A. The actual amount of excavation in the two above referred to buildings, is 6,740 cubic yards, or over ten times as much as that allowed by Mr. Edgerton in his testimony.

Q. And at what price do you figure deep excavation including carting and dumping in the City of New York?

A. Excavation in ground of this character, where there is a large quantity of water to be encountered, is exceedingly slow, and is worth two dollars a cubic yard.

6579 Q. Therefore, the total cost of excavation for these two buildings, would equal how much as compared with Mr. Edgerton's estimate of $621?

A. $13,480.

Q. In that estimate has any allowance been made for sheet piling and pumping?

A. None whatever, but it should have been made, such item is absolutely indispensable in excavating in ground of that character.

Q. Is sheet piling and pumping included in that amount of $13,480?

A. No, sir, that is an extra item. That $13,480 is for the excavation alone.

Q. Now, what would be the total value of the sheet piling and pumping in addition to the $13,480?

A. The sheet piling for these two buildings cost $3,360, whereas the item of pumping cost $5,750. That last item of course includes boiler, fuel, the water, the salaries of the engineers and coal, etc.

Q. Well, then, the expenditure, if I aggregate these correctly for these foundations should be $22,620 as against Mr. Edgerton's allowance of $620?

A. Yes.

Q. So there is a difference of $22,000 about?

A. Yes.

Q. Now, have any allowances been made by Mr. Edgerton for the solid concrete and brick foundations which are under the water gas apparatus as shown in the sketch of the foundations which you have prepared?

A. There has not been.

Q. From what were these sketches drawn; what kind of drawings are these sketches which you have prepared?

A. From the drawings in existence at the works, which I understand were used in building these foundations; that is the old generator house showed piles and solid brick foundations, which 6580 formed the foundation of the original benches, the retort benches. The concrete foundation I think under the water gas apparatus was not piled.

Q. Now, generally speaking, without going into great detail, have you compared Mr. Edgerton's estimates upon various factors of cost with the actual cost of construction as known to you in New York for these particular factors?

Mr. Burr: I think that was all gone into.

Mr. Mathewson: It is simply a general question which is introductory to something else. It could not have been gone into, any comparison, because he has not been on the stand since Mr. Edgerton was on the stand.

Mr. Burr: He gave his general reasons.

Mr. Mathewson: This is something different.

The Witness: I have.

Q. Now, suppose you take one building and make some comparisons, what building would you select?

A. For instance, the building which we have only completed a short while ago at the new plant of the Astoria works, the inclined retort house.

Q. How did you find that the unit of cost which you have employed in computing the value of buildings compares with the actual unit of cost of that building?

A. The cost of that building?

Q. Is your unit of cost more or less than the actual unit of cost in that case?

A. It requires a little explanation.

Q. Well.

A. In this instance the building is higher, and therefore the relative cost of the foundation floor area as well as the roof construction would be the same, also the volume is increased on ac- 6581 count of greater heights, therefore the unit of value of such building should be considerably less.

Q. On your schedule?

A. Yes, the unit of value computed as it is is very little less.

Q. Now, take the 111th street exhauster house to which he referred, Mr. Edgerton, in his estimate has put brick at $14 per thousand laid What is the actual cost?

A. $25 a thousand.

Q. He has stated stone footings, estimated at 90 cents per cubic foot. What is the actual cost per cubic foot?

A. The actual cost is $1.40 per cubic foot.

Q. He has estimated flooring at $40 per thousand feet board measure. What have you to say as to that?

A. The cost of the material alone is $42 without any labor attached.

Q. And what would be the total cost per thousand feet including labor?

A. If it was double flooring the cost would be $82 per thousand feet laid.

Q. What is the cost of labor per thousand feet for single flooring and double flooring?

A. About $20 per thousand feet board measure.

Q. Single or double?

A. Single.

Q. And $40 for double?

A. Yes.

Q. He has estimated yellow pine girders at $40 per thousand feet board measure. What do you say as to that?

A. The actual cost of the material would hardly be covered by that estimate without any labor. I have quotations for the same kind of lumber at present at $45 per thousand feet.

Q. Now, he has inserted steel checkered floor plates at 5 cents a pound, does that cover the cost of such floor plates?

A. The material cost alone at present is 3½ cents per pound, and the cost of labor to lay the plates including the fitting and cutting is 1¾ cents per pound, making a total actual cost without
6582 any profit to the contractor of 5¼ cents per pound.

Q. That includes all waste that may arise in cutting?

A. Any waste in fitting and cutting.

Q. Did you find that Mr. Edgerton has allowed anything for excavation for this building?

A. No, I believe that Mr. Edgerton omitted the entire item of excavation for this building.

By Mr. KIRBY:

Q. What building are you now referring to?

Mr. MATHEWSON: This same building, 111th Street.

By Mr. MATHEWSON:

Q. Now in the same estimates Mr. Edgerton has allowed cost of 50 cents per cubic yard in the instance of the 132nd Street governor and boiler house and in another instance he has applied the figure of $1.00 per cubic yard. What is the average cost for deep excavation of this character, as required in such buildings?

A. Not less than $1.25 including the cost of disposing of the earth, the dumping privileges, etc.

Q. Do you find in any of Mr. Edgerton's estimates that he has made an allowance for the contractor's expenses, for his office force, draftsmen, scaffolding, shop, wear and tear on tools and appliances, etc.?

A. He has not.

Q. What percentage of the value of the cost of work of this kind in your experience in this character of building should be allowed for these items?

A. It would not come less than 10% on the actual cost of the work.

Q. Now, Dr. Marks in substantially all cases has assumed your

cost of apparatuses and holders to be correct, but in some few
6583 instances he differs with you, and with Mr. Edgerton he
differs in many instances. Now, taking up Mr. Edgerton's statement as to holders, do you find that he has submitted any detailed estimates as to the cost of holders including guide frames?

A. He has not.

Q. At page 5347 he states that one-third of the cost of the holder is an ample allowance for the cost of the guide frame. What have you to say as to that proposition, Mr. Mayer?

A. I can only say that such estimate is absolutely erroneous. Some 25 to 30 years ago it was the intention to have the various gas holders uniform in their construction, and at that time they endeavored to use a column in the guide frame for every ten feet in diameter of the holder, but such were only endeavors and could never be carried out with any kind of certainty. For instance a holder 60 feet in diameter would have 6 columns, one 70 feet would have 7 columns, one 80 feet 8 columns, etc. Now there were no holders built at that time with an uneven number of columns in the guide frame. Why that was so I cannot explain, but nevertheless it was the fact, and in the very instance of the Consolidated works a glaring example of this kind exists which will prove positively that Mr. Edgerton's assumption that the guide frame of the holder amounts to one-third the cost of the holder is impossible. For instance, the four holders at the 21st Street station of 400,000 feet capacity are constructed in three lifts with an outer section of 88 feet in diameter. These holders have 16 cast iron columns in the guide frame. At the same station there are six holders each of
345,500 cubic feet capacity constructed in two lifts, the outer
6584 section of these holders is 95 feet in diameter. These holders
have guide frames consisting of only eight cast iron columns.

Q. The diameter is greater, but the number of columns is only half as many?

A. The diameter is greater, but the number of columns is only half as many. The two holders of 250,000 cubic feet capacity at the same station are constructed in two lifts with 84 feet in diameter, and the guide frame only contains six columns, so that it will be seen that the maximum variation in the diameters of the different holders as between 84 and 95 is only 11 feet, whereas the variation in the number of columns amounts to over 100 per cent., and such difference excludes all possibility of applying a general rule which assumes that the cost of the guide frame to the holder is one-third of the cost of the holder itself.

Q. Now, if the valuation of the various holders (including guide frames) by Mr. Edgerton is based on the assumption of such proportionate values between the guide frames and the holders, would that be sufficient to account for the entire difference between Mr. Edgerton's and your own valuation as to the value of the holders?

A. No, I think it would account for a great deal more than that.

Q. And is the same true of the other cases in which differences of values exist where such a general rule has been applied by Mr. Edgerton?

A. It is so.

Q. Now, what were your values on holders and apparatuses, with which Mr. Edgerton disagrees, based on?

A. My valuations for holders and apparatuses are all based on actual detailed estimates. Of course it was impossible for me to make any such detailed estimates in the time at my disposal, 6585 during my examination of the plants, but as I had access to all the detailed estimates of the firm of Bartlett, Hayward & Co., with which I was formerly connected, and which estimates are an accumulation of over 25 years, made partly by myself or under my personal direction, I was thoroughly familiar with applying them to the apparatuses in question at the works of the Consolidated Gas Company.

Q. Now, in giving your estimates of the value of holders, for instance, did you ever make or did you have before you detailed estimates in each case showing the actual cost of such holders or of holders of the same character which you could change as might be required for existing conditions of material or labor?

A. Yes, I had the actual detailed estimates of weight, to which I applied the prices under New York conditions as they existed last summer.

Q. Now, do you mean merely estimated weights or actual shipping weights?

A. I had both.

Q. W-ere Bartlett, Hayward Co., for instance, installed any part of the holders or installed a holder of the same kind, did they keep a record of the actual weight of the holder?

A. Absolutely a record of the actual cost.

Q. Were holders ever erected by you or under your personal supervision?

A. They were all constructed under my personal supervision.

Q. And did you have access to all this in making up your estimates?

A. I did.

Mr. Kirby: I submit, Mr. Master, this is not proper rebuttal. I object to this line of questioning to these details upon which Mr. Mayer based his conclusion as set down in his direct testimony 6586 unless an opportunity be given to Mr. Edgerton to go upon the stand and show his details.

Mr. Mathewson: I don't propose to put in evidence these details as to each holder and piece of apparatus; I am merely now calling the attention of the court to the method by which this witness reached his estimate to rebut the defendant's assumption that his estimates are incorrect.

Mr. Kirby: If it were to be brought out in this case it should have been brought out on his direct-examination, it seems to me.

Mr. Burr: It seems to me that it is quite apparent that this testimony should have been given in the direct testimony and if it is intended as a statement now it seems there was no information as to the sizes, the actual weights or the cost of holders, it was not furnished to me, and it should have been, in justice to us, we should have had the foundation, and the basis of his figures and in the valuation of these buildings, then we would have had a proper opportunity to have criticized or gone in detail into the merits of these figures.

The MASTER: Why wasn't it done. Why didn't you bring that out on cross-examination? It might be a serious question as to whether if Mr. Mathewson had chosen to bring out these facts on the direct-examination of his witness, his own expert whether you might not have objected to it on the ground that the reasons for his opinion as an expert are not properly brought out as a part of his direct-examination. Now, if Mr. Mathewson didn't bring that out on direct and you didn't bring that out on your cross, and it 6587 comes up that the witness' method of valuation is not attacked by your witnesses why can't he show generally the care which he took, or the methods he followed in arriving at his results. I quite agree with you that it is not at all proper to put in evidence any of these materials that he used, these detail drawings, etc., these specifications, etc., I don't understand that Mr. Mathewson is offering them.

Mr. BURR: I understand the only object in referring to them is to confirm the correctness of the valuations he gave before, since his last appearance here. He has testified as to the values he has given, that he made detailed estimates, consulted drawings which were made at the time in some cases, all of which seems to me is not proper rebuttal, unless we have the opportunity to go into it very fully.

Mr. KIRBY: His method has not been attacked, his conclusions have not been attacked.

The MASTER: I will allow this line of testimony in so far as it is broad and general, but not in detail. I think you are right about that. It is a very close question anyway as to what is proper.

Mr. KIRBY: I except.

Mr. BURR: I except.

Q. What proportion of the detailed apparatus would you say Mr. Mayer, in your valuation consists of apparatus upon which you computed the weights, and respecting which you had exact weights or procured exact weights one way or another as distinguished 6588 from the stock items like boilers and things of that sort which are built by special builders and not particularly by Bartlett, Hayward & Company?

A. Well, all apparatus at the plant as compared with the other items for which I was compelled to obtain prices from the manufacturer which manufactured such articles, would cover probably not less than 96 to 97 per cent. of the cost of the apparatus or plant.

Q. And where Mr. Edgerton differs from your weights are your weights of apparatus estimated or asumed, or are they the actual result of your knowledge and your experience?

A. The actual result of knowledge based upon my own experience.

Q. As to the three or four per cent. consisting of boilers, etc., have you bought and installed boilers from time to time?

A. Many of them.

Q. In your estimates which have been attacked by Mr. Edgerton, in regard to these items, did you in addition to your own knowledge make any inquiry at the time of the manufacturers as to the prices at which the boilers could be installed?

A. I so stated that in my testimony.

Q. As an illustration, Mr. Mayer, have you here a sheet showing the detail in which it is necessary to go, and into which Mr. Edgerton did not go, to make an exact estimate of the cost of a gas holder?

A. I have.

Q. This estimate is a hypothetical holder of the type of the 132nd Street holder, five million cubic feet——

A. It is of the same dimensions, but slightly less in pressure I think.

Q. Now, does this detail which I hold in my hand show the detail into which it is necessary to go to give an exact estimate of the holder?

A. Yes.

6589 Q. In making an estimate of the value of these different apparatuses how do you proceed as compared to the way in which you would proceed to make a bid for furnishing such apparatuses?

A. Identically in the same manner.

Mr. Mathewson: I offer this paper in evidence as an illustration of the detail into which the witness says it is necessary to go to get the actual value of a holder. This is not an estimate of the 132nd Street holder, but illustrative of what it is necessary to do to get the exact value of the holder, but Mr. Edgerton stated on the stand that he did not do that.

Mr. Kirby: What Mr. Edgerton stated on the stand is in the testimony.

Mr. Burr: Isn't this merely a bill of material?

Mr. Mathewson: This is an estimate in detail of the weights to which in figures the price for material and cost of labor have to be applied to suit conditions at the time each piece of work is installed, the actual price.

Mr. Burr: This simply shows the material used in the holder?

A. Yes. Shows the weights of material and each class of material.

By the Master:

Q. Is there anything in this paper which differentiates the cost of the guide frame from the cost of the holder?

A. Yes.

Q. Can you pick it out?

A. Yes, sir (witness exhibits same to Master).

6590 By Mr. Mathewson:

Q. I ask you at this point whether it is possible to make an exact estimate of the cost of a holder or other piece of apparatus constituting these other 96% to which you have referred without going into a detailed estimate of the same general character as you have presented here and which you have shown to the Master

A. I consider it absolutely impossible. All the factors have to be based on the weight, and such factors cannot be determined unless the weight is known.

By Mr. Burr:

Q. Where did you get the weights which appear in this hypothetical holder?

A. From the former estimates for a holder of those exact dimensions.

Q. That was not open to Mr. Edgerton for his inspection, was it?

A. Oh, no.

Mr. Mathewson: It would have been if you had cross-examined him on the subject and brought it out.

Q. Have you that estimate now?

A. Here it is.

Mr. Burr: If you remember, Mr. Master, you will recall that we called on the other side for the particulars of the construction of these holders and never could get them. Now, it is not fair that at this last moment that they should present here an estimate of the cost of the construction of these holders without giving us a chance to go into the whole subject.

Mr. Mathewson: You mistake, Mr. Burr, I am not offering any such thing. Unless I am mistaken your witness testified that
6591 he didn't make such detailed estimate of such apparatus. Mr.
Mayer testified it is not possible except from such detailed estimate to make an estimate of the values. Then he says what sort of an estimate it is necessary to make. It is perfectly obvious. Your witnesses never could go into the details in the time at their disposal. Even if they attempted to they could not. I am not not going to put in the estimates of these various holders.

Mr. Kirby: Such details as our witnesses went into have not been spread upon the record. They should be spread upon the record, as I stated before. There are reams of it.

The Master: Don't discuss it. If you object I will rule upon it.

Mr. Burr: I object to that as incompetent and immaterial and not proper rebuttal.

The Master: I don't see that it is proper rebuttal, except in so far that Mr. Edgerton may have given general testimony about the methods to be followed in getting at the cost of holders; and I don't see any such general testimony here except in that single case of the cost of the guide frames, and that, I understand, you have already covered. This table which you have here covers a great deal more than that guide frame question. Mr. Edgerton did say here that one-third of the cost of the sheel was considered an ample allowance for the guide frame. That of course is the sort of thing you are entitled to meet on rebuttal; but I think most of this goes further than that. It simply goes to show that the methods adopted by your witnesses was better and more accurate than the method 6592 adopted by the other witnesses.

Mr. MATHEWSON: Where our method is criticised am I not entitled to meet such criticism?

The MASTER: I don't find that he specifically attacked Mr. Mayer's method.

By Mr. MATHEWSON:

Q. Have you examined Mr. Mayer's testimony as to the manner in which he found the valuation?

A. Yes.

Mr. MATHEWSON: Then may I have this marked in for identification, and then tomorrow morning I will renew the offer. I think I can show the Master then the testimony which rendered it admissible.

The MASTER: I think so much of that as goes into this question of allowance for guide frame is proper, but there is so much else in it, I have very serious doubt about it.

Marked for identification, "Complainant's Exhibit 374, January 30, 1907, E. C. Jr., steno."

Mr. BURR: I say in reference to the testimony of Dr. Marks in connection with holders he has practically accepted the figures of Mr. Mayer as being correct, he differs with him, however, in the depreciation principal.

Mr. MATHEWSON: In reference to the detailed estimate of a holder of the character of the 132nd Street holder, such detail figuring would consume a good many pages according to the exhibit "For Identification 374." I will withdraw that last question, on which the main question is based. It may be rendered unnecessary.

6593 Q. My question, Mr. Mayer is, whether in reference to other items of apparatus, excluding the stock items like boilers, etc., you consider it necessary to get an exact estimate, to go into a like detailed computation?

A. It is even more so with the other apparatus than in the instance of holders.

Q. Mr. Edgerton spoke of double-riveted covers for purifiers as something unique or different. What is the fact?

A. Well, all large purifier covers must necessarily be double-riveted on account of the interior strain.

Q. How about the New Astoria?

A. Are all double-riveted, and could not be otherwise.

Q. In the case of smaller holders do you consider it better or poorer construction?

A. It is better, but not necessary.

Q. Mr. Edgerton spoke of the 14th Street as a dilapidated old plant. You examined the plant, did you not?

A. I did.

Q. What have you to say as to that suggestion of Mr. Edgerton's?

A. I find that the plant has been operated and is being operated to the full capacity and at economical rates, therefore it could not be dilapidated.

Q. Now, Mr. Logan in his testimony stated that in many cases his values were higher than yours, and in other cases substantially the same, and in some cases it was below your valuation, do you find his difference was due to the difference in the weights which were assumed for the apparatuses or due to other reasons?

A. That is the only reason I can assume, that his weights differ from mine.

Q. Well, you observed in his testimony that he was assuming the weights which he employed in such cases?

A. Yes, I remember that.

6594 Q. And assuming the weights that you actually found, and his unit figures, how would his values then compare with yours?

A. Would be the same about, excepting——

Q. Now, without going into details as to each structure do you find that Mr. Edgerton in his estimates generally as to the value of similar factors of cost to those to which I have called your attention, I mean by similar factors the cost of board, the cost of excavation, the cost of brick laying, etc.—in other words has he made the same errors and omissions generally throughout, or are those individual instances?

A. No, the same errors and omissions are made throughout, but they vary in some instances. They are not always the same in each estimate.

Q. Do you consider these errors fundamental, or are they merely of slight account?

A. No, they are errors which would absolutely give a wrong impression concerning the value of such buildings and construction.

Q. What then do you say general-y concerning his estimates of value of buildings, and apparatuses wherever they fall below your figures?

A. I can only say that these estimates have not been made upon any knowledge of expenses and conditions as they exist in New York, and therefore I cannot accept them as being fair valuations.

Q. As to pipe connections Mr. Edgerton suggested that a new plant could be constructed with fewer pipe connections than those called for in your valuations. Even if you constructed a plant with the connection which Mr. Edgerton suggested, could in your judgment, the connections for such plants as the Consolidated possesses be constructed on his theories on the figures he gives?

A. No, sir, or nothing like it.

Q. Is it a fact that modern plants as they are constructed contain single pipe system connections?

6595 A. All modern plants contain at least a double system, and in some instances like in the New Astoria we have four lines of pipes from the retort house to the condenser house to act as condensing mains to assist atmospheric condensation.

Q. Between the retort house and the condenser house?

A. Yes.

Q. Now, if old mains had been maintained in the plants of the Consolidated Gas Company, as the connections had additional lines laid, would that indicate any antiquated or out-of-date or improper construction?

A. I doubt that additions to existing plants could be made when the plant is to be kept in operation without simply adding to the existing mains and making the existing mains a part of the reconstructed plant.

Q. Now, so far as you have observed, what about the connections, were they in use or not?

A. As far as I was able to ascertain and as far as I was able to see they were all in use.

Q. Where you have several lines of connections would it in your judgment be wise or economical to throw out these smaller connections in order to put in new and larger ones?

Mr. Burr: I object to that. I think it is opening the door——

Mr. Mathewson: Mr. Edgerton criticized the connections and cut them from 21,000 down to 12,000 each.

The Master: Objection overruled.

Mr. Burr: I except.

Mr. Kirby: I except.

The Witness: No, it would not be wise for the reason that you would be compelled to shut down the plant.

6596 Q. What would you do, add additional connections, and keep what you had?

A. There is no other way of adding to a plant that has to be kept in operation, as I have said.

Q. In reference to these items of holders, etc., which you have valued how many of them did you see personally?

A. I saw them all.

Q. Now, as to your estimate of the cost of labor in the city of New York did you act on hearsay, or from actual experience and knowledge.

Mr. Burr: One moment. I think this is direct-examination. You have examined him and re-examined him as to the basis on which he fixed the cost of labor.

Mr. Mathewson: Mr. Edgerton has testified he got information from these sources and other sources and asked Tom, Dick and Harry, and I ask this witness whether his conclusion is based on estimate and hearsay or else on experience and knowledge.

The Master: I don't think it is rebuttal.

Q. In addition to your examination of the plant of the Consolidated at this time for the purpose of an appraisal, have you had any knowledge of the facts?

Mr. Burr: I object to that as already testified to.

The Master: Objection sustained.

Mr. Mathewson: I except.

Q. Do you find that even as it was and at the time then at your disposal you included all the buildings and apparatus of the company——

6597 Mr. KIRBY: I object to that.

Q. ——in your estimate of valuation.

Mr. BURR: Same objection.
Objection overruled. Exception.
The WITNESS: I did, with the exception of two buildings, one was the so-called Avenue A shop at the 21st Street works, and the other one was the 66th Street shop.
Mr. MATHEWSON: I am not going to ask this witness these valuations, but to indicate the fact merely that in the estimate he did not include them.

Q. Now, Mr. Mayer, the witnesses for the defence in some instances referred to various pieces of apparatus, as for instance scrubbers, as scrubbers are used, ordinarily used, is it a fact that all scrubbers are made by the same concern or in the same way when they deal with the same capacity?
A. No, not at all, it depends entirely upon the different construction of the various firms.
Q. Is it possible taking any piece of apparatus of that character to compute its value without knowing the exact weight or measuring the exact weight?
A. No, as I stated before, you cannot.
—. Now, you have given a certain valuation of the plant new as something over sixteen million dollars, and you have given the valuation of a plant taking out your depreciation *in toto* at something over $15,500,000, as I recollect——
A. It is something like that.
Q. Upon what theory did you compute the depreciation?

Mr. BURR: He has already testified as to that.
6598 Mr. MATHEWSON: Wait a minute, let us see whether he has or not.
Mr. KIRBY: If he has not, he cannot do so now.
Mr. BURR: Point out just exactly where he did testify to that.
Mr. MATHEWSON: Have you any objection to it?
Mr. KIRBY: I have.
Mr. BURR: I object to it on the ground that it has already been testified to, the method of arriving at his depreciation, and the method by which he arrived at the cost of engineering.

Q. Referring to the depreciation computations of Dr. Marks and Mr. Edgerton and your knowledge of the plant, I will ask you whether or not in your judgment for the difference between your valuations given to-day, to which I have referred, and the valuations as depreciated, to which I have referred, the plants could be put in condition as good as new?
A. In my valuation, you mean?
Q. Yes.
A. Yes, they can.

Q. In your experience is it easy to judge the depreciation of a building from appearances, simply outside appearances?

A. Unless such judgment of depreciation is performed by a man experienced in the detail of the estimated cost of repairs I should say that he would be unable to judge depreciation by appearances.

Q. Isn't it a fact that frequently a very small expenditure for pointing up and other items relating to outside appearance makes a building as good as new?

A. It is very often the fact.

Q. Have you ever estimated for repairs and alterations in bringing apparatus up to efficient working order?

6599 Mr. **Burr**: I make the same objection. It is incompetent, immaterial and not rebuttal.

The **Master**: That is good, Mr. Mathewson.

Mr **Mathewson**: It seems to me that is proper. He said that the difference between his view and depreciated value would make the plant as good as new.

The **Master**: The question is objected to and I think here it is clearly objectionable. I will allow you to ask him merely as to Dr. Marks and Mr. Edgerton's method of arriving at values, and let him point out their defects.

Q. How long have you been estimating for repairs and alterations in gas apparatuses?

Mr. **Kirby**: I object to that.

Mr. **Mathewson**: Why?

Mr. **Kirby**: If it was not brought out before, it should not be brought out now.

The **Master**: Objection sustained.

Mr. **Mathewson**: I ask for the answer.

A. Over 25 years.

Q. Now, did you observe that Mr. Edgerton's depreciation for both the old and new U. G. I. stations, which had been many years in operation as 10%?

A. I did.

Q. What do you observe for his depreciation at 132nd Street as compared with other holders?

A. Where the holder is entirely new, as I remember it the depreciation is marked at 5%. Then there was a holder at I think 63rd Street which I constructed in 1889 or 1888, I have forgotten which, at any rate it is seventeen or eighteen years old, and the depreciation is the same 5%. 6600

Q. Now, did you hear the testimony of Mr. Edgerton and Mr. Marks, or have you read it as to the time which was devoted by them to the examination of these plants?

A. I have.

Q. I will ask you whether in your judgment it is possible in an examination of that length to go into the details of construction or make such an examination as to give even an approximately exact cost of such a plant?

A. I know that I should not be able myself within that time to give even a rough guess, it would be absolutely impossible.

Q. Have you made a computation as to the number of hours that you and your assistants put in in examining these plants for the purpose of your testimony and estimate originally?

Mr. Burr: I object to that as already in the testimony.

A. I have.

Q. How many?

A. My own time and that which my assistants actually spent at the various works was 3780 hours.

Q. And were your assistants men familiar or unfamiliar with gas apparatuses?

A. They were all draughtsmen and engineers, picked for that particular purpose, they had been working with me for years and they were familiar with all the details of construction. Without such men I could not have accomplished it even in that time.

Q. Could you have accomplished in that time with these men that result, if you had not had the benefit of the estimates and drawings which had been placed at your disposal?

6601 A. It would have been impossible even in that time It could not have been done within 12 months with more men if I had not had these estimates and drawings at my disposal.

Q. Did you compute from the testimony the number of hours occupied by Mr. Edgerton and Dr. Marks?

A. I have.

Q. Well, how many hours, about?

A. Dr. Marks has been 84 hours at the works and Mr. Edgerton 50 hours.

Mr. Mathewson: That is all except that I will call the Master's attention to-morrow to this Exhibit 374 for identification. I reserve that right.

Cross-examination by Mr. Kirby:

Q. What did you take into account, Mr. Mayer, when you computed the numbers of hours that Mr. Edgerton put in in making his appraisal of these plants?

A. His testimony as he gave it when I was sitting over there.

Q. The times spent at the plant?

A. Yes.

Q. Anything else?

A. No. You could not examine apparatus any other place except at the plant.

Q. Did you consider the time of any one who was assisting him?

A. Only his own time.

Q. In your total of 3,780 hours do you include anybody's time but your own?

A. That of my assistants.

Q. You do not include Mr. Edgerton's assistants?

A. I don't know that he had any.

Q. Or of Dr. Marks' assistants?

A. I didn't know that he had any.

6602 Q. I presume in figuring depreciation the conditions as well as the age of the apparatuses has much to do with the factor employed, does it not?

A. The condition has, the age has not——

Q. Well, it might well be a new U. G. I. apparatus of 1906 and an old one of 1884 would have the same depreciation factor, would it not?

A. No, it would not.

Q. If age has nothing to do with the appearance, or rather conditions as observed, how do you come to the conclusion that there might not be the same depreciation?

A. Because in every instance the apparatuses are kept up to their full working and operating condition.

Q. Then you assume that——

A. I know it, because if it was not the case it could not be operated.

Q. You assume it from your knowledge of these apparatuses?

A. Yes, I know from my observations of these apparatuses.

Q. All these U. G. I. apparatuses are in use from day to day?

A. Yes, sir.

Q. And in use the fire brick and such portions as are subject to heat are depreciated, are they not?

A. Yes.

Q. And being new lined to-day they would be more valuable than a week from to-day, would they not?

A. Well, there would probably be a slight deterioration, yes, which would be wiped out the next time they were repaired.

Q. But needing repair at any time before those repairs are made they have less values than at a period immediately after the repairs have been made, have they not?

A. At that immediate moment, yes.

Q. Such is also true of holders, is it not? Do holders ever need repairs?

6603 A. Very seldom, only such holders as are defective in construction. I don't know that we ever repaired a holder we constructed ourselves.

Q. Do they last forever?

A. I don't know how long they last.

Q. Isn't it a fact that sometimes the tops rust out or become so defective that new plates have to be put in, or repairs made in some way?

A. Not if the gas is properly purified or the painting on the outside properly taken care of.

Q. Are all holders properly painted, and is all gas properly purified so that it will not in any way affect the material of which the holder is made?

A. It is for the Consolidated Gas Company in New York.

Q Have you examined the holders at 65th Street?

A. Yes, sir.

Q. Are you not aware that on the side of these holders paint for a space of yards or more at various places has come off?

A. Not at the time I examined it, no.

Q. Paint does peel off from holders from time to time, does it not?

A. When there is bad paint used or bad water in the tank, yes, sir.

Q. Did you consider that the holders at 14th Street at the time you examined them were properly painted?

A. They were.

Q. Needed no painting of any kind?

A. No.

Q. Where did you get your information from in reference to Mr. Edgerton assuming that the cost of the frame was one-third that of the holder?

A. From his testimony.

Q. Did you notice how many holders out of all these he proceeded to use such an estimate for?

A. How many what?

Q. How many holders out of all these did he proceed to use such an estimate for?

6604 A. He didn't give any detailed estimate of the holders, therefore I assume he assumed the same estimate for all of them.

Q. Now, I refer you to Mr. Edgerton's testimony at pages 5346 and 5347, to the question at the top of page 5347: "Q. Did you measure those guide frames and compute their value? A. I did. Q. And computed their weight? A. Yes, sir. Q. Now let us have the details of that computation? A. Haven't anything more here than 164,700 at four cents, cast iron girders 16,150 pounds and guide rails 960 pounds."

Q. Did you read that part of Mr. Edgerton's testimony?

A. I did.

Q. And did you consider that in estimating the value of the guide frame, did you consider that one-third?

A. No, I considered nothing except that he did not give enough information——

Q. I understand you to say that Mr. Edgerton in all expenses going to his cost as to all guide frames of holders estimated that the guide frame was a third of the holders.

A. I assume he did, because he did not——

Q. That was because of the fact that on examination he did not go into the details used in giving the valuation that you assumed he took one-third of the cost of the holders as the cost of the guide frames?

A. No, because he could not have measured his guide frame any other way.

Q. Do you know how many times Mr. Edgerton went to these different stations and examined these guide frames?

A. It would take him not less than three days with one man to measure each guide frame in one holder.

Q. Would Mr. Edgerton have to measure each member of that guide frame?

A. He would.

6605 Q. He could not take one section, measure the members of that section and assume the rest were the same?

A. Yes, if he went on that section of the holder from the top to the bottom, but they vary.

Q. But if he measured the sizes from top to bottom wouldn't it be possible for him to come to a conclusion as to the value of such guide frames?

A. It would not have been possible for him to have measured them in the time at his disposal.

Q. Then your answers depend upon what you consider impossible for Mr. Edgerton to have done in the time at his disposal, in the way of making measurements which would have enabled him to make an appraisal?

A. No assumption about it. I know from my own experience he couldn't have done it.

Q. Assume that Mr. Edgerton measured the lowest of the three members of this guide frame, for the sake of getting the weight of frame, and gave them the benefit of the doubt and used that weight to the top, would he be giving a value that would be too great or too small, or a weight which would be too great or too small?

A. Well, if he assumed the bottom member of the guide frame to constitute the entire guide frame and provided his calculations were correct and he would not increase the error 12 or 24 or 16 times or as many panels as there are in the guide frame, but if he should make an error in that instance he would simply have that error 24 times, if there were 24 panels.

Q. Now, the error would be in the direction of making the guide frame too heavy?

A. Not at all, it might be just in the other direction.

Q. Aren't they heavier as you come near the ground?

A. If his estimate is correct——

Q. Then your whole testimony here is that Mr. Edgerton in the time at his disposal could not make an examination of the plant and make measurements, but if he did make measurements they were not correct measurements?

A. I know they were not correct as far as he did give them.

6606 Q. From such weights as you have been able to get from the testimony?

A. Yes, they are not correct.

Q. Have you looked at his weight of the guide frame for the 65th Street——

A. I don't recall it just now. I was attempting to give the testimony——

Q. Having done so at that time did you not come to the conclusion that the weight which he gave there was enough higher than that which the guide frame actually is——

A. I cannot recall that until I go over the testimony.

Q. Now, in your measurement of the dimensions of the members of this guide frame did you, as Mr. Edgerton did, take callipers and rules and micrometers and use such precautions to see that you got the right and proper dimensions of the guide frame?

A. If I had done that I would have made the same errors that Mr. Edgerton made. I have built most of these and know——

Q. Then it is impossible to go to a guide frame and make measurements and find out the size of the material that enters therein?

A. No, it is not impossible to do it, but you have to climb up in the air about 250 feet to do it, and it takes considerable time to do it.

Q. Have you consulted the employees of the Consolidated Gas Company to find out whether Mr. Edgerton did not climb up some 250 feet in the air to make these measurements?

A. It was not necessary to do so. I know he did not.

Q. Do you know whether he did or not?

A. No.

Q. Do you know how many times it is necessary to climb up 250 feet to make these measurements?

A. No. But no man can do it in fifty hours.

Adjourned at 5.45 P. M., to Thursday, January 31st at 11 A. M.

Last Exhibits:

Complainant's, 374.
Other exhibits same as last hearing.

6607 Circuit Court of the United States, Southern District of New York.

CONSOLIDATED GAS COMPANY OF NEW YORK, Complainant,
vs.
JULIUS M. MAYER, as Attorney General of the State of New York; WILLIAM TRAVERS JEROME, as District Attorney of New York County; FREDERICK E. GUNNISON, JOHN C. DAVIES and LUCIAN L. SHEDDEN, Constituting the New York State Commission of Gas and Electricity, and THE CITY OF NEW YORK, Defendants.

Before Arthur H. Masten, Special Master.

NEW YORK, *January* 31, 1907—11.00 a. m.

Met pursuant to adjournment.
Present: The Master, Mr. Mathewson, Mr. Kirby, Mr. Burr.

6608 Mr. BURR: I think I might occupy some time in straightening out the matter of the real estate, which has got to be done before we close this case or else I will withdraw the stipulation which I entered into with you.

Mr. MATHEWSON: What do you mean? I don't know what you are talking about.

Mr. BURR: I will tell you. That is the reason I will avail myself of this lull to tell you.

Mr. MATHEWSON: I don't know of any stipulation that I have violated, or that I am prepared to cancel.

Mr. BURR: Our time is becoming very limited and I cannot afford to lose a moment. You remember some time ago, Mr. Master, I called your attention to the stipulation which Mr. Mathewson evidently intended to enter into that was made waiving the technical objection to the grants and the maps, but it appears in the record it simply refers to the grants. When we afterwards sought to have that corrected by including the stipulation as to maps, certain conditions were exacted from us with which we cannot comply. Now, I will call your attention to exactly what happened in that regard. On page 4277 of the record, on the introduction of City's Exhibit 76, Mr. Mathewson used the following language: "I object to it as not proven." This objection was overruled and exceptions taken (p. 4278). Similar objections were made to Exhibits 77, 78, 79 and 80. On page 4282, Mr. Master, on this subject the following discussion took place:

"Mr. MATHEWSON: There is no question but what these water rights were substantially vested in the Consolidated Gas Company."

6609 Mr. MATHEWSON: That word "substantially" should be subsequently.

Mr. BURR: Yes, subsequently. I won't read all. That is on page 4284, but it is manifest that the intention was to have this stipulation cover objections made to the maps as well as to the grants. It seems to me we are entitled to this correction and in the event of its refusal we desire to withdraw our stipulation and require the gas company to prove the *mean* conveyances.

Mr. MATHEWSON: What are you referring to?

Mr. BURR· Simply that without the word "maps" here we would have to prove all these maps. We made a concession with regard to them and in consideration of that you consented we should not be put to the trouble of proving the maps and the grants, but the word "maps" was left out.

Mr. MATHEWSON: I remember generally that records were presented and that there was objection to them as not proven, as to execution or something of that sort, and that we withdrew the objection.

Mr. BURR: We entered into a stipulation with you.

Mr. MATHEWSON: Well, whatever it was it appears on the record.

Mr. BURR: It was an inadvertence that the word "maps" was left out of our stipulation.

The MASTER: Well, the maps were admitted, Mr. Burr.

Mr. MATHEWSON: Of course, any concession we made and any concession you made in that regard was for the purpose of this suit only.

Mr. BURR: If I recall, some days ago it was said "if you submit a stipulation it will be all right," and I submitted one but there seems to be come hitch. I wish you would take it up yourself.

6610 The MASTER: The maps were admitted and it appears that the man was here ready to prove them and I admitted them understanding that he was the proper custodian of the maps and the man would be called later, so as not to interrupt the witness on the stand at that time. Mr. Mathewson apparently having insisted on having him called, but he was not called, and I should think your rights are protected.

Mr. **Burr**: I do no- say Mr. Mathewson is changing any stipulation that he meant to enter into at the time, but in the office of the attorneys for the complainant they evidently do not understand it as well as Mr. Mathewson does.

Mr. **Mathewson**: I assume some stipulation as to inserting the word "maps" between Mr. Burr's office and the office of Sherman & Sterling has been taken up, with which I am not familiar.

The **Master**: You will find that the record shows that Mr. Hatton was going away. Mr. Hatton, who was the man who brought the maps, was going to prove the custody of them and the office they came from and he was relieved from attendance. That apparently is a waiver of any objection.

Mr. **Burr**: Well, I didn't know. Because of the attitude of Sherman & Sterling I assumed that there was some legal objection.

I think it is proper to note that we have not as yet received the transcript of the testimony taken yesterday, and it is by a great effort that we are able to proceed at all to cross-examination upon the great mass of rebuttal testimony which has been put in so quickly.

6611 Mr. **Kirby**: Not only that, but yesterday's exhibits, numbers 370, 371, 372 and 373 have not as yet been received although they were promised.

Mr. **Mathewson**: The delay is not attributable to us. I gave them to Mr. Carroll last night and he was to deliver them by half past nine this morning.

Mr. **Kirby**: We are not blaming anybody; but simply stating the fact.

Frederick Mayer resumes the stand and further testifies:

Cross-examination continued by Mr. **Kirby**:

Q. I understood you to say yesterday that you figured on the cost of labor and material for over 95% of the apparatus you appraised in arriving at its value?

A. I did.

Q. How did you arrive at your values for the water gas apparatus?

A. I obtained those from the proposals from the United Gas & Improvement Company.

Q. I other words you obtained bids from them?

A. Yes.

Q. So that that apparatus at least was not included in your 95%?

A. Not in the instance of the water gas plant but it was in the coal gas plant.

Q. In the coal gas plant you figured upon the material and labor for the construction of it?

A. Yes.

Q. I believe you also said you had access to the figures of Bartlett, Hayward & Company, of holders constructed in New York for the Consolidated Gas Company?

A. I did.

Q. So that you took advantage in making your appraisal of bids from the U. G. I. of Philadelphia and Bartlett, Hayward & Company of New York on such apparatus as these concerns installed for gas companies? 6612

A. Well, those of Bartlett, Hayward & Company were the actual estimates either by myself personally or under my direction.

Q. But no matter how they were made I understand it that they were not yours at the time of making this appraisal?

A. They were mine in a sense of the word, yes, because they were prepared by myself or under my direction.

Q. But were in the possession of Bartlett, Hayward & Company with which you were no longer associated?

A. That is right.

Q. Now I state to you that Mr. Edgerton's figures on holders were checked before their insertion in his proposal by the sales agent for three of the largest holder builders in this country. Assuming this was so would this in any way change your opinion as to the accuracy of Mr. Edgerton's values?

Mr. Mathewson: I have no objection to Mr. Kirby's putting an assumption to the witness, but to say I now "state to you," which is testimony by counsel, I do not think it is quite proper.

Q. Then I will change the question and assuming say, that Mr. Edgerton before inserting the values obtained by him in his appraisal of holders submitted his figures to the sales agent of three of the largest holder builders in this country, and that these agents agreed with his values, would this in any way change your opinion as to the accuracy of Mr. Edgerton's figures?

A. No, it would confirm my opinion regarding the cost prices submitted by him for the reason that no matter who he referred to they were not familiar with New York conditions 6613 as nobody built holders in New York for the last eight years except Bartlett, Hayward & Company, therefore they could not be familiar with New York conditions, and this would strengthen my valuation.

Q. Now will you also assume that Mr. Edgerton had access to and examined the cost of material and labor and total cost erected of the original four small holders of the Mutual Gas Light Company of this city, has had access to the cost of the holder for the Standard Gas Light Company of this city, and had access to the cost of the 2,600,000 cubic feet holders of the Central Union Gas Works of this city, would this in any way change your opinion as to the accuracy of his figures?

A. Not at all, because my estimate was based upon the conditions as they existed last summer. If he had access to such figures they were built under different conditions.

Q. Were all of Bartlett Hayward's figures for holders built last summer?

A. No, they were for holders built within the last twenty-five years, only the prices were applied to conditions as existed last summer.

Q. I notice in a great many of your foundation estimates, in fact in the majority of them, that you have estimated for piling under buildings of but twenty-eight feet in height. Is it usual to put any more than ample footings for such foundations? 6614

A. It is. I have never built a building of that height for gas house purposes in ground that was bad and required reinforcement without any piling because I knew it would not stand.

Q. How did you arrive at your knowledge that there had been piling used in these cases?

A. I stated yesterday partly from drawings and partly from information that I could collect at the works. Where there had been any drawings in existence for the buildings under consideration I ascertained -he necessity of piling from drawings or other buildings in the immediate neighborhood.

Q. In your inspection of various buildings around the neighborhood did you notice the condition of the three-story building opposite the retort house on 14th Street and endeavor to ascertain whether piling was used in each of the walls of that building.

Mr. MATHEWSON: What kind of a building is that?

Mr. KIRBY: Three-story brick building opposite the gas house in 14th Street.

Mr. MATHEWSON: Was it a tenement house or a part of a gas plant?

Mr. KIRBY: Not part of a gas plant.

A. I did not.

Q. Would it surprise you to know that this three-story brick building has no pile foundation thereunder?

A. Not in the least. I have heard of tenement houses falling down for want of proper construction and proper foundation, and such construction certainly would not be done by the Consolidated Gas Compnay.

Q. Will you give me the buildings you did look at to ascertain if they had piling foundation thereunder, contiguous to the 14th Street works?

6615 A. I do not recall the drawings which were in existence for particular buildings. What I have in mind now is 21st Street. I don't know whether there were any bad conditions at the 14th Street station. It is too long ago to remember.

Q. I call your attention to the description of a one-story building, as set down in the schedule of appraisal, 14th Street station shed, one-story building, galvanized iron siding, 38 ft. 3 by 31 ft. by 11 ft. 6, at underside of roof trusses, foundations 6 ft. 6 below grade, consisting of brick walls and 12 by 12 inch coping, constructed of piles, space, 30-inch centres, in double rows; do you consider that a building of that size and weight demands a pile foundation?

A. I don't know what the original intention was as far as the purpose of that building is concerned.

Q. I ask you do you consider that a building of that size, dimensions and weight demands a pile foundation?

A. Yes, I consider that no building could be built in that ground without pile foundation, no matter how small it is.

Q. A shed or anything of that kind?

A. Yes, sir.

Q. Have you ever made any estimate of the weight which soil of this character would hold up without pile foundation?

A. I have made many tests of ground of similar character, yes.

Q. And what weight do you think it would hold per square foot of area?

A. Well, I should not for a building or foundations of machinery place any weight upon it, because it may be hard in one spot and may be soft in another right alongside of it.

Q. Is there any apparatus in this one-story building, with galvanized iron sides, to which I have just called your attention?

A. No; I believe not. But I do not recall it.

6616 Q. It has no basement?

A. No.

Q. Now, we can eliminate foundations for machinery and simply take the building by itself?

A. Yes.

Mr. Mathewson: What building is that? Will you give me just the description of it, what it is known as?

Mr. Kirby: I have given you the description. It is known as a shed of the 14th Street station. The description I have given. I will repeat it if you would like to have it again.

Mr. Mathewson: No.

Mr. Kirby: The roof is galvanized iron or wood. Mr. Mayer has stated he is familiar with the character of the ground at 14th Street. I would like to know how much weight this ground would carry per square foot.

A. Why, I did not make any tests of the carrying capacity of the ground at that particular location, but from the description you read and from the character of the ground I know that no weight should be placed upon it at all.

Q. No weight at all?

A. No weight of a building or anything like a building.

Q. Not even a shed?

A. Not even a shed, because that shed may be used for supporting a great deal of weight inside for storage purposes.

Q. You know the use to which this shed was put, don't you?

A. I don't recall it now; it is too long ago.

Q. Let us assume that that was a shed which was not to be put to such use as holding great weights for storage purposes?

A. I would still claim the necessity of piling the walls.

6617 Q. So that every building whether it was one-story *of* half a story or five stories, whether it was what is commonly known as a shed, or no matter what its weight was, according to you would have to be piled?

A. It has to be piled.

Q. Notwithstanding the fact that across the street you have a three-story brick building which has no piling under its foundations?

A. It would not affect my judgment at all.

Mr. Mathewson: No evidence in the case that there is such a building.

Q. Would it influence you in any way if this three-story building across the way to which you have made reference was a factory in which there was machinery?

A. Not at all.

Q. Do I take it that you assume that Mr. Edgerton in making his appraisal of these buildings did not compute on any piling for the foundations?

A. To the best of my recollection he stated he did not consider piling necessary and did not include it. Now, whether that was just in 14th Street or some other place, I don't recollect exactly, but it was in either one of the places.

Q. That is the only ground which you took for coming to your conclusion. Now if it be a fact that Mr. Edgerton merely stated that he did not consider a piling foundation necessary that would not indicate to you, would it, that he had not estimated on piling in getting at his appraisal valuation, would it?

A. Not only that fact alone, but his detailed estimate did not show it, that he included any piling except in a few instances. In a general way, if I remember correctly, he said he made an estimate for piling so many thousand dollars. Where that thousand dollars comes from or how he arrived at it I don't know.

6618 Q. But the mere fact that he stated piling, so many thousands, would indicate he had estimated on piling?

A. No, it would not indicate he had estimated at all, but that he made a wild guess.

Q. Well, call it whatever you may, but he included piling?

A. Only in a few instances as I remember his detailed estimate now.

Q. Point to the testimony and show me where you consider he has not included piling where you set it forth, as being under the buildings for foundations?

A. I referred to the detailed figures which he submitted and which I had to look over.

Q. Nothing in the testimony?

A. Yes, it was so stated in the testimony. I cannot refer to the pages. In many instances he said there was no piling there and why there shouldn't be any there.

Q. That is quite true but that is not testimony to the effect that he did not estimate on the cost of the piling?

A. If he was familiar with the structures and surrounding buildings and the consequent action on pipes in certain cases he would not consider that piling was unnecessary.

Q. I do not presume that there would have been for a gas works peculiar conditions existing so that they would require pilings, whilst a factory building to sustain a greater weight might not need piling?

A. A big difference between the two. The effect produced by settlements might put the whole station——

Q. That would apply to your one-story shed?

A. It would.

Q. In which there would be no pipes of any kind?

A. There might be. There might be some in the immediate neighborhood in the ground that would be affected by the settlement of the buildings.

6619 Q. And presume there were no pipe contiguous, would that change your opinion?

A. Not at all. It would have to be piled if it is a building for a gas works.

Q. Did you notice that the brick wall around the holder yard at 14th Street and Avenue C leaned badly over towards the street so it had to be secured to the holder columns and anchored inside the yards to keep it from falling in the street?

A. I did.

Q. Did you notice in the 14th Street retort house that truss girders of considerable depth were stretched across the retort house at a number of places and apparently introduced since the building of the house to keep the building from falling apart?

A. I did.

Q. Do you consider the roof of the purifier house at 42nd Street to be in good repair while at a number of points a good view of the sky can be had through the roof?

A. What is that, 42nd Street?

Q. Yes.

A. I don't recall that.

Q. Did you take particular notice of the woodwork of the trestles in the 42nd Street yard?

A. Yes.

Q. Isn't that woodwork, all of it, as a matter of fact, in such a dilapidated condition, as well as the flooring above, as would call for a general condemnation of the whole of it?

A. No.

Q. What condition is the woodwork in?

A. I cannot recall exactly, but it is in condition as far as depreciation is concerned, according to the value of depreciation that I put it down at that time. It is impossible to remember all of those details now when the investigation was made several months ago.

6620 Mr. Mathewson: I think that was the vast sum of $1,000 that was attributed to the trestle, or something like that.

Mr. Burr: You wasted a good deal of time upon $50 in this rebuttal, so that by comparison that sum is vast.

Mr. Mathewson: Perhaps I saved it. You won't save the thousand.

Q. Mr. Edgerton has estimated the cost of frame Phenix column holders at 63d Street and 65th Street, at a value of $48,000 each, due to the extraordinary amount of iron introduced into that frame, thus making the cost of the frame nearly one-half the cost of the iron work of the holder. Do you consider the introduction of this amount of iron into the frame excessive?

A. Well, if you will refer to my valuation you will find that if there is a difference that this difference is due to either lack of weight in Mr. Edgerton's estimate or else by applying wrong prices. The values I have given are absolutely correct. I built both of those holders, too, I believe.

Q. What proportion do you consider the weight of the frame to be to the holder?

A. There is no fixed proportion.

Q. Of these holders I am talking about, these two specific holders at 63rd Street and 65th Street.

A. I could not make a guess at that.

Q. But you built them?

A. I know, but that does not naturally enable me to make a guess as to what that weight was eight or ten years ago in proportion to the weight of the holder.

Q. You did not estimate that?

A. Of course, and that would vary with every style and detail of holder. There is no fixed proportion, therefore I cannot remember.

6621 Q. In making your appraisal didn't you figure on these weights?

A. I did. I took it right from the original cost.

Q. But you cannot remember now what the proportion was?

A. Certainly not, because there are thousands and thousands of figures that I had to make.

Q. And you have not the information at hand?

A. Except in my valuation.

Q. Except as there, you haven't it?

A. No.

Mr. Mathewson: If you want the information as to what the weight of the frame was and the weight of the holder——

The Witness: It is all in the testimony.

Mr. Mathewson: The witness can give it to you, if you want him to refer to his notes, can you, Mr. Mayer?

The Witness: Yes, it is in the testimony now, I think.

Mr. Kirby: No, it is not.

Q. What did you estimate as the weight of these holders, exclusive of their framings.

Mr. Mathewson: He said he did not estimate, but took the exact weight and knows what it is.

Mr. Kirby: Some of us call that an estimate.

Mr. Mathewson: It is not wise to do so.

The Witness: That is the three million-foot holder?

Q. Yes.

A. The weight of the holder is 1,204,610 pounds; the
6622 weight of the guide frame is 924,285; the weight of the pipe
connections is 75,400. The total weight of the entire construction is 2,258,795 pounds.

Q. What did you figure the value of the holders to be exclusive of the guide frame?

A. I figured them altogether .

Q. So that in coming to your valuations for holders you took all the weights and multiplied it by a certain factor?

A. I did, and that certain factor is based on the actual facts existing last Summer.

Q. About that you have already testified?

A. I have testified, and I believe given the details how those factors were made up; the total was 7.1 cents per pound.

Q. So that the method of your appraising these holders was as set down in your testimony and as just stated, obtaining the weights of the different parts and adding them together and multiplying by a certain factor?

A. Yes.

Q. Coming for a moment to the tanks which contain the holders. I ask you if it is not considered from an engineering point of view that it is considerably cheaper to construct a brick tank in rock excavation than in any other kind of material?

A. No, it is very much more expensive. That is very plain on the face of it. When you have to excavate a whole mass of rock instead of earth it costs very much more. I don't see how it could cheapen the tank any. You have to do the same excavation as in ordinary earth and then build the holder the same as in ordinary earth.

Q. Do you estimate the entire amount of rock?

A. No, neither do you in earth where the earth is good.

Q. Do you excavate more rock than earth?

A. No more than you would in the instance of earth.

6623 Q. As much?

A. As much.

Q. Would you excavate as much rock as you would earth?

A. As much as you would good earth, yes. There may be a slight difference in the cone remaining in the centre of the tank, but the blasting would remove a great portion of the rock unintentionally which probably could remain there if it was not——

Q. But there is no drilling or blasting done for the purpose of removing the rock in the central part where the cone would be and where in an excavation in dirt the earth would have to be removed?

A. No, that is not so. The rock would not have to be removed. The earth would remain in the same spot where the earth remains in the other instances.

Q. But the earth, not standing up as rock does, is it not a fact that more of it would have to be removed than rock?

A. I have already stated just now very slightly more because you cannot confine your explosions in blasting to a certain contour.

Q. But you endeavor to do so?

A. But you cannot; it is practically impossible. You always remove more than you intend and therefore the excavation is nearly like with good ground.

Q. Have you ever calculated the difference in the cubical contents which are removed from an excavation for a tank built in rock and one built in sand?

A. I have, in this very instance. The removal of the rock is based upon a drawing which is prepared for the special purpose of building the tank. Now blasting has got to be executed to the lines called for by that drawing and that gives the maximum amount of excavation of rock required.

Q. Yes, but in preparing the drawing for excavation in rock and also sand are the same distances and height of cone reached.

6624 Mr. MATHEWSON: He said ordinary ground and not sand.

A. In the instance of sand you would have to excavate to the natural angle of repose of that particular material.

Q. And that is so in all soil?

A. It is so in rock, especially where you have rotten rock.

Q. But the angle in rock is much more vertical than it is in soil?

A. Yes, but I have already stated that you can not carry out a vertical excavation and it is never done in gas holder tanks, this is due to the fact that the tank when completed must be absolutely tight. In order to make it tight you have got to cover the interior excavation and make the same tight with the covering of concrete or cement. Now you cannot put concrete or cement into a vertically blasted rock wall, and in order to permit of applying the concrete you have to blast on an incline the same as you would in the cone in the instance of good ground. The tank that leaks through the crevices in the excavated rock not properly protected by the concrete, in other words, would be of no value.

Q. So that you require a certain angle to be set down for an excavation in rock?

A. We do.

Q. And a certain other angle to be set down for an excavation in sand?

A. Yes, sir, and another angle for another kind of dirt.

Q. But coming to steel tanks of modern construction, I ask you if these could not be built for less than half the cost, including pile foundation, in place of the brick tanks now used for the small holders which you have appraised at 14th Street, 42d Street, 44th Street and 21st Street plants?

A. I am not prepared to say unless I investigate that question in detail and ascertain the details.

6625 Q. What is your opinion about it?

A. As an engineer I have no opinion in matters of that kind. I deal with positive facts only and by reference to my paper.

Q. Would you be prepared to state whether or not such steel tanks would cost as much as the brick tanks to which I have referred?

A. No, I think they would cost less than the four combined holders, including the brick tanks and in fact I know that is a fact because we have removed four holders and substituted them by a holder with steel tank on the same area.

Q. So you have at least some little opinion upon the subject?

A. Well, a weak opinion which is of no value so far as comparison of values is concerned.

Mr. Mathewson: They might cost twice as much.

Q. Where do you think you could obtain a duplication of any one of these holders together with steel tanks for one-half the sum that you have estimated to replace these holders?

A. I could not say that at all. It takes a good many references to figures to answer that.

Q. Speaking for a moment upon your 10 per cent. engineering factors as opposed to Mr. Edgerton's 3 per cent, I presume that in undertaking an enterprise such as the replacing of the works of the Consolidated Gas Company, you would start out by employing engineers and draughtsmen and such as that to lay down the plant, would you not?

A. You mean from the standpoint of the contractor or the standpoint of the gas company?

Q. From the standpoint of the man who gets your 10 per cent.

6626 Mr. Mathewson: If you were building the works. You mean the company, don't you, Mr. Kirby? That is, for a plant constructed for it?

Mr. Kirby: I don't care whether it is a company, individual or what. Take the man who is getting this amount of 10 per cent.

A. There is more than one who gets 10 per cent. There is one 10 per cent. for the company and another 10 per cent. for the contractor.

Q. Yes, your final 10 per cent. you have spoken of and compared with Mr. Edgerton's 3 per cent.

A. The final 10 per cent. is expense incurred by the gas company. The gas company employs continuously a force of engineers and draughtsmen numbering from 50 to 75. That is about as big a force as I had under my direction as the chief engineer of the firm of Bartlett, Hayward & Company. It is this force of fifty to seventy-five engineers and draught-men and men that make up a very large portion, besides all the other items which I have enumerated in my testimony, of the 10 per cent.

Q. Now, we will assume that you have got a contract at the figures set down in your appraisal for replacing the buildings and apparatus of the Consolidated Gas Company. Would you employ engineers to lay out the work and draughtsmen to put the same into proper working drawings and prepare specifications and such?

A. That work will all be done by the gas company, that is, with the force of engineers and draughtsmen that I have just referred to. They would ask for proposals on specific parts of the contemplated improvements, such as apparatus or alterations to certain fixed buildings.

6627 Q. Now, in asking for these bids I presume that the details, say for gas holders and holder tanks, would be furnished by the firm giving the bid?

A. They might in some instances if they are approved of by the gas company. When they have an idea of their own that the details of the manufacturers do not suit them, they would change them to suit their ideas, and get bids upon such altered conditions.

Q. In these bids submitted by Bartlet Hayward, which you are familiar, were the plans and specifications for those holders and tanks drawn up by Bartlett, Hayward & Co., or the Consolidated Gas Co?

A. In the instance of the tanks of Bartlett, Hayward & Co., they are solely and alone my own construction and details. In instances of other apparatus, very often the gas company requires specific details to be incorporated in the construction upon which bids have to be made.

Q. I presume the U. G. I., from whom you obtained your bids for the Lowe water gas apparatus, also have their own plans and specifications, have they not?

A. Absolutely the same as in my instance with the gas holders.

Q. Now, your plans and specifications are prepared for say one stack of benches of a certain size. I presume those plans and specifications can be used for another stack of the same kind of benches, can they not?

A. They can under like conditions, but where conditions differ, or the details of construction have to be changed to suit that particular condition——

Q. That is, different foundation plans might have to be used or something of that kind, dependent——

A. In the instance of benches they would have to be adapted to the building unless it is contemplated to make such repairs 6328 in the buildings to permit of building benches of modern construction.

Q. This contract which you have, being for a great number of buildings and benches, I presume you would endeavor to so make the size of your buildings and benches that the plans for one would be fitted for use elsewhere, would you not?

A. Not at all. Every plan that I design is designed upon different lines to suit the local requirements and conditions as they exist. One cannot be applied to another.

Q. You never make your plans and specifications for say one holder in figuring upon the cost of another?

A. Oh, yes, I said before that we apply it to the requirements of the individual conditions.

Q. That is also true of your benches, is it not?

A. Also true of the benches and other apparatus.

Q. Of every apparatus?

A. Yes, the gas company watches the results obtained with the apparatus very carefully, and where they see the necessity of introducing improvements in the next apparatus for the same purpose, they request the manufacturer to incorporate that in his design.

Q. You have assumed a two years' building, what do you mean by that, that the operations from the time you obtained the contract to the completion of the work is two years?

A. I mean that it is two years from the time that the gas company places the first contract for grading and excavation to the time that they are able to make gas in that plant.

Q. And that includes such plans and specifications and work of that kind as would be necessary for the work?

A. It does.

6629 Q. Did I understand you to state in your testimony of yesterday in reference to foundations of the 21st Street plant that the concrete foundations for the new Lowe machines were not piled?

A. I did say that, and the reason I presume for not piling this particular foundation was due to the fact that the ground was found to be sufficiently compressed from the piling of the building, and the adjacent foundation of the old benches which had been piled. There is very often a great difference in the character of ground within a very short space. I find for instance in two purifier houses at the Astoria plant, that within two hundred feet, the same kind of building, that in one instance the excavation alone of one building amounted to over $40,000, whereas in the instance of the other building, an exact duplicate, it was $27,000, and the buildings were only 200 feet apart.

Q. This last is an unusual condition?

A. Not at all; it is met very often.

Q. And in your assumption of the necessity of piling under such buildings as you have included in your appraisal, it was based upon information given to you by the employees of the Consolidated Gas Company or from such old contract that came into your hand?

A. Well, they were only sufficient to indicate that the buildings had been piled, and then the value of the piling was based upon my own detailed estimate of what those pilings would be if I had to construct them.

Q. I mean whether or not it was necessary for these buildings to be placed on piles, not the cost of them?

A. No, it was not any question of finding out whether it was necessary, but whether it was piled, and I found out they were.

Q. That is all you looked into?

A. That is all I looked into.

6630 Q. You stated yesterday there was no visible dilapidation of the 14th Street plant and that it can be operated to the full capacity?

A. I did.

Q. In his connection did you notice that one entire stack of benches was let down, and kept down by reason of wear and tear on the retorts?

A. Where is that, 14th Street?

Q. Yes.

A. I don't think that was the fact at the time of my investigation and my examination of the plant.

Q. Did you notice Mr. Edgerton's testimony in reference to that?

A. Yes, I believe I recall that.

Q. Did you notice that six or eight benches or another stack were exhausted?

A. Not at the time of my examination.

Q. Did you notice that the stack of sixes accompanying the ½ depth furnaces, although nearly filled with retorts, was out of action?

A. I did not notice it.

Q. I ask did you notice it at the time?

A. No.

Q. Were all of these benches in action at the time of your examination?

A. As far as I can recall now they were, although I won't be sure of that fact because it was some time and it is possible that large number of benches were down, and I believe they were, for repairs; that is usual in the summer time, to shut down part of the plant to repair it.

Q. The condition would be different in December or January when Mr. Edgerton visited the plant, would it not?

A. It would as far as the repairs were concerned, but if they had other sources of production to supply the demand, they could afford to shut down a section of the plant.

Q. You stated yesterday that the pipe connections cannot be cut off in an old apparatus in order to connect on new apparatus. Must not, therefore, the new piping be a duplication of the old
6631 and on a larger scale, and when the old apparatus is removed what use can these old connections be?

A. I didn't refer to pipe connections for apparatus; I referred to pipe connections for the entire plant.

Q. Let us refer to pipe connections for apparatus.

Mr. **Mathewson**: I do not think Mr. Mayer so testified. I asked in regard to yard connections and nothing about——

Q. Let us take it, say to a puprifier box. Now, you have stated that such could not be shut down because the operation of the works must go on, and we will assume putting in a new purifier box and say you carried to that purifier box a new connection.

A. I didn't state that at all. I stated that the connections could not be taken out and replaced by others because it would stop the operation of the plant.

Q. Well, I think I stated the same thing in a little different way.

A. No, you referred to a single apparatus of the plant.

Q. Let us assume the single apparatus of the plant.

A. That is a different question from what I answered yesterday.

Q. May be it is; let us assume that it is. Will you answer the one I am asking now?

A. The question you ask now does refer to a single apparatus. If you mean to refer say temporarily to a single apparatus, to reconstruct the same, that of course can be done without shutting down the plant, because there are always valves between the gas mains and apparatus permitting a shutting down of such individual apparatus, but that is an entirely different question from what I answered yesterday.

6632 Q. So in the instance I have mentioned it would be possible to remove the yard connections and replace it by another?

A. No, it would not, I have not referred to general connections. I have referred to an apparatus, the elimination of this particular apparatus and not to any particular pipe connections except so far as they belong to that particular apparatus.

Q. Well, that is what I have reference to.

A. That is not yard connections.

Q. Well, take the yard connection running to that individual apparatus?

A. Well, you cannot take out the yard connections without stopping the operation of the plant.

Q. If, Mr. Mayer, you had been unable to obtain figures from the U. G. I. as to the cost of their water gas apparatus, how would you figure the value of such apparatus?

A. I should have had to figure them in detail, both for the fire brick linings as well as for the shells and mechanism to operate the plant, but as I have built many shells and a great many operating mechanisms for various kinds of water gas apparatus, including those of Mr. Edgerton's, I am familiar with the cost of that class of works from my own experience.

Q. I presume that the forms of these water gas apparatus, in fact of all apparatus in gas works, have been changed several times during your experience as an engineer?

A. Oh, yes, I have stated that just a few minutes ago, that the details have been changed.

Q. I presume also in estimating your value of guide framing, or rather the weight thereof, that the size and weight of a holder has much to do therewith?

A. No, none whatever. The size and weight of holder has nothing whatever to do with the guide frame.

6633 Q. So that a holder of small cross section would require as heavy a guide framing as one of large cross section?

A. That depends upon the result of statistical calculation, based upon the assumption of twenty-six pounds of pressure to the square foot of curved surface exposed to the direction of the wind.

Q. So that then a large holder which has relatively a large cross section would need a stiffer and heavier frame than a small one, would it not?

A. Oh, yes; that is natural.

Q. And a three or five——

A. Excuse me. What I meant by that, is not stiffer applied in the proper term of the word. It has to be just as stiff for a small as a big holder, but it would require more material in one than the other. The stiffness would have to be the same in both to resist the same wind pressure.

Q. And to get that stiffness in that large holder you would have to have more weight than in a small holder?

A. Yes, more material.

Q. Well, more material means more weight?

A. Yes.

Q. That is also true for a five lift holder as with a one lift holder?

A. Oh, yes. Possibly I misunderstood your question before regarding the size and weight of a holder in comparison to the guide frame. I referred to the same individual holder, meaning the size and weight of a particular holder had no fixed relationship to the weight of its own guide frame.

Q. That comes down to that with which we all agree, that cubical contents has little influence upon the weight of the guide frame; it depends upon the diameter of the holder?

A. That's right.

6634 Q. You spoke yesterday of your detailed estimate of cost of the governor and boiler house at 132nd Street?

A. Yes, sir.

Q. And you gave a cost of that per cubic foot, did you not?

A. I believe I did.

Q. Do you remember what that was?

A. I think it was fifteen cents, wasn't it? I don't remember.

Mr. Mathewson: 13.2 I think.

The Witness: I think it was fifteen cents, that is my recollection. That was 132d Street, wasn't it?

Mr. Mathewson: Yes.

The Witness: Fifteen cents.

Q. Is that the building which you compared with Mr. Edgerton's cost?

A. I did.

Q. That being the only exhibit which I had I will take that up. I refer you to Complainant's Exhibit 373, which purports to be a comparison between your valuation of that plant and Mr. Edgerton's, and I ask first of all where do you get the value of $30,000 as Mr. Edgerton's valuation, cost given in schedule, because by referring to the testimony I see that the value set down is $21,000.

Mr. Mathewson: Mr. Edgerton computed that at $21,160, and I am not sure but that may have been one of the clerical errors in the schedule that Mr. Edgerton presented, which was subsequently corrected on your list here—$30,000, I mean.

Mr. Kirby: In my copy of the schedule, I have not the original, and in the printed schedule which was taken from the original, the value is set down not at $30,000, but as over $21,000, or $21,160.

6635 Mr. Mathewson: $21,000 it was put down as—was that the depreciated value or original value, Mr. Kirby?

Mr. Kirby: I don't know.

Mr. Mathewson: There are $30,000 and whether that was an error and subsequently changed before printing—or maybe it was the cost without depreciation, I don't remember.

The Witness: I think it was Dr. Marks' testimony instead of Mr. Edgerton's.

Q. Then it is an error, instead of having $30,000 it ought to be as is in the testimony, $21,000?

A. It appears here $21,000. It may be I just changed the two schedules, Dr. Marks' and Mr. Edgerton's.

Q. Well, that is the case; you have just referred to the schedule where you got your information from?

A. Yes.

Q. And it is set down there as $21,000?

A. Yes; it should be Dr. Marks' valuation instead of Mr. Edgerton's.

Mr. Mathewson: In reference to that 132d Stre-t building, the 13.2 cents is the amount at which Mr. Marks figured Mr. Mayer's cost upon Mr. Marks' cubic contents, 13.2.

Mr. Kirby: What I was after was Mr. Mayer's, and that is fifteen cents.

The Witness: Fifteen cents.

Mr. Mathewson: Mr. Mayer, on his own cubical contents computation gave fifteen cents.

Q. So that the figures which we have to compare are Mr. Edgerton's of $21,000, and——

A. $21,160, as given in his detailed schedule.

Q. And your figure which is——

A. $26,763.

6636 Q. What is this figure which I see here, $20,071? The figure in Complainant's Exhibit 373?

The Master: It says here total contents of building 133,800 cubic feet.

Mr. Kirby: I just wanted to see what the value is and I think I know, but I want him to state.

A. It may be an error of the typewriter in inserting those two values. I do not recall for what reason they put that down. I don't know whether it had any relation to the 15 cents at all. The total contents of the building was 133,800 cubic feet.

Q. Well, 133,800 cubic feet at 15 cents per cubic foot would be what?

A. I presume $26,736.

Mr. Mathewson: You had better not presume. Just figure it out and see. That may give you some light. You had better look at your own record and find what the cubical feet are and not depend upon memory.

A. Well, I have it down here, 133,800.

Mr. Mathewson: Yes, but the question is raised about it. That is the building at the top of the page, isn't it?

A. Will you let me see my original schedule, please, of 132d Street.

Mr. Mathewson: You have it here.

By Mr. Kirby:

Q. It is a fact that the number of cubic feet which you have set down on this exhibit as the cubical contents of that building, figured at 15 cents per cubic foot, amounts to $20,071, is it not?

A. $20,071, yes.

6637 Mr. Mathewson: Look at your cubical feet. Look at your memorandum and see if that is right.

A. That $20,071 refers to the building alone. And then there is an item for the foundations, $6,665, making a total of $26,736.

Q. Then, that is the cost you have given in your schedule, but you have figured this out now at 15 cents per cubic foot and you have given the cubical contents of the building?

A. Yes, I have already stated in my testimony that my additional values per cubic foot are based upon a foundation of about four feet depth below the surface of the ground; it includes though in that instance in good character of ground, which at 15 cents for the building make $20,071, and then there is an item for foundations, extra cost $6,665, making a total of $26,736.

By Mr. **Mathewson**:

Q. That is what appears in your original schedule?

A. That is on account of the original increased depth for foundations beyond that of normal condition.

By Mr. **Kirby**:

Q. So you have tried to carry through the estimate of all your buildings a method which will make them capable of comparison, you have taken a certain unit assuming a certain depth of foundation and where that foundation has been carried deeper you have added to that and where it has been shallow you have deducted?

A. That's right.

Q. Now, then we are to compare Mr. Edgerton's valuation of $21,160 with your valuation of $26,736, is that correct?

A. That is right, sir.

6638 Q. And is this figure of $19,310 which you have put under Mr. Edgerton's column that of his building exclusive of foundations so as to compare it with your figure of $20,071 exclusive of foundation?

A. Exclusive of the foundation as it exists here but including foundation of the depth of four feet as would be in normal condition, so that the two valuations are upon the same basis.

Q. So that there is practically but little difference between the two?

A. As far as the substructure is concerned, but he made a big blunder in his foundations.

Q. Endeavoring to trace this blunder, as you call it, you have taken certain values and put them under the column headed "Edgerton's values;" where did you get those values from?

A. From his total estimate.

Q. Did they come from his testimony?

A. No, from his detailed estimate which he submitted here in large yellow paper envelopes.

Q. Now, I notice that on page 3 of this exhibit, under miscellaneous items, you have fireproof concrete arches. Now, you included that in your cost of concrete?

A. Yes.

Q. And so in your tile coping, you included the cost of enameled brick and so on?

A. Yes.

Q. So that it has been impossible for you to make separate comparison between the values which you put upon certain parts of the work and values which you, looking at these sheets to which you have made reference, assumed Mr. Edgerton had put upon the same parts of the work, is that not a fact?

A. No. In most instances direct comparison was possible; and only in these few instances, such as fireproof, concrete arches, tile coping, fireproof doors, flashing and gutters and machinery foundations, amounting in total to $3,450, no comparison was possible.

6639 Q. Did you go through these sketches which Mr. Edgerton submitted here?

A. Oh, no, that was impossible.

Q. Do you understand those that you went through?

A. Do I understand them?

Q. Yes?

A. Well, I did as far as I could tell what figures meant when I saw them on a piece of paper added together. That is all it amounted to.

Q. What were these schedules, were they detailed statements of cost?

A. Well, they were intended to be, and with the exception of the omissions why they were detailed statements. There were a whole lot of omissions.

Q. You haven't any knowledge, have you, as to whether or not certain amounts as set down for a certain material or job say painting and glass, Edgerton's valuation $325 as against yours, being $150, you did not include hardware which you have set down as a separate item of $200?

A. If he includes painting and glass under hardware it would be a blunder right off. I don't see any connection between the two.

Q. It might be a blunder in the statement but it would give the same thing in dollars and cents, would it not?

A. I am not prepared to say.

Q. Neither are you prepared to say that the amount which he sets down as $520 for his granolithic cement floor which you give as $432 does not include other things beside the floor in itself?

A. I cannot tell, no, sir.

Mr. Mathewson: Might that include hardware, too?

Mr. Kirby: It might very well include it.

6640 Q. In figuring out the costs of buildings and things of this kind, do two men work in the same way? Is it not a fact that one man will oftentimes include under a certain head what another man will include under another certain heading?

A. No; that couldn't happen very easily. He might apply different valuations but so far as the application of values to a certain class of material *of* workmanship is concerned he could not change those. He could not make carpenter's work like hardware or hardware like painting and glass or anything of that kind. He can apply different values but cannot change the character of the work to which it is applied.

Q. Now in going through these schedules you found a certain statement with the letters "etc." after them. Did you know what those letters "etc." referred to?

A. What are those letters?

Q. Well, it means and so forth, does it not?

A. I presume so.

Q. Do you know what and so forth means?

Mr. Mathewson: Let us see what it is that you are referring to.

Mr. Kirby: My question is perfectly clear.

A. No, I don't know what and so forth means in putting a valuation on the cost of a building. I couldn't attach any value to it.

Q. So wherever in this schedule which you have just made reference to I show you "etc.," do you know what the "etc." means?

A. I don't know. It is of no value.

Q. And probably the only man who would know what "etc." meant would be the man who put it there?

A. That may be so but when you total up his summary and you find that a whole lot is missing there then that "etc." explains that that "etc." was not taken care of. It was lost in some way or another.

6641 Q. As a matter of fact that "etc." might very well be those things which have not been taken care of?

A. Well, that may be, but when they are not there, of course his price is too low.

Q. And in such cases where his prices are smaller or higher than yours I suppose "etc." included certain things there which he had not taken care of?

A. Possibly.

Q. So in no instance, high or low, or the same, could he be right?

A. No the total is considerably lower. If the total was the same as mine it would be all right, but it is not.

Q. So the way you come to your conclusion is to take Mr. Edgerton's total and compare it with yours and because he is different he is wrong, is that it?

A. I know he is wrong because he has not allowed sufficient for sub-construction or foundation. It is self-evident by his detailed estimates that he has not included it.

By Mr. Mathewson:

Q. You would not include $6,000 of extra foundations under "etc.," would you?

A. I think not, unless figured *it* in detail.

By Mr. Kirby:

Q. This question of foundations having been such an interesting one—I cannot find it here, but if I remember rightly you made reference to Mr. Edgerton's lack of including foundations in his appraisal of the 21st Street station. Did you make such a reference?

A. That may have been possible, I don't recall it exactly, but I believe it is quite likely.

Q. Now, do you find on Mr. Edgerton's valuation for these buildings to which I have called your attention that he has made 6642 any allowance for both foundations or any foundation except the foundation which could be used in the hard soil?

A. He did not. In some instances he did not allow enough for ordinary foundations.

Mr. Mathewson: That was the old and new generator house at 21st Street, was it?

Mr. Kirby: I think that referred to the whole of 21st Street.

Mr. Mathewson: No, I don't think so, for I didn't ask him as to any buildings at 21st Street except the old and new generator plant, as far as I recall.

Mr. Kirby: He went into a whole lot of talk about purifier houses and sheds.

Mr. Mathewson: The question asked was whether these buildings, with reference to these buildings, that is to say the two buildings respecting which I had been questioning the witness, and he said he found he had allowed only 621 cubic yards of excavation. There should have been over ten times as much or 6,740.

Mr. Burr: I find referring to certain buildings that Mr. Edgerton has made no allowance for pile foundations.

Mr. Mathewson: Yes, that is quite right.

Mr. Burr: Under the water gas apparatus and under the buildings.

Mr. Mathewson: That may be, yes.

Mr. Burr: And the witness stated he had drawings on such foundations and from such drawings and the information which was given him he built what would represent the existing foundations.

Mr. Mathewson: Yes. That is all true. Confining this 6643 to apparatus and foundations and buildings to which the witness was testifying. It may be Mr. Edgerton did not allow anything for pile foundations on any building at 21st Street, and this witness might so testify if it were true, but my point is, so far as I recollect, he has not covered it so broadly as that.

Mr. Kirby: The contrary not only may be true, but is true.

Mr. Mathewson: Even if so it must appear in the statement.

By Mr. Kirby:

Q. Well, so that we may get at the foundation of this whole foundation question, let us take up the 21st Street station and buildings. Let us take the first building set down in that schedule, stove storage and meter-proving shop. I ask you if you know——

Mr. Mathewson: Refer to your schedule in reference to the 21st Street plant, so you can know what you are after.

Q. (Continuing:) — how much Mr. Edgerton allowed for the excavation and foundation upon that building?

A. No, I do not.

Q. Now, I ask if you will tell me how much you allowed for excavation and foundation in that building?

A. $12,400.

Q. And did that include foundation for machinery?

A. There is not any machinery in that building.

Q. So that a statement in that schedule "foundation for machinery" is an incorrect one?

Mr. Mathewson: No, it is not.

6644 A. I have it here as merely a memorandum, instructions given to my men at the time of examining the plant to look out for foundations of machinery, and they had a memorandum by which they had to report to me. Where there isn't any machinery, there wasn't any included.

Mr. Mathewson: This was Mr. Mayer's private memorandum made out for his purpose, and to assist you I had copies made as speedily as possible and sent to you. There were in various cases expressions, "Foundations for Machinery," under different headings which were merely put there by Mr. Mayer's instructions to call the attention of himself and subordinates to look for foundations and include them if there were any, and it does not mean that any foundations were included in the total estimate. Is that so, Mr. Mayer?

The Witness: That is so; it was simply copied in making the copies of the schedule.

Q. Taking the meter repair shop and office, do you know how much Mr. Edgerton included for foundations in that building?

A. I don't recall it now. I looked hurriedly over his detailed estimate, but I cannot carry it all in my head.

Q. Nor for the stove repair shop?

A. Same thing.

Q. Or the——

A. There is no foundation for machinery in any of those buildings.

Q. And none included in your estimates of their value, is there?

A. None whatever.

Q. Do you know how much Mr. Edgerton allowed for his foundation for machinery over the entire plant?

A. No, he did not figure the foundation separate from his substructures and therefore you cannot tell.

6645 Q. In other words you could not from the sheets which you had before you separate the figures so you would be able to come to a conclusion thereon?

A. There were some instances where I think there was a figure at the end for these foundations estimated in round figure; in a great many instances there was no such figure.

Q. In those instances you were not able to make your separation?

A. No, because he did not figure it in detail.

Q. Do you deny that these sheets were the only figures that Mr. Edgerton had in making his appraisal?

A. That is the only one submitted to me.

Q. Well, I didn't ask you that.

A. Well, those are the only papers I can base my judgment upon, I haven't seen any others.

Q. In making your estimate did you have about three sheets or a sheet and a half for each building?

A. Wherever I made a detailed estimate it was made on the same basis that you have an example of before you. Foundations I kept separate from the buildings in order to establish a value of foundations.

Q. And the figures and calculations that you made to come to these conclusions I presume would cover a great many more pages than even here, would it?

A. No, it was not necessary for me because I employed a unit figure for the buildings which included a certain amount of foundation. All I had to estimate was the variations from normal conditions of the constructions under consideration and so I got basis for comparison.

Q. So that that would be a very simple operation?

A. It would be, yes.

Q. Quite a different operation, however, where you are working on the cost of buildings by detailed estimate of materials entering into the construction thereof?

6346

A. No, it would not be very different for the reason as shown in my yesterday values in which the detailed estimates or rather the prices of the detailed estimate were included.

Q. In your unit values you had to go through quite a long process to come to a conclusion, did you not?

A. No, I had those.

Q. But at the time you originally made that you had to, didn't you?

A. Yes, indeed.

Q. You didn't do it on one sheet of paper either?

A. No. It took more than three or four weeks to do it, too.

Q. Now, if I remember your testimony yesterday you stated that Mr. Edgerton figured his brick at $14 per thousand laid?

A. I believe that was the case in that instance, that particular building. I have forgotten which one it was. I think it was at 132nd Street, the governor house——

Mr. Mathewson: No, exhauster house at 111th Street. They may have miscopied it 111th Street, but my notes make it so.

Q. I think you also stated that Mr. Edgerton's price for flooring was $40 a thousand, board measure.

A. Yes.

Q. Now, I call your attention to page 5393 and 5394 of the testimony, and ask you if it is not stated there that Mr. Edgerton in making his estimates considered the cost of material erected "brick work, ordinary brick, $14 to $20 per thousand; pressed brick $20 to $40 per thousand; lumber $35 to $60 per thousand feet B. M."?

A. Yes, but I am referring to the detailed prices applied to his estimate in yesterday's testimony—applying his prices given in his testimony in the detailed estimate, but much lower ones.

6647 Q. Will you tell me in how many instances he used brick at $14 per thousand laid?

A. No, I can't tell you that because I could not examine all the estimates within the time.

Q. Can you tell me in how many instances he used flooring at $40 per thousand feet, board measure?

A. No.

Q. And you assumed because he used it in one instance that he used it in all instances, is that right?

A. Well, I had a good reason for that assumption. I don't see why he should change the value in one building from that in another building for the same class of materials unless there is an error.

Q. And the cost of brick laid never varies, in your mind?

A. Oh, yes. I stated that repeatedly. It varies very much.

Q. You gave a value yesterday, I think, of $25 per thousand, did you?

A. And I gave in detail how that was made up in my testimony.

Q. When did you give that?

A. In my original testimony.

Q. I would like to have you give it to me now?

A. These prices are based upon conditions that existed at the time of my examination last Summer. The average price of the brick was $10, the minimum price at that time was $8, and the maximum price was $12. The labor of laying that brick for bricklayers was $7, the labor of the helpers was $4, the Portland cement was $2.25; sand and water, 80 cents; proportion of time for foreman, 50 cents; proportion of time for timekeeper, 20 cents; hod hoisting, 50 cents; scaffolding, 16 cents; total, $25.41, for which I applied a figure of $25.

At 1.10 P. M. a recess was declared until 2.30 P. M.

6648

Afternoon Session.

2:30 O'CLOCK.

Frederick J. Mayer, being further examined, testified as follows:

Cross-examination by Mr. Kirby (continued):

Q. Just before recess you gave us figures going to make up the cost of brick, which you stated you have used, as $25 per thousand laid, and you gave brick at from $8 to $10?

A. $8 to $12.

Q. Using an average figure of $10 per thousand?

A. That is right.

Q. Was that the price of brick in December of last year?

A. Thas was the price of brick in July of last year, at the time I made my examination.

Q. Is it not a fact that the price of brick in December last year and to-day is no higher than $7.50 per thousand, for ordinary brick, used in ordinary building purposes?

A. That is always the case in the winter time, when they cannot get up the river in winter, and they cannot make any deliveries.

Q. I suppose that it is the effort of every builder to purchase his brick at as low a figure as possible?

A. Yes, but he has got to buy them when he can get them.

Q. You stated that a bricklayer received $7.00 per thousand? Upon what day's wage did you base that?

A. $5.60 per day of eight hours.

Q. That would be the same as the wages used by Mr. Edgerton; that is, 70 cents per hour, would it not?

A. Seventy cents per hour.

Q. How many brick do you calculate he would lay in a day?

A. 800 brick in walls of this kind.

Q. Is it not a fact that bricklayers laying brick on straight work of this kind will lay a thousand a day, and oftentimes more?

6649 A. Not when the work is executed under the direction and supervision of the Consolidated Gas Company.

Q. In ordinary contract work such as is going on in this city, is it not a fact that men will lay a thousand and more bricks a day?

A. It depends on the character of the wall.

Q. I mean in this character of wall?

A. No, it is not. A wall that contains pilasters and curbing cannot have much over 800 brick laid in a day, when you lay it in cement mortar, in a full bed of mortar.

Q. Are all the brick of the Consolidated Gas Company laid in cement?

A. Almost all, there are very few exceptions.

Q. Is there no lime used?

A. Occasionally, but not often.

Q. Is that the way the brick is laid in most work in this city?

A. In most gas works.

Mr. Mathewson: Are we dealing with the Consolidated Gas Company's plant? It seems to me we are, and not with some other plant.

Mr. Kirby: They may have laid the brick in cement when there was no necessity for it. There was a great deal of extravagant work done here.

Mr. Mathewson: This is testimony by Mr. Kirby.

Q. Is it not a fact that brick laid in buildings of this character in this city are laid with lime cement, instead of cement mortar?

A. No, it is a fact that they are almost exclusively laid in cement mortar, and not lime mortar.

Q. And you consider that the walls of the building of the Consolidated Gas Company are laid in cement mortar?

A. I do.

6650 Q. Is that true of the buildings at 21st Street?

A. I do not recall exactly whether this is true in any particular instance, but if these buildings were to be built today, they would be built in cement mortar.

Q. I see you put down here the price of a helper at $4.00 a thousand. What wage does he receive per day?

A. $3.00.

Q. For an eight hour day?

A. An eight hour day, yes.

Q. Is it not a fact that where hod hoisting machinery is used, the helper is able to serve more bricklayers, than where hod hoisting machinery is not used?

A. In buildings of this kind, where the heights are not very great, the hod hoisting does not cut a very great figure.

Q. Fifty cents on a thousand brick?

A. I mean the application of machinery would not, because the buildings are comparatively low.

Q. Do you use hod hoisting machinery as a matter of fact?

A. To a very small extent in buildings of this kind.

Q. I notice you have a foreman down here at 50 cents?

A. Yes.

Q. What do you figure his wage to be?

A. $7.00 per day.

Q. How many workmen do you expect that foreman will be able to take supervision of?

A. Any foreman is required to supervise from twelve to sixteen masons. That was taken from direct observation last summer during the construction of buildings at the Astoria plant, from where I collected all this data. I also ascertained that they could only lay 800 bricks a day.

Q. You do not consider that the bricklayers at Astoria are laying more than 800 bricks a day, in work of this kind?

A. They were not, at the time of my examination.

6651 Q. Is it your understanding that the sub-contractors that are laying brick at Astoria are receiving as much as $25.00 a thousand for brick laying?

A. If they do not they lose money.

Q. Then if it came to your attention that the builders that are erecting the Blair Building, which is at the corner of Broad Street and Exchange Place, and the builders that are putting up the North American Trust Company Building and the builders that erected the Title Guarantee & Trust Company Building or Broadway, each of *of* which is by a different concern, are to-day using in their estimates and prices for brick laying $15 to $20 a thousand, they would be losing money?

A. I know nothing about that class of buildings. I am talking about buildings that I have erected in my own experience, and as to which I have absolute facts.

Mr. Mathewson: Gas house buildings?

The Witness: Gas house buildings.

Q. Have you ever built gas houses in the City of New York?

A. I said in my testimony that my valuation was based upon the buildings of the completed plant of the Kings County Gas Light Company in Brooklyn.

Q. Are you prepared to state that the buildings of the kind that I have spoken of are more complicated in their character or that the laying of brick thereat would be more expensive than at a gas house building of the same kind and character as the Consolidated Gas Company?

A. I would not be able to make any comparisons at all; they are so different in detail of construction that they cannot be compared.

Q. When was the Kings County Gas Company building put up?

A. I have testified to that.

6652 Mr. MATHEWSON: He went all over that in his original examination fully.

The WITNESS: 1897.

Q. You have also taken occasion to state your figures in reference to the price of lumber; are you aware that you can purchase to-day lumber of as good quality as that which is used in the majority of the floorings of the buildings of the Consolidated Gas Company for a price not higher than $30 per thousand board feet?

A. No, the price that I have obtained within the last few days was $45, and the price that I applied last summer I think was $42.

Q. Did you make application to the Southern Yellow Pine Company?

A. No, I did not.

Q. Did you make application to the Collins-Lavery Company?

A. No, I did not.

Q. I understood you to say that you did not make a careful examination of all these sheets, which are placed in the possession of counsel for complainant?

A. No, it was impossible in the time.

Q. I call your attention to Sheet for the 65th Street station, where there appear under the heading "Brick Work" certain dimensions, and I ask you if it is set down thereon at what price this brick work was figured?

A. That might be $17 or $18.

Q. If you multiply that by $18 you will get $3,600, will you not, and if you multiply by $17, you will get some other figure?

A. I presume so.

Mr. MATHEWSON: That would be a little less wrong than $14?

Mr. KIRBY: As you look at it.

6653 Q. Here is one of the buildings of the 21st Street plant, brick work, giving certain dimensions, $17?

A. Yes.

Q. That is correct, is it not?

A. Yes; that is, the application of the figure 17 is correct on that sheet. I do not know whether the calculation is correct.

Mr. MATHEWSON: Are the sheets the same as those which were in the envelopes when we had them.

Mr. KIRBY: They are the same sheets.

Q. In such of these sheets as you did examine, did you notice that in some instances the value of the building as given in Mr. Edgerton's schedule differed from that set down upon the sheet?

A. I cannot recall that now.

Q. Did you notice that in some instance the total of the amount set down as the cost of the various elements of the buildings is not the same as the cost of the entire building as set down on the sheet?

A. That is about the same question; I cannot recall that in detail. There was too much stuff to examine in the time that I had.

Q. Did you notice that in some instances the walls were figured solid? That is, without any allowance for the windows equal to the cost of the brick work which is replaced.

Q. But in figuring the cost of the wall as such, did you notice that in some instances the wall was figured solid, without any brick being taken therefrom such as would be measured by the area of the window spaces?

A. No, when I examined the detail of the brick work, I believe I saw there was an allowance for the cost of the windows equal to the displacement of the brick.

Q. If the walls had been figured solid in the manner which I indicated, would not this increase the cost per thousand of 6654 brick which would have to be actually laid for that wall with the window spaces taken out?

A. No, because they are figured at the same cost. The windows are figured at the same cost as the brick work; consequently there is no difference.

Q. You misunderstand me. We will take a wall for instance in which——

Mr. Mathewson: If you exclude windows and put in brick, or if you exclude the brick and put in windows, the witness says that they offset each other.

The Witness: According to your own detail.

Q. Let us assume that we have a wall indicated on this blotting paper, and in it, there are say a dozen windows or doors or what not; now, let us say that we are figuring only on the cost of that wall, and we take its area solid without any allowance for any windows or doors or anything?

A. Without any allowance for pilasters, or anything of that kind?

Q. We will make an allowance for everything that is there, with the exception of windows and doors; if we take and multiply the number of brick as calculated in that way by, say, 16, we will come to a certain figure which would be the cost of that solid?

A. On that basis of applying a price.

Q. Applying a price, yes. Now, if instead of doing it that way we deduct from the number of brick the number which would be indicated by the area of our windows and doors, we would for the same value have to use a higher amount per thousand, would we not?

A. If $17 was the figure and what you took out for the windows is replaced by brickwork I do not see why we should; it will be one and the same thing for the cost of the wall; therefore the total 6655 cost of the wall remains the same.

Q. The total cost of the wall remains the same, but the total cost of the brick per thousand is different, is it not?

A. The total number of brick would be different.

Q. Yes, and if you figured your brick at the larger number than were actually there and come to a figure which we will say would be $1,000, and you used that $1,000 as the value of your wall, and then divide that by the number of brick actually in that wall, you would get a cost per thousand which would be greater than that which you use, would you not.

A. Than that which I use?

Q. Than that which would be used (under such conditions) in your calculation?

A. Than that which I use, yes.

Q. You stated in your testimony yesterday that you made a detailed estimate of one of the sheds at the 21st Street plant?

A. Foundations, I think I said.

Q. Page 6574, the things of which you have prepared a detailed estimate; there you check your figures as to Shed No. 2, 21st Street.

"Q. And that would give a total of detailed estimate of how much for the shed? A. $67,846."

A. I think that detailed estimate referred to the foundation.

Q. Have you prepared a detailed estimate of any building at the 21st Street station?

A. For the foundations.

Q. Not for any buildings?

A. Except Avenue A shop, I think it is, 21st Street, which was omitted from my original testimony.

Q. Then you figured all of these sheds at so much per cubic
6656 foot; is that right?

A. For the superstructure, yes.

Q. And that was 16 cents a cubic foot, was it not?

A. That included the purifier houses, and houses with double floors, yes.

Q. Did those double floors extend all over the floor?

A. They did in the instance of the revivifying room, but not in the instance of the purifier houses.

Q. How high are those buildings?

Mr. Mathewson: Which one are you referring to now?

Mr. Kirby: I am referring to the one in the testimony at page 6,574, No. 2 Shed at 21st Street, the one of which he said he prepared a detailed estimate, and which he now says only referred to foundations.

Mr. Mathewson: That was the total detailed estimate.

Mr. Kirby: $67,846.

A. The average height was 28 feet 6 inches; some of those were higher than others, but that was the average height for all six.

Q. And you used the 16 cents per cubic foot factor for each shed?

A. I did.

Q. How many of them were there?

A. 5 sheds, two purifier houses and 1 condenser house; all of the same dimensions.

Q. Were they separate buildings?

A. They were all in connection with each other, all adjoining each other.

Q. They had party walls, hadn't they?

A. Yes, with buttresses on both sides.

Q. Didn't you figure them as separate buildings?

A. No, my valuation of 16 cents per cubic foot, that took care of all that.

6657 Q. In other words it would be more if each building had its own wall?

A. If it had been one separate building, yes.

Q. How much would it have been in that instance?

A. I could not say that offhand; it requires that I should give it some little consideration, to establish a unit value of the building, because you have to do it in comparison with the other buildings.

Q. Would it have been a cent more?

A. I could not tell that offhand; I would have to make a detailed comparison.

Q. What is the construction of those buildings?

A. They are heavy walls, buttressed on both sides, with foundation walls 24 inches thick, and some of them have very expensive peaked roofs, and some of them have flat roofs.

Q. What do you mean by very expensive roofs?

A. For that size building, the peaked roof as compared with a flat roof; the flat roof is very much cheaper than a peaked roof.

Q. Are there any stories in them, floors?

A. I have already stated, in the oxide shed and the purifier house.

Q. But they do not cover the entire area?

A. No, but they all refer to the same valuation of 16 cents per cubic foot; 16 cents remains the unit for all of those buildings.

Q. Will you take those buildings and compare them with the building at the 132nd Street station, of which you have given a cubical contents factor of 15 cents, and tell me what in those sheds makes them more expensive than at the 132nd Street building.

A. The 132nd Street is figured at 15 cents for the building, and these buildings were figured at 16 cents.

Q. It would have been more but for the party walls?

6658 A. It would have been more but for the party walls, on account of the buttresses and heavy walls and the stone work and the foundations.

Q. How deep are those foundations at the 21st Street station?

A. They are 8 feet 6 inches to the top of the timber capping on top of the piles.

Q. In your 16 cent estimate did you include the piling in the foundations?

A. No, I included a foundation to the ordinary depth of 4 feet below the ground.

Q. So that as far as the foundation is concerned, you compared it with the 132nd Street building, did you not, where you add $6,665 for additional foundation?

A. Yes, that was for the extra depth below the ordinary.

Q. And you have done the same thing with the 21st Street Station?

A. Much more, because they are piled; considerably more.

Q. So that we can disregard that extra foundation. Now, disregarding that, tell me what in the building itself at 21st Street is such as to make your unit of value higher than it is at the 132nd Street building?

A. The brickwork itself, with the curbing, and the heavy offsets, the buttresses and the stone work on the buttresses.

Q. How many more brick are there in the walls of the 21st Street building, considering the wall as a party wall, than there are in the 132nd Street building?

A. You cannot make any comparison on that basis between the two buildings, at all; I could not answer that question, because my valuation was based upon so much per unit of cubical contents.

Q. But that unit varies, and varies according to the kind of buildings; you have stated that the reason is on account of the extra thickness in the wall. Now, I ask you if you can give me the difference in the number of brick? 6659

A. Not in the number of brick, I cannot, only in that unit of value.

Q. As a matter of fact does not the 132nd Street building have more brick than the 21st Street building, considering the wall as a party wall?

A. I could not tell you, because I have not made that detailed calculation on that basis. It is on the basis of cubical contents.

Q. In the 132nd Street building you included a steel floor at a value of $2,104.99. Was there any steel floor in this building at 21st Street?

A. No, there is not.

Q. You also included some monitor sash, $630, was there any monitor sash in this building?

A. No, there is not.

Q. You also included some terra cotta roof covering, $1,170? Is there any terra cotta roof covering at 21st Street?

A. No, there is stone covering, though.

Q. You also add as high as a value for slating and flashing as $2,250. Would there have been such an amount as this spent for similar materials at 21st Street?

A. Yes, the flashing would cost more; because it is a much larger roof?

Q. How about slating?

A. No slating, because these are different kinds of roofs.

Q. You also have fire-proof concrete arches at the 132nd Street building; are there any fire-proofed concrete arches at 21st Street?

A. No; it is substituted by brick instead of concrete.

Q. What are the arches for at 21st Street?

A. I was just going to say—some of these buildings contain foundations for apparatus, especially for purifiers.

Q. But that foundation you considered in the shed for purifier house, didn't you? 6660

A. Yes, but it has for a total valuation, a 16 cent unit for all of it.

Q. Is that quite a large item?

A. Yes, quite an item.

Q. How much?

A. On the total cost of the foundation you mean?

Q. Yes.

A. I cannot separate the number of feet of concrete in each one of them now.

Q. It is not very large, is it?

A. It is quite an item, yes, sir.

Q. How much do those purifiers weigh? What do the foundations have to carry per square foot?

Mr. MATHEWSON: You have the weight of the purifiers, haven't you?

The WITNESS: Ordinarily about three and a half tons.

Q. Per square foot?

A. Per square foot; that includes the spent oxide in the boxes.

Q. What sized purifier would that be for?

A. The weight per unit of surface would vary of course with the depth of the box. The spent oxide alone weighs 75 pounds per cubic foot, to which would have to be added the concentrated load of the carriages, and the covers suspended from the carriages, and under those conditions the load on the foundations increases very materially more than if the covers are not suspended; therefore, when the traveling load is added, it comes to about 3½ tons per square foot.

Q. Do I understand that over the entire area covered by these purifier boxes there is a weight of three tons or more per square foot?

A. No, upon the foundation.

Q. Upon each foot of foundation there is a load of between three and four tons?

A. Yes, the foundations for the purifiers, that is the foundation for the columns.

6661 Q. That would mean the total weight of the purifier boxes would be how much?

A. This includes the weight of the oxide, and it includes the rolling weight of the covers when suspended from the carriages.

Q. In other words, you are putting down a foundation to suspend a moving load?

A. Yes, a maximum load; that is, normal load plus the moving load when the covers are suspended.

Q. In doing that of course you calculate the area foundation which is not directly under the load which is moved to that place, don't you?

A. I do not understand that question.

Q. Let us take two tons per square foot of area, what height of solid iron would that represent placed over that area?

A. These are all concentrated loads; the purifiers are supported on columns, and upon those columns loads are concentrated. It depends on the number of columns, how much the concentrated load will be. The less columns you have, the more load, and the more columns you have, the less load. I know from my own practical experience, and I have calculated many foundations for purifiers, and I know that they average from two to three tons on those foundations.

Q. Exclusive of the oxide?

A. Including the oxide it would be about 3½ tons per square foot.

Q. Then instead of having a large area to sustain your purifier you have columns upon which the weight becomes concentrated?

A. Yes.

Q. That being so, the columns must necessarily be similar in area, would they not?

A. It depends upon the load upon them.

Q. You have assumed a load and stated one?

A. I have stated that the load depends on the number of columns under the purifiers.

6662 Q. Do you know the number of columns under the purifiers here?

A. No; you asked me a general question how much the load under the purifiers was, the load upon their foundation.

Q. I asked you a general question and endeavored to aid you to come to a conclusion so as to tell me what the cost of those foundations was?

A. I have the cost here, but I cannot tell you exclusively of the cost of purifiers; I can tell you in detail.

Q. I don't want it in detail.

A. Then I cannot give it to you.

Q. You cannot tell me what percentage of the total that would be?

A. Not off hand.

Q. In your 132d Street detailed estimate, you gave an estimate of platform and stairs, $740.04. Was there any such item in your 21st Street building?

A. There was in the instance of the purifier houses and the revivifying sheds, yes. No, they were not iron; they were wooden stairs. Besides, in those buildings there are elevators for the handling of the oxide.

Q. You have given the value of these elevators in the schedule of your apparatus, have you not?

A. I do not recall whether I did in this instance or not; I think it is likely they are included in the cost of the buildings.

Q. The schedule will show. My impression is that they are in the schedule of apparatus. Those sheds were coal sheds, were they not originally?

A. I presume they were originally built for coal sheds, and for general store sheds.

Q. You have included in your estimate of their value an overhead runway to carry coal, have you not?

A. Yes, that is also included in that valuation of 16 cents per cubic foot, and the very fact that they were constructed for coal sheds made the walls exceptionally heavy and made the valuation a little more on that account. 6663

Q. Are they old sheds?

A. They are old sheds, but they are almost as good as new.

Q. They were built in 1884 and prior to that, were they not?

A. Yes, about that time.

Q. Have there been any changes in them since that time, that you know of, besides putting in purifiers and revivifying rooms?

A. No, I do not know of any.

Q. Now, I call your attention to Complainant's Exhibit 372, in which you make certain comparisons in the second column thereof, where you say: "Edgerton's value new." What do you mean by Edgerton's values new?

A. Undepreciated.

Q. As a matter of fact those values in many instances included your own values, did they not?

Mr. MATHEWSON: That has all been explained. Mr. Edgerton in his statement accepted Mr. Mayer's figures in many cases and put down the depreciated value in the last column.

Mr. KIRBY: I am quite familiar with Mr. Edgerton's schedule and if you will look at it you will see that while Mr. Edgerton did that he did it in cases where he agreed with Mr. Mayer's valuation, or because he did not have time to make appraisal on his own account.

Mr. MATHEWSON: All right; he assumed them, and we are proceeding on that same assumption in our computation.

Mr. KIRBY: That is what I want Mr. Mayer to state, and not have it as it appears on that exhibit.

Mr. MATHEWSON: He did say so yesterday, if you will look at the testimony.

6664 The MASTER: Gentlemen, the more time you waste in repartee and argument, the less you will have for the examination of witnesses.

Q. I ask you whether the column "Edgerton's values" did not in fact include value which you yourself have put on part of the apparatus? I ask as to the second column. Are those all values which were given by Mr. Edgerton, or did they include value which you gave to the apparatus, and which were taken by Mr. Edgerton, for the reason, as stated by him in his testimony, that he had neither the time nor the opportunity to appraise them himself?

Mr. MATHEWSON: We do not know why he took them.

A. These were taken from Mr. Edgerton's details; that is all I know about it. I did not compare it with his testimony.

Q. Did you read his testimony?

A. I read his testimony, but I did not compare this with his testimony. I had the figures right before me, and there was no necessity for referring to any testimony.

Q. You do not understand that Mr. Edgerton agrees with you in all of your values, do you?

Mr. MATHEWSON: Is this important? I object to this. Mr. Edgerton stated his own conclusions.

The MASTER: It is proper cross-examination, if Mr. Kirby thinks it worth while to pursue it.

Mr. KIRBY: It simply carries a wrong inference, and I do not think the exhibit should stand in that way without explanation.

6665 Q. I refer you to the third column of this exhibit where it says: "Omissions"; have you a detailed statement showing what those omissions were?

A. They all appear in my testimony. They were omissions taken from my own schedules.

Q. Do you mean to say that your testimony of yesterday gives the apparatus the values of which when totaled up will equal the value set down in that third column marked "Omissions"?

A. My previous testimony does not, the testimony of yesterday.

Q. Then these are values which you yourself have given to apparatus of parts of the plant which you did not appraise at the time you gave your prior testimony?

A. Oh, yes, I did; these are values taken from my testimony and from my schedule, which I did not find in Mr. Edgerton's valuations.

Q. Will you tell what they are?

A. Yes, I can tell you that; it took a long time to find that out.

Q. You have not prepared a statement of that?

A. Here is Mr. Edgerton's statement; I have got it right here.

Q. You have not prepared a detail of this third column?

A. No, I had not the time, but I can give it to you all from here, item for item. In the instance of the 132nd Street station——

Mr. MATHEWSON: There is nothing in there from the 136th Street station, Mr. Mayer.

Q. Take the largest, the 99th Street plant. There is $50,000 or more; that is the only item that amounts to anything, $50,000 and more; take that and tell me what it is. The other amounts are so small that I cannot waste much time on it?

A. The total amount was $50,493. Can I see the original sheet?

6666 By Mr. MATHEWSON:

Q. Yes, you may have taken that out of the wrong station; it doesn't seem to run parallel exactly (hands witness original sheet). May it have been in connectings?

The WITNESS: I am trying to find out, I cannot tell without reference to my detailed notes. There is one item 11 through benches of sixes, back to back, $48,620. There is no valuation in Mr. Edgerton's schedule for it.

By Mr. KIRBY:

Q. Are you not aware that Mr. Edgerton did value those eleven through benches, giving the cost new $39,000 with depreciation of 6½ per cent., giving it a value of $33,307, and so stated in his testimony?

A. It don't appear in this schedule.

Q. That is in your typewritten copy of the schedule?

A. That is the schedule which was furnished me.

Mr. Mathewson: Furnished by you to me, Mr. Kirby, and the one that this witness had to examine.

Q. Did you compare that with the exhibit in this case?

Mr. Mathewson: Why should he? It was a carbon copy that you delivered to me for our purposes, and if you made a change in the exhibit afterwards, and did not notify us, we are not to be held responsible.

Mr. Kirby: I have made no change in the exhibit whatever, but if Mr. Mayer had read Mr. Edgerton's testimony he would have found a reference to these very benches, and the value given.

6667 Mr. Mathewson: There is your cover and the whole thing as it was delivered to us. Do you mean to say that there has been an addition of that to the exhibit?

The Witness: I do not know whether it is in the exhibit, or whether it is not; I only know it is in the testimony.

Mr. Matthewson: There is the carbon copy which was delivered to us.

The Witness: The item is there but there is no value given.

Mr. Mathewson: And that was filed and printed as an exhibit in this case.

Q. Let us take the one for the 14th Street plant, $13,279——

A. Here is another item; I find it now, $1,650 for two Mackenzie exhausters, page 5.

Q. Don't you find a value in the very schedule that you have before you of $3,726 for those two Mackenzie exhausters?

A. The connections for the exhausters have been omitted. I think it is connections; I will refer to my detailed schedule. What station is this?

Q. Just what do you mean has been omitted, if anything?

Mr. Mathewson: I will say in regard to this typewritten exhibit that a copy was given to us long before the other was printed, and was given to the witness long before it was printed.

Mr. Kirby: You will remember that at the time Mr. Edgerton was testifying he called attention to some errors, not only of omissions, but of adding in value twice.

Mr. Mathewson: I called his attention to those on cross-examination, and my own recollection is that this was one of them, 6668 now, you mention it, but of course, I did not go over those schedules.

Mr. Kirby: I am trying to get nothing more than the fact.

Mr. Mathewson: I understand that. The amount of the omissions is not very much. It is only for accuracy that the witness has stated what they appear to be in Mr. Edgerton's schedule. It is fair to say that our question is not so much with the omissions, which are not large in amount, but the basis of valuations which Mr. Edgerton assumes in the property which he did include and value. I think that is clear.

The Witness: I have got it now.

Mr. Mathewson: What is the item?

The Witness: My price of $1,650 for the two Mackenzie exhausters—Mr. Edgerton has got a price below it of $3,726, which refers to the Greenfield vertical engines, the next item which was also taken from my schedule at the same price, but these figures are badly mixed in Mr. Edgerton's schedule; they were not copied right from my valuation.

Q. The Greenfield vertical engine has been appraised by Mr. Edgerton, has it not?

A. He has given a price for Greenfield vertical engines of $3,720, and in my valuation they are under the head of Mackenzie exhausters.

Q. The "valve as per Meyer" refers to the Mackenzie exhausters?

A. No, he has given a wrong price; that refers to the Greenfield engines.

Q. Be that as it may; what value do you give to the Mackenzie exhausters?

A. $1,650.

Q. Then Mr. Edgerton has given you the benefit of the difference between $3,726 and $1,650, and instead of being an error in 6669 the manner you have stated it is an error in the other direction, because he has valued, as you will notice on the schedule, the Greenfield engine himself and given the cost as $2,000, factory price, and with depreciation value of 15%, $1,700?

A. He applies the price which I gave him in my schedule for Greenfield engines, for Mackenzie exhausters, and did not put down the Mackenzie exhausters, which would be probably the difference between the two.

Q. And it would be a debit instead of a credit, and it is really not worth while taking up this time about it; and the fourth column of this Exhibit No. 372 is simply additions as you made them from the values you have set down there?

A. Which I set down as being omitted:

Cross-examination by Mr. Burr:

Q. Have you been in Astoria lately?

A. Yes.

Q. When?

A. Last Sunday.

Q. How many times have you been there this month?

A. Three times.

Q. Have you examined the plant over there?

A. I have.

Q. Within the past month?

A. Yes.

Q. And since Dr. Marks and Mr. Edgerton gave their testimony have you examined the plants of all the companies?

A. No, I have not.

Q. I mean, for the purpose of comparison?

A. No, it was impossible; I did not have time to do that.

Q. You did, as far as you were able, with the idea of correcting any errors in your previous valuations?

A. Yes.

Q. Did you find any errors in your previous valuations or your inventory?

A. No, sir.

Q. You have described some errors here to-day, have you not, in your inventory?

A. Do you mean these errors referred to just now?

6670 Q. Yes, and before this morning?

A. That is to say, in Mr. Edgerton's valuation that I referred to just now; it was not in my own.

Q. In making your examination of these plants and of the apparatus, if I understand you correctly, Mr. Mayer, you had the advantage of the aid and assistance of the officers and employees of the Consolidated Gas Company; you were enabled to inspect and examine and measure and weigh to your heart's content, were you not?

A. Yes.

Q. And you had all the information which was at the disposal of the officers of the company?

A. Yes, of those that I found at the gas works.

Q. You spent, you say, 3,780 hours in making an examination which has enabled you to appear here and testify so positively with regard to the correctness of your inventory and your valuation; is that correct?

A. Well, with regard to the 3,780 hours, that referred to the actual time spent in examination of the plant, not in the preparation of the schedules or the detailed valuation of the plants, only in the examination of the plant itself.

Q. That is what I thought, how many hours did you spend in the preparation of the schedule?

A. As compared with that——

Q. I am not asking you to be so particular as to designate the number of hours. Can you give me the number of days or weeks?

A. Probably at least the same number of hours, if not more.

Q. Now, allowing eight hours a day that would be 473 days or 15.7 months, would it not, for the 3,780 hours?

A. Yes, if your calculation is correct. I say yes, but I have not figured it over.

Q. And allowing twelve hours a day, it would mean 315 days or 10.5 months, assuming that my calculation is correct?

A. I presume it would.

6671 Q. You saw and consulted, undoubtedly, the inventory and calculations presented here by Dr. Marks and Mr. Edgerton, as you say, and they show at least great industry on the part of those gentlemen?

A. Yes, I don't doubt that.

Q. If I understand you correctly it is absolutely impossible for any man without the knowledge and information which Bartlett Hayward & Company possesses as to the cost of construction of gas plants, under New York conditions, to make a fair and reliable estimate as to the cost or value of these plants in the City of New York to-day?

A. Generally speaking, yes, but I would like to modify that to this extent; that is absolutely correct in the instance of holders, and most of the apparatus.

Q. And how as to the buildings?

A. Not to the buildings, because we do not construct buildings ourselves.

Q. I will ask you, after the length of time that you have spent in the actual examination of plants and holders, are you prepared to swear now here that there are no foundations in any of the plants of the Consolidated Gas Company which are unused?

A. I do not know anything about unused foundations; my valuations only included those that are used.

Q. I am asking you, will you swear that there are no foundations in the plants which are not in use? Can you swear under oath that there are no foundations in the plants of the Consolidated Gas Company which are not in use?

A. I haven't paid any attention to that; I have only valued the foundations which are in use.

Q. In other words, there may be some foundations in the plants of the Consolidated Gas Company which are not in use, and those you have paid no attention to? 6672

A. I don't know anything about those.

Q. And in ascertaining the depths and kinds of foundations which you have testified regarding, if I understand you correctly you were helped and aided by the original drawings used at the time of the construction of those foundations and which the employees or officers of the company were using at the time of the construction of these foundations?

A. That is so, the ones which I found at the works of the various stations.

Q. So that as regards those particular structures, you took the dimensions and you took the character of them as they appeared in those drawings?

A. To a large extent.

Q. Are you familiar with the exhibit introduced in evidence here known as Rowland's inventory?

A. I have never seen it and never heard of it until I came here to testify; I never heard of its existence.

Q. Then that accounts probably for what I am going to call your attention to; you have not accepted, therefore, the valuation placed by Mr. Rowland upon the various buildings itemized in his inventory, have you?

A. I have never seen it, Mr. Burr.

Q. You are quite sure you have made no mistakes of any moment in your calculations or in your inventory, and as I understand you you would desire to be understood as saying that if these other experts had all the information that you had they would have arrived at the same conclusions that you have?

A. No, I don't mean to say that. As far as I know there is no

error in any of my valuations, because they have been checked time and again. I do — mean to say that I have checked them
6673 all myself, because that would have been impossible, but I do not believe there are errors, and there are none according to my knowledge. As far as the other gentlemen reaching the same conclusion as I have is concerned, I am willing to state that under no circumstances would they reach the same conclusions, because they have not the practical experience in valuing these buildings that I have, and they could not reach the same conclusions even if they had had the same length of time at their disposal to reach those conclusions.

Mr. Burr: The conclusion is obvious.

Q. You say that Mr. Edgerton and Dr. Marks depreciated the U. G. I. water gas apparatus 20 per cent. Is it not a fact that Mr. Marks did not depreciate the U. G. I. water gas apparatus at 21st and 42nd Street stations at all?

A. I don't recall that at all; did I say that he depreciated it twenty per cent.?

Mr. Mathewson: I do not think he said that generally.

Mr. Burr: I have here this question in the typewritten record: "Now, did you observe that Mr. Edgerton's and Dr. Marks' depreciation for both the old and new U. G. I. stations, which had been for many years in operation, was twenty per cent.? A. I did."

Q. Aren't you mistaken in that? Is it not a fact that Dr. Marks did not depreciate U. G. I. apparatus in the 21st and 44th Street stations at all?

A. I cannot state that from memory. I would have to refer to the testimony and my notes and everything else.

Q. Are you not aware from the exhibit that you introduced
6674 yesterday that Dr. Marks did not depreciate the 132nd Street station at all?

A. Which exhibit is that?

Mr. Burr: I will give it to you in a second.

—— tention to the fact that there is an error there. What I said was, I think, that Mr. Edgerton *marks* the old U. G. I. sets as depreciated.

(Here Mr. Mathewson refers to the printed record at page 6599.)

My question in substance was whether Mr. Edgerton marks the old and new U. G. I. sets as having depreciated ten per cent., but not twenty per cent.; nor did the first part of the question read as the stenographer has it. I know there was nothing about twenty per cent., for I asked no such question.

Mr. Burr: And as far as Mr. Marks was concerned?

Mr. Kirby: Nor so far as Mr. Edgerton was concerned?

Mr. Mathewson: No, nor as far as Mr. Edgarton was concerned.

Q. The depreciation which you have allowed was only the depreciation for visible decay, and allowed nothing for inadequacy and increasing demands and obsolescence due to the progress of the art of gas making?

A. The depreciation which I allowed in my opinion based upon practice for the last twenty-five years of making estimates for repairs, and I considered that the actual depreciation is represented by the cost of repairs required to put the apparatus in condition as good as new, and to serve its purpose intended. As to obsolescence and inadequacy I can only state what I have stated before, that in my opinion there is no obsolescence or inadequacy from the
6675 sources which you mention, because every year each of the plants receives additions or alterations or substitutions of apparatus. Old apparatus are substituted by new ones; and in fact all of the plants are kept up to the best possible condition, and are supplied constantly with modern apparatus in order to produce the best and most economical results; therefore, I cannot conceive that obsolescence or inadequacy, is in existence.

Mr. Mathewson: The question as it should be, on page 6599 is: "Now, did you observe that Mr. Edgerton marks depreciation for both old and new U. G. I. stations which have been for many years in operation as ten per cent."? instead of twenty per cent. The answer remains as before: "I did."

Q. That depreciation which you allowed for three renewals and extensions which you have referred to as due to the causes I have named, as inadequacy, etc.?

A. No, it is due to wear and tear principally, and in this instance of course the time was too short to make a detailed estimate of the cost of repairs, to establish a positive factor of depreciation, because such depreciation, based upon the actual cost of repairs, would require more time than the valuation of the new apparatus and take them apart to a certain extent to find out what repairs would be needed. It is my opinion based upon my practice and general knowledge, based upon the approximate cost of repairs for such apparatus.

Q. These gentlemen who undertook to follow you on behalf of the defendants, making inventory and giving valuation of these various plants and apparatus, they had the benefit of your
6676 knowledge as given here where you assumed to give the age of the different plants, the dimensions, size, weight, etc., and have used those to a very large extent, have they not?

A. I think they have.

Q. Referring to Exhibit 371, 14th Street station, you stated that there was an omission of eight holders?

A. Yes.

Q. Your valuation of them being $507,398?

A. Yes.

Q. Will you look at Complainant's Exhibit 70 in this case, page 193. I will call your attention particularly to the item there marked No. 19, gas holder tanks. Six tanks, Nos. 1, 2, 3, 4, 5 and 6, including guide plates and inlets, $198,000.

A. Yes, sir.

Q. Item No. 21, gas holders—six gas holders and frames, $198,000.

A. Yes, sir.

Q. Now, referring to block number 7, page 197 of the same exhibit, item number 41, gas holders—two gas holders and frames, $52,000; number 40, gas holder tanks—two tanks, including guide plates and well, $60,000?

A. Yes.

Q. Total for eight holders, Rowland's valuation in 1884, $508,800?

A. I don't see that last.

Q. The exhibit to which I am calling your attention is Rowland's inventory, so I ask you if you do not see there the total valuation as given by him, amounting to $508,800?

A. $116,364.

Q. The $198,000 that I first called your attention to, and the other $198,000, the $52,000 and $60,000 amount to $508,800?

A. In connection with the former, that may be, but I have not been able to figure it up in my head as you call off the figures.

Q. Refer to page 198 of the same exhibit and take the recapitulation as given there?

A. Total value of machinery, buildings and holders?

6677 Q. Yes, $1,706,294?

A. Yes.

Q. Don't you observe that the $508,800 valuation, assuming my calculation to be correct, the valuation of the eight holders, is included in this $1,706,294?

A. I presume it is; I haven't seen this before, I am not sure, but I presume it. It appears to be.

Q. Will you refer to Dr. Marks' testimony, page 5063, recapitulating the inventory, 14th Street; don't you find that this total of Mr. Rowland's of $1,706,294 is the first figure in the recapitulation?

Mr. Mathewson: Show him the testimony.

Q. (Handing testimony to witness.) Don't you find that to be the first item in the inventory of the 14th Street station, Consolidated Gas Company, 1906, as given by Dr. Marks as it appears on that page, 5063?

A. It is the same as it appears on this page, 198.

Q. As appears in Mr. Rowland's inventory?

A. I don't know how it appears in Mr. Rowland's inventory. This is the first time I have seen Mr. Rowland's inventory.

Mr. Burr: It will be conceded that this is Rowland's inventory, an exhibit in this case?

Mr. Mathewson: That is what it is stated to be "total actual first cost of buildings and structures 1884, $1,706,294." If the holders were included in that I suppose the witness assumed, as I think I would have assumed, that the buildings and structures did not include holders and apparatus. I did not know about that of course; I haven't checked them up.

6678 Q. If this total, given there by him, $1,706,294, includes the $508,800 which you say was omitted for those eight holders, then you are mistaken as to that?

A. I cannot give my *po*inion as to that; I have not added up this valuation and I don't know what it is.

Q. You can see; there is the exhibit before you.

A. I see some figures here, but I cannot give an opinion on them unless I read the whole testimony.

Q. You find figures on the pages mentioned, do you not?

A. I find the figures printed in this book.

Q. Your own valuation of those eight holders in 1905 is $507,398, is it not?

A. Yes, that includes the tanks.

Q. Mr. Rowland included the tanks, as I have shown you?

A. I can form no opinion about what Mr. Rowland included; I have not read it and I do not know.

Q. I referred you to it where it appears at page 197, Block 7, Items No. 40 and No. 41.

Mr. Mathewson: If it relates to that I suppose it can be pointed out?

A. Under that item it refers to two tanks, gas holder tanks—two tanks, including guide plates and well.

Q. $60,800?

A. Yes, referring to two tanks.

Q. And Item No. 41 is two gas holders and frames, $52,000?

A. It does not include any tanks.

Mr. Mathewson: That is page 197 you are referring to, of the exhibits or the testimony?

Mr. Burr: Of the exhibit; Mr. Rowland's inventory.

The Witness: There are no tanks given in that last item. In Item No. 41 it says gas holders and in Item No. 40 it says two tanks, including guide plates and well.

6679 Q. The difference between those two valuations is $1,402, which is all the depreciation you have allowed after twenty-two or twenty-three years of service?

A. I cannot follow you in my mind. You can read it from that paper, but I have not made any comparisons between my values and Mr. Rowland's values.

Q. I am trying to follow you.

A. I have based my depreciation on my opinion irrespective of Mr. Rowland's, and therefore, I am unable to make any comparisons as to my valuations or depreciations with Mr. Rowland's.

Q. Let us assume that this valuation of Mr. Rowland's valuation is as I have stated, and the difference is as I have stated, $1,402. Is not that 27/100 of one per cent. depreciation, and is it not a fact that it is about 1/100 of one per cent. depreciation annually which you have allowed on those holders.

Mr. Mathewson: I object to this; here is Mr. Rowland's valuation, he gives certain figures and he says Mr. Mayer's is a certain other figure, and he says that the difference is Mr. Mayer's depreciation, which is ridiculous, of course.

Mr. **Burr**: That is what you had Mr. Carter for two days doing, making calculations of this kind.

The **Master**: In view of what he says about his non-use of Mr. Rowland's valuation, I do not see what use it is on cross-examination, even if it is correct. I do not see why it is not a matter for your brief.

Mr. **Burr**: This exhibit is an exhibit of the complainants'; they put it in to bind us by Mr. Rowland's valuations at that time.

6680 The **Master**: It does not appear that it affects this witness' testimony.

Mr. **Burr**: I am simply calling his attention to Mr. Rowland's valuation in 1884.

The **Master**: He says that he does not know anything about Mr. Rowland's valuation in 1884, and you cannot attack his appraisal by any question in regard to Mr. Rowland's valuation if he did not see it.

Mr. **Burr**: Except as regards the item of depreciation, showing that a certain valuation was placed upon these holders and tanks in 1884, and that there was a certain other valuation placed upon them after the lapse of twenty-three years, in 1906.

Mr. **Mathewson**: But not by this witness.

The **Master**: It seems to me very remote, but if you gentlemen want to spend your time on that instead of saving it for Dr. Humphreys or whoever else will be here tomorrow, you may do it. I do not want to cut you off in cross-examination, but it seems to me a little out of proportion to the importance of what else there is in the case.

Q. When you say that Dr. Marks agrees with your figures in regard to any of these matters, you do not mean that he follows you in allowing ten per cent. for engineering and five per cent. for interest, do you?

A. No, I am speaking of the total figures.

Q. If you add your ten per cent. for general engineering to your valuation for these holders, $507,398 it gives you a total of $558,137 for the eight holders, and if you add five per cent. to this for interest charges, does it not give $586,044, or $77,200 odd higher valuation on these eight holders than Mr. Rowland himself put upon them in 1884? 6681

A. I do not know anything about Mr. Rowland; I cannot base any opinion on it, as I do not know Mr. Rowland's figures and do not know anything about them. This is the first time I have ever seen them.

Q. But that would be the fact, assuming these figures to be correct?

Mr. **Mathewson**: I suppose your computation is correct, but the witness would have to go through it to establish its correctness.

Q. Is that correct?

A. I presume so.

Q. Will you refer to Complainant's Exhibit No. 70, page 214, of this same book?

A. Yes, sir.

Q. I call your attention to the item house No. 10, brick building on concrete foundation, composite roof, lime room and foundation for iron work, purifier house 66 x 184 feet?

A. I do not see that.

Mr. MATHEWSON: That is Mr. Rowland's valuation again?

Mr. BURR: Yes, $33,265.

The WITNESS: Yes, I see it.

Q. Page 215, house No. 9, 66 by 184 feet, $18,313?

A. Yes.

Q. House No. 8, condenser and scrubber house, 66 by 184, $43,517?

A. Yes, sir.

Q. House No. 7, storage warehouse, 66 by 184, $24,435?

A. Yes.

Q. Page 216, house No. 6, storage warehouse, 66 by 184, $27,335?

A. Yes.

Q. House No. 5, storage warehouse, 66 by 184, $23,135?

A. Yes.

Q. House No. 4, storage warehouse, 66 by 184, $26,135?

A. Yes.

Q. Page 217, house No. 3, 66 by 184, $24,771?

A. Yes.

6682 Q. House No. 2, storage warehouse, 66 by 184, $25,443?

A. Yes.

Q. Is not the total of these valuations given by Mr. Rowland in 1884, as appears by that exhibit, $246,349?

A. The total was $463,131. You did not read all the figures on those pages?

Q. I am referring you to those particular houses?

A. I cannot follow you as quick as you can read and figure up these figures to see if they are right.

Q. We have had to do considerable figuring.

A. Well, I cannot do it.

Q. If you take a piece of paper and a pencil, you can follow me?

A. Then you must not read so quick; you must give me time to put it down.

Q. If you put down the figures, and Mr. Mathewson will follow the exhibit, we will get along.

Mr. MATHEWSON: I think I ought to say here for the record that this is merely taking certain buildings described in the exhibit which Mr. Rowland appraised at a figure in 1884, and taking certain other buildings described in the exhibit; and, assuming that they compact, although Mr. Mayer includes foundations for apparatus and Mr. Rowland perhaps does not, there is no evidence as to how the building is changed, and he is asked what the difference is between two amounts. If this line is to be pursued, it seems to me it is wholly useless as a basis of comparison, and I do not want my time in putting in my direct testimony from my chief remaining witness cut down, if this consumes a great deal of time. I do not see that it is important.

6683 Mr. **Burr**: It is very brief; we have got it in concise form and it is merely to call the attention of the court to the value of depreciation as allowed by Mr. Mayer.

The **Master**: You will have to have the time to finish up your case, and it will come out of the other side, Mr. Mathewson. They can cut short their examination of some other witness. I do not think it is of any material importance myself.

A. $246,349.

Q. Are not these the buildings on the block partially bounded partially by Avenue A and other property on Avenue A, 20th Street, East River and 21st Street, with the exception of the meter house which is not taken into consideration?

A. I am not familiar with those.

Mr. **Mathewson**: That is true. Take it out and look it over.

Mr. **Burr**: Yes, he has apparently never looked at Mr. Rowland's valuation.

The **Witness**: I do not see here a description of the block that you refer to.

Q. Is not that so?

A. With the exception of the meter house—I have to find that out; which meter house is it?

Mr. **Burr**: The meter house, 21st Street and Avenue A.

Mr. **Mathewson**: Now, are there any other buildings in that schedule, which is called Rowland's appraisal, which were not included in the figures given you and which you have just added up?

—. There may be buildings specified in some other place in the exhibit; I confes I do not know.

6684 Mr. **Burr**: Mr. Mayer is familiar with them. He has valued them.

Mr. **Mathewson**: Not in regard to that exhibit; he knows nothing about it.

The **Master**: What I do not understand is this; unless there is some evidence in the case from some of these witnesses, I do not understand how the valuation made by Mr. Rowland in 1884 can be of any value as compared with the valuation made by this witness in 1906. *Non constat,* but the property may have changed in a dozen different particulars between those two dates. Suppose the wall has fallen down; suppose one story has been added to it, or something of that kind. How any comparison based on those two valuations can be of materiality here, I do not see.

Mr. **Burr**: The testimony is—Dr. Marks says that he adopted Mr. Rowland's valuation and he inspected the buildings and he gave his testimony as to the character and appearance of the buildings.

The **Master**: But this witness says that he does not know anything about Mr. Rowland's valuations and did not take them into account.

Mr. **Burr**: That is what he should have done in making his depreciation, we contend.

The **Master**: That is a matter of argument. You cannot gain anything by putting him through these valuations here, except to waste time.

Mr. Burr: I made the same objection to Mr. Carter's valuations, when he was allowed to go on with carefully prepared papers on every conceivable subject.

6685 The Master: I am not going to cut you off, only I am giving you fair warning that you may need this time for something else that you may consider more important.

The Witness: Yes, apparently they are all the buildings contained in this paper, or the value of such buildings as taken from this exhibit, with the exception of the meter house, pages 213 to 218.

Q. Referring to your testimony on page 1478, shed No. 1, as given by you, south side of 21st Street, corresponds to Shed No. 2 on Mr. Rowland's inventory, does it not? Are not those the numbers made by Mr. Rowland on the doors of those sheds?

A. What shed is that?

Q. Your testimony, page 1478?

A. What page is it here in the exhibit?

Q. I am calling your attention to your testimony at page 1478. Look at that page of the record; you gave certain valuations as they appear on that page, of the sheds numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10, didn't you?

A. I only find up to 5. Sheds Nos. 1, 2, 3, 4, and 5. Are they marked as Shed 8, 9 and 10, purifier house and condenser house?

Q. You gave certain valuations there for those sheds, including a shaving and scrubber house, purifier house, condenser and scrubber house, and shed No. 10 purifier house. The total of your valuations of those sheds appears to be $677,183, does it not?

By Mr. Mathewson:

Q. Are they valued as sheds in your testimony?

A. Only from 1 to 5.

Q. What are the rest?

A. Purifier house and condenser house, and another purifier house.

Mr. Mathewson: Then those were the sheds, when you valued them?

The Witness: No, a purifier house and condenser house.

6686 By Mr. Burr:

Q. And you call them sheds, don't you?

A. No, I do not. You call them sheds. You call them sheds 8, 9, and 10, but I call them purifier house and condenser house.

Q. I will read it correctly: Shed No. 1, Shed No. 2, Shed No. 3, Shed No. 4, Shed No. 5 and Shed No. 6?

A. There is no Shed No. 6 here.

Q. Shed No. 7, shaving and scrubber house?

A. No shed No. 7 here.

Q. Well, we will call it shaving and scrubber house. You valued that at $64,037, didn't you?

A. The shed, $67,846; purifier house, $7,626.

By Mr. MATHEWSON:

Q. Is that one shed or all the sheds, at $67,846?
A. Each. That is No. 1 shed.

By Mr. BURR:

Q. And the condenser and scrubber house, you place a valuation on that also?
A. Yes, $97,626.
Q. The purifier house, you give a valuation to that of $94,697?
A. $94,697.
Q. Is not the total of your valuation of those houses and sheds that I have called your attention to $677,183?
A. I will have to figure that up first. You include the two purifier houses and the condenser house, do you?
Q. Yes.
A. I make it $629,179.
Q. Will you add 15 per cent. and see what that makes?

Mr. MATHEWSON: Why? How do you know, even on your theory, that 15 per cent. was not included by Mr. Rowland in his appraisals, assuming that the buildings are the same.
Mr. BURR: I am giving you the benefit of adding his 15 per cent., or 10 per cent. and 5 per cent.

6687 A. Do you want 10 per cent. and 5 per cent., or 15 per cent.? It makes quite a difference.
Q. 10 and 5?
A. $725,652.
Q. Will you deduct Mr. Rowland's valuation of $246,349 from that?
A. $479,303.
Q. You do not claim that that difference is due to foundations, do you?
A. Why, Mr. Burr, I have already stated before that I do not know anything at all in comparison with Mr. Rowland's valuation; I cannot tell anything about it, as I know nothing about Mr. Rowland's valuation. I do not know how he did value the buildings, so that I am unable to make any comparison, and I cannot tell you.
Q. You refer on page 1556 to some brick and brown stone building used as an enclosure for holders?
A. That was at 18th Street, wasn't it?
Mr. MATHEWSON: Yes.
Q. Are not the brownstone trimmings on that building disintegrated and in very bad condition?
A. Yes, to some extent they were disintegrated, but just how much I do not recall at the present time.
Q. Don't you give a valuation there of $155,784, I think it is, is it not (shows to witness)?
A. I gave my valuation $169,328.
Q. What is the depreciated value?
A. $155,785.
Q. If you add to that depreciated value your ten per cent. and

five per cent, what do you make it? Or adding in round figures fifteen per cent., which amounts to $23,368, if my computation is correct, does not that amount to $179,151?

A. If your computation is correct it would amount to about that, yes.

Q. Will you refer to page 184 of Exhibit No. 70, Block No. 2, West 18th Street?

A. Yes.

6688 Q. Above 10th Avenue, two enclosed gas holders; also well, gas holder building, 188x92, brick with heavy stone trimmings, extra heavy roof, and internal framing, $45,250. That is the same property which you valued with fifteen per cent., at $179,151?

A. The location here would indicate that, yes, sir.

Q. Subtracting the valuation placed by Mr. Rowland, $45,250, from that, leaves a difference of $133,901 excess placed by you upon this building twenty-two years after Mr. Rowland valued it, is that the fact?

A. I only valued a building in the same location; whether or not it was the same building I could not tell, and therefore I cannot make any comparison with any of Mr. Rowland's statements; it is absolutely impossible for me to do so.

Q. There is only one building there, which occupies the whole block?

A. I do not know whether that building was in the same condition at the time of my examination as it was at the time Mr. Rowland examined it; besides which the cost of materials and labor at the present time is entirely different from what it was at that time.

Q. In your testimony regarding the 18th Street station you mention as an omission five sheds amounting to $145 in a total of $224,000. Have you seen those sheds?

A. Where was that, at 18th Street?

Q. Yes.

A. Yes, I have; last summer I have.

Q. As a matter —, would you say that they were worth five dollars collectively?

A. They are worth just what they are valued in my schedule; at that time I valued them carefully and I looked at them and examined them carefully.

Q. Are they fit for anything more than kindling wood?

A. Yes, they served the purpose for which they were intended at the time of my examination.

6689 Q. Don't you know that Mr. Marks stated in his testimony that he purposely left them out of his valuation, and that it was not an omission in the sense in which you use it?

A. It was an omission that appeared on the schedule.

Q. Are you not aware that the $11,800 of which you spoke, for foundations, at the 21st Street station was purposely omitted, according to the testimony of Dr. Marks, so far as the figures being included in the cost of the buildings was concerned.

A. What foundations do you refer to?

Q. 21st Street.

A. Which ones, there are lots of foundations at 21st Street.

Q. Referring to your omissions, $11,800, old retort house; you gave a valuation of that as $71,117, and you referred to an omission by Dr. Marks.

A. What was the amount?

Q. $11,800.

A. Yes, item No. 22, foundation for benches, omitted from his schedule.

Q. Don't you know that that item was included in the cost of the buildings, from his testimony?

A. No, I do not; I do not see why it should be.

Q. You have that here; and the other item $1,650 for furniture, marble fireplaces and so forth, was not that according to Dr. Marks' testimony purposely omitted, as a lot of antiquated relics?

A. I cannot recall his testimony at the present time. I know it is not in this total valuation. It is in use and is worth something; it was in use when I examined the plant.

Q. How about the other condenser; item No. 100, marked ten per cent. completed, $30,700. Do you recall that?

A. That item was omitted entirely.

Q. Don't you recall testifying yourself that there was 90 per cent. of that yet to come?

A. No, 90 per cent. of it was completed at the time; ten per
6690 cent. was to come, if I remember correctly. That condenser
was partly erected, as I remember it; and most of the material
was lying on the ground.

Q. On the contrary, was it not marked ten per cent. completed?

A. I will not be sure about that, but the material was there. I cannot tell how much of it was erected.

Q. Item No. 115, three filter presses, John Johnson & Company, $2,550.

A. It was omitted entirely from this schedule, Dr. Marks' schedule.

Q. Those filter presses were abandoned, were they not?

A. Not when I examined the plant; they were in good condition and could be used at any time.

Q. I call your attention to this other item, 16-inch Wiley Proportional meter, $1,600, Item No. 165. Was not that deemed unnecessary, and was it not merely experimental?

Mr. Mathewson: Deemed by whom unnecessary?

A. It was in position and ready for use; I presume it was in use at the time, and it was, for all I know.

Q. Dr. Marks testified that it did not appear to be in use; have you read his testimony?

A. I cannot recall.

Q. Item No. 28, $12,700, foundations for benches?

A. It is omitted from this schedule.

Q. Dr. Marks testified, didn't he, that that was valued with the building?

A. I do not recall that.

Q. Item No. 177, steel tank, $655. Did you find that yourself, Mr. Mayer?

A. Yes.

Q. Are you quite positive that that steel tank is in existence?

A. I do not know whether it is now, it was at the time I made my examination.

6691 Q. Do you recall the day when you saw that particular steel tank?

A. The day?

Q. Yes.

A. No.

Q. About how many months ago was it?

A. About seven.

Q. Dr. Marks testified that it could not be found by himself or the guide?

A. I cannot help that; that is not my fault.

Q. Referring to the 42nd Street station, you called attention to certain omissions of Dr. Marks, omissions which you say amount to $6,077, item No. 21, specifically, of that statement?

A. $156, is it not?

Q. Didn't Mr. Marks include that in his estimate for No. 2 coal shed?

A. It is marked here carpenter shop, but how he makes a connection between carpenter shop and No. 2 coal shed, I do not know.

Q. Dr. Marks testified that he did not include it in his estimate for No. 2 coal shed?

A. I did not know that. The item is here but no valuation. That is the reason I marked it as an omission.

Q. The point I want to make is this. If you read Dr. Marks' testimony he mentions these various things, and they were not negligently omitted. He did not value them because he did not consider they had any value. For instance, take item number 50, cast iron box?

A. I say I cannot recall all the testimony.

Q. In regard to that he said that the attendant knew nothing of its use, and it was apparently out of use. You say it is an omission of $636?

A. Yes.

Q. Item number 32, cribbing and earth work filling for eight oil tanks, $2,438?

A. It is omitted here.

Q. Mr. Marks allotted that to the general expense of construction, didn't he, in his testimony?

6692 A. I cannot recall it, but if he did it did not belong there; it belongs here where the item is.

Q. I call your attention to Exhibit No. 70, of page 242. Don't you find that Mr. Rowland gives four gas holders at $120,000 and four telescopic gas holders at $90,000, being a total of $210,000.

Mr. Mathewson: At what works?

The Witness: Eleventh Avenue on the Hudson River, 41st and 42nd Streets. It is marked here.

Q. Will you refer to items 94 and 95 of the inventory?

A. Of my inventory?

Mr. Mathewson: You will have to look at your inventory.

The Witness: Mine is not numbered.

Mr. Mathewson: I know it, but I guess you can find it.

The Witness: What station is it?

Mr. Mathewson: 42nd Street station apparently.

Q. Referring to your inventory, see if you did not give us a total depreciated value of those same holders in 1905 or 1906, $223,590, the value given by you, $245,209, adding to the depreciated value of those same holders in 1905 or 1906, $223,590, the value given by you, $245,209, adding to the depreciated value 10 per cent. What do you find the value given by you for those four holders in that inventory?

A. These are the four holders, 250,000 feet capacity?

Mr. Mathewson: Just look and see on the schedule.

The Witness: I am looking to see if I can compare them; I do not see how I can.

Q. What value did you give for those four gas holder tanks and four telescopic gas holders?

6693 A. For the tanks I gave $120,384, for the holders I gave $112,180.

Q. That is $232,564?

A. Yes.

Q. Now, you add 10 per cent. to that and then 5 per cent.; what do you make it?

Mr. Mathewson: Did he add 10 per cent. on holder stations?

The Witness: This is not a holder station; this is a plant.

A. To the whole plant I add that, but not to that particular item.

Q. If you add it to those two items, of which you have given the value as $120,384, and $112,180, what do you find it to be?

Mr. Mathewson: He did not add it, but if you want him to I suppose he can do it.

Mr. Burr: Yes, I would like to have him act as my computer temporarily.

A. $253,110.

Q. Now, add the five per cent.?

A. $268,610.

Q. That is a difference of $58,210 from the valuation placed by Mr. Rowland on those same holder tanks, is it not?

Mr. Mathewson: I do not know whether they are the same ones or not.

A. There is a difference between the figures given in this book and the figures given by my valuation, yes.

Q. I will not bother you to go over the omissions to which you have referred regarding the 44th Street station, save to say that they were omitted according to Dr. Marks for the same reasons, either because he did not deem them of value, or because he could not find them in his investigation.

6694 Mr. MATHEWSON: Is that your testimony or his?

Mr. BURR: I am asking him in regard to it. He is criticizing Dr. Marks' statements.

Mr. MATHEWSON: I am asking whether it is your testimony or his.

Mr. BURR: It is my statement based on Dr. Marks' evidence, and that applies to all the other stations.

Q. Now, if you refer to your Exhibit No. 373, introduced by you yesterday, you gave the exact cost per cubic foot of contents, not inc-uding foundations at fifteen cents; is that so?

A. No, that includes a certain part of the foundations; it included foundations of ordinary depth, four feet.

Q. Then, you mean by that that a cubic foot of contents is not computed to include the foundation, but that the cost of the foundations is included in the fifteen cents?

A. Ordinary depths of foundation; to a depth of four feet.

Q. Didn't you observe that Dr. Marks fixes fifteen cents per cubic foot as the true first cost of this building?

A. I believe that his figure was identical with mine in that instance.

Q. And that in his computation he says as to all these buildings he has included not only the contents of the superstructure, but also to give full measure, the contents of the cellar or basement. Do you notice that?

A. Well, the cellar or basement would form a part of that building, because my computation was based upon from the first floor line as far as the contents of the buildings are concerned, up to the edge of the roof. Now, if there was a basement under these buildings that would be included. Whether he did it on the same basis I am unable to tell. 6695

Q. In regard to this particular 132nd Street station, as appears on Exhibit No. 373, don't you also note that the result of that computation from Dr. Mark's value is $569,604 as against $540,702 obtained by yourself with the assistance of plans and the figures and facts of the entire Consolidated Gas Company at your service, as you have stated, and do you not deem this a proof that Dr. Marks' valuations are liberal and more than fair to the gas company?

A. I do not know what you are talking about. I do not see any figure here of $569,604 for this building. The biggest figure is only $26,000.

Q. While Dr. Marks is looking for that I will call your attention to another matter. I call your attention to the recapitaulation on the opposite page of Complainant's Exhibit 371. Have you got that there?

A. No, I don't know what it is.

Q. It is the exhibit offered by you yesterday?

A. Yes, I have it here.

Q. Now, I will call your attention to that exhibit, Mr. Mayer, Exhibit 371, and to your recapitulation. Do you not find on page 5108 of the testimony that Mr. Marks gives his actual present valuation at $9,348,692 for the property of the Consolidated Gas Company's plants?

A. I will have to see that testimony.

Q. Do you not find those figures given there, $9,348,692?

A. Yes, under the heading of estimated cost per annual thousand cubic feet of sales, 1905, the structural cost of buildings, apparatus and holders is given as $9,348,692.

Q. Now, referring you to the following pages, 5064, 5063, do you not find the depreciation given on the 14th Street station as $725,175, $13,200 and $6,472?

A. On page 5063?

6696 Q. Yes.

A. Yes.

Q. And on page 5064 do you not find depreciation for 42nd Street given as $472,182?

A. Yes.

Q. On page 5069 do you not find the depreciation for the 44th Street station given as $132,808?

A. Yes.

Q. And I will read the rest of page 5076, and see if they are correct: 21st Street station, $612,304.

A. Yes.

Q. Page 5084?

A. I find these figures and I will try to follow as quick as I can, just hunting up the figures.

Q. Page 5094, 99th Street station, $129,974?

A. Yes.

Q. Page 5089, 18th Street station, $165,290.

A. Yes.

Q. Page 5093, 63rd Street Station, $43,644?

A. Yes.

Q. Page 5095, 65th Street station, $81,499?

A. Yes.

Q. Page 5098, 111th Street station $96,780?

A. Yes.

Q. And on page 5101 and on page 5103, no depreciation is charged against the 132nd Street station or against the Inwood station?

A. Yes.

Q. Making a total of $2,479,323, if you want to verify that?

A. That is right.

Q. And that makes the actual present structural value given by him as a grand total, $11,828,020, does it not?

A. Yes.

By Mr. MATHEWSON:

Q. That excludes the omitted items however and of course the 10 per cent. and 5 per cent.?

A. As the figures appear I think it would.

By Mr. BURR:

Q. If you read the testimony as to the inventoried actual structu-

6697 rail cost of the buildings, manufacturing apparatus and holders of the Consolidated Gas Company, which was given by Dr. Marks with the statement that it is not customary in inventories where all the various subjects are in position to add either 10 per cent. or 5 per cent. to the cost as was necessarily done in the case of preliminary estimate of proposed works made by engineers; from your inspection of the inventory prepared by Rowland did you not observe that this was not done by Mr. Rowland in the inventory prepared by him in 1884, Complainant's Exhibit 700?

A. I did not inspect Mr. Rowland's valuation, therefore I cannot tell.

Q. Your total is $16,137,477, is it not?

A. I believe that is the figure.

Q. And that is $4,309,457 more than Mr. Marks' total of $11,828,020?

A. That was without allowing anything for the general engineering expenses and for interest charges.

By Mr. **Mathewson**:

Q. We will say that those items are items not valued, not omitted; or items whose value was included in the valuation of other buildings. Now, the original structural cost as given by Mr. Marks as you have stated appears to be $11,828,020, and this subjected to a depreciation of $2,479,328, which would be, would it not, about 21 per cent. on an average and yields an actual present value of $9,348,692. Now, have you noticed in the case of the 14th Street station——

Mr. **Mathewson**: Is that a question?

Mr. **Burr**: I am now drawing his attention to the depreciation as made up by Rowland in the case of the 14th Street——

The **Master**: He said within five minutes, and three other times, that he didn't know anything about Rowland's appraisal at all, never inspected it. 6698

Mr. **Mathewson**: I don't believe he knows whether Rowland computes depreciation or not.

The **Witness**: I know nothing about Rowland's valuation.

Mr. **Burr**: Well, of course, I do not want to unduly protract the examination as a good deal of this is more argument than testimony, but I simply desire to call the Master's attention to the great differences which exist between the figures as found by Mr. Mayer and the figures as found by Mr. Rowland for the same property in 1884.

The **Master**: I see, but it — a matter of argument rather than a question to this witness, who does not seem disposed to change his valuations at all in consequence of anything you bring out. He says he does not know anything about Rowland's figures.

Q. Will you look at Exhibit 370, 99th Street station, Item No. 2, generator house?

A. Is that the same as this (indicating a paper)?

Q. The generator house, Item No. 2, are not your cubical contents incorrect there? This is the East 99th Street station; or if your cubical contents are not wrong your multiplication of the 105,056 cubic feet at 13½ cents is incorrect, is it not?

Mr. Mathewson: Multiplication on those two would not necessarily bring Mr. Mayer's valuation, because that is only a unit figure, the result of which he adds for foundations of apparatus, etc., beyond a depth of about four feet.

6699 Mr. Burr: We will let Mr. Mayer answer it.

Mr. Mathewson: That was shown this morning in another instance exactly how he reached his total.

A. Yes, there is apparently a small difference.

Q. What is the difference?

A. I make it $133,840, as against $105,056.

Q. Now, will you multiply the cubic feet by the 13½ cents which you have adopted and see what it amounts to, or I mean multiply the number of cubic feet that you have found to be correct by 13½ cents?

A. It will make the price $15,368.

Q. Instead of $29,807, as given by you?

A. Oh, no, that only refers to the superstructure and not to the foundation. There is another item for foundation and buildings and foundations for water gas apparatus amounting to $30,732, in addition to that.

Q. That is not in Exhibit 370, is it, the generator house in East 39th Street?

Mr. Mathewson: The witness has testified that is——

The Witness: No, that is not here. It is just superstructure.

Q. Now, you see I am referring to Exhibit 370 and calling your particular attention to item 2, generator house, 69 feet x 67 feet x 24 feet, six inches high, and where you give a cubical contents of 105,056 cubic feet at 13½ cents, and your total upon that calculation at $29,807, and I ask you is not that incorrect? You have, as I understand, found that your cubical feet are incorrect, and I am now asking whether your general results, the amount, is not incorrect?

A. No, the $29,807 includes the foundations that I referred to just now.

6700 Q. Well, that don't appear in that exhibit.

A. They do not appear in that exhibit.

Mr. Burr: That is all.

Mr. Kirby: I will just state to Mr. Mathewson that I have been reading over this testimony, and in reference to the detailed estimate of that holder at 132nd Street I believe, as far as I am concerned, if Mr. Mathewson desires to put it in, I have no objection.

Mr. Mathewson: 132nd Street?

Mr. Kirby: The one you offered yesterday.

The Master: The hypothetical or typical estimate.

Mr. Mathewson: Yes, very good. I do.

Mr. Burr: I object to it as not being proper and as incompetent.

The Master: You were to call my attention to some thing, Mr. Mathewson.

Mr. Mathewson: Yes, I will, but I think I would rather examine the witness on redirect first, if it does not make any difference to the Master.

The MASTER: No difference.

Mr. KIRBY: It is quite immaterial to me one way or the other.

Redirect examination by Mr. MATHEWSON:

Q. Referring to this generator house at 99th street which you value at $29,807 you have testified, as I understand it, that your valuation of that building includes both the building and the apparatus—the foundations of apparatus?

A. That is so in all instances. In all my valuations wherever there is an apparatus in a building the foundation is included.

6701 Q. And that is true even though you do not specify it when you give the name of the house?

A. In every instance.

Q. So taking the cubical contents and multiplying by the cents per foot which represents the building with a normal foundation of only four feet the product would not give your total valuation, would it, in many cases?

A. No.

Q. And to that would have to be added the excess for the unusual foundations to get your total valuation?

A. That is right.

Q. And that is the explanation of any situation that may appear in these exhibits?

A. That is the case all through my entire valuation.

Q. Reference has been made to the supposed fact that some paint appeared to be off the holder at 63rd Street or 65th Street. Would that indicate any physical deterioration in the holder if it were painted at reasonable intervals?

A. Not at all.

Q. Mr. Edgerton testifies on page 5324 of the record that on a visit to 23rd Street he had two gentlemen with him; he also says at another place that he was accompanied by a Mr. Woodward, and he subsequently states at page 5401 that he had two assistants to go over portions of the plant, but does not state what portions they were. Assuming that Mr. Edgerton had two assistants at all times who assisted him continuously or even four assistants, would he and they have been able, in your judgment, within the time at their disposal, to make an accurate estimate of the cost of the plant to the Consolidated Gas Company which they have appraised?

Mr. BURR: Objected to. I think that whole thing was traversed before. No use of bringing up this subject again. This is
6702 not redirect-examination.

The MASTER: It is redirect-examination, but it seems to me it is a question gone over so often it is not worth while spending any more time on it. Both sides have brought that question to my mind several times; that question of insufficient time in which to make the inspection.

Mr. Mathewson: That is the only question I have on that point, unless the Master thinks it is improper.

The Master: I do not think it is improper. I think it is all right for redirect-examination, but I think it is a little cumulative, that is all.

A. I am absolutely sure that the valuation within that time with any three or three dozen assistants could not have been accomplished.

Q. You were asked why you thought that Mr. Edgerton had not measured all these apparatuses and computed, and you stated for one reason that there was no time. Did the weights which Mr. Edgerton state for apparatus so far as he did state them indicate that he had examined them accurately and carefully?

A. Not at all.

Q. Now, Mr. Edgerton at page 4688 gave the weight of a iron tank on the roof of the boiler room at 14th Street at 72,348 pounds. What was the weight of that tank?

Mr. Burr: This is not anything brought out by cross-examination, Mr. Master. This all should have been gone into on direct-examination of Mr. Mayer. It is opening up new sources for cross-examination, I submit. I think counsel should have exhausted himself on his direct-examination and his rebuttal.

6703 Mr. Mathewson: He was directly asked why he thought Mr. Edgerton had not made measurements of the apparatus. Now, he says one reason was the weights that he gave where he specified apparatus, and I am asking in reference to these particular things.

Mr. Kirby: But he should have testified to them on his direct-examination.

Question allowed; exception.

A. 90,000 pounds.

Q. On page 5336 he mentions eight purifiers at 42d Street and gave the weight as 443,544 pounds for the eight. What was the weight?

A. 675,720 pounds.

Q. At page 5342 he refers to the four holders, 250,000 pounds each at 42d Street. He said the weight was 1,120,000 pounds. What was the weight?

A. 1,580,000 pounds.

Q. At page 5432 he gave the weight of four holders at the 44th Street station as 203,300 pounds. He gave the weight of the holders with their frames and connections in items totaling 1,373,200 pounds. What was the weight of all those?

A. 1,751,880 pounds.

Q. At page 5355 he gave the weight of two holders at 65th Street as totaling 2,124,000 pounds each. What was the weight of the two holders?

A. For the two together, 805,600 pounds.

Q. I don't think you have got the right place?

A. 65th Street?

Q. Yes, there is the figure you made for your examination?

A. What size holders were those? Oh, those were the million foot holders?

Q. Yes, 2,124,000 each or 4,248,000 for the two?

A. The weight of one was 2,774,800 pounds and the other was 2,869,920 pounds.

6704 Q. Including shell, guide frame and connections in each?

A. Yes, sir; a total for the two of 5,614,720.

Q. Did you observe any case where Mr. Edgerton gave the weights, where he gave the actual weights as you recall it, of apparatus or the holders?

A. No.

Q. Now, I will ask you one general question in reference to Mr. Logan's testimony. Counsel for the complainant——

Mr. Kirby: This is certainly not redirect-examination.

Mr. Mathewson: I know it is not and I will recall the witness, if you put it that way, for a single question. I know this is not.

Q. Counsel for the complainant gave Mr. Logan certain weights and asked him if he assumed those weights whether the valuation would be equal to your valuation, Mr. Mayer, or asked those questions in substance. Were the weights which were given to Mr. Logan in those questions the actual weights that you had found?

A. That was right.

Mr. Mathewson: I can go over them all. I have them here, but I think it is easier in that way.

Q. In each case?

A. In each case.

Q. Now, you were asked where you got the figures from which you made comparison with Mr. Edgerton's unit values of different material. Were they not the figures giving or purporting to give the details of valuation of the different buildings which were handed by defendant's counsel to me and delivered by me to you?

A. Yes.

6705 Q. Did you use any other figures from any source but this in making the comparison?

A. I did not.

Q. In reference to piling; supposing you could get no information and had no drawings, but knew that the character of the soil was wet or swampy below a depth of three or four feet. Would it not be known to you as an engineer that you would have to put in pile foundations or other expensive foundations from that fact alone?

A. Absolutely, and I should certainly put in sufficient in a gas works because I know the danger arising from an insufficient amount of piling.

Q. In case a building is erected on an insufficient foundation in such soil it is not possible to put additional weight in the building, is it, without putting in a foundation which would mean the destruction of the building after the building is once built.

Objected to as calling for a conclusion, as the previous question did and as all those questions do which commence "Is it not an impossibility," which Mr. Mathewson has so frequently used; and as incompetent, immaterial and irrelevant.

The **Master**: The question is undoubtedly objectionable as to form, Mr. Mathewson.

Q. If you desire to use a building to sustain a heavy weight in a gas plant located on such soil as is without pile foundations, would it be an expensive thing to reconstruct and put different foundations under the building after it is constructed?

Objected to as calling for a conclusion.

Question allowed. Exception.

A. No. It would be entirely too expensive to do it afterwards.

6706 Q. Did you take into account the fact that a wall was leading at one of the stations and that there were truss girders in buildings to which attention was called in making your estimate of value?

A. I believe that was in 14th Street, either 14th or 21st Street, I am not quite sure about that. The walls were bulged very much and leaning, and that to my mind was an indication of an instance where an insufficient amount of piling had been used or else the piles were cut down at a point above the water line and had rotted.

Q. Did you find the wall had been buttressed or otherwise supported?

A. The insufficiency of the piling had been taken care of by buttressing and the trusses you referred to.

Q. Did the wall appear to be firm at the time you examined it?

A. Absolutely, with those additions.

Q. Your attention has been called to the fact that contractors sometimes submit estimates in reference to apparatus where it is desired. Did you take that into consideration in computing your ten per cent. engineering cost to the company?

A. Well that is not to be taken into consideration directly in the ten per cent. charged for general engineering cost, which the contractor submits in the way of a general proposal and has not the slightest bearing on the work that is to be performed by the gas company in designing and arranging a gas plant.

Q. Is it general engineering and drawing of plans, grading, curbing, the storage and drain pipes and temporary fences and other things of that sort which go into the ten per cent. which the company has to expend?

6707 A. It is. I want to say right here that in some instances the grading amounts sometimes to digging away earth and often rock extending from fifteen to twenty feet above the surface before it is graded, and that sometimes goes over the entire surface of the building lot occupied by the gas works. A very large amount of earth under this condition was removed in the case of the new works at Astoria.

Q. Mr. Marks has testified as defendant's counsel has called your attention, that it is not customary for engineers in inventoring an existing plant to make an estimate of its value, to include ten per cent. for engineering expenses; or five per cent., is that the fact?

A. I have to differ with Dr. Marks for the simple reason that it is an expense which the gas company has got to go to in designing the plant.

Q. Your attention was called to the fact that bricks are a little lower at this time of the year than they are in the summer. How does the price of other building material compare now with what it did last summer?

A. In a great many instances the cost of material is higher, particularly in the instance of lumber and also of steel. Steel plate alone went up in price since about the first of January, $8 a ton. Even with the bricks lower at this time of the year the cost of laying them would be considerably more than the difference in cost of the material or the total cost of $25, for the reason that the inclemency of the weather would not permit of laying brick at the same rate as in summer.

Q. What rate of wages did you assume in your estimate of cost in New York City, I mean Union rates or other rates?

6708 A. Only Union rates, for the reason that the work could not be executed and finished within the time required by the gas company to permit them of using the plant when they need it without Union labor.

Q. Referring to the table of this 132d Street building, respecting which counsel has examined you, I observe that it figures up $21,160, and there appeared to be masonry $1,370, concrete $480, and the various other items mentioned for that total amount, and the item after which the "etc." occurs is as follows: "$150, painting, etc., isn't it?

A. Yes.

Q. Would you as an engineer suppose that any great amount was included in this $150 for painting?

Mr. Burr: Objected to.

The Master: It is hardly a question calling for expert opinion.

Mr. Mathewson: I thought not originally. I could not exactly understand the purpose of the examination.

I offer these sheets in evidence.

Mr. Burr: I object to the introduction of these because it is quite evident they are mainly pencil marks and incomplete data upon which some conclusion was reached by the witness Edgerton.

Mr. Mathewson: It shows the $21,000 at which he valued the plant very clearly.

Objection overruled; exception.

The Master: It being understood they are allowed simply for the purpose of meeting so much of the cross-examination as related to the question of what was included under the item "etc.," and such length on the subject of this memorandum and I assume you offer it to meet them?

Mr. Mathewson: I do.

6709 Mr. Burr: Then there is no objection to that item "etc." being marked in evidence, but here is a whole lot there that I don't know anything about.

The **Master**: It has no probative force except for the purpose for which it is admitted.

Mr. **Mathewson**: He testified respecting them before and I would be quite entitled to call for them and introduce them independently of any examination of this witness.

Mr. **Burr**: At this hour and at this time I think it is wholly improper, and I object to it as incompetent, irrelevant and not proper rebuttal.

Objection overruled; exception.

Mr. **Burr**: Exception.

Mr. **Kirby**: Exception.

Received in evidence and marked Complainant's Exhibit 375.

Q. You were asked in respect to the shop item No. 2, 21st Street, as compared with the 132nd Street—governor house, wasn't it?

A. Yes.

Q. And whether certain items in 132nd Street did not appear in the construction of the shop. On the other hand, is it a fact that certain features in the construction of a shop did not appear in the construction of the 132nd Street house?

A. It is impossible to make a comparison between the two buildings. They are so different in character and nature that no comparison is possible.

Q. When asked in reference to foundations you said that foundations must carry about three and one-half to four tons per foot. In addition to the weight of the purifier boxes and covers and the carriages generally the foundations have to carry the weight of the water in the seal and floors of the building.

A. Yes.

6710 Q. And the weight of the columns themselves, of course?

A. Yes.

Mr. **Burr**: I object to that as being improper, "of course" and assuming and telling the witness what they must do and what they must carry. This witness is entirely competent to tell what is the situation under the circumstances.

The **Master**: Do not lead him, Mr. Mathewson.

Mr. **Mathewson**: I will try not to. Where he is asked if certain things are not carried, it seems to me that I am entitled to draw his attention to some things and ask if they are carried. It would seem to me so, at any rate.

Q. Now, you were also questioned as to certain buildings in 1884 which were appraised by Mr. Rowland and then as to your appraisal at present. Do you know what changes of construction or otherwise have been made in any building appraised by Mr. Rowland in 1884 within the last twenty-two years.

A. I know that a great many changes have been made in all the buildings, but just what they consist of since Rowland's valuation of course I do not know.

Q. You know how many of them have had buttresses added, do you?

Mr. **Burr**: He has stated he does not know.

Mr. **Mathewson**: Yes, I know he has.

Q. Well, we will take eight sheds and which appear to have been valued by Rowland and now there appear to be five sheds and three purifier houses. Do purifier houses require any foundations 6711 and apparatus or otherwise or other things that you do not ordinarily find in sheds?

A. A great many.

Q. How about condenser house?

A. The same there.

Q. Do you know how the condition of any of the apparatus in 1884 compares with the condition at present?

A. I do not.

Q. Do you know how much has been spent on any item in replacements or repairs or renewals?

A. No, I cannot tell you that.

Q. Is it possible for you to make any comparison without knowing all the details as to conditions then and exactly what the buildings contain and what their construction was as compared to the present?

Objected to as calling for a conclusion of the witness.

Question allowed; exception.

A. It would be absolutely impossible for me to make a comparison unless I knew what was included in Mr. Rowland's valuation.

Q. Do you know in what buildings of Mr. Rowland he included any foundations of apparatus, if he included such foundations in any building?

A. I can tell you nothing at all about it.

Mr. **Mathewson**: Now, Mr. Master, I wish to renew this offer in evidence of Complainant's Exhibit 374 for identification. The testimony as I find it of Mr. Edgerton on page 5118 that there are many small and some large items that he was unable to calculate out on account of the number. He stated at page 5333 he had not 6712 figured the weight of six holders at 14th Street at all and based his estimate entirely upon their capacity. He stated at page 5336 that two other holders at 14th Street were figured on capacity and that he did not estimate separately for the guide frames. He stated that two holders at 65th Street were calculated on their cubic contents and he stated (p. 5373) he did not compute the weight of apparatus, and from that its value in every case; he stated (p. 5403) he took guide frames at 42nd Street at one-third the weight of the holder, and so on.

The **Master**: Now, as I understand it this exhibit that you offer amounts to this, that the witness says that no proper estimate can be made by the method that Mr. Edgerton has shown, that he used, and that the only proper sort of estimate is one going into details such as that typical exhibit that you offer.

Mr. **Mathewson**: Yes, and he also says in addition that it is impossible within the time which was at Mr. Edgerton's disposal to make such detailed estimates, all of which should be corroborated by an exhibition of the details required for even a single holder which this witness says does not require so much figuring as a good many other kinds of apparatus.

Mr. **Burr**: I do not quite understand this, not having had an opportunity to look over the numerous pages of which this document is composed—some thirty-six uages.

The **Master**: As I understand it, he says that is the way you ought to figure on the cost of a holder.

By Mr. **Burr**:

6713 Q. Are these the various costs given here on this paper?

A. Only the weight. The costs are given in my testimony as to the cents per pound of its value in detail.

Q. This merely is a bill of material, is it not?

A. No, that is an estimate of the weight and of the various parts entering into the construction of the holder.

Mr. **Mathewson**: You will see at the end of the statement of the number of feet total.

Mr. **Burr**: I notice here at the end, and that is why I base my objection against its introduction, that 5,180,980 multiplied by .67 cents per pound gives $347,125.66.

Q. For what particular plant or piece of machinery does that have reference?

A. To the 132nd Street holder. I stated yesterday those were the hypothetical dimensions of the 132nd Street holder.

Q. Then this is an estimate on the 132nd Street holder?

A. Of a holder of the same size. In this instance a little bit lighter.

Q. Does that purport to give the amounts paid for the various materials used in that holder?

A. Not at all. It is a detailed estimate upon which is based the final price at so many cents per pound, to which I have testified in my testimony, and I will give you the figures in detail how the price of a pound was made up, and I can do it again now, if you want it.

Mr. **Burr**: I object to it as incompetent, immaterial and irrelevant.

The **Master**: Mr. Kirby's objection is withdrawn, do I understand?

Mr. **Kirby**: Yes, I do not care one way or the other whether it is in or not.

6714 The **Master**: I will allow it.

Mr. **Burr**: Exception.

Received in evidence and marked Complainant's Exhibit 376.

Recross-examination by Mr. **Kirby**:

Q. You spoke with reference to the weight of a tank at one of the stations to which you gave a weight of 90,000 pounds. How did you get that weight?

A. I had taken the measurement of the tank and estimated the weight in detail from those dimensions.

Q. Did you make those measurements?

A. They were made under my direction.

Q. And if Mr. Edgerton made his measurements I assume that you would consider that the difference lay in the accuracy of one man's measurements over the other, would you not?

A. They are in the accuracy of the measurements or the thickness of the metal or the calculations themselves; there are three chances of making error.

Q. I assume measurements made not only of dimensions but of thickness of metal?

A. Everything included.

Q. Have you the measurements of that tank?

A. No, not here. I had them all at the time I gave my testimony.

Q. Take the purifiers of the 42d Street works to which you give a weight of 675,720 pounds. How would you get the weights of those purifiers?

A. Those purifiers were measured and then an estimate taken from those that I referred to as having been made during the last twenty-five years of the same size purifiers corresponding to the measurements of the boxes in this instance.

6715 Q. So that if Mr. Edgerton had measured the size of the purifier, the thickness of the material would enter therein, and would have made his measurements and multiplications correctly; would he not have been apt to have come to a more correct result than this which you obtained by comparison.

A. No, quite to the contrary. I am quite satisfied any results would have been incorrect. He is not familiar with the detail of construction and I am quite satisfied that he would probably leave out of the detailed estimate at least 25 per cent. of material that should be in it.

Q. How do you know that Mr. Edgerton is not familiar with the detailed construction of a purifier?

A. Because he has not constructed any to any large extent.

Q. Well, if he has constructed one, doesn't he know?

A. No, that is only a trial but not an experience upon which you can base the valuation of an apparatus.

Q. I am not talking about valuation, sir. I am talking of size and how they are made?

A. Well?

Q. And if a man builds one doesn't he know as well as if he built a dozen?

A. No.

Q. Though they are all the same, as you state?

A. No, he doesn't know. He does not. Every time he builds one it is quite a problem to figure the statical calculation and the sizes therefrom and ascertain the proper thickness of the plates.

Q. And how do you estimate it, by comparison?

A. I have taken the same size of purifier, the same hypothetical dimension of a purifier, and I know that is absolutely right and fits the occasion.

Q. That is quite true——

A. There is no comparison about it. It is an absolute detailed estimate for that situation; no comparison.

Q. Now, therefore, if Mr. Edgerton measures the size and dimensions of the material going to make up those purifier boxes has he not the data upon which he can base his estimate? 6716

A. I venture to say that if Mr. Edgerton would do so it would take him not less than a week to make an estimate of one set of purifiers, and then I do not believe he would have everything in there that belongs in it.

Q. Let us take your holder at 42nd Street. How did you get the weight of that holder?

The Master: If you are going on in this way we will adjourn now till 9:30 o'clock tomorrow morning.

Mr. Kirby: I do not desire to go into this. I would not have gone into it.

The Master: I am not complaining of you. You have a right to recross-examine, but are apparently starting out now on a line of examination that will consume quite some time.

Mr. Kirby: It will, of necessity, not because I want to.

At 6.10 P. M. adjourned to February 1st, 1907, at 9.30 A. M.

Last Exhibits:

Complainant's, 376.
State's, OO.
City's, 236.

6717 Circuit Court of the United States, Southern District of New York.

CONSOLIDATED GAS COMPANY OF NEW YORK, Complainant,

vs.

JULIUS M. MAYER, as Attorney General of the State of New York; WILLIAM TRAVERS JEROME, as District Attorney of New York County; FREDERICK E. GUNNISON, JOHN C. DAVIES, and LUCIAN L. SHEDDEN, Constituting the New York State Commission of Gas and Electricity, and THE CITY OF NEW YORK, Defendants.

Before Arthur H. Masten, Special Master.

NEW YORK, *February* 1, 1907.

Met pursuant to adjournment.

Present: The Master, Mr. Mathewson, Mr. Kirby, Mr. Burr.

6718 FREDERICK J. MAYER resumed the stand and further testified:

Cross-examination by Mr. KIRBY (continued):

Q. Last evening you were speaking of the purifier boxes at 42nd Street, of which you gave the weight, as estimated by you, 675,720 pounds. I have before me the description of the apparatus for the 42nd Street station, furnished in the manner noted by Mr. Mathewson yesterday, and I ask you if the boxes, the description of which I now read, are those of which you gave the weights just mentioned?

Mr. Mathewson: Take your own memorandum and see if it is accurate, Mr. Mayer.

The Witness: Is that 42nd Street?

Mr. Kirby: Yes, the ones of which you gave the weight yesterday.

Q. I read from the description:

"Eight purifier boxes, 20 feet by 3 feet deep by 22 feet, 24 inch by 4 inch cups;

Two layers of trays, connections and supports;

Eight W. I. covers, 20 feet by 22 feet by 3 feet 6 inch boxes."

Is that the description which you used in making your calculation of weight?

A. That is right.

Q. Now, have you the details giving the size of the iron work going to make up those boxes?

A. No, I have not those details now; I did have them last summer at the time I made my valuation. This is 42nd Street. If I remember correctly, I built those boxes myself. I think in this instance they are likely to be the actual shipping weight. That was formerly the Metropolitan Company, and I believe I built those boxes myself.

6719 Q. Are you prepared to state whether or not you took the sizes of the various materials going to make up these boxes from actual measurement of the same as the box appears, or from drawings or specifications which you may have had in your possession, or obtained from some one?

A. The actual measurements were taken first by a man competent and familiar with the details of such boxes, under my direct supervision. Those measurements were then used in selecting the detailed estimate amongst thousands of estimates that fit these particular boxes, or boxes of the same dimensions. From those detailed estimates, which were made by myself or under my direct supervision within the last twenty-five years, the detailed weights were arrived at. All those details I had here last summer at the time I made my valuation.

Q. So that it was possible for your assistants to measure the dimensions as set down here, and not only to measure their dimensions, but to measure the thickness of the material used in the construction of those boxes?

A. Yes, it was.

Q. Do I understand you to say that it would have been impossible for Mr. Edgerton to have also made those measurements of thickness?

A. I say it would have been impossible for him to do that in every instance, in the fifty hours that he spent at the works.

Q. I didn't ask you that. I asked you if as to those particular boxes, of which you have given the weights and to which you have made reference, it would have been impossible for Mr. Edgerton to have measured the thickness of the material?

A. No, not if he did not spend any time anywhere else except on those boxes; he might have measured that particular set of boxes, but not the other apparatus which he claims he did.

6720 Q. You measured each purifier box in every plant?

A. Each and every one purifier box, and every other apparatus in each and every plant.

Q. And the thickness of the material going to make up each purifier box in each and every plant?

A. Where an apparatus was not enclosed it was measured; and where it was enclosed entirely you cannot measure it.

Q. You did not take, say, a purifier box of the same dimensions which might be at some other plant, and having applied a weight and value to the first purifier box which you measured, and, taking the thickness of the material, apply the same weight and measurements to the other one which was of the same size?

A. Not at all, Mr. Kirby. I just told you that these weights were selected from thousands of estimates prepared within the last twenty-five years either by myself or under my supervision.

Q. Did it happen in any instance that this estimate that you selected was for more than one purifier box?

A. Yes, of course, if a purifier box is of the same dimensions it is applicable under the same conditions, and these estimates are correct in detail, for the simple reason that a cubic foot or a cubic inch of iron twenty-five years ago did not weigh any more than it does weigh to-day?

Q. But twenty-five years ago it might have been that they used more material in purifier boxes than they do to-day, might it not?

A. And that is taken care of by the detailed estimates which have been *been* made, as I said before, by me or under my direction for the last twentyfive years, as compared with estimates made at a more recent date. I told you that it was selected from thousands of estimates.

Q. Quite so; a purifier box erected to-day might have an 6721 entirely different weight, though, from one that was erected twenty-five years ago?

A. It is possible, of course, depending upon the size and detail of construction, upon which I dwelt so forcibly last night before we left.

Q. Do I understand you to say that it is your opinion that with all the dimensions of a purifier box, together with the thickness of both the wrought and the cast iron, the width and depth of the cups, the width and the thickness of the flanges, the length and sizes of the T-iron supporting the covers, and the length, number and sizes of the T-iron supporting the trays, that it would have been impossible for Mr. Edgerton with his experience in the gas business, as it has been set down in this record, both in designing, constructing and operating works, to correctly calculate the weight of this purifier box?

A. If this purifier box was in use he had no chance to go inside of it and measure anything pertaining to the inside of it.

Mr. MATHEWSON: Supposing he had all those dimensions?

A. (Continuing:) If he had all the dimensions and had not omitted any, he probably could make a correct estimate of the weight.

Q. How would he get the inside dimensions?

A. By going inside the box.

Q. Suppose the covers had been lifted?

A. Then he had access to the interior of the box.

Q. Don't you know that the covers were lifted for him?

A. I do not, but I know from his estimate that he did not include the value of any trays or any supports for the trays.

Q. How do you know that?

A. Because it don't appear in his estimate.

6722 Q. Have you seen the details of his estimate?

A. No, he has not shown it.

Q. Then how do you know?

A. Because he has not mentioned it. He has used so many cents per pound, and he cannot do that unless he has got sufficient practical knowledge to apply it.

Q. Don't you consider that a man of his experience has practical enough knowledge to measure the dimensions of a purifier box?

A. I know he has not sufficient practical experience to include the cost of the trays and supports for the trays on a per pound price. It is only a practical man who has been long years in the business who has sufficient knowledge to know how such factors can be applied.

Q. And you do not consider that his experience in the business is sufficient for him to measure up the exterior and interior of a purifier box?

Mr. Mathewson: He did not say so.

A. That is not the question; that is not what I said. I said his practical experience is such, what is not based upon any assumption, but upon my actual knowledge for a great many years, and I know he has not sufficient familiarity with the details of construction as would enable him to incorporate the values of trays and tray supports on a per pound price. He does not know how to apply it.

Q. Not if he had made a detailed examination of the interior?

A. No, it is a question of practical experience to apply such factors.

Q. Do you consider that a purifying box is a very complicated piece of apparatus?

A. Not to a constructing engineer. It might be to a man who occupies the standpoint of a buyer, for instance, but not to a constructing engineer. As a buyer he might buy the cheapest, 6723 but it would prove the most expensive in the end, because there would be so many omisions that would have to be furnished afterwards that the total cost would be the same as if he had accepted the highest price submitted.

Q. But when you buy a purifying box you buy it complete, don't you?

A. That depends on the specifications accompanying the bid. If you buy from irresponsible people you will have to buy a lot of things afterwards.

Q. I call your attention to some diagrams set down upon pages 143, 144, 145 of "Newbigging's Handbook for Practical Engineers," and I ask you if you will point out to me the complicated parts of a purifier box.

A. I have not stated that the construction of a purifier was complicated. I will say that it might be complicated to an inexperienced man such as a buyer, but it is not complicated to a constructing engineer. And right here in this instance I want to say that there are no tray supports and no trays shown; as I said before, Mr. Edgerton omitted them in his estimate.

Q. Look at page 141, and I think you will see a section which shows the trays.

A. That is a different section from what you showed me. In this one it is included and in the other one it was omitted.

Q. I mentioned three pages and you failed to take notice of any but the first page.

A. As I said before, Mr. Kirby, to the eye of a constructing engineer familiar with the details of construction of course it is apparent at once, but to the eye of an inexperienced man, such as a buyer, it is not.

Q. On page 141 is a section through a purifier box, is it not?

A. Yes.

Q. The horizontal lines there indicate trays, do they not?

A. Yes.

Q. Is there anything very complicated in that?

A. There is nothing complicated to me, anywhere, in any of those places.

6724 Q. Page 144 I show you another section which is the box with the tray left out, and the carrying carriage and the hoist by which the box is lifted. I asked you if there is anything very complicated in that.

A. Now, as to that, when you get right down to the point of detail of construction there is more complication in this little picture than it appears to possess, to the eye of a man that don't know.

Q. I can believe that.

A. I venture to say right now that Mr. Edgerton does not know how large to make the bottom plate, just one bottom plate of a purifier, so as to take care of the cooling strains that exist in the process of cooling in the mould, which enter into consideration as a factor to resist pressure. That is a complication that he does not know.

Q. Don't the pattern makers have a scale which allows for contraction and expansion?

A. You do not understand my remarks. I am talking about shrinkage strains which occur in the casting, during the process of cooling in the mould.

Mr. Mathewson: Not the reduction of the size?

A. (Continuing:) The pattern maker does not know that; he has nothing to do with that. It is a question for the constructing engineer to decide that.

Q. Then there is no method of measuring the thickness of that bottom plate?

A. A method of measuring it? Certainly you can measure anything that is accessible. In connection with my remarks I want to add that the cooling strains have to be taken care of, in the dimensioning and sizing of the plate, and the ribbing and the thickness of the plates, to prevent its cracking when in operation. It is
6725 a well-known fact that bottom plates in purifiers have cracked from apparently unaccountable causes. If you take our purifier bottoms you will find that there are no cracks. This is attributable to these details which appear to you as being not in existence.

Q. No; this being what you designate now as your purifier box, I presume it would have all those strengthening materials that you mentioned.

A. Yes it would.

Q. And one who had an opportunity to examine should observe that in his examination, should he not?

A. If they were there, yes, he should find them.

Q. And if they were not there they ought not naturally to be included in the estimate of the value of the box?

A. Certainly not.

Q. I ask if you consider that these figures with the dimensions are such as will set down upon the box?

Mr. Mathewson: The dimensions of the covers?

Mr. Kirby: 8 wrought iron covers, 20 x 22, with 24 inch x 4 inch cups, etc.

A. There is always an allowance for a variation of the cups around the boxes, and in designating the size of the cover, you always refer to the size of the box. It is common with all constructing engineers.

Q. If Mr. Edgerton in making measurements ascertains that the covers were of greater dimensions than set down here, and so calculated them he would not be in error, would he?

A. That is not in error in either direction. The covers for 4 inch cups are always 5 inches larger in each direction than the
6726 box, and the size of the covers always refers to the size of the box.

Q. So that the dimensions given here for covers are not in fact the true dimensions?

A. Yes, they are, because the constructing engineer always adds half the size of the cup for the cover.

Q. But the weight of material in these covers, you would have to use larger dimensious than are set down in this schedule, would you not?

A. No, for the constructing engineer handling it, knows just exactly how to apply that difference, which I do in every instance. Besides I think you will find the covers for boxes. I think you will find it reads. It does not say eight covers so and so big.

Q. And such covers would be larger in size than the boxes?

A. Yes, by five inches—half the width of the cup.

Q. So that taking their dimensions you do not think it would be correct rather than taking the dimensions as set down?

A. I did not set down the dimensions of the cover. I said the covers for such size boxes.

Q. If you will listen until I have finished my question you will not be led into error?

A. You asked about the size of the cover given there. I did not give the size of the cover. I gave the size of cover for such size boxes.

Mr. MATHEWSON: This inventory was made by you for your own purposes, was it not?

The WITNESS: Certainly.

Mr. MATHEWSON: Not to be delivered to anybody else?

The WITNESS: Certainly not, every constructing engineer of gas works knows how to apply such dimensions.

6727 Q. Have you the details of the foundations under those purifier boxes?

A. No, I haven't got them now, I had them all last summer.

Q. The foundation as indicated in Newbigging's—can you give a general idea?

A. Not at all; foundations in every instance would differ from those under other conditions.

Q. I am asking you how this condition at 42nd Street compares with that down here?

A. Not at all; that is merely an assumption. That is based upon nothing; it is a sketch.

Q. I want you to tell me, inasmuch as you have not your details here, how the foundations are situated at 42nd Street?

A. They are piled.

Q. The foundations are piled, and the supports for the purifying boxes?

A. They are piled.

Q. Piled below the foundations?

A. Below the column foundations.

Q. They come up to the columns?

A. Yes.

Q. Are the columns in any way similar to this sketch?

A. Well, a column is a column, and there is not a great deal of variance in the appearance of a cast iron column; they look pretty near all alike.

Q. And the columns as placed under the purifying boxes, disregarding the question of piling, are similarly placed in this sketch to what they are in 42nd Street?

A. Not at all; it has got no bearing upon that at all, on 42nd Street, and it does not admit of any comparison.

Q. Are there more columns?

A. Mr. Kirby, it is impossible to say that off-hand, by comparing it with a sketch and a book which does not refer to any particular job at all.

Q. I am very anxious to get at the truth, and you have not your details here?

6728 A. If I had my details here I would not be able to tell you that. I would have to have the plan of the building to find that out.

Q. You haven't that plan, have you?

A. Not now. I have not. It is a well-known fact that in modern construction the number of columns is reduced to a minimum, and in fact I have executed a great many constructions without any columns. Instead of using them, I have put the weight in the supporting girders, which extend from side wall to side wall of the building.

Q. You do not remember how many columns there are under these purifying boxes, if any, do you?

A. No, I couldn't tell you that now.

Q. Now, you spoke of the bulging of the walls of the building at 14th Street. Does this bulging show a settlement of the walls?

A. It absolutely indicates it.

Q. Now, if those walls settled, why is it that the piping running from that building or into it was not broken?

A. I did not say it was not broken; it might have been broken and repaired.

Q. If a wall settles in that way does it break the pipes entering or leaving the building?

A. It undoubtedly would if there was sufficient settlement. I have known that to occur in many instances.

Q. Would a most minute settlement, say 1-16 of an inch?

A. It depends on the limit of elasticity of the pipe connections as to how long it would be before the fracture would occur.

Q. Are pipes running in and out of buildings in gasworks so placed that they will be able to compensate for a slight settling?

A. They are.

Q. And in running through walls, is it not the custom to leave a small space around so that a settlement or variance in the relative position of the wall, if small, will not disturb the pipe?

A. That is true.

6729 Q. You have placed in evidence Complainant's Exhibit 376, detailed estimated weights of 5,000,000 cubic feet holder, and stated that the details set down in this exhibit are necessary to be obtained in calculating the weight, and from the weight the value of a gas holder. Is that correct?

A. That is right.

Q. Now, does this detail include not only the tanks proper and the framing, but also any internal framing which may be in the holder?

A. Everything and anything belonging to that holder from beginning to end and from start to finish.

Q. Am I right in assuming that some of these articles set down under the heading "Flange Steel" are for the interior framing of the holder, or if not, will you point out to me such material?

A. Yes, in this instance it is. It belongs to the vertical stiffeners of the second section.

Q. And there is distributed throughout the schedule all the material which there is in any one of the holders?

A. Yes, the entire material is set down from beginning to end of construction.

Q. Will you tell me which holders of the Consolidated Gas Company you have the same details for as are set down in this Exhibit No. 377?

A. I cannot tell you from memory, but a large majority; within the last six or eight years nobody but Bartlett, Hayward & Company has built any holders in New York or Brooklyn.

Q. Outside of the holders erected within the last six or eight years?

A. A great many estimates of the other holders, yes, just how many I cannot tell you.

Q. Let us take up the holders of the various stations? Have you the details of construction of the holder at 132d Street.

A. That is the one (indicating) or one of the same size.

6730 Q. By that you mean the estimate set down in Complainant's Exhibit No. 379?

A. Yes, sir.

Q. And the holders at 65th Street?

Mr. Mathewson: You mean has he identified the 65th Street?

Mr. Kirby: Yes.

A. Yes, I believe I built the 65th Street holders.

Q. In coming to your appraisal of that holder, you prepared a schedule such as this?

A. I took my weights from such a detailed estimate such as that.

Q. And did you do the same thing with the holders at 65th Street?

A. Yes, I did, I built those.

Q. Did you take the weights in the same way of the holders at 44th Street?

A. In every instance.

Q. And at 42d Street?

A. In every instance. I built the four holders at 42d Street.

Q. And 18th Street?

A. There are only two holders. Yes, they were taken from detailed estimates.

Q. When were those 18th Street holders erected?

A. I do not remember, but it was a good many years ago.

Q. And from what source did you get the detailed estimate?

A. The same source as I got that.

Q. From the builders?

A. From my own estimates made within the last twenty-five or thirty years, of the same size holders.

Q. Then, it was not for the identical holder there to-day?

A. If the dimensions agreed with those, or my detailed estimate, it is the identical holder. As I said before, it did not make any difference whether it was made twenty-five years ago or made to-day.

Q. Is it not a fact that you can take an estimate for holders 6731 of exactly the same size and same capacity, and that then when erected one will weigh more or less than the other?

A. Slightly, due to the difference between the weight of the purchase weight of the material and the actual shipping weight after the material has been manufactured. That difference varies from—well, it amounts to about 3½ per cent.

Q. So that the holders which you did not have the actual details of, and of which you took the details by comparison, might differ by that percentage?

A. No, that percentage is a difference which exists in all holders. Where I did not have the details in my estimate I made new details for such conditions.

Q. How could you make new details if you did not know the construction of the holders?

A. I could see the construction of the holder. I took the pressure of the holder, for the weight of the holder, and then measured the details for the guide frame.

Q. Did that carry out the statement which you have made in connection with the details of construction of the holder? When you took the pressure of it did that give you the internal framing?

A. No, sir.

Q. You did not know the details then?

A. In this instance, no; the weight of the holder was estimated by pressure, but I say in most instances I had detailed estimates and did not have to take the pressure.

Q. How is that about 18th Street, do you remember?

A. No, I cannot recall that.

Q. How is it in regard to 14th Street?

A. In 14th Sreet I believe I took the pressure, but I would not be sure about that, there are so many estimates; it is impossible for me to remember that, when I made that about seven months ago, in all this multitude of figures.

6732 Q. How about 23rd Street?

A. What I said about one applies to all. Wherever I had a detailed estimate of the exact holder, which was the case in a great many instances, I took that detailed estimate. Where that was not the case I did make estimates from such weights and measurements as I was able to obtain.

Q. And what weights and measurements were you able to obtain, and in what way did you obtain them?

A. By sending my man there and going there myself, and by directing them how to take the measurements and telling them what measurements I wanted. When they reported to me I telephoned to Baltimore to find whether they had an estimate to cover that situation.

Q. Did you measure the height of the guide frame and the thickness of the material entering into it?

A. Everything.

Q. Did you take the pressure on the holder?

A. Everything.

Q. And from those dimensions and from that pressure you calculated the weight of that holder and your guide frame?

A. And compared it for verification with the estimate in existence at Bartlett, Hayward & Company's office, which estimates were made under my direction for the last twenty-five years, in order to be sure that my calculations were correct.

Q. And to that weight you applied a unit figure which you had previously determined upon and which you have spoken of in your direct testimony?

A. Yes.

Q. Yesterday you mentioned certain sheets, some of which you had examined and some of which you had not examined, which sheets are those furnished by me to counsel for complainant?

6733 Mr. Mathewson: I did not ask him on redirect about any of them, nothing at all.

Mr. Kirby: It was on redirect that you offered one.

Mr. Mathewson: No, I merely asked for 132d Street, which had already been testified to. I asked for it at the end of the case and I offered it, but it had no relation to his examination, and I shall object to going into this question, as I think it is a consumption of time.

Mr. Kirby: The consumption of time will consist in offering all those sheets in evidence. I simply want to identify them.

Mr. Mathewson: I don't know how you can offer them in evidence, your case being closed. I think you should have offered them before, and I shall not consent to that. That may mean days of further examination by me of witnesses, and going over them.

Mr. Kirby: I will make the offer and then make my argument.

Q. I show you a statement headed 14th Street station, a lot of yellow sheets upon which there are certain writings, figures and dimensions and what not. I show you the same thing in an envelope headed 42d Street plant, 44th Street plant, 18th Street plant, 21st Street station, 163d Street station, 199th Street station and 111th Street station; also Inwood station. I ask you if these are not the envelopes and the contents thereof which you make reference in your testimony as having been looked over in part by you, and from which envelope headed 132d Street station the entries have not been taken out, but were yesterday placed in evidence in this case by Mr. Mathewson?

A. I am absolutely unable to tell. I had such envelopes
6734 but I cannot tell whether they are in the same condition as when I had them, because my reference yesterday to omissions and errors may have been corrected since that for all I know. I cannot tell whether they are the same papers or not.

Mr. Mathewson: You did not examine them anyway, did you?

The Witness: No, the space of time was entirely too short; I could not do that and I could not tell whether they are the same papers or not.

Q. You made such a close examination of them that you are not able to tell whether they are?

A. I said yesterday that the time was too short, but in that time those that I did examine I found that they were so full of errors and omissions that I took it for granted that they were all on the same basis and were of no value.

Mr. Kirby: By reason of the statement of the witness, and more particularly by reason of the fact that yesterday Mr. Mathewson placed in evidence over our objection these sheets for the 132d Street station, I here offer, so that instead of having a part of what is a complete statement, which may be worth much or little, we may have it complete, the sheets for the other stations. I call attention to the fact that on page 5385 of the testimony, being the testimony for January 9th, a statement was made by me in reference to these sheets, as follows:

(Here Mr. Kirby quotes from the record at the page mentioned, which was ordered not to be spread upon the record.)

Mr. **Kirby**: I was prepared to offer all of these statements at that time, and acting upon the suggestion of the Master I had 6735 them marked for identification. Now, I contend it is improper to place in evidence here as an exihbit any one of these exhibits without placing them all in. As I stated at that time, and as I inferred yesterday, they are nothing but memoranda subject to the explanation of the man who made them, and without such explanation, as I then stated, can have but very little value. Having been taken advantage of in any one instance by the complainant I certainly consider that the others should go in and that that should be stricken out as an exhibit; either that, or else they should all go in together.

Mr. **Mathewson**: Mr. Kirby entirely misconceives the situation. The only papers which I offered were the details in reference to the 132nd Street station and no other station. Now, if Mr. Kirby will refer to the record he will see that I took these very sheets when Mr. Edgarton was on the stand, and asked Mr. Edgarton as to every one of the details making up the $21,160, and I asked him whether he had included profit in the first item, the cost of brick, or whatever it was. No, he had not. I asked him whether he had included profit in the cost of carriage, and he said he had or had not. I said "Take up the cement floors $520." He answered, "I can shorten that by saying that the contractor's profit, so far as my information goes, will be included only in the brickwork and he will save that concrete work."

Now, I have simply offered these sheets in order that being printed, it may be intelligible to the Court that the figures with which I was dealing, and the sheets upon which I was examining the wit- 6736 ness, were in reference to that particular station; nothing more and nothing less.

Of course, if any paper were produced by the defendant which would tend to rebut the accuracy of the defendant's testimony, as that paper would, showing that he had not included any profit in the purchase of his brick or other material, it would be quite pertinent for me, he having presented it, to offer it as the very last thing in my case, with no witness on the stand at all. It is marked for identification, and if these papers were desired to be offered as to the other stations by the counsel for defendants at that time, and they had been admitted, my witness would then have examined those particular papers as to those other stations and would have been prepared to testify to their correctness or incorrectness, no matter what time it might take; but to put them in now after their case is closed, merely because I offered papers which have been referred to in the examination of the witness and gone over in detail as to the 132nd Street station, would simply put me back where I would have to take up these papers and spend days on them in examination to perhaps rebut them. It seems to me perfectly clear that it is most competent for me to offer that paper and incompentent for defendant's counsel at this stage to offer these other papers respecting which I have said nothing. I will say this, that if the counsel have any question about it, this can be marked for identification and printed. I would be just as willing to have it marked for identification as anything else.

6737 The **Master**: Where is the place this was offered in evidence?

Mr. **Burr**: It is in yesterday's proceedings which have not been printed yet.

The **Master**: I remember pretty well what took place.

Mr. **Kirby**: The whole testimony carries an entirely wrong inference.

The **Master**: I will exclude these and give you an exception.

Mr. **Kirby**: Then I here move to strike out the exhibit which was admitted yesterday, on the ground that it is improperly admitted unless all are placed in evidence.

Mr. **Mathewson**: I am perfectly willing to have this printed so it can be referred to as a part of this record, as an exhibit for identification for that purpose, if you wish.

The **Master**: That probably answers the purpose.

Mr. **Kirby**: No, I want to have them all to have the same strength in the case. I do not want in the case an exhibit which has no right there unless it is connected with all the other sheets for the other stations.

The **Master**: Do you imagine the Appellate Court is going to spend any time looking over these details?

Mr. **Kirby**: They will on an exhibit in the case.

Mr. **Mathewson**: If you will give me time to rebut these papers and go over them and give testimony in regard to them, I would have no objection to their going in.

6738 The **Master**: I have disposed of the matter. I think the suggestion made by Mr. Mathewson, that they should be printed, the expense of that coming out of his client, in part, covers the whole thing. If there is any error in excluding them you will get the benefit of that.

Mr. **Kirby**: They are marked for identification. I do not care whether they are printed or not. They are always subject to our use, marked for identification.

The **Master**: But the Supreme Court will not pay any attention to them unless they are in the record.

Mr. **Mathewson**: I am perfectly willing to have the paper I offered yesterday printed as an exhibit for identification for reference, to make this intelligible in the testimony, instead of being offered as an evidence as proof of anything.

The **Master**: That answers your question, Mr. Kirby.

Mr. **Mathewson**: But I cannot consent to printing all of these other papers.

The **Master**: Very well, we are all in harmony.

Mr. **Kirby**: So that there may be no controversy about tampering, such as Mr. Mayer suggested, in regard to these schedules, I would like to have them marked in some way.

The **Master**: They have already been marked.

Redirect examination by Mr. **Mathewson**:

Q. Did you have all the d-tails of computation at hand when you were called to testify last summer, when you were examined here?

A. I had, and I was continuously telephoning to Baltimore, and even taking trips to Baltimore twice a week, sometimes taking the night train and coming back the next night.

6739 Q. Bartlett, Hayward & Company are the custodians of these, are they?

A. Yes.

Q. And they are in Baltimore?

A. Yes.

Q. And since last summer you have moved your office and cleaned up generally?

A. Both my Baltimore and New York offices were moved since then.

Q. Do I understand, in reference to a holder which you did not build, that after taking measurements of the holder, for instance, or other apparatus, you then went to Bartlett, Hayward & Company's estimates to see if they had built a holder or other apparatus of these dimensions?

A. Yes.

Q. And if you found that, you took that weight?

A. I did.

Q. And if you did not?

A. Where they differed from the dimensions taken actually in buildings, then the weights were estimated in detail.

By Mr. **Burr**:

Q. Where is your office now?

A. My New York office, in Park Row Building. My Baltimore office is in the Keyser Building.

Alexander C. Humphreys, recalled in rebuttal, testified as follows:

By Mr. **Mathewson**:

Q. At what period were you connected with the U. G. I. Company of Philadelphia?

A. From the first of 1885, January 2nd, to the latter part of 1894, almost exactly ten years.

Q. What was your position there?

A. First, superintendent of construction; almost immedi-
6740 ately general superintendent; finally, in charge of all the en-
gineering details, of operating details, and finally all commercial details and sales of all plant.

Q. Mr. Edgarton in his testimony at page 3945 says that he was engineer and chemist from 1882 to 1891; and at page 3990 he says that he thinks he was as active as anybody connected with the U. G. I. Company. That covers the first six years of your administration there?

A. Yes.

Q. What is the fact as to that?

A. The facts are that practically Mr. Edgarton had nothing whatever to do with the engineering connected with the works of the U. G. I. Company, or with the operation, purchase, accounting, or any of the features that came under my direction, the only exception being one works or plant in which his process had been installed, namely, Pensacola. I will follow that up and try to get rid of an unpleasant subject at once. When I took charge of the U. G. I. Co. I was engaged as superintendent of construction with the understanding that I should be given general charge, after a short test. When I took charge the whole technical force that was given to me to do my work with was one draughtsman who had never been inside of a gas works before, so far as I could learn, and one constructor who had never erected anything but an oil gas bench. Within a month I was required to take charge of the operating works, North and South, and then, within a few months I was, on top of all my other duties, required to instruct a lawyer who had charge of one of our important patent suits, our other lawyer having died. It seemed to me that that duty would not have been put upon me if the company had been depending upon anybody else, except in an honorary way. Mr. Ed-
gerton's title as engineer and chemist, as declared by the offi-
6741 cers of the company, was an honorary one, in connection with
the fact that they have taken up some of his patents.

Q. Do you know, in fact, whether it was an honorary one during the six years since 1885 to 1891, while he was connected with the company?

A. If you could use that term to indicate a position where no specific duties were performed and where the holder of the position was not in regular attendance, but was frequently absent for months at a time.

Mr. **Burr**: I move to strike out "as declared by the officers of the company."

Mr. **Mathewson**: He was one of the officers.

The **Master**: Strike it out, in so far as it relates to that. This is a matter of personal knowledge.

Q. Was Mr. Edgerton consulted by you or did he confer with you from 1885 down to the time he left in 1891?

A. He did not.

Q. In reference to matters of policy or otherwise?

A. Not at all.

Q. He says that he left the U. G. I. Co. because he differed as to the policy of making a poisonous gas. What was the reason that he left, if you know?

A. Expiration of his contract.

Q. And at whose suggestion was that not renewed?

A. I do not know who originally suggested it.

Q. I will ask generally whether Mr. Edgerton was active in any practical way so far as the U. G. I. was concerned after you joined it in 1885?

Mr. Burr: I object to that as calling for a conclusion. He may state what he did.

Mr. Mathewson: In a practical way. I suppose that is a meaning that is intelligible to any one.

6742 Mr. Burr: I suppose it is, but he is entitled to give the details. It is merely a conclusion.

The Master: Let him state what he did as far as the witness knows.

A. Do you want to ask what he did?

Q. State what he did, so far as you have not already stated; if you have covered it, all right.

A. It would be difficult to state exactly what Mr. Edgerton did, as he, so far as I know, was not considered in the practical operation of the work of the company. He was consulted, no doubt, by some of the officers as to experimental work and the like, in which he was expert, but in practical matters was not.

Q. Had he anything to do with the purchase of pipe and material while he was there with the U. G. I. Company and he had his title?

A. Not at all; that purchasing agent was one of my assistants, and all large purchases passed through my hands for final decision.

Q. He also testified that he made a study of accounts, and took charge of accounts. Did Mr. Edgerton have anything to do with the accounts of the U. G. I. Company after you were there?

A. This is the very first intimation I have had of anything of the kind. When I took charge of the U. G. I. Company, if my recollection serves me, the only thing that could be considered as a return or form, or anything of that kind to be used in connection with the operation of the works, was a weekly report. Possibly Mr. Edgerton may have had something to do with getting that up, but I could not say; but the whole thing was a great surprise to me; this statement.

Mr. Burr: I move to strike that out.

The Master: Strike it out.

6743 Q. Were you in such a position that you would have known if he had had anything to do with keeping accounts or the method of the accounts?

A. During my administration?

Q. Yes.

A. Certainly, I directed it.

Q. Have you yourself ever had experience in accounting, or have you made a study of the subject?

A. I have. I entered the gas business through a secretarial position.

Q. Mr. Edgerton at page 3990 of the testimony states in substance that he made possible the use of heavy oil, such as intermediate. Do you understand that to be the fact, is that your information or knowledge?

A. No, it was quite contrary to my knowledge and belief. Undoubtedly Mr. Edgerton has done a large amount of experimenting in that direction, but as far as the U. G. I. was concerned, and so far as the general work which I know of in the gas business is concerned, I think it can be claimed that the development of plants for the use of heavy oils was done in the United Gas Improvement under my immediate direction, and resulted in the development of the so-called double superheated plant, the object being to develop a plant which would use an oil which was at that time almost a drug upon the market; and at the same time to develop a plant which would be elastic enough to use practically any kind of oil which could be bought the cheapest at the moment, with the additional feature that it was desirous of especially developing a heavy oil, as the heavy oils as a rule were at high flash points and therefore safer.

Q. I have asked you in reference to Mr. Edgerton's connection with the U. G. I. Company only because he himself stated it as part of his qualifications before proceeding with his testimony; he 6744 also additionally stated that he was connected with the Pensacola Company, and you have so stated. Was that a company which at that time was employing his so-called process of oil gas?

A. It was.

Q. Did you take charge of the Pensacola plant when he left it?

A. It came under my direction with the other works as soon as I assumed charge.

Q. When was that?

A. In 1885, my general charge; but being loaded down with work I endeavored as far as possible to place the work for that particular plant upon Mr. Edgerton, it being his process.

Q. The process was introduced at Pensacola about 1884, wasn't it?

A. Yes, about that.

Q. And when was it abandoned?

A. In 1896.

Q. Why was it abandoned?

A. Because it was wasteful, and also it was badly constructed in some directions.

Q. Mr. Edgerton has stated in some substance that this process has been displaced at plants where it has been in use in the United States, except at Danbury, on account of persuasions of promoters—that word being his. What is the fact, as you know, and as far as your knowledge goes?

A. I have already stated the facts in regard to Pensacola. It was abandoned because it was uneconomical as compared with the other plants being operated by United Gas Improvement Company; and as each plant, as far as possible, was made to stand upon its own legs, we endeavored to make that plant in every way a success, and we got better results out of it in the years immediately succeeding the time that Mr. Edgerton had not been supposed to be looking out for it closely himself. The result was that it was somewhat improved, but by comparison it was still very poor, especially on oil.

6745 Q. What condition did you find the Pensacola works in when they were turned over?

A. When I commenced to go to Pensacola to look out for things I found they were in great trouble about contamination of the wells from leakage of the holder tank, and also from the tar being allowed to run out on the adjacent country, which was sand. I also found that there was no purification provided for, although the plant was there, but had not been started up. After that was started up we still had considerable trouble with the purification, and when I came to investigate it I found that my orders that were attached to the test slips for sulphureted hydrogen to the effect that a jet of gas passing five feet should be allowed to impinge upon a slip of paper saturated with acetate of lead. Mr. Edgerton had countermanded to the effect that the stream should be reduced to two feet an hour, because this was, so to speak, a two-foot process, and I had to show the superintendent that our problem had nothing to do with the size of the stream, that we were trying to find out whether there was any possibility of sulphuretted hydrogen developing, and not to take those instructions from Mr. Edgerton.

Q. As to the results of heavy oil, of which Mr. Edgerton states was just as good as high-grade oil, was what was disclosed at Pensacola incorporated in his process?

A. The general results showed them to be using about 140 pounds of fuel to the thousand, about ten gallons of naphtha per thousand, 35 candle power gas with a very very wide variation, som-times running as wide a variation as from 20 to 40 candle power, and showing about 3.5 candles to the gallon. In 1892 and 1893, the year succeeding Mr. Edgerton's departure from the company, although he had not much to do with Pensacola before that, showed 9.32
6746 gallons and 9.23, and they happened to average out exactly the same, 3.85 candles to the gallon. The repair item for works is interesting, showing for one year 12.36 cents and the next 14.14.

Q. What was the cost in the holder at Pensacola, if you have a note of it?

A. My recollection is considerably over a dollar. In 1892, $1.37.

Q. Were these results with 140 pounds of fuel and ten gallons of naphtha to the thousand and 3.5 candles to the gallon, good or bad results as compared with modern methods?

A. Very poor.

Q. Mr. Edgerton also referred to the New Orleans gas company as in the hands of a receiver, as having failed. Has the company that owns and operates the New Orleans works been in the hands of a receiver so far as your information goes?

A. Not the immediate company; some holding company with which it was indirectly connected had some financial trouble; the gas company had always gone along and paid dividends.

Q. Mr. Edgerton testified at page 4017 that he invented the tower scrubber, which was taken to England and brought back here, and again claimed that he originated the tower scrubber and erected one at New Orleans in 1873, from plans made in 1871 or 1872. Is Mr. Edgerton correct in that?

A. No.

Q. What are the facts?

A. The great Beckton works in London commenced work in 1868, and they were gas making in 1870, including these scrubbers, but these were erected in Belfast as far back as 1860, and in Preston in 1867, and many of them were in use in the 60's.

Q. Mr. Edgerton testified at page 4849 that he introduced a system of compressed gas on railway cars first as early as 1871, and that this led finally to the use of the compression system as a 6747 means of distribution. Was 1871 the first use of compressed gas of the character which he described?

A. No.

Q. What is the fact in reference to that?

A. The Pintsch people in Germany were using it successfully back in 1877, and they had been experimenting in Germany on compressed gas for car illumination as far back as 1837.

Q. Now, Mr. Edgerton refers at various points to the laying of mains, and advocates laying them near the surface. Do you know any place in this country and in this latitude in which mains are laid as near the surface as possible instead of at a depth of several feet?

A. Not unless it is unavoidable on account of some obstruction or the like in this latitude.

Q. Have you any information which corroborates Mr. Edgerton, that they are laid at Faribault near the surface?

A. They are not.

Q. He referred to Baltimore and exposed pipes there, at page 4035 of the testimony. Now, you are a director of the Baltimore Company, are you not?

A I am, and largely interested.

Q. What is the fact as to that so-called exposed pipe?

A. That exposed pipe was exposed because we could not get it down under the surface; it went across the marsh, and was laid across the marsh and covered up as far as possible. It happens that the engineer of the Baltimore Company is a very warm advocate of putting his pipes under the ground, and he never would have put that pipe above he ground if he could have helped it. That was discussed, and I entered into this discussion as to how this pipe should be laid and the difficulties to be overcome.

Q. So the facts as to the way it was laid and the reasons for its laying are within your knowledge, are they?

A. They are.

6748 Q. Now, Mr. Edgerton expressed at page 4835 to 4837 that heavy oil is better than light oil, has more carbon and greater enriching power, and just as good a carrying capacity for the illuminants in suspension. What is your view on that subject?

A. It is an extremely broad statement to make, that an oil is a better illuminator because it has more carbon; it seems to me if we followed that out to its logical conclusion, we could say that powdered anthracite would be still better.

Q. It is pure carbon practically, is it not?

A. Yes, sir, or that a bituminous coal would be a better illuminator than cannel coal, having a larger amount of carbon than the cannel coal. Of course, the fact is that the carbon has to be kept in solution in the hydrogen, in the form of hydro-carbons, and the oils that are now supplied to the gas company, the heavy oils, do not carry their illuminating power to the burner as well as the oil we used to use. And that is unquestionably a fact that has been demonstrated by practice in later years. In other words, there are more of the condensable vapors in the gas made from these heavy oils than there used to be in the past.

Q. What is your knowledge, derived in the business, as to the efficiency of heavy oils as compared with light oils in carrying illuminants to the consumer?

A. You could not put that into percentages, because it would vary with the oils, and even from the same crude oil, an oil of the same specific gravity as another oil from that same crude oil might vary in that regard, depending upon the way in which the oil has been produced in the oil stills; and we made a series of very extensive tests in England not a great while ago, two or three years ago, on heavy oils, and they have not been giving such satisfac-
6749 tion to our clients as the oil previously purchased, and we found that those oils gave an efficiency of about 85 per cent. of the oil that had been used before that.

Q. Mr. Edgerton suggests that in cold weather with the heavy oils no more will be required, the heavy oils will do just as well, and he refers in his testimony to certain papers accompanied by letters from him which had been sent to Chief Engineer Bradley of the Consolidated Gas Company. Have you those letters with the papers attached?

A. I have.

Q. Does Mr. Edgerton in any of those papers say whether more oil is required in cold weather or not?

A. He does.

Q. Just quote what he does say on that subject.

A. I quote from the 7th page of the general statement, on the Danbury gas process, which accompanied the letters referred to, to Chief Engineer Bradley, something over a year ago, "were the above method carefully carried out it would give a very fair result; as carried out there was some times intervals of ten days between tests at Danbury on many occasions, thus giving an opportunity for the gas to sag in candle power, or rise above the mean in the spring season. Not only is more oil required in cold weather, but even with the increased quantities shown in the record the gas would sag below standards, and this is particularly noticeable since the use of gas oil.

Q. Now, Mr. Edgerton also refers to the cost of gas——

A. If I might continue, please?

Q. Yes, very good.

A. "In order to weather the minimum standard points in bad weather, close haul and close to, the plant put in New Orleans and very closely watched for fouls from the poop deck of the City 6750 Hall during several months, the enclosed log or record is offered." It would seem to point to the fact that more watchfulness is required in bad weather.

Mr. Kirby: That is an inference. I move to strike it out. Let the statement stand as it is.

The Master: Let it stand as it is.

Q. Now, is that all of that subject?

A. Yes.

Q. Now, Mr. Edgerton at page 4678 stated that the cost of gas as he was informed by the New Bedford people was something like twenty-four cents, that that was the information that he gained. Is that correct?

A. No, sir.

Q. Now, what is the fact as to the cost at New Bedford?

A. He has stated it was 38.65. It was reported, I think, 24 cents in a report made by the sliding scale commission, but through some mistake of the printer, probably, the distribution amount was put in the manufacturing column, and the manufacturing account was put in the distribution column, so that it does appear in that column that the gas was made for 25.4 per cent. An examination of the returns of the company show that that is not the fact.

Q. Well, Mr. Edgerton may have been misled by seeing that report?

A. I imagine that was the truth.

Q. Now, in order to confirm the reports of the company did you make any inquiries of the president of the company?

A. Yes, I had quite an extensive correspondence with the president.

Q. Did you find that your conclusion that you have now stated was correct or otherwise?

A. I found that conclusion was correct according to the president's statements. In fact, it was the president who pointed out to 6751 me how the error probably had occurred.

Q. Now, at page 4679, Mr. Edgerton refers to a mixed coal and water gas of 18 or 19 candle power, and this is a gas, is it not, which costs 38 cents?

A. It is.

Q. And it might be gathered from Mr. Edgerton's testimony that New Bedford made an unenriched coal gas from 18 to 19 candle power. Do you know whether that is the fact or not?

A. I know that is not the fact, that it is so made, and I gathered from the testimony that is what Mr. Edgerton meant. I don't know whether he did mean it or not.

Q. However it is construed, the fact is as you have stated it?

A. Yes.

Q. At page 4754, Mr. Edgerton has stated that a depreciation is not a charge against the cost of gas, but a charge direct to profit and loss. In the papers which he sent the Chief Engineer, Bradley, and which you have here, how does he include depreciation, as a charge against the cost of gas or otherwise?

A. Included right in the cost of gas.

Q. What does he state is required for depreciation and repairs which the defendants criticize at even 10.89 in the case of the Consolidated Gas Company?

A. The statement that I have before me is not the unadjusted statement of cost, it is the statement on the basis of 17.6 candle power reduced.

Q. What do you mean by reduced?

A. On the Edgerton theory that one candle is as good as another, he takes the actual cost of the gas as made of a certain candle power and then says the cost is so much less according to the candle power to which he wishes to reduce it, and in this particular statement he reduces his gas to a candle power of 17.6 and then makes his cost conform to that. I have merely restored the original figures and 6752 on that basis—this 32.95, I think, candle power gas—the repairs and depreciation together foot up $14.96 *cents* a thousand.

Mr. **Kirby**: Mr. Master, I object to this line of testimony and object to quotations from Mr. Edgerton's letters to Mr. Bradley, unless it be that all of the letters and the accompanying schedules be either read in evidence as to the contents of the letters received by Mr. Bradley or else placed in evidence as an exhibit. I don't think it is proper upon the record in this way part of a communication.

Mr. **Mathewson**: There is a good deal of it that does not relate to the points about which there is any controversy.

The **Master**: If you use this letter for the purpose of impeaching the witness, it ought to be produced.

Mr. **Mathewson**: Certainly, it is produced, it is right here, and the witness has it in his hand.

The **Master**: If there are enclosures and tables in it that it is not material to have spread upon the record, you can mark it for identification, but anything that is of sufficient importance to be put on record should be produced.

Q. (Handing papers.) Are these the letters to which you refer, the first being dated Danbury, November 22d, 1905, and second dated Danbury, November 30, 1905, with the papers attached, excluding, of course, any pencil memorandums you have put on them?

A. Yes, sir.

Mr. **Mathewson**: I ask that they be marked for identification. 6753

Bundle of papers marked Complainant's Exhibit 377 for identification.

Q. Now, Mr. Edgerton, in these papers which have been marked Complainant's Exhibit 377 for identification, sets forth, does he not, various estimates in reference to the cost of making the oil gas according to his process, using one item or another?

A. These papers?

Q. Yes.

A. These papers show Mr. Edgerton's statement of the actual cost at Danbury in the year 1902-3. It is a selected statement, although the statement was dated and sent to Mr. Bradley March, 1905, apparently, or the statement was made then, it was sent to Mr. Bradley later, but it is for the year 1902-3, and purports to be an actual statement of the cost as it occurred. There are many results given for many other years, but that is the only one that covers actual cost.

Q. He gives certain results as to coal, oil, candle power and candle power per gallon from the year 1891 to 1905, does he not?

A. Yes, sir.

Q. Take the entire number of years, how many candles per gallon are produced, or how high is the candle power per gallon according to his own statement?

A. His statement shows the candle power from 1890 to 1904, and it seems to be an arithmetical average for those years of 34.89 candles.

Q. How many gallons per thousand?

A. 9.64. It figures out candles per gallon of 3.62.

Q. Now, during the entire period from 1891 to 1905, do you find that his candles per gallon rise above four?

Mr. Burr: I object to this. I do not think this is pertinent. I scarcely think we want to go into an inquiry at this late hour 6754 as to the methods adopted by Mr. Edgerton or by anybody connected with that company at that time.

Mr. Mathewson: I did not go into it. Mr. Edgerton was brought in and alleged that we ought to have a coal and oil gas process, and introduced figures reducing cost to something like 16 cents on his process, by assumptions of one kind and another, and I am going to show by his own statements that the candles of gas are much less than the Consolidated Company, and the next question will be whether a table has been made comparing the table which he here presented with the result, but inserting the actual results which he obtained in Danbury and showing the situation.

Mr. Burr: But that necessitates us to go into the circumstance which brought that about and therefore we would have to know all the circumstances.

Mr. Kirby: This matter was before Mr. Mathewson at the time, and he referred to it in his examination of Mr. Edgerton, and if desired could have gone into it at length. It is not proper and I object to it on that ground, and I object to it on the further ground that you cannot take a letter which is not in evidence in the case and make comparisons from part of it and deductions by a witness, even assuming that he was the one to whom it was addressed.

The Master: I don't know that it is not Mr. Mathewson's intention to eventually offer it in evidence, or part of it, but on the question of rebuttal, do you claim that it is not proper for Mr.

Mathewson to show that one of your witnesses has made on some other occasion statements which are inconsistent with the
6755 statements which he made on your direct examination?

Mr. **Kirby**: I certainly do not, but I do not see, Mr. Master, how by taking a statement as to which Mr. Edgerton has had no opportunity to say whether the conditions there vary, or whether they are the same as he assumed in making his computation——

The **Master**: That may all be. If he has given testimony along a certain line on his direct, and Mr. Mathewson claims he has writings emanating from Mr. Edgerton, which when examined will bring results entirely different from Mr. Edgerton's testimony, it would certainly be proper rebuttal. I cannot interrupt at this time until Mr. Mathewson has developed the lines to show how far it is material, or valuable, but that to my mind is what he is trying to get at, and unless you show me some stronger reason to the contrary I am inclined to let him proceed.

Mr. **Burr**: I submit the proper procedure was at the time, in order to enable this to be brought into rebuttal, to call Mr. Edgerton's attention to the letters and statements made, and ask him if he did not make the statements and give him an opportunity at that time to explain what gave rise to those letters and statements therein contained.

Mr. **Mathewson**: I did not know at that time that there were any such letters written. I only knew it when Mr. Edgerton, when I asked him if he did not send some letters to Maryland, volunteered the statement that he sent some to Chief Bradley, and I did not have the papers at that time.

6756 The **Master**: I will allow it.

Mr. **Burr**: Exception.

Mr. **Kirby**: Exception.

Q. I asked whether during the entire period from 1891 to 1905, the results as he submitted them to Chief Bradley of his oil gas process as operated at Danbury exceeded four candles per gallon?

A. There is only one case where it would work out, and that is the year 1902, when he got 4.01.

Q. Well, the Consolidated, according to the testimony is how high per gallon?

A. For the moment I do not recall; I think it was between 5 and 5.60.

Q. Well, between 5 and 6?

A. Yes.

Q. Have you examined the table which Mr. Edgerton submitted here showing an estimate of the cost of oil gas mixed with a certain proportion of coal gas, according to the process that he advocates giving unit figures which he uses as cost of coal, etc.?

A. Yes.

Q. Have you taken that table and prepared a table in rebuttal, inserting instead of the figures which he used the actual figures which resulted according to his statement to Chief Bradley in the papers which are marked for identification?

A. Let me understand that question. You are now asking me to show what would be the cost of candle power as in New York on the basis of Mr. Edgerton's Danbury statement?

Q. Yes.

A. Or to criticise Mr. Edgerton's statement as to the should-be cost in New York?

Q. Well, I want you to do both, but I will let you take the order.

A. I take Mr. Edgerton's statement of the cost of the Danbury gas of 32.95 candle power, and from that I prepare a statement according to the one-candle-power-being-as-good-as-another 6757 theory, of what it would cost for 24 candle power gas. I wish to have it distinctly understood, however, that I do not agree with the theory as applied to cost. It has some relation as to value to consumers. The cost of the 24 candle power gas prepared on this assumption by proportion would be $1.0254 or 102.54 cents. Now, in the same way I prepare a comparison with the New York—I should have stated, by the way, that that $1.02 is of course for everything, including management and everything, at the burner. This statement that I am now going to refer to I am just going to compare with manufacture as being more in line with Mr. Edgerton's statement for New York, and a better comparison.

Q. In other words, to compare the statement as to the cost of coal and oil gas, 28 candle power and 50 candle power.

—. ——.

Q. And the table which he presented, I think was at page 4683 of the testimony. Have you the page where he states that?

A. Page 5024-6. These statements prepared by Mr. Edgerton were on 14 candle power and 50 candle power. So as to arrive from that at a cost of the mixture, I have made up this statement to show what would be the cost of a 28 candle power made direct from gas on this Edgerton theory, which would be 65 cents, and 50 candle power would be $1.16, whereas, comparing Mr. Edgerton's statement for New York, instead of the 28 candle power being 65 cents it is estimated by him at 34.64 and the 50 candle power instead of being $1.16 is estimated at 48 cents.

Q. In reaching these highest figures, you took Mr. Edgerton's method of computation and tables, did you?

A. Yes, sir.

6758 Q. And inserted the cost of the items as stated by him to Chief Bradley, in 1905, as actually obtained at Danbury?

A. Yes. I have these tables, if you wish them.

Q. How would that affect the cost of his mixed coal and water gas?

A. Now, I have not made an estimate in every particular to correspond to Mr. Edgerton's statements, just referred to, of 14 candle power gas and 50. I have satisfied myself with simply criticising certain features of Mr. Edgerton's statement. I should want to take more time and considerably more study before putting myself on the record as to exactly what it would cost in detail to produce a mixed gas as covered by Mr. Edgerton's statement.

Q. Well, then proceed and point out such features as you desire in reference to his estimate?

A. First of all I wish to call attention to the fact that if we make

Mr. Edgerton's statement up in a little different shape for 14 candle power gas and add together the cost of coal and unloading, we have a cost per thousand of 28.431 cents. Now if we go down below and take up our residuals, we find the statement credit for residuals 31.83. These two totals, however, are not brought together for comparison in this statement.

Q. As the statement works out he would get for residuals——

A. A credit or minus quantity of 3.40 per thousand.

Q. That is he gets more for his residuals than the cost of the coal?

A. Yes, he would commence with no cost for his coal, which is something that is practically unheard of on the Atlantic coast. There have been a few isolated cases under exceptional conditions and in the west there have been other cases, especially in Cincinnati and Cleveland. I cannot say positively, but I do not think it 6759 is so even in those cities to-day where the conditions are very different. On the Atlantic seaboard it is almost unknown if not entirely so. It used to be found frequently to be the case in England, but is very infrequently so now. In the last year's report that came out there were only two cases reported in England, and those were Sheffield and Widnes.

Q. In the lake region of the west such as Cleveland in the making of coal gas, is not coal a good deal cheaper than it is in New York?

A. As a rule it runs cheaper.

Q. How about the price of the residuals?

A. As a rule the residuals run higher. There is a general tendency that way for the bituminous coal, the coal for coal gas making running lower and the net returns on residuals higher.

Q. From your knowledge of the gas business and as a gas operator familiar with eastern conditions, is it in your judgment possible to obtain from residuals in New York City three cents more than the coal originally cost?

A. A physical impossibility, or a finincial, whatever you like to call it. It is an impossibility at present.

Q. Is there anything further?

A. Mr. Edgerton takes as a yield for this particular gas 11,648 feet to the long ton. You can squeeze out of the coal that much gas; it is doubtful if that yield would run as high as 14 candle power in the average; within certain limits it does not make much difference, whether you take a little more or little less gas out of the coal, you pay for it one way or another. If you strip the gas down closer, you get the lower candle power. For a 14 candle power gas I should be unwilling to estimate on more than 11,000 feet to the long ton, although you could obtain more. For instance, New Bedford 6760 was quoted as showing almost exceptional conditions as to efficiency, and they produce only 10,640 feet with the modern benches. Another criticism I would have as to repairs, where Mr. Edgerton only allows 3½ cents per thousand in spite of the fact that the labor is down to a low point, indicating the use, as of course you would use, of a large amount of labor saving machinery. One of the debits against the saving on labor in that case is the extra repairs to the machinery. My judgment is that in modern coal gas works with labor saving devices. carried to the maximum, 5 cents per thousand for repairs would be rather under than over.

Q. That is exclusive of renewals and depreciations ?

A. Well, I was just going to add that I do not find anything in that for depreciation beyond this insufficient amount for repairs.

Q. And you find that in Mr. Edgerton's statement to Chief Bradley he did include depreciation?

A. Yes, in the Danbury one referred to, as I say, they both together amounted up to 14 cents and more, but of course, a very different plant. But, let me correct that a little, the 14.5 you know is in the total cost.

Q. The 14.96 you mean, don't you?

A. That takes in all repairs and depreciation in the cost of the gas.

Q. You mean 14.96 instead of 14.15?

A. Yes, I should say 14.96. That is not simply works repairs by any means. Mr. Edgerton did not mean that. I should correct some of the items, with the distinct understanding that I am not endeavoring to make a final statement of cost, but simply to correct the more glaring errors, as I take them to be, in Mr. Edgerton's statement. By allowing 11,000 cubic feet as all things being considered, as an economic result, $3.20 per ton would be 29.09
6761 cents. For unloading, I have accepted Mr. Edgerton's figures. I have tried to differ in as few places as possible without endorsing any of those which I include, but simply, as I say, picking up the ones which I think are glaringly out of the way. That brings unloading 1.02, making coal gross 30.11. On coke I allowed Mr. Edgerton's figure of 1182 pounds, but I took the average price of $3 per ton as I preferred to take the evidence of facts accomplished in New York rather than to take any estimate. We make from the coke 16.12 cents. Tar I take also on the same basis of what can be here recovered, 29.1 cents a ton, or 2.64 cents; ammonia happens to be practically the same. I also allowed a small amount for carbon that might be recovered .39, making 21.79 credit for residuals, and leaving net for coal, instead of a credit of 3.41, a charge of 8.32 per thousand. This makes a difference between us of 11.72 cents at once. I put in repairs and depreciation at 9.5 against Mr. Edgerton's 3.5, or a difference of 6 cents, bringing the difference up to 17.72 cents, which is to be added to Mr. Edgerton's cost of 7.12, bringing it up to 24.84.

6762 Q. For what candle power gas?

A. 14. Now, I have not attempted to deal with Mr. Edgerton's water gas cost for 50 candle power, but even accepting that——

Q. Oil gas was it not? Oil and water gas?

A. Water gas, it is the same thing, it is a water gas with really very little water gas in it. I presume that is what Mr. Edgerton meant, rich water gas. It is an enriched water gas, or a diluted oil gas, either way you want to put it. Now to make the mixture of 24 candle power we need 280 feet of the 50 candle power and 720 of the 14 candle power. Taking the 50 candle, 48.45 cents, Mr. Edgerton's price, the cost would make 13.566 the 720 feet of the 14 candle power gas at 24.84 would make 17.885, which would show even with these corrections a cost of 24 candle power mixture at Astoria of 31.45.

Q. That would be assuming his cost of oil gas as estimated in his table?

A. Yes, sir, for the purposes of that calculation I accepted it.

Q. If you have the cost of oil gas as computed according to his actual results at Danbury as stated in his letter to Chief Engineer Bradley, and combine it with your coal gas as you have computed it, according to Mr. Edgerton's errors as you think they are, what would — give as the cost of the mixture?

A. If instead of accepting Mr. Edgerton's cost for 50 candle power gas as 48.45, we should take the cost as developed by the Edgerton theory from Danbury cost sheets, which brings a 50 candle power gas up to $1.16, we should have the 280 feet if my figures are
6763 correct, that are required in the mixture, costing alone 32.48 cents, and we should have a total cost of 50.37 cents in the holder.

Q. Some evidence was introduced as to the costs at Milwaukee, Detroit and Grand Rapids, or, rather, selling prices of gas there, and Mr. Carter made an estimate that on the same basis per candle power, that New York gas at the present candle power would cost something over $1.20, but I wish to ask you from your familiarity with conditions and operations of plants in various parts of the country, whether you would consider it possible to achieve the same results in New York City as to cost of gas as can be achieved in the Lake region to which I have reference and in which those cities are located?

A. As a general proposition, no.

Q. I will ask you whether you think it possible to make any comparison or to draw any deductions as to the price in New York, or the prices charged in those cities, without a complete analysis of accounts and costs of other items?

A. It would have to be made with an expert analysis, and when I say expert I mean expert both from the operating standpoint and the accountant's standpoint; an analysis other than that would not be of any special value. We would have to know as to the exact classification of all the items.

Q. Have you read Mr. Edgerton's testimony or have you heard it in reference to his suggested high pressure system for New York?

A. I have.

Q. What have you to say as to his statement that he has specified, that the pressures could not only be controlled within a variation of an inch and a half but possibly one-fifth of that which, would be .3 of an inch?

A. I think it is about as far from being correct as it could be.

6764 Q. Have you ever been able to realize, or even known any case where such result has been experienced?

A. Not operating to any extent at all. Where you have any such variation you would have to have the consumption cut down practically to nothing.

Q. Do you know of any city in which gas is carried through the congested portions of the city and delivered to the distributing mains in the city under a pressure of 20 or 30 pounds?

A. I know of only one case that could be brought in under that description, and there you would have to study conditions pretty carefully. That is New Orleans. They do run a high pressure, but I think it runs at thirty pounds. It was not, however, put in to equalize pressures as far as the city was concerned, but was put in to carry gas to districts which were troubled by low pressure rather than by variation of pressure, and the effort has been made to carry that pipe through districts not as thickly settled. I know of no other case where the high pressure pipes for illuminating gas are being carried through the city.

Q. Was it your information that in New Orleans the pipes are used as general supply pipes running back and forth through the congested parts of the city for the pur*opse* of supplying those congested sections?

Mr. Burr: I must again object to Mr. Mathewson leading the witness. Dr. Humphreys can clearly state what he finds to be the condition or what his information is, but Mr. Mathewson says "don't you find" and "isn't it your information" that such and such conditions exist? If it is continued by Mr. Mathewson I must object to it.

6765 Q. I will simply ask you this question further, whether you would consider it wise or safe to install a system operating mains up and down each side of the City of New York, as indicated by Mr. Edgerton, under a pressure of from twenty to thirty pounds, through the congested parts they would traverse?

Mr. Burr: Objected to as calling for a conclusion.
Question allowed. Exception.

A. I should consider it most hazardous and unsafe; I would not for a moment take the responsibility of recommending such a course; and on top of that I should consider it unnecessary.

Q. Mr. Edgerton states that automatic governors could be inserted so as to shut off the supply in case of any break. What have you to say on that subject?

A. Automatic cut-off valves that would, upon the amount of gas passing out through the governor in excess of the maximum, trip and shut down the valve, that is what I presume Mr. Edgerton has referred to; and there are such valves, more or less efficient; but granted the valves were put in, no question as to their efficiency, guaranteed to act on every occasion, it would not afford any safety as far as regulators are concerned in between the high pressure lines and the low pressure lines; would afford no extra safety with regard to high pressure lines; and it is the high pressure lines we are considering with the introduction of high pressure lines into a city where now we have only low pressure lines. These valve- are so designed and constructed that if through a break or any other cause the amount of gas being passed exceeds a certain amount, as I have stated, a trip

occurs and the valve falls and is held. That would shut off
6766 the gas through a particular governor from the low pressure mains, but we are not talking of low pressure mains; we are talking about a break in the high pressure mains, and if a break occurred in the high pressure mains, even if the valve did shut down it would have no effect upon it; the valve, in other words, is beyond the break. You could take another step towards safety by the introduction of such a valve at the pumping station. In other words, pumping all your gas up to such a pressure above 20 pounds as would be necessary to make this main automatic governor operate, that governor would pass the gas on about 20 pounds pressure to the high pressure line and then the gas would finally be governed by the individual governors. Now if a break occurs in the high pressure line and provided the gas passes in such possible quantities as to exceed the maximum for which that governor was set, plus the margin allowed, then it would shut, but to do that you would have to leak so much gas into the streets that you would not have secured safety. And, furthermore, the introduction of a valve or a regulator at that point, namely, after the compressor, would introduce another distinct danger. If for any other reason the pump ceased to act and the pressure fell on that account at the inlet the governor then would fall and you would not have gas on your mains and if the stoppage lasted long enough you would cease to satisfy your consumers, although that is a somewhat remote contingency; but the point is even if you introduce this additional valve, which I don't think any engineer with experience would stand for, the safety obtained from it would be practically nothing.

6767 Mr. BURR: I move to strike out "which I don't think any engineer with experience would stand for."

The MASTER: Let it remain. It is a question of expert opinion and there has been a lot of it given on both sides.

Exception.

The WITNESS: I can supply a little rough sketch. I didn't have time to make a proper one. If there is any doubt as to what I mean it can be shown by this.

Mr. MATHEWSON: I understand.

Q. In reference to a high pressure system of this kind, Mr. Simpson testified that it would require an expenditure of over four million dollars for additional mains, and Mr. Addicks also said it would require a large additional expenditure for pumping station and apparatus. Does that or not accord with your view?

A. It does. I have not been over the figures very closely, but I have done considerable figuring on it.

Q. And can you, as an engineer, as a gas man, see any reason why with a system of mains already in operation in the city of New York they should be either abandoned or supplemented by additional expensive mains or compressing stations such as have been indicated?

A. No, not such as has been indicated. I would be in favor as necessity developed, and as the company has done in the past of introducing pumping mains running at lower pressures, though they are really high pressures for gas, and using pipes of a larger size for that reason and I think some misapprehension comes into the consideration of this matter perhaps by Mr. Edgerton and others in thinking that there is this very great difference in the size. There is large difference but there is no such difference as I think 6768 is generally supposed. For instance if I wanted to raise my flow from—double my flow—no, if I had a certain flow and wanted to increase the flow by say going up from 30 inches which we might take as a low pressure pumping scheme up to 20 pounds I could get the same effect by doubling the size of my pipe, doubling its diameter; that would be the difference in size.

Q. Referring to weights of pipes, Newbigging was quoted by Mr. Edgerton as to weights. Are you familiar with our friend Newbigging's work?

A. I have it in my office and have had it for many years and get all the editions. I am not very familiar with it.

Q. How do the Newbigging weights given for gas pipe compare with those Mr. Simpson states the Consolidated Gas Company is using and always has used?

A. My recollection is that in every side except two Newbigging is heavier than Simpson.

Q. And those are four inch and six inch pipes, are they not?

A. Four inch and six inch.

Q. And as to the frost conditions in England, relating to the depth of pipe, how do they compare with this country and how would that affect the laying of pipe?

A. The frost conditions in England are of course much less severe than here.

Q. Have you any knowledge as to the depth at which pipes are laid in London under the congested traffic of that city?

A. I have not any very definite knowledge—I have had it but I cannot recollect it.

Q. Mr. Edgerton at page 3979 refers to the best pressure, which he stated he thought in the Consolidated Gas Company would at present be about .6 of an inch, which would be all around the 6769 most satisfactory pressure; what is your view on that subject, briefly?

A. I entirely disagree with him.

Q. Is that based on theory or experience?

A. Based on experience, based on the complaints made by consumers.

Q. Do you think a higher or lower pressure would be good?

A. Considerably higher and I should want to point out here also that we are considering the pressure as I understand it in the ordinary distributing mains, and when we talk about a pressure required at the stove we have got to think of the pressure required in the distributing mains, to get the pressure at the stove.

Q. And would there be more or less of pressure between the mains and the stove?

A. There would be less pressure at the stoves than in the mains.

Q. How much perhaps on an average, for an average length of service or house pipe?

A. It is almost impossible to state, because the buildings and all run so differently—the piping is run so differently, but a loss of an inch would not be at all infrequent.

Q. What would you consider to be a minimum working pressure to meet the requirements with the various kinds of apparatus that are now in use, tested at the main?

A. In my opinion we have to have two and one-half inches at the head of all the services to get the best results. We could get along with less, but unquestionably an inch and a half to two inches at the heads of the service would create very great dissatisfaction, with modern appliances.

Q. Referring now to Professor Bemis' testimony at pages 3024 and 3025, he justifies his estimate of the value of a plant of twenty times net earning by quoting your testimony in Holyoke, Massachusetts, where he says that you pursued a similar cost or
6770 adopted some similar theory. Was that the case——

Mr. Burr: Ask him, what that case was.

Mr. Mathewson: Very good.

Q. What was that case?

A. A case where the investigation, appraisals, etc., were being made in connection with the determination of the city to take over the gas plant and electric plant.

Q. I was going to ask you if that was the case. And what was 5% in that case, or in what relation did you use it?

A. I used it in valuing the plant and business and used it in connections with the earnings which I had determined; the earnings of the gas plant separately, and I valued the plant on a basis of $672,654.

Q. Did that include the plant and tangible property alone or the plant and any rights and franchises and good will, etc.?

A. Of course there was a large question as to what the rights might be on account of the way it was being taken over, but that was my valuation of the plant, as I expressed it in the testimony, as a going concern.

Q. A tangible and intangible concern?

A. Yes, sir; everything for business.

Q. As a matter of fact, what were the tangible assets, the structural value of the tangible assets, estimated at that time and in that proceeding?

A. For the gas plant only $340,227.52.

Q. And the profits?

A. $33,632.70.

Q. And that would be a profit of how much on the structural value?

A. 9.88 per cent.

Q. Or practically ten per cent.?

A. Yes, sir.

Q. That is the same figure you gave in your original testimony here as a fair return of the bare structural value?

A. Yes, sir.

6771 Q. Now, at page 3021, Professor Bemis suggests that six per cent. is a sufficient return on your investment, and he quotes certain Massachusetts companies to show the net issues are on a five per cent. basis; that is, for an established, successful business. Have you examined that testimony and the returns of those companies?

A. I have.

Q. As they appear in the reports to the Massachusetts Gas Commission, to which Professor Bemis referred?

A. I have.

Q. What are the names of the——

A. Lynn, Cambridge, Clinton, Brockton, Newburyport, Fitchburg, Natick, and Malden and Melrose as one.

By Mr. **Burr**:

Q. Worcester, also, wasn't it?

Mr. **Mathewson**: That comes in later.

Q. My recollection is that that came in in a different connection.

By Mr. **Mathewson**:

Q. Have you made up a table showing from the reports to the Gas Commission exactly what the profits of the companies were which he referred to as on a five per cent. basis?

A. I have taken the profits as they appeared from the manufacturing account without any adjustment and the assets as they appeared in the individual reports, and found them to total as follows:

Assets	$5,895,499.60
Profits	595,968.12

or an average return upon the investment of 10.1 per cent.

6772 Q. In other words, their earnings were 10 per cent., although the dividends may have been some other figure; is that right?

A. Yes, sir.

Q. Did you prepare a table showing that?

A. Yes, sir.

Q. Have you it here?

A. Yes, sir; that is the table. It is as follows:

Average Return

Upon Investment of All Massachusetts Companies cited by Bemis on pp. 3021-3023 of Testimony in this case, as Shown by Gross Profits—"Manufacturing Account"—from Mass. Commission's Reports, return of June 30, 1905:

Company.	Assets.	Profits.
Lynn Gas & Elec. Co. (including Elec.)	$1,792,602.11	$259,159.28
Cambridge Gas Light Company	1,742,581.88	159,011.02
Clinton Gas Light Co. (including Elec.)	247,508.95	13,418.07
Brockton Gas Light Co.	616,279.40	42,773.62
Newburyport Gas & Elec. Co. (including Elec.)	294,365.88	14,482.88
Fitchburg Gas & Electric Co.	421,243.00	54,266.54
Natick Gas Light Co.	63,667.30	1,480.36
Malden & Melrose Gas Light Co.	717,251.08	51,376.35
Total	$5,895,499.60	$595,968.12

59,596,812 ÷ 5,895,499.60 = 10.1% Average return upon investment for all of the above companies.

6773 NOTE—In comparing above data with that contained in A. C. H. Table No. 1, note that, in latter, all the Mass. Gas Companies engaged only in the gas business are included, and that the profits as determined from the so-called Manufacturing Account are reduced by figures obtained from analysis of P. & L. Accounts. The above profits are the balances of Manufacturing Account without modification. The total reduction so made (in case of Natick and Malden) only amounts to $4,099.71 and leaves the average return for eight companies above still in excess of 10 per cent.

Q. Have you other copies of those?

A. I think I have; two more.

Q. Prof. Bemis also quotes the seven companies to which you have referred, Cambridge, Fall River, Worcester, Lowell, Springfield, Lawrence and Lynn, in another con-ection, at page 3055, with comments on their returns of capital?

A. Yes, sir.

Q. Have you from the same source, that is the reports to the Massachusetts Gas Commission, prepared a table showing their sales, capital, including funds and notes, per thousand, profits, and other items of income, so as to bring out a statement of the rate per cent. on the total capital paid by these companies and the cents per thousand of profit?

A. I have.

Q. Will you produce it?

A. Here it is. I will say that this is prepared, that there may not be any doubt about it, it is prepared from the actual returns made by the companies themselves and not from the printed returns. It would be difficult for anybody to get all this information out of the printed returns. We have had to make application to the returns as furnished by the company such as were used by Mr. Bemis.

6774 The MASTER: This refers, as I understand it, to the corresponding material to that shown in table 18 on the other side of the page, 3055.

Mr. MATHEWSON: Yes, sir.

Mr. BURR: Except he says it is based upon the actual returns and not the official returns as appears in the report of the Massachusetts Gas Commission.

Mr. MATHEWSON: They are not printed yet. We got copies, as Mr. Bemis examined the originals or took copies.

The WITNESS: The printed records were not available for either of us, you see.

Mr. BURR: I see.

Q. And the results are as follows, are they not, as to the rate of return on capital,

Cambridge	11.55%
Fall River	16.38%
Lowell	16.09%
Springfield	9.6 %
Worcester	15.88%

or an average of how much?

A. 13.88%.

Q. What is the average profit or earnings, net earnings, allowed in the case of the five companies to which you have referred?

A. Net earnings allowed?

Q. Yes, cents per thousand?

A. 31.03.

Q. I see that on rates of total capital you specify nothing for the other two companies, Lawrence and Lynn. Is that because they are electric as well as gas companies, and their capital is not separated.

A. Yes, sir; I endeavored to separate but learned from the Commission that it will be impossible to do it reliably.

Q. But the cents per thousand sold can be stated and averages 35.16 cents for the two companies, does it not?

6775 A. That's right.

Q. Or an average for the seven of how much?

A. 32.06.

Mr. BURR: Are you going to put in the summary of results?

Mr. MATHEWSON: I offer this table, with the summary of results, in evidence.

Received in evidence and marked "Complainant's Exhibit 378.

Mr. MATHEWSON: This exhibit is marked at the top "A. C. H.; Table No. 4, rebuttal."

Dr. Humphreys made up several tables of one kind or another which may or may not be used tentatively, and that is a good way to refer to it.

The WITNESS: I would like to say, Mr. Mathewson, that I don't want to load you up with a lot of stuff, because everything is on here, I believe to make these details completely self-explanatory. I have endeavored to do so, and still they do need the explanation——

Q. *Q*. I was just going to ask you to make it?

A. Well, I have made up this table by taking each case and analyzing as far as I could with the returns of each company before me. Where I found certain other items charged to profit and loss, I considered them and analyzed them and introduced them except so far as they might be met by other items of income. If I found other items of income I didn't take credit for them but simply let them stand by themselves and took the profits from the gas business.

Q. If you had taken those items of income, that would have increased the rate of income and increased the profit in cents per thousand?

A. Yes, but I was endeavoring to confine myself strictly to
6776 the gas business as far as I could see it from these reports.
Where I found by analysis that the renewals and repairs did not amount to 14.15 cents I added.

Q. Wherever you found that the repairs, renewals and depreciation already equaled or exceeded 1.415 cents you left it at that point, did you?

A. I left it at that point, did not make any reductions on that account.

Q. And in every case where it was below you added to bring it up to 14.15, which was the figure you used in your estimate of the amount of depreciation, repairs and renewals?

A. That is correct, sir.

Q. That would compare with actual expenditures of the Consolidated Gas Company for repairs and renewals for the past twenty-one years I think you said, of 10.6?

A. Yes, that is my figure.

Q. Or nearly four cents more than the Consolidated?

A. Yes, sir.

Q. If these companies were to be cut down in this table to 10.60 cents which the Consolidated has actually expended per annum that also would show a substantial increase, the rate or return on capital, and in number of cents per thousand of profits, wouldn't it?

A. Yes, sir. I assume in that adjustment I did not take my amount, as I figured it up at 10.60, but took 10.89 as the amount that was probably more nearly in the minds of counsel on both sides.

Q. That was for the twenty years?

A. That was for the twenty years, but it has been so often referred to I took that instead of the amount brought up to date of 10.6.

Q. That is to say, following this table you made a comparison
with the Consolidated Gas Company's situation, and have a
6777 table to that effect, have you not?

A. Yes, sir.

Q. Now, will you simply read that into the record? It is very brief.

Table No. 4 shows Gross Profits adjusted to bring Repairs and Renewals up to at least 14.15 c. per M in cases of all seven companies considered, but where Repairs and Renewals as charged were found to exceed 14.15c. no adjustment was made.

If now instead of making the above adjustment we adjust Repairs and Renewals to 10.89c. per M in all cases we find a considerable increase in Gross Profits as follows:

Gross Profit (5 Co.'s — 1 to 5) 15.78% of Capital as compared with 13.88% on Table No. 4 Col. No. 14.

Gross Profit (5 Co.'s — 1 to 5) 35.27c, per M as compared with 31.03c. on Table No. 4 Col. No. 15.

Gross Profit (2 Co.'s — 6 and 7) 39.38c. per M as compared with 35.16c. on Table No. 4, Col. No. 15.

Gross Profit (7 Co.'s) 36.29c. per M as compared with 32.06c. on Table No. 4 Col. No. 15.

Hence, assuming 8% interest we have 36.29 ÷ 8 = $4.536 as Capital per M *exclusive* of Franchises, Good Will and other intangible assets for the 7 Massachusetts Companies.

Sales of N. Y. Consolidated were 13,283,163 M ft. for Year 1905. Hence 13,283,163 x $4,536 = $60,252,427 as capital for N. Y. Consolidated exclusive of Franchises, Good Will, and other intangible assets on the basis of 7 Massachusetts Companies quoted by defendant's experts.

6778 Q. Now, Doctor, these special items, the profit and loss, debtors to profit and loss, column 7, represent charges other than those carried into the previous charges for cost of gas; that is, it might be called lump charging off?

A. Yes, sir.

Q. And you have taken enough of those to bring up to 14.15 cents where the amount of repairs and renewals and depreciation was less than that at the outset?

A. Oh, yes.

Q. Now, as a matter of fact, while that rate of repairs, renewals and depreciation is very much greater than charged by the Consolidated Gas Company, supposing you included not what you considered a fair adjustment and to which you have testified in these tables, but the entire amount of these special and arbitrary charges to the profit and loss account as part of the operating cost of gas, showing a gross profit for the five companies which you show in Complainant's Exhibit 378 of how many cents per thousand?

A. The five companies would still show 29.05 cents per thousand.

Q. And profits under capital of what per cent.?

A. Thirteen per cent., as compared with 13.88 on the table.

Q. But of course, if you add those enormous amounts to the depreciation, renewal and repair account they would become charges as against the operating cost of gas, would they not?

A. Yes, sir.

Q. What would they add to the operating cost of gas per thousand feet in that connection?

A. 4.47 cents.

Q. And that would have to be reckoned with, would it not, if you assume any such depreciation item as that?

A. Certainly.

6779 Q. Have you prepared two supplementary tables to Complainant's Exhibit 378, showing how the different items in Exhibit 378 were figured out as to the amount added in each case where it was added to bring the total renewals, repairs and depreciation up to 14.15 cents?

A. Yes, sir. This shows details so that it can be followed—the development of that other table can be followed; that is all it is for.

Q. One or two?

A. Two additional tables.

Q. Have you copies of those tables?

A. I have, sir.

Mr. MATHEWSON: I will ask you to give the copies to the other counsel and I will offer these in evidence.

Received in evidence and marked respectively Complainant's Exhibits 379 and 380.

Q. Have you gone to the Massachusetts reports, the last printed volume from the Commissioners of Gas and Electricity, in the State of Massachusetts, and taken all the companies in Massachusetts, as shown in the work from which Prof. Bemis has quoted, showing in similar manner to Exhibit 378 the returns as profit on capital, and profit in cents per thousand sold as to all of the companies in Massachusetts engaged exclusively in the gas business, so that they can be analyzed?

A. I have. I have prepared that table and also two supplements, Nos. 2 and 3, to show how I developed the details.

Q. In the same way that the last two exhibits showed the development of Exhibit 378?

A. Yes, sir, with a careful note in each column so as to lead anybody examining it to see exactly what I mean.

6780 Q. And in this case where the expenditures in the manufacture of gas did not equal 14.15 cents for renewals, depreciation and repairs, did you add a sufficient amount to make that sum up where there was any special fund charged off to which it could be applied, or from which it could be obtained?

A. Yes, sir, I added enough to bring up to 14.15, but did not deduct anything if I found more.

Q. And if it had been reduced to 14.15 by deduction where companies had charged off more than that it would have increased the rate of return on capital and increased the cents per thousand of cents of profit shown in this table?

A. Yes, where there were such cases.

Q. Will you state whether this table does not in whole show that the average profits per thousand sold for these companies were 32.21 cents per thousand?

A. Yes, sir.

Q. And the average return on capital 11.17 per cent?

A. Yes. I want to make an additional explanation, it appears here, and I had better draw special attention to it, that these adjustments were made only in the case where there seemed to be necessity for it by the introduction into the individual profit and loss account of special items such as depreciation or reserve.

Q. If you had a credit that also would have increased the rate of return?

A. Yes, except so far as I stated where they might be considered as standing against other items of extra expenditure. Now, the returns as printed did not give me the full opportunity for closely analyzing those charges to profit and loss or again we have had reference to the detailed reports of the Commission, and we made those adjustments by the reports made by the companies themselves, the detailed reports in the same way, and employing that as Mr.
6781 Bemis had employed some in the case of 1906, though we went back to 1905, because the details were not even in the printed record.

Q. Now, I see in this paper which you have in your hand, one or two, perhaps two, companies you have marked "ignored"; what is the reason for that?

A. Well, in one case it is plainly shown there, No. 2 where there was a loss. There was no good considering such a case as that, in considering profits. It shows an abnormal condition, I hope.

Q. Reference has been made to Haverhill?

A. Yes, sir.

Q. Now, if you look at this table a moment, referring to the low capital at Haverhill, meaning stock, bonds and notes, it appears to be how much?

A. 63 cents per thousand feet.

Q. To you as a gas engineer familiar with conditions, what would that indicate as to assets?

A. Indicate the assets had been very largely written down in some way or another.

Q. How much does Haverhill earn on a capitalization in percentage on capital?

A. 44.56 per cent. on that basis.

Q. And looking down the table it seems to be generally true, does it not, that these companies with very low capitalization are permitted to earn a very high return on it?

A. Yes, take the very [illegible]t one on the list, Worcester, shows 2.18; earns 14.20 per cent.

Q. And when you speak of capital in this table which you have before you and also in Complainant's Exhibit 378, it refers, does it not, merely to the paper capital, that is, to stock, bonds, notes payable and not to the value of assets or value of property? Not at all to the value of assets or value of property?

A. Not at all to the value of assets, and the notes payable
6782 are the notes payable which are considered as part of the fixed capital by the commissioners and so show in their returns.

Q. The same ones to which I called Dr. Marks' attention when he was on the stand?

A. Yes, the same thing.

Mr. **Mathewson**: I will offer this in evidence, with the summary, showing the detail by which this table was developed, for the convenience of counsel.

Received in evidence and marked Complainant's Exhibit 381 382 and 383.

Q. Assuming that all these special lumped charges included in the column of this large sheet, Complainant's Exhibit 381 under column 7 (Special debits to profit and loss) were included not only to sufficient extent to bring those individual companies up to 14.15 cents for repairs, renewals and depreciation, but that such items had been included *in toto*, making a very much greater charge. What charges would the gross profits for the thirty-two companies still appear to be per thousand feet?

A. 27.61 cents, as compared with the figures shown on the detail, 32.21 cents.

Q. Or a return on capital of what?

A. 9.57% *per cent.* as compared with 11.17.

Q. But in case you had this additional charge to depreciation, renewal and repair account it of course would go into the operating cost of gas as a charge against operation, would it not?

A. Certainly, amounting to 5.75 cents per thousand feet.

Q. So in reckoning the cost of gas if you were to include those immense depreciation charges you would have to add 5.75 cents to the cost, would you not?

A. Yes, that is right.

6783 Q. In other words, is it possible to consider a large depreciation charge without at the same time considering an addition to the cost of gas to take care of it?

A. No, sir.

At 1.00 P. M. a recess was declared until 2.15 P. M.

After Recess.

Alexander C. Humphreys, resumed.

By Mr. **Mathewson**:

Q. Referring to your statement that the inclusion of all the special items of debit arbitrarily charged off in the cost of gas, following the introduction of Complainant's Exhibit 378 would add to the cost of gas 4.47 cents, just exactly what do you mean by that? I think I did not ask you definitely enough, so that it is clear. That is, how is the 4.47 cents computed and what does it represent?

A. The 4.47 cents covers all the special charges carried into profit and loss, reduced to the cents per thousand basis; the difference in cost, as found on Exhibit 378, namely, 31.03 and 29.05, the difference in cost would be only 1.98 of course, and that 29.05 is found by including such additional amounts as are found on the profit and loss statements outside of the adjustments I made, already explained.

Q. In this connection you omitted Lawrence and Lynn, for the reason that their business is involved with electricity?

A. Yes, sir. Perhaps you want an explanation on the other table, if you did not understand me.

6784 Q. Very good. What does the 5.75 cents mean which you said would be added to cost if everything was included, all the special items on Complainant's Exhibit 380?

A. That 5.75 is on a par with the 4.47, referring to the other table, whereas the net difference in cost would be only 4.60, namely the difference between 27.61 and 32.21, as it appears on Exhibit 380.

Q. Now, by reference to Complainant's Exhibit 382, if you are to include all the special debit charges to which you have referred, it would show a charge to repairs, depreciation and renewals on the part of Cambridge, of how much per thousand feet?

A. 22.679, with this little explanation: Gas stove repairs and renewals are omitted in that total, because I found upon close investigation that that account was in Massachusetts practice used somewhat as a dumping ground for other charges, and while unquestionably the repairs and renewal charges are in there which should be included, I was not able to eliminate the charges which were not stove repairs and renewals, and therefore did not include it at all. In other words, these amounts would all be somewhat increased if we had all the repairs and renewals included.

Q. But on the general proposition of return upon capital and the cents per thousand included, there would be substantially no change?

A. No, there would be no change, because it simply means that a certain item which is not in repairs appears as repairs in the total, it would be in.

Q. In East Boston the total return is 16.996, including repairs and depreciation, if the special debit item be included?

A. Yes, sir.

Q. And Northampton?

A. 31.577. Pittsfield, 57.003; Plymouth, 66.466; Springfield, 26.107; Taunton, 22.037; Worcester, 21.199.

6785 Q. Cents per thousand feet in each case?

A. Yes.

Q. You observe that Mr. Marks and Mr. Bemis assumed certain capital and assets in Massachusetts, as though they represented actual assets and capital of the company. As an engineer familiar with the gas business, what would it indicate to you where charges are made at that rate for depreciation, repairs and renewals?

A. The charges in some of those cases undoubtedly indicate that there has been a writing down of assets by charging too much; more than was required to account for depreciation and repairs.

Q. Now, referring to the companies that were selected by Mr. Marks as to four out of the five, and as to Mr. Bemis, all five, Cambridge, Fall River, Worcester, Springfield and Lowell, as typical companies, have you made an analysis of the reports for the year ending June 30, 1906, with a view to showing the actual book value, and structural value per thousand feet in the case of those companies?

A. I have.

Q. Now, is the table you have in your hand the result of your knowledge and computation and does it state your conclusions therefrom?

A. It does, in connection with certain other tables.

Q. Have you a copy of this table for the other counsel?

A. Yes.

Mr. MATHEWSON: I offer that in evidence.

Paper received in evidence and marked Complainant's Exhibit 384.

Q. This table, Complainant's Exhibit 384, shows adjusted book assets for the Cambridge Company of 4.38; Fall River, 3.80; Springfield, 4.62; Worcester, 4.38 and Lowell 3.40. Lowell seems to have no figure carried opposite the adjusted book assets, and I find 6786 in relation to street mains and meters the statement that Lowell in its assets and liability statement does not separate the mains and meters from the real estate, machinery and manufacturing appliances and that therefore no adjustment could be made in the case of this company. That is the explanation, is it?

A. That is true.

Q. Now as explanatory of this table 384 have you prepared certain supplementary tables?

A. I have, to establish the adjustments.

Q. The first table, being table number 8 to which I call your attention, indicates, does it not, how the item working net assets found in Compalinant's Exhibit 384 is obtained?

A. That is true, yes, sir. It is for that purpose so as to give details of the amount appearing in the main sheet.

Q. Complainant's Exhibit 384 and with the necessary notes and explanations of the method I follow.

Q. You deduct from the quick assets the floating debt?

A. That is right.

Q. Now Mr. Marks testified, you may recall, that he found the working capital of the four companies which he dealt with as 47.8 cents per thousand feet of sales after including the notes payable, in accordance with the custom of the Massachusetts Commission. What do you find here as to working capital per thousand feet sold? Mr. Marks' figure of 13 cents was his first estimate when he excluded notes payable and some other items from working capital, but his final figure was 47.8 cents including those items, when he found that the Mass. Commission included them. What do you find for these five companies as to working capital?

6787 A. The figure that rested in my mind was the 13 cents, that being Mr. Marks' figure as really deduced by him. My recollection is also that Mr. Marks took for the year of June 30, 1905, and for that year on the same basis on which this paper was prepared the true working capital would be 43.75 cents per thousand, and this table for the year June 30, 1906, shows the working capital to average 38.5 cents per thousand, instead of 13 cents.

Mr. MATHEWSON: I offer that table in evidence.

Paper received in evidence and marked Complainant's Exhibit 385.

Q. Now, have you also a table marked "A. C. H., Table No. 9," indicating how the excess value as to street mains and meters over book value is obtained?

A. I have. It is a comparison between the book value of certain of the assets and an estimated value prepared in the case of such assets and details are to be found in the reports. For instance, street mains, and meters, are scheduled in the reports, and therefore, we have an opportunity to compare with these two particular items the book values with the real values. I have been careful in making my estimates for comparison to take conservative values. For instance, in my estimate on meters, I took the present cash price and did not even add for cartage. All the discounts are taken off. The street mains, instead of taking any value of mine, this refers to Mr. Marks' work, I have satisfied myself for this particular purpose by accepting Mr. Marks' estimate of cost for cheap laying, namely under uniform conditions of macadam. On that basis I have prepared this explanatory table so as to arrive at the values appearing in table No. 6788 7 by which we built up the assets. It is to be noted that I have no means of adjusting for works nor for services.

Q. But taking street mains and meters only, and those you say are the only ones you can compare, does it not appear that in every instance, that the actual value as estimated exceeds the book value with the sole exception of meters in Springfield, where the book value seems to exceed the actual value by $1,693.

A. That is true.

Mr. Mathewson: I offer this table in evidence.

Table received in evidence and marked Complainant's Exhibit 386.

Q. Now, you have produced another table known as "A. C. H. Table No. 10," showing your details of the estimated values of the meters as shown by you on the last previous paper, Complainant's Exhibit 386, based on the conservative basis of figuring to which you have testified?

A. I have.

Q. And this paper merely shows the detail of such computation, does it not?

A. That is all. It is just to show the facts as I understand them.

Mr. Mathewson: I offer that in evidence.

Received in evidence and marked Complainant's Exhibit 387.

Q. Have you also prepared a further supplementary table known as "A. C. H. Table No. 7," being a summary comparing the estimated increases in the value of street mains from June 30, 1905, to June 30, 1906, with the increases of value of such mains and services for the same period, and showing the apparent writing down of this account for the four companies at Cambridge, Fall River, Springfield and Worcester?

A. I have.

6789 Q. Take Cambridge and the increase between June 30, 1905, and June 30, 1906, in mains upon Dr. Marks' estimate of value would be $15,524, would it not?

A. Yes, sir.

Q. How much does the increase appear on the books?

A. $6,010, making a difference of $9,514.

Q. From your knowledge of the value of mains would you be able to say that the $6,010 does not represent an adequate value of the increased main mileage?

A. It does not represent the value on the books, no.

Q. In every case there would seem to be a writing into the books of less than the full increase, except in the case of Worcester, as to street mains and services?

A. That is right.

Q. And the details at the foot of this sheet show how the totals above are arrived at in detail, do they not, or at least the amounts which are found at the foot of the column?

A. That is right, it shows the details. It is a listing of the amounts.

Q. Dr. Marks produced statistics as to the Worcester Company and was questioned as to their treatment of assets in their books, and as to the fact that the assets account did not keep pace with the increase in property. Have you prepared as illustrating this from the Massachusetts' reports to which his attention was drawn, a statement of the increase in mileage for mains for the Worcester Company between June 30, 1901, and June 30, 1906, a period of five years as indicating that policy?

A. I have.

Q. And is the table, "A. C. H. Table 11-A," a table setting forth the results?

A. It is.

Q. Now, taking this table, it appears that on June 30th, 1901, that the Worcester Company had 523,128 feet of mains to which you attribute a value of $430,000, omitting some few mains of 1, 1¼ and 1½ inches and the 30 and 36-inch mains which do not seem to appear?

6790 A. Well, I omit the 1, 1¼ and 1½ inches, which are on the list simply because they are small, and Mr. Marks' table did not cover them. I wanted to confine myself to that.

Q. That is, he gave no values for them?

A. Yes, sir. The 30 and 36-inch mains do not appear in the schedule.

Q. And the same is true where dashes appear elsewhere in this account?

A. That is right.

Q. According to Mr. Marks' unit values this 523,128 feet should be worth on June 30, 1901, how much?

A. $430,270.

Q. What were they actually carried at on the books of the Worcester Company on that date?

A. $123,215.

Q. Which would be less than one-third of the value as computed by Dr. Marks, would it not?

A. Yes, sir.

Q. In the year ending June 30, 1906, we find that the mains of the Worcester Company have increased from 523,128 to how many feet?

A. 707,885 feet, which I valued at $558,137.

Q. On Dr. Marks' unit values?

A. Yes, sir, simply by way of comparison as will develop later.

Q. Instead of appearing on the books of the company at a value of $558,137 on June 30, 1906, at what value are they carried?

A. $112,328.39.

Q. That is to say in spite of an increase from 523,128 feet to 707,885 feet in the five years the company has reduced the book value of its mains by how much?

A. $10,977.47; in other words, there is an increase in calculated value which is an increase on new pipe, because the increase is in new pipe of $127,867, and if we add to that the actual decrease in the book value of $10,977.47 we have a difference of $138,844 in this period alone. That is the increase of calculation values of mains alone.

6791 Mr. MATHEWSON: I offer that in evidence.

Paper received in evidence and marked Complainant's Exhibit 389.

Q. You said that the only items which you were able to compare, as appearing in the report, were the mains and services and meters. Have you any reason to suppose that the treatment of manufacturing plant as to writing down, and other assets, was any different on the part of the Massachusetts companies than their treatment of mains and meters?

A. Mains and meters?

Q. Yes.

A. Services I did not compare. No, I have no reason to suppose they followed any different plan.

Q. Do you know what the structural value per thousand feet average throughout the United States has been of gas plants according to the last census?

A. Yes. I have a memorandum here.

Mr. BURR: Sales or capacity?

Mr. MATHEWSON: Was it sales or capacity?

The WITNESS: Per thousand feet of sales.

Q. And the average capital per thousand feet of sales, taken into account all the gas undertakings throughout the country according to the census was how much?

A. The United States structural value per thousand was $7.23 and capitalization $8.47, as compiled by Mr. Grosser, the statistician, in Chicago. I took it from a statement appearing in the Chicago pamphlet, as it has been called here.

Q. His tabulation purports to come from the United States census, does it not?

A. Yes, sir.

Mr. MATHEWSON: That is the pamphlet we had from them with several statements quoted therefrom.

6792 Q. Mr. Bemis says at page 3092 as a well known fact in the gas business that an increased consumption following a reduction of price does not involve a proportionate increase in capital. Have you taken the companies to which he referred in his table—was it at page 3092?

A. He refers to those companies at page 3021 or 3055.

The Master: 3055 is the Massachusetts companies.

Q. Have you taken the large companies, Lynn, Worcester, Springfield, Lowell, Lawrence, Charlestown and Cambridge, to see whether his statement that there is no proportionate increase required in capital is susceptible of proof?

A. I have.

Q. Have you prepared a table showing the increase in percentage of assets and profits?

A. I have.

Q. And do you remember his statement that the profits would largely increase with very little increase in assets in case of an increased output in gas?

A. Yes, sir. "It is a well-known fact in the gas business that an increase of consumption following a reduction in price does not involve a proportionate increase of capital?"

Q. In taking these companies have you taken the increase in price for periods which Mr. Bemis used in his table, in showing the increase in sales or profits of the companies?

A. Yes, sir.

Q. For instance, Lynn?

A. I think you will find that page to be 3090.

Q. For instance, in the case of Lynn, Professor Bemis took two periods, 1894-5 and 1903-4, did he not?

A. Yes.

Q. And in Worcester, two periods, 1894-5 and 1900-1?

A. Yes.

6793 Q. And so on for the other companies which I have named?

A. Yes.

Q. Now, taking those two periods for the Lynn Company, for example, 1894-5 and 1903 and 1904, the gas profits show an increase of profits of how much money?

A. Over the first period they show an increase—well, the profits were $46,212 in the first case and $114,200 in the second, and the ratio is 2.47.

Q. Did you find that the gas assets had to increase or did increase any less rapidly than the profits?

A. I found the gas assets to be $351,405, and $879,421, a ratio of 2.5.

Q. In other words, the assets increased more rapidly than the profits, did they not?

A. A little in that case.

Q. How about Worcester?

A. Let me add to that, please, I think I left it off the table, that the total reduction in that case was from 1.22 to 90 cents.

Q. In the case of Worcester the reduction was from $1.29 to one dollar, was it not?

A. Yes, sir.

Q. And the profits increased?

A. The ratio was 1.22.

Q. And gas assets?

A. 1.23.

Q. In the case of Springfield with a reduction from 1.37 to 1.01 there was an increase of profit by a ratio of what?

A. The profits increased 1.67 and the gas assets 1.22. There is an explanation on the table showing that the conditions were somewhat different, change of management, etc.

Q. In Lawrence what was the result of a reduction from $1.28 to one dollar?

A. The increase in profits was a ratio of .83 and the increase of assets was 1.45.

Q. And in the case of Lowell with a reduction from $1 to 91 cents?

A. The ratio of profits was 1.30 and the ratio of gas assets 1.40.

6794 Q. Of course all of these gas outputs are under the legal rate of 16 candle power?

A. They are under that rate. I have not put in the actual candle powers delivered.

Q. Cambridge shows an increase of .96 ratio and profits and 1.11 ratio in assets, does it not?

A. That is right.

Q. Charlestown on the other hand seems to show an increase of 1.48 ratio in profits and 1.18 in assets?

A. That is true.

Q. What is the explanation there?

A. They were buying gas from the Union Gas & Coke Co., and since then they had been building a plant for themselves. In other words, they did not need the increase in plant because they purchased the gas already manufactured in their immediate neighborhood.

Mr. Mathewson: I offer that paper in evidence.

Received in evidence and marked Complainant's Exhibit 390.

Q. Prof. Bemis at page 3533 said that in some cases a reduction had been made in Massachusetts when dividends were below 6%?

A. Yes, sir, he made that statement at page 3533.

Q. Have you a statement of the companies to which that statement of his would apply?

A. I have prepared a statement which I think is complete.

Q. He named the companies, I think, and you have taken the same companies, have you not?

A. Yes, sir, I think I have taken the exact companies.

Q. Does it appear in the case of those companies that that was the general rule, or did the Commission make some explanation 6795 in each case of why the reduction was made?

A. I will say that there is a special explanation in each showing that there were conditions which the Commission seemed to think warranted them in making this reduction.

Q. Did they make a special explanation in each case?

A. Yes.

Q. Have you prepared a memorandum for convenience setting forth in as concise terms as possible the statements of the Commissioner in that regard, setting forth the reason?

A. I have. It is as follows:

1A—EXHIBIT

MEMORANDUM

In Regard to the Reductions in Price of Gas Made by the Massachusetts Gas & Electric Light Commission When Dividends Were Only 6%, As Claimed by Profesor Bemis in His Testimony (See page 3533).

Springfield—Reduction took effect November 1, 1900:

In its decision upon this petition the Board said (see page 19 of Report Issued January, 1901) that as far as the dividends were concerned it was doubtful whether it would be justified in reducing them, but that the earnings for the fiscal year ending June 30, 1900, were the largest in the company's history, and that even allowing for the reduction in those earnings that would be produced by increases in the prices of materials there would still remain "after providing for dividends and the other charges necessary for the maintenance of a proper public service a substantial sum, which may be applied to a reduction in the price."

6796 The profit from the gas business for the fiscal year ending June 30, 1900, was $86,543.83, or at the rate of 11.99% upon the gas assets of $684,940.02, which equalled $4.50 per 1,000 cu. ft. of sales for the year (see pages cxx and 124, Report issued January, 1901). If the average price received during this fiscal year had been lower by the amount of the reduction of 20c. per 1,000 cu. ft., ordered by the Commission, the profit from gas for the year would have been $56,163.85, or at the rate of 8.2% upon the gas assets.

East Boston—Reduction took effect March 1, 1901:

In its decision upon this petition the Board, in reviewing the history and financial policy of the company, said: "For many years no charges whatever were made for depreciation; these have never exceeded one per cent. in any year, and have usually been not more than three-quarters of one per cent. At the same time, although the annual charges for repairs have been uneven in amount, and, when computed upon the cost per thousand, have sometimes seemed to be too high, no considerable sum seems ever to have been charged in this way which should have been charged to construction accounts. The tendency, on the whole, has seemed to be liberal towards construction rather than operating accounts * * * The natural result of the policy thus outlined has been that the company has to-day a plant whose structural value is probably less than its capital stock, and is confronted with a demand for a liberal expenditure for extraordinary repairs, needed in the interest of the consumers and the shareholders as well," and concluded, "As the conditions exist, however, it is difficult to see how the expenditures now needed can be met without either a higher price or a lower dividend rate 6797 than might otherwise be fair and reasonable. The responsibility for this condition seems to be so clearly upon the management that it does not seem to be the duty of the Board to provide for these expenditures out of the price of gas, or to require consumers to again contribute, through the maintenance of the present price, what they have already once contributed for such a purpose. The conditions seem to entitle consumers to a reduction in price, and to imperatively demand, for the proper conserving of the interests of the shareholders, a reduction of dividends until such expenditures have been made upon the plant as will equip the company to supply gas at a reasonably low price with a fair profit."

The profit for the fiscal year ending June 30, 1900, was $24,856.22, or 8.1% upon the assets of $306,933.47, which equalled $6.05 per 1,000 cu. ft. of sales for the year, while 10% dividends were paid upon the capital stock of $220,000, which equalled $4.34 per 1,000 cu. ft. of sales (see pages xli and 123 of the Report issued January, 1901). If the price during the fiscal year had been lower than the average price actually received by the amount, 15c., of the reduction ordered by the Commission the profit would have been $17,337.17, or 5.6% upon the assets.

Waltham—Reduction took effect June 1, 1901:

This was a combined gas and electric plant and the Board found that in addition to selling gas to two large consumers at a loss, the company was making the gas department pay part of the cost of the electric department (see pages 15, 16 and 17 of the Report issued January, 1902). Even under these conditions the profits from gas for the fiscal year ending June 30, 1901, was $15,600.03, 6798 or 9.83% upon the gas assets of $158,647.58, which equalled $4.60 per 1,000 cu. ft. of sales during the year (see pages cxxxi and 135 of the Report issued January, 1902). If the price received during the fiscal year had been the average price, $1.30, per 1,000 cu. ft. received during the first fiscal year during the whole of which the reduction ordered by the Commission was in effect, instead of being $1.41 as it actually was, the gas profits would have been $11,871.83, or 7.5% upon the gas assets.

Newton and Watertown—Reduction took effect July 1st, 1901:

In this case the Board found that notwithstanding a decrease in the price of gas in "the last fiscal year" and an increase in cost of materials combined with a decrease in value of residuals "a somewhat lower rate than that charged would probably permit the maintenance of the usual dividend, and amply provide for depreciation or contingencies, along with the maintenance of the best service to the public. To such a reduction the consumers are justly entitled." In the fiscal year ending June 30, 1901, the profit from gas was $42,386.82, or 11.6% upon the gas assets of $366,341.85, which equalled $3.33 per 1,000 cu. ft. of the sales for the year (see pages xcviii and 135 of the Report issued in January, 1902). If the price received during the fiscal year had been the average price, $1.17, per 1,000 cu. ft. received during the fiscal year during the whole of which the reduction ordered by the Commission was in effect, instead of

$1.30 as it actually was, the gas profits would have been $28,223.08, or 7.7% upon the gas assets.

6799 CHICOPEE—Reduction took effect January 1, 1903:

In this case the Board found that 24% of the total output of the company was sold to two large consumers at a price that did not include a fair share of the fixed charges, and that in addition the expense of management was very high. They summed up the case as follows: "The proposition that a company is entitled to a fair profit involves a further proposition that its affairs are economically and judiciously managed. The management may, if it desires, choose between profits and a high operating account, but it cannot rightly choose to impose both upon the consumer. Some of the prices now charged are unusually low, too low, it may be, for the interest of the corporation; but the highest price charged is unusually high, and the economies demanded of the Company may properly be applied to a reduction in this price." The reduction in price from $1.75 to $1.50 per 1,000 cubic feet, which was ordered by the Board, only affected about 24% of the sales, and only made a reduction of 4c. in the average price received per 1,000 cu. ft. in the fiscal year in which it was made, and of 9c. per 1,000 cu. ft. in the first complete year in which it was in effect.

For the fiscal year ending June 30, 1902, the profit from gas was $6,423.84, or 3% on the gas assets of $193,252.91, which equalled $10.24 per 1,000 cu. ft. of sales (see pages xxxv and 146 of the Report issued in January, 1903). If the price received had been the average price, $1.31, per 1,000 cu. ft. received during the first fiscal year during the whole of which the reduction ordered by the Commission was in effect instead of being $1.40 as it actually was, the profit would have been $4,736.41, or 2.4% upon the assets.

6800 CHELSEA—Reduction took effect November 1, 1904:

The Board in this case stated that the ability of the company to make any reduction that might be practical was due entirely to the contract in force for the purchase of gas from the Massachusetts Pipe Line Company, the benefits of which should be shared between the stockholders and the consumers (see page 20 of the Report issued in January, 1905).

The gas profits for the fiscal year ending June 30, 1904, were $24,754.76, or 7.5% upon the gas assets of $329,630.85, which equalled $6.63 per 1,000 cu. ft. of sales for the year (see ppages xxx and 125 of the Report issued in January, 1905. If the price received for gas during the fiscal year had been less than the amount, $1.25, per 1,000 cu. ft. actually received by the reduction of 15c., ordered by the Commission, the gas profits would have been $17,105.27, or 5.2% upon the gas assets.

EAST BOSTON—Reduction took effect November 1, 1904:

In this case the Board gives the reason for ordering the reduction as follows: "The acquisition of this company in the interest of the owners of the other Boston companies was effected but little more than a year ago. The advantage of this alliance, bringing to the company a highly skilled management and increased facilities in the purchase of supplies, has apparently improved the company's ability to serve its customers. As this common control makes special economies available, the company may well afford to share their benefits with its consumers. Utilizing these advantages, and considering the expenditures needed to improve the services and maintain it at a proper standard, the Board make their recommendation."

6801 In the fiscal year ending June 30, 1904, the profit was $30,489.89, or 8.4% of the assets of $362,587.84. Owing to the fact that one-quarter of the gas sold was sold in bulk to another gas company and therefore did not call for any distributing system, the assets per 1,000 cu. ft. of sales have not been figured. (See pages xliii and 124 of the Report issued January, 1905.) Taking the average price received for the gas sold to ordinary consumers as being less than the average price, $1.26, per 1,000 cu. ft. actually received for gas sold to such consumers by the amount, 5c., of the reduction ordered by the Commission and the price of gas sold to the other gas company as being that stated by the Commission in their decision the profit for the year would figure out $27,493.96, or 7.6% upon the assets.

NEWBURYPORT—Reduction took effect December 1, 1904:

The reasons for ordering this reduction are stated by the Board as follows "About two years ago the control of the corporation passed to the present owners, who have greatly improved and extended the plant and the cost of this work has so increased the company's indebtedness that at the date of the decision it was more than $110,000.

"The statement of the company's operations for the last fiscal year shows a surplus, after payment of interest and dividends, altogether too small either for a reduction in price or even for the regular and safe conduct of the company's affairs. A careful scrutiny, however, of the operating accounts disclosed the fact that they contained numerous items incidental to the plant improvements already referred to; and, while these may have been properly
6802 and necessarily included, they are not likely to be repeated,
and their absence from future statements will make a substantial increase in the company's apparent profits. On the other hand, this increase will be in some measure offset by an increase in the interest charges, due to the growth of the floating debt.

"Giving due weight to all these facts, the conditions which surrounded the company at the time of the decision seemed to permit only the reduction in price which was named by the Board."

In the fiscal year ending June 30, 1904, the profit from gas was $6,630.60, or 5.6% on the gas assets of $128,962.82, which equalled $5.36 per 1,000 cu. ft. of sales for the year (see pages xcvii and 125 of the Report issued in January, 1905). If the price received during the year had been only $1.40 per 1,000 cu. ft., this being that to which it was reduced by order of the Board, the gas profits would have been $4,111.41, or 3.2% upon the gas assets.

CHARLESTON—Reduction took effect January 1, 1906:

In the fiscal year ending June 30, 1905, the profit from gas was $68,778.41, or 10.5% upon the gas assets of $654,049.75, which equalled $3.58 per 1,000 cu. ft. of sales for the year (see pages cx and 116 of the Report issued in January, 1906).

If the average price received during this fiscal year had been 91c. per 1,000 cu. ft. instead of $1.01, as it actually was, the gas profit would have been $50,507.81, or equal to 7.7% upon the gas assets.

Mr. BURR: I cannot help but remark that this is called a memorandum instead of a long speech or oration, as the statements 6803 of Professor Bemis and Dr. Marks were characterized.

Mr. MATHEWSON: They should have headed their memorandum in that way. This was taken from the same sources which they kindly introduced to our notice.

Q. Are you able to find any general pronouncement of the Gas Commissioners in Massachusetts that a six per cent. rate is sufficient under normal circumstances?

A. No, sir.

Q. At page 3093 Professor Bemis says that he draws a conclusion from his study of the Massachusetts companies that if the companies can stand a reduction of any given amount they can stand a reduction of at least eight or ten cents more by reason of the large increase in business sure to follow without any proportionate increase in expenses, always providing that the reduction does not go down to operating cost. The exhibits we have put in have shown an increase in assets proportionate to profit and more, but independent from that, what would be your view as to the soundness of the proposition which he advances?

A. My view is it is very unsound. For instance, if the statement is literally interpreted, I can hardly believe Mr. Bemis wished it to be so understood, in other words, if there is a reduction of eight or ten cents, there is no reason that there should not be another reduction of eight or ten cents, the only limit is, provided it does not go down to operating cost. Suppose it went down within one or two cents of operating cost, the amount of sales would have to be very, very large.

By Mr. BURR:

Q. Then we would have confiscation, would we not, Doctor?

A. We would.

6804 By Mr. MATHEWSON:

Q. He also refers to the proposition which he advanced that with a reduction of price there would be or will be such a great increase of consumption that the sales will increase very rapidly, and in this connection some one referred to the London companies. What is the experience there according to your investigation?

A. Taking the years 1900 and 1904, taking the three London companies and averaging them, the reduction in price between those years was 10.56 per cent., whereas the sales only increased on an average of one per cent. per year. My recollection is that one per cent. per year figured up 4.23.

Q. Is not the consumption in London so far as you know the largest per capita of any city in the world outside of New York?

A. I believe it to be.

Q. Would the fact that the saturation point per capita has been so nearly reached have any effect on the increase in consumption in your judgment?

A. In my opinion it has a very great influence.

Q. And what would you say as to Professor Bemis' statement at page 3218 that his experience throughout this country and Europe tends to show that the large company has lower costs of distribution, as to its being a general proposition which may be accepted?

A. As affected by the increase in sales, the larger the sales, presumably, the larger the company, in that sense.

Q. That is what I referred to.

A. The average for the three Metropolitan companies between the years 1901 and 1905 shows an increase in the items which are called distribution and management of 18.8 per cent., whereas the sales show an increase of 3.79 per cent., so that the expenses increase even faster than the sales.

6805 Q. Referring to the Laclede Gas Company, which was introduced at page 3018 as part of a table, it was stated that 5 per cent. was paid on stock and bonds, but upon what capitalization was the 5 per cent. paid, if you have computed it?

A. First mortgage bonds, $10,000,000, five per cent.; five per cent. extending refunding bonds of $7,000,000, making $17,000,000; preferred stock of $2,500,000 and common stock $8,500,000, making $28,000,000.

Q. That would be an equivalent to $8.43 per thousand sold, the sales being 3,221,671 thousands, thousands being the unit.

Q. That would be an equivalent to 8.43 per cent. on a capitalization of $5 per thousand cubic feet of sales?

A. Yes.

Q. Or of 10½ per cent. on $4 of sales?

A. That is right.

Q. At page 3577 and 3578, where Professor Bemis was asked as to its being easier to maintain a candle power of only 14 with coal gas than it would be to maintain a candle power of 22 by means of oil enrichment to a large degree, he said it was easier probably to maintain 14 than 22 candles, and yet that he knew in Philadelphia the candle power does not vary a mile from the works, and at the home of Mr. Walton Clark, who lives seven or eight miles away. Does your knowledge of the situation at Philadelphia enable you to say whether that is so, or could be so?

A. No, sir, it is not so, and could not be so.

Q. Professor Bemis stated as his authority something that Mr. Walton Clark said to him, have you gone to the same source of information to find whether Professor Bemis properly understood the matter?

A. I have, and have his absolute denial that he ever made any such statement.

6806 Q. In writing?

A. In writing, yes, sir.

Q. Now as a matter of fact in considering candle power and the maintaining of a margin, is it not true that it is easier to maintain a narrow margin above 14 or 16 candle power, where you are making coal gas, than it is to maintain a narrow margin above the 22 standard for water gas, with the assurance that you will not fall below the standard fixed at any time?

A. It is easier to maintain the standard on the lower candle power, especially as compared with water gas made today, from the oils which we have to employ; especially so in that regard.

Q. And assuming that the Consolidated Gas Company was maintaining a certain candle power at its works, and that that candle power averaged on the whole considerably above the 22 rate, but that repeatedly the candle power was found falling at one or more points to between 22 and 22½ candle power, would it in your judgment be prudent or wise to reduce the candle power at the works?

A. It would not, in my opinion.

Q. Do you or do you not think it necessary to take into consideration the possible fall in candle power beyond the testing station before it reaches consumers, at distant points?

A. I certainly do, although as I understand the New York Law, they can test where they please, and therefore can go beyond the present testing station and so find a farther fall than is shown by the city's test at present.

Q. Questions have been asked in reference to the provisions of the English statute, in reference to candle power penalties. Is it possible with fair prudence and safety to maintain a narrow margin between the standard of average candle power where the penalty is
6807 slight, than where the penalty is heavy?

A. As a commercial proposition of course you can run more risk in that connection, because the fines are smaller.

Q. What is the English statute? What, in brief, does it provide?

A. The London standard?

Q. The London standard, yes.

A. To understand the London standard and the London penalties you have to take the Law of 1880, which as I think has been referred to two or three times in this case, and read that, and read with it the modifications brought in to the amendment of 1905, London Gas Act.

The MASTER: Did not some of the provisions of that 1905 Act get in on the record before?

Mr. MATHEWSON: Yes, they did, but that is not the Act that provides the penalties. It relates back to a previous Act.

Q. Is not that so?

A. Yes. The 1905 Act simply refers back to the old Act and simply shows these amendments. The facts are at present, taking into consideration both these laws, there is no penalty for sulphur or ammonia; sulphuretted hydrogen remains as an impurity, with 50 pounds the maximum fine for each occasion; but if found at one testing station they are not entitled, the examining officers, to a further forfeiture for tests at other stations. Further, the average at such one testing station for that day and on the preceeding day and on the following day shall represent the quality of the gas said to be deficient; in other words, having found the deficiency they must then proceed and average them, the averages of that day, the preceding day, and then the next day, and take that average, the final average to show the deficiency if there is one.

6808 On pressure there is simply a requirement as to a minimum, but nothing as to a maximum, as has been repeatedly brought out, and that must not go less than 6 between what you might call the daylight points, from midnight until sunset, I think it is, and from sunset to midnight, not less than one inch. The maximum penalty in that case is 10 pounds, and they are only permitted to assess one penalty in the 24 hours.

In regard to candle power, of course it varies with the companies. Two of the companies are 14, and one is 16. The large Gas Light and Coke Company is 16, the small Commercial Company and the other companies, such as the South Metropolitan, are 14. For the first half candle power deficiency there is only a 40 shilling fine or penalty, but even for the first candle and for every subseqeunt candle the fine shall not be less than 25 pounds and not more than 100 pounds, with only one forfeiture a day. But, if the deficiency is found not to exceed one candle, then the same rule applies as I have previously described with regard to impurity. They are to take the average of the day at that place, average that with the average of the preceding day, and with the average of the next following day, and that is to be taken as the candle power for comparison with the standard. Then it goes on to say that no forfeiture shall be incurred in any case with respect to which it is certified by the Chief Examiner that the defect of the illuminating power, excess of impurity or insufficiency of pressure, was occasioned by unavoidable cause or accident.

Furthermore this clause was modified in the latter Act in regard to appeals, and the fact is, by lists obtained by me from the
6809 companies, that most of the cases reported against them are finally remitted.

Mr. Burr: Have you got the references there to the statute which you have quoted?

The Witness: Yes.

Mr. Burr: Will you be kind enough to give them?

The Witness: I cannot give you a reference, Mr. Burr, for 1905. I do not know where it is published. I can let you have my copy. It is an official copy.

Mr. Burr: Is that the copy you had the other day?

The Witness: Yes, it is an official copy; and I can refer to the other one, the original Act.

Mr. Kirby: Is it not in the Supplement?

The Witness: No, it is too late. It is only out in 1905. I do not think there is any publication as late as that. For 1880, you will find that in Michaels and Wills, 5th Edition, pages 180 and 181. I think you have got that. If not, I will let you have my copy. The 1905 Act is 5, Edward VII, Chap. 155, and that I can let you have if you like afterwards. It is all marked up, but you can read it.

Q. Do you find that even with this mild penalty and with the low candle power coal gas, the Metropolitan and Suburban Companies of London maintain an average of only one-half candle above the standard of candle power?

A. In the year 1904 the Gas Light & Coke Company averaged 16.52 for a requirement of 16. The Commercial averaged 6810 14.9 for a requirement of 14. The South Metropolitan maintained an average of 14.7 for a requirement of 14. The average delivery was 15.78, but I have not averaged out what the average requirement would be. You would have to take and multiply the amount sold by each one, which I had to in the other case.

Q. You have not the suburban companies there, have you. May I take the sheet?

A. You cannot get any average from that. They run from 14.50 up to 16.50, the suburban companies, with all sorts of different requirements. You would have to take each one individually in order to work that out. You would have to take Fields for that.

Q. Have you Fields here?

A. Yes, I have it here. It is in the second main column with the two sub columns "Required or Delivered," I think it is. That is 1905.

Q. I have the figures here, if you do not mind my leading the witness to that extent?

A. That is 1905, and I think I just gave the other.

Q. Don't it appear in Fields' Analysis that Brentford maintains 15.60 as against required 14?

A. Yes.

And Bromley maintains 15.55 as against the requirement of 14?

A. Yes.

Q. And Croydon 15.25 as against 14?

A. Yes.

Q. And Hornsey 15.90 as against 15?

A. Yes.

Q. And Richmond 15.70 as against 15?

Q. And Wandsworth 15.51 as against 14, amongst others?

A. Yes, that is right.

Q. Professeor Bemis refers to the oil contracts of the Consolidated Gas Company with disapproval and says that the different stations could divide the contract as Philadelphia did; have one station supplied by one oil company, and one by another oil company. Is the case in New York parallel to Philadelphia?

6811 A. No, I think not. New York has a very much larger quantity of oil to use, and it is a much more serious problem to cover such a large field and be sure of having a supply. For instance, Mr. Bemis mentions Philadelphia. The amount of oil used by the Consolidated Gas Company and other gas companies coming in under the contract in 1905, was 32 per cent. more than Philadelphia, Newark, Jersey City, New Haven and Baltimore added together was, and that was for 1906, which are the figures I have obtained. We will presume that showed a little increase over 1905.

Q. Did you hear Mr. Addicks's testimony, that in case they abandoned the Standard Oil Company contract it would be necessary and prudent to have a large storage capacity of three months. In view of the fact that there was no other great storage capacity than the Standard Oils in this vicinity?

A. I did.

Q. Do you approve or disapprove of that?

Mr. **Burr**: I object to that.

Q. Well, what would be your view on the subject? I will put it that way?

A. I will put it in this way, that I should not want to advise or undertake the responsibility in such a case, unless I know there was a very large storage supply available and at my disposal.

Q. Mr. Bemis, at page 3252, being asked how they did in Massachusetts in connection with the Municipal Act, to which his attention was called, and as to whether there was any provision whatsoever for a Sinking Fund in that Act, replied that he understood there was. Is there any provision in that Act for Sinking Fund that you can ascertain?

A. No, there is not.

Q. What is it?

6812 A. It is a requirement for the taking of three per cent. on the investment, less land and appurtenant water rights, charging that up to the cost of gas each year, and that amount is to be expended from year to year for renewals and extensions so far as that amount is large enough to pay for the extensions or renewals. In other words, the amount is at once re-invested in the business, as required, as an offset against depreciation. It is true that that three per cent., as named in the Act, can be modified by the Commission. They have the right to do so, but they have not done so; and in the case where they were asked to modify for Holyoke at five per cent. they refused to do so, before the new law went into effect changing it from five to three.

Q. Did you, as Mr. Bemis had, have any conference or communication with any member of the Commission?

A. Wishing to be very sure of my reading of the Act I communicated with the chairman, Mr. Barker, and found that my reading of the Act was entirely correct.

Q. Have you his letter, if counsel desire it in that connection?

A. Yes.

Q. Mr. Bemis said in reference to the hazard of explosion, which perils among others would be covered by the reserve fund, that he had heard of no other explosion as costly to the company as in Boston, and that its occurrence anywhere else seemed improbable. Is it the fact that explosions of that character, and disastrous ones, are unusual in your experience and knowledge?

A. It depends upon the meaning of the word unusual. They occur, and we have to look out for them. We had a very bad one in Philadelphia, at Market and 6th Streets, last year, the money cost of which has not yet been determined on account of suits pending and all. There was a very bad explosion in London, in 6813
Southampton Row, Holborn, I think it was. I found that

the Gas Light & Coke Company was permitted to write up a portion of the cost of that explosion, to the extent of eight thousand pounds, to its insurance fund during the last half of the year 1904.

There was another bad explosion occurred a good many years ago in Liverpool. That led to the loss of a very large sum. My recollection is—the whole thing was described to me in detail by the Chief Engineer, who was a personal friend—that it resulted in the burning down of docks and so forth, and they had actually to pay out of their treasury 450,000 pounds, or $450,000—we will assume it was $450,000—and of course we know such explosions are occurring continually in a small way. I should expect such a hazard to be very largely increased with a high pressure system.

Q. Mr. Bemis, at page 3519, says of the cost of the repairs of the Consolidated Gas Company, 7.16 cents, that this seems to be high and no doubt repairs and depreciations will be within the 10.89 to which reference has been made, and he refers to your testimony in Holyoke and to Mr. Cowdrey's testimony in Chicago. What was the testimony on those occasions, as it relates to this point of Mr. Bemis?

A. My testimony in Holyoke was guarded all the way through with a statement that I was referring to Holyoke and that I had been repeatedly asked to give general statements, and that I had refused to do so; that it was not my practice to do so; each cost must be considered by itself, taking into account construction and everything else. There I mentioned repairs and renewals and depreciation, 11.27—small works in a cheap town. I do not read Mr. Cowdrey's evidence quite as Mr. Bemis seemed to. Mr. Cowdrey put from 8 to 9 cents in for repairs and renewals for water gas plant 6814 alone, or for coal gas plants 10 to 12 cents, and then allowed 10 cents to take care of future depreciation and emergencies. Then he recapitulates by taking 20 cents for repairs, renewals, depreciation and contingencies.

Q. That 20 cents covering the same items would be such as you allow, practically the same or more than you allow in your estimate for the New York situation?

A. Yes, that is more than I allowed for the same thing.

Q. Referring to Mr. Marks' testimony he stated at page 2383 that you neglected to place any limit as to the length of time within which your 5 cents per thousand extra for reserve fund would be collected from consumers, and at page 2390 he corrects that by saying that, on thinking the matter over, he recalls that you lately had agreed that the reserve fund should be terminated when 10 per cent. of the capital or investment was reached?

A. Yes.

Q. Now, as a matter of fact, the first time you appeared on the subject was before the Commission of Gas and Electricity of the State of New York, was it not?

A. It was.

Q. What did you say on that occasion?

A. Page 1700 of the report of the case before the New York Gas and Electricity Commission, printed "I add for that, I just explained, for reserve contingencies and hazards 5 per cent., making 21.77. Now, I would like to supplement, of course, that five cents by saying that I would like it distinctly understood that that in my opinion is a reserve and should not be called an actual expense in the business, but should be treated as a reserve, and having grown to certain dimensions should be there stopped and not allowed to increase again until drawn upon, following the English practice.

6815 Q. But in this case your testimony appears at page 1497, where you stated that the reserve should accumulate until it reached one-tenth of the investment, did you not?

A. I did.

Q. Mr. Marks at page 2372 advocates a single system of mains for the City of New York. What would this involve, and what would you say as to the wisdom of such a substitution?

A. Well, first it would involve a fairly complete abandonment of all that they have got in the streets now, but I will go further than that and say that a single pipe system in many of the streets of New York, especially the important streets, would not be in my opinion a practicable method of distributing gas in New York City.

Q. Mr. Marks testifies at page 2385 that the price received for gas in Philadelphia was 78.1, is that the fact, Doctor?

A. No, sir.

Q. Is there any gas sold in Philadelphia at that price?

A. I think not.

Q. As a matter of fact, to reach that 78.1, does not Dr. Marks include all the gas sold to private consumers, and also all the gas which is delivered to the city, as part consideration for the rental, in the price received from private consumers only?

A. He does.

Q. If he divided the price received from private consumers by the gas sold to private consumers, he would get, would he not, a dollar, or practically that, as the cost of gas sold?

A. Yes; I can show it perhaps by a statement rather clearly. If you take the gas sold to citizens at a dollar—I am taking the figures from Dr. Marks, and using his figures, but simply readjusting them—40,243,341 M feet, we have $40,243,341. If you take the city's gas consumption, at a dollar, we have 4,639,900 M feet, or $4,639,900. This would make the total receipts $44,883,241.

6816 Against that we would have rental-royalty I think Dr. Marks calls it—Column 4 of his table $3,758,477, gas equivalent at $1 as above. That is gas that is given free, now, put down in dollars and cents $4,639,900; then we would have as the total rental paid to the city for the use of its plant $8,398,377, which would amount to 18.71 as the rental paid. Now, the cost of lighting, meter inspectors and so forth, given by Mr. Marks, Column 7 of his table, excluded from the price $1,113,528; this would make the total rental and cost of lighting and repair and meter inspectors $9,511,905, that last item of lighting and repair being 2.48 cents per thousand. Then there remains to the U. G. I. to cover the cost of gas and return on the U. G. I.'s investment, and only on their investment,

$35,371,336 and that amounts to 78.81, and that is where the 78.81 comes from. You take all those amounts together and foot them up, the average selling price would then be $1. You can turn around and say you sell it to the city at a different price, and get a different result. For instance, I have got another statement made up on the same lines, only in this case I assume that the gas is sold to the city at 90 cents. In that case the average selling price comes out at 98.96, and still the U. G. I. has remaining to cover the cost of gas and return on the U. G. I.'s investment just the same sum of 78.81 cents.

Q. As to the U. G. I. Company, if I understand you correctly, and I wish you would correct me if I do not—I am simply trying to get at the facts—they have to earn no return on the investment in the city's plant which they operate nor do they have to pay any taxes on that plant?

A Not at all.

6817 Q. And all they do pay is paid to rental in the shape of gas to the city and ten cents per thousand on the gas they sell to private consumers; is that correct?

A. That is included in the 21.19 cents of my first statement, which added to the 78.81 makes up a dollar. That has to include the return on the city's investment in plant. The U. G. I. Company has, according to Mr. Marks' own statement—I have not checked that up—an investment of $2.15 a thousand in its part of the plant, and it does have $2.15, according to that, which they have to earn on it. There are other reasons of course that you could bring into this, as appear from a summary of the lease. For instance, fourth in the lease—the U. G. I. is protected from competition and has exclusive rights——

Mr. Burr: I object to that unless the lease is offered in evidence.

Mr. Mathewson: It was commented on here by your own witness, and is put in Dr. Marks' affidavit, to which we have had access.

The Master: Is that the same thing which was called the contract dated November 12th, 1897?

Mr. Mathewson: Yes.

The Master: Your witness has testified about that.

(The paper to which Dr. Humphreys refers is marked for Identification Complainant's Exhibit No. 391).

The Witness: Now, you wish me to comment on that ordinance?

Q. Which is the ordinance to which you now refer?

A. It is entitled an ordinance of the City of Philadelphia, 6818 approved November 12th, 1897, authorizing lease of the Philadelphia Gas Works to the U. G. I. Company.

Q. Yes, briefly, if you will?

A. Page 4. It protects the company from competition by giving the company exclusive rights; page 4, also, the company can do its own paving; page 5, can occupy any subway that should be built by the city without rental; page 8, can terminate in ten years, January 1908, upon notice; the city must then reimburse for all extensions and so forth and improvements with interest at 6%, simple interest. That is pages 9 and 10. Page 11, if the lease runs to December 31st, 1927, the City gets works and improvement without payment to the company. Page 12, the company to expend 5 millions of dollars in three years and at least 15 millions in thirty years; page 13, need not extend pipes, unless one consumer for each hundred feet guaranteed; page 14, 22 candle power is the standard daily average unless prevented by accident beyond the company's control; penalty $500, not for each violation, but for each day; fine to be returned if the company shall show fault beyond its control; page 15, free street lamps to the number in use at the first of the lease, but not to exceed 300 additional each year thereafter; pages 15 and 16, price to be $1.00 unless changed by ordinance; then limited as follows: December 31, 1907, 90 cents to be net to the company, 90 cents; December 31, 1912, to be net to the company 85 cents; 1917, net to the company 80 cents; 1927, net to the company 75 cents. The U. G. I. in addition is to pay $10,000 per year to the city for inspection and some other little items. Page 18, the company only pays to the city money as received. I read this to mean that they do not have to pay on bad debts. Page 16, the company can 6819 collect penalties from consumers if bills are not paid in 5 days, according to the old rule. In other words, instead of giving discount to consumers for prompt payment they can penalize them if they are not paid in 5 days. I do not imagine that they follow out such a rule, but they are permitted to do so.

Q. I do not want to spend any time on the question I am now going to ask you, but Mr. Marks was asked in reference to a proposition involving the extension of the lease for 30 years, was it, from 1905, or 75 years?

A. 75 years.

Q. 75 years, for which he said the company offered 25 million dollars, (that is page 3760) to the City of Philadelphia?

A. Yes, sir.

Q. To be paid in the future, and this was cited by Marks as showing how valuable the situation was?

A. Yes.

Q. What is the fact in reference to that, and how onerous would such a contract be covering that long period?

A. Well, to provide for the capital invested at the end of 30 years, it would have been necessary to put by if I recall, 1.78 per cent in a 4 per cent. sinking fund; and here is an eminently appropriate place to show what a sinking fund is really intended for. They would not want to invest that in the plant; having already invested it, they want to find some means of paying it back, because the assets would not be there at the end of 30 years; they would have to deliver them up without extra payment. I have not attempted to spread out on the thousands of feet by endeavoring to estimate what the sales would be, but I have simply taken the sales at the average of what they were in 1904, the actual sales to the consumers on which they got their money taking 1.78 upon the 16 millions, which was the amount named by Mr. Marks as having been already spent, and the amount brought into his statement.

6820 Q. Spent by the U. G. I. for plant?

A. For improvements and repairs and all the rest of it, which they would have to sacrifice. I find it would take $284,800 a year, or, 4.18 cents per thousand. Now, so far so good, up to the time 1905. In 1905 when this change of lease was contemplated there would have been accumulated by this process $2,624,147. Now, if that was allowed to accumulate without any additions whatever, so as to relieve the company entirely of any further additions, and take care of the money we have to sacrifice, and we take the 16 million dollars and add to it the 25 millions which they would pay, making 41 million dollars in all, I find that the accumulation at 4% compound interest would at the end of the lease amount to $49,714,465, so that they would have left about 8 million dollars to cover any further extensions and additions to plant that they might find it necessary to make.

Q. In other words, if they had provided or reserved up to that time when they retire their investment the mere accumulation at compound interest of that in future would take care of the entire 25 million dollars that they would have to pay, the entire 16 million dollars in the plant already spent, and 8 million dollars more?

A. That is right, sir.

Q. I will ask you one question as to maps of mains. For what purposes are maps of mains kept by gas companies ordinarily?

A. They are ordinarily kept for ready reference to see what mains they have in the street and what streets are occupied with mains and the size of the mains.

6821 Mr. BURR: I object to that. The question is what the maps in the office of the Consolidated Gas Company — kept for?

The MASTER: I do not see that it is important. You covered that fully.

Mr. MATHEWSON: I think so; *de mortuis nil nisi bonum.*

Q. We will refer to Mr. Hall's testimony for a moment. Has you firm of Humphreys & Glasgow acted and are they acting as accountants for gas companies, or accounting engineers to any extent?

A. Yes, you might call it that, but I would rather like to explain it, than give it a title. We have a very large number of plants for whom we put in apparatus all over the world, and we endeavor to keep that plant up to the mark by periodical inspection.

Mr. BURR: I think this was all gone into when Dr. Humphreys was qualified as an expert.

Mr. MATHEWSON: Not on this point.

Mr. BURR: I do not think it is pertinent to this inquiry at this stage, where we are rapidly drawing to a close, to go into a dissertation on the care and intense purpose with which they construct.

Mr. MATHEWSON: Not at all; give him a minute and he will be all through.

The MASTER: I presume he wants to show that he has some knowledge of accounts, to meet some points in Mr. Hall's testimony. You may go on for a moment or two, and if it does not appear we will rule it out.

Mr. MATHEWSON: That is the whole purpose.

6822 The WITNESS: It may be your purpose; it is not mine, because I think that I have qualified.

The MASTER: Shorten it as much as you can.

A. We have this intimate knowledge of the way the English accounts are kept, to enable us to make comparisons from year to year, we go through the accounts of these clients of ours, a certain number of them, now amounting to about fifty, and others that we have erected plants for are coming in all the time and adding themselves to this list. We send out each year to these people confidential comparative statements as to the cost of gas, and then suggestions as to how to improve results. This brings us into intimate contact with the English accounts.

Q. I want to ask first as to what your view is of the propriety of the exclusion of interest on taxes which are being tested under the advice of counsel. Is that a proper operating expense or not?

A. In my opinion it is.

Q. Mr. Hall at page 3366 said that he eliminated repairs to gas stoves. As to the English practice, he was doubtful. What is the English practice to the inclusion of repairs to gas stoves in operating expenses?

A. They include it.

Q. When asked as to the Parliamentary investigation expenses he said they would not be allowed by any competent accountant. What is the rule as to Parliamentary investigations, where the company is attacked or being legislated against?

Mr. BURR: I object to that because it does not appear that in the sense that Mr. Hall used the expression Mr. Humphreys is a competent accountant. He does not assume to be an expert accountant. 6823

Mr. MATHEWSON: He will refer you to his authority; give him a chance.

The MASTER: I will allow it.

Exception taken by Mr. Burr.

A. I will say first that I do assume to be an expert accountant, and know a great deal more about accounts in connection with gas companies than any of the accountants who pose as expert accountants. What particular item do you refer to? I was embarrassed at the attack upon my ability.

Q. Parliamentary investigation. I refer now to the item of legal charges and expenses in connection with the investigation of 1905, which Mr. Hall has excluded as not a proper charge in the operating expense of the company.

A. The returns all show that provision is made for such charges in the regular way to operating expenses; but there is one exception, where the company has involved itself in such Parliamentary proceedings; and there it is left to the Board of Trade sometimes, or the auditor of the Board of Trade, to decide whether it shall go against income or whether it shall be charged against the profits, so to speak; in other words, a direct charge to profit and loss, but there is no exception as far as I know in the ordinary Parliamentary proceedings, where the company is attacked, or on the defensive or in any other legal charges.

Q. That is to say, where the company is investigated or where they are opposing an act of Parliament, do the usual forms of account expressly provide that they are legal expenses and shall be a charge against operating account?

A. They do

6824 Q. Now, as to the section of public lamps charges, Parliamentary and law charges, in the nature of the expenses to which I have just referred, bad debts, stove repairs, and so forth, what authorities have you, if any, for objecting to the conclusion of Mr. Hall, Mr. Marks and others to exclude them or any of them?

Mr. Burr: He has not stated that he does object yet.

Mr. Mathewson: If he does not, I suppose he will say so.

A. I do object to the exclusion of those items, and the one chiefly referred to, public lamps, lighting and repairing—an item for them appears in the British Government returns and also appears as a special item in the printed report of the Gas Light and Coke Company. It also is to be found at page 88 of Michael & Wills, previously referred to. American Gas Light Association, uniform system, shows the item. Page 68 of the classification sheet of Blank 20, I think they call income and expense, whatever the title is; Massachusetts form for returns of companies, item 13, on income and expenses says, "For public lamps lighting and repairing (gas lamps only), then, ditto, other lamps," which I presume is a blank left for oil lamps, naphtha lamps, etc. In New York, the form of the return by the New York Commission shows under operating expense an item: "Operating and repairing street lamps."

Q. Mr. Bemis stated that he withdrew his three per cent. allowance for reserve fund which he made in favor of the company before the Gas Commission, because he ascertained here that 6825 the land of the company had appreciated in value since it was acquired by themselves, or the predecessor companies, and that the mains and services appeared to be worth more on account of the new and expensive pavement. I want to ask you whether that situation, in your opinion, would justify the exclusion of a reserve fund?

A. It would not.

Q. State briefly why?

A. Increase and appreciation in value of real estate would not pay for anything until that real estate was sold, and the real estate could not be sold until the property was vacated. It would add to the value of the assets of the company, but would not add to its earning capacity as long as it was occupied by a manufacturing plant. Therefore, there would be nothing to pay this charge from.

Q. What about the expenses of operation and renewals, so far as the more expensive pavement is concerned; what effect would that have on the situation?

A. The additional values that the assets might have by reason of the pavement being above the pipe would add to the burdens of the company from an operating standpoint, because not only would the pipes to be laid in future have to be laid at a greater cost, but the operating expenses would be increased because the work of keeping the pipes repaired and renewed would have to be done at an added cost, due to the fact that the pavements would have to be renewed; so that if that were taken as compensating for depreciation, we have to compensate by the increased cost of our operating charges, which does not seem to me to be logical.

Q. If the increase in the value of land was due to moneys received from consumers of gas and put into new lands beyond a fair dividend, or if the increase in the value of mains was due to a like action, the situation might be different, might it not? 6826

A. Certainly.

Mr. Burr: I object to that as calling for a conclusion as to what might be the result.

The Master: It is answered already.

Mr. Burr: Then I move to strike it out.

Motion denied. Exception by Mr. Burr:

Q. As to the cost of gas, attention has been called to the fact that for one reason or another there is a difference of a cent or two between the cost of the Consolidated water gas stations and the New Amsterdam, and perhaps the Standard and the Mutual. I want to ask you as a practical gas man whether it is possible to get the identical cost of gas as between two companies operating even in the same city?

A. I do not know whether it is possible or not. I should consider that if I made an examination of two such companies and found such to be the case, it would be a most extraordinary case.

Q. Would you consider that a difference of a cent is extraordinary at all?

A. No, I should not.

Q. If you made a schedule of the cost of gas in London, to which Mr. Marks has referred and shown what it would cost in New York—Mr. Edgerton's theory (page 4742)—what does he call that?

A. Well, he described it in two or three ways. I have quoted it generally on the "one candle is good as another" theory, which I think is explicit.

Q. That is, it has to be reduced to the power of New York gas at an average of 24.18 at the test. Reduced to this basis the Gas Light and Coke Company would charge for candle power gas 24.18, 101.19 cents, would it not? 6827

A. Yes, raising it from 16.48, which they actually delivered to 24.18, which was the actual delivery for the last half of the year 1905, in New York by the Consolidated Gas Company after the standard was raised.

Q. And the Commercial?

A. 99.28.

Q. And the South Metropolitan?

A. 84.04.

Q. What is the average of the three?
A. 95.59.

Mr. Mathewson: I ask that this statement be spread upon the record in connection with Dr. Humphrey's testimony.
(The statement referred to is as follows.)

PRICES OF GAS. PRIVATE CONSUMERS.

New York and London.

Compared on basis Edgerton's theory "One candle as good as another" (p. 4742), on basis of candle power delivered 1905. N. Y. average latter half of year.

	Average candle power delivered.		London prices to private consumers, including meter rents, which, in N. Y., are included in price.	London prices adjusted on basis of candle powers according to Edgerton theory.	
	London.	New York.		Ratio.	Adjusted price.
			c.		c.
Gas Light & Coke Co.....	16.48	24.18	68.98	1.467	101.19
Commercial..............	14.9	24.18	61.17	1.623	99.28
South Metropolitan........	14.6	24.18	50.75	1.656	84.04
Average of Three Cos.....	15.72	24.18	62.15	1.538	95.59

6828 Q. Now, as a matter of fact can gas be manufactured, all other things being equal, as cheaply here as in London?

A. It cannot.

Q. Why not?

A. Labor is lower there and materials are as a rule lower in price.

Q. Generally speaking, how would you say the price of labor varied in per cent. from the cost of labor here, as far as your observation goes?

A. I have not made an estimate in the form I would like to do it, by taking the number of men of each kind and averaging it up in the true way, but I should think it would run about 40 per cent., from the figures that I have been able to compare along certain lines. For instance, comparing the Gas Light and Coke Company of London with the Consolidated Company returns received from both companies within a month or so; the foremen are about 24½ per cent. more in New York than in London. I am now comparing prices in New York before they raised. Assistant foreman in the works, about 45 per cent., nearly 46 per cent. higher here. The coal handling men about 29 per cent. more. Carbonizing men, 43 per cent. more. Coke handling men, 45 per cent. more. Mechanics—well, that is rather an indefinite term, and we would have to match it up the best we could there. We have taken mechanics as they are described and put them against mechanics here. Of course that will vary, but there is about 35 per cent., in the figures here, against New York. Mechanics' laborers or helpers, about 17 per cent.; gas fitters, 53 per cent. and over; gas fitters' assistants or helpers, 54 per cent. General laborers, 39 per cent.

Q. As to the cost of plant, to which some witnesses have referred, in Great Britain, is plant as expensive of construction there as here?

A. In general, no.

6829 Q. Is that due to the lower price of labor and material taken as a whole?

A. Of course, certainly.

Q. So that the production of gas would be less costly, and the amount of plant per thousand upon which returns would be paid, would also be less?

A. Yes.

Q. And is it possible, without taking into consideration all these features, to compare the cost of gas in Great Britain, or the cost of plant in Great Britain, or capitalization per thousand in Great Britain, with similar items in the United States, without careful an-lysis?

A. It is not.

Q. I think that is all, except that you referred this morning to computations respecting the results of Mr. Edgerton, or results which you obtained by taking Mr. Edgerton's figures, and you stated your total. Have you for the conve-ience of counsel detailed statements showing how the results are reached?

A. I have.

Q. Will you hand one to each of counsel? This first sheet is a computation taken from the papers sent to Mr. Bradley by Mr. Edgerton on 32.95 candle power oil gas, is it not?

A. That is right, and that cost is not shown in Mr. Edgerton's statements of cost because he shows the amount expended for each item, but before putting down the cost per thousand he reduces it to the basis of 17.6. I took and divided it up, each item for itself, just as it appears; namely, got it down to a basis of 32.95, which is what it purports to be, and so arrive at the cost of manufacturing the 32.95 candle power gas at Danbury, for manufacturing and leakage, as 90.5 cents per thousand, as shown by the actual figures given by Mr. Edgerton in his statement: Distribution, 9.07; Manufacture, 21.09; Bad debts, etc., bringing it up to 140.78 cents.

6830 Q. The figures that you use are his exhibit after the division?

A. That is all, in other words, I divided by the actual gas made.

Q. What does the second sheet show?

A. The second sheet shows on the theory of Mr. Edgerton what it costs to make 28 candle power gas, the 28 being one of the candle powers that he has taken for his New York ideal assumption, but I have also 50 candle power gas, both being enrichers, and I show in column 2 what would be the result of the Danbury basis, namely, cost of manufacturing 65 cents, against the cost that he took in his estimate for New York, at 34, and the Danbury gas cost on the basis of 50 candle power, 1.16 against his estimate*d* of 48 cents.

Q. What is the third sheet?

A. The third sheet is the statement of certain averages as obtained from the Danbury record. For instance, gallons of oil, average gallons used, average candle power, average candle power per gallon, and the coal per thousand, mixed gas.

Mr. MATHEWSON: I offer these sheets in evidence.

Received in evidence and marked Complainant's Exhibits, respectively, Nos. 392, 393, and 394.

Mr. KIRBY: I move to strike out all the testimony of Mr. Humphreys having to do with the letter purported to have been sent to Mr. Edgerton and received by Mr. Bradley, unless it be that with the letter accompanying statistics be placed in evidence.

The MASTER: I did not find this morning the page where it was referred to on the examination of Mr. Edgerton.

6831 Mr. MATHEWSON: Is that motion made on the theory that the letters are not proven? If so, I will ask Dr. Humphreys some questions, as he is perfectly familiar with Mr. Edgerton's handwriting, and has the original letters.

Mr. KIRBY: No, I am not taking any such captious ground as that. I am quite willing to admit on the record, after inspection, that the letters were written by Mr. Edgerton, and were sent to Mr. Bradley, but the letter is really a statement upon a certain theory in regard to making gas, and represents the results shown at Danbury, and results, I believe, shown at New Orleans.

The WITNESS: And some reference to them.

Mr. KIRBY: And Wallington, and it carries figures and statistics of all those places, and the references and statements are so interwoven that one taken without the other is certainly unfair and improper.

Mr. MATHEWSON: You can cross-examine the witness on it. The papers are here at your disposal.

Mr. KIRBY: I have no objection whatever to it all going in evidence, but I do contend that it is improper to place that letter, or part of the letter, in evidence in the way that has been done this morning, unless it is all placed in evidence, and the letter is not complete unless the data which accompanied it is considered as part of it.

Mr. MATHEWSON: It is marked for identification, and I am willing that it should be printed so that you can refer to it; but here is your witness who produces Danbury as the pet place where 6832 this process is going on, which he says he has consulted in reference to everything and he sent the statements for 1905 to our chief engineer, saying that the results at Danbury are thus and so. He then makes a statement of the cost of gas in New York, and puts it at about half of what the cost was in Danbury. Is not that pertinent? As to the method of introducing it, if you want me to support that, all the papers in connection with those letters may be marked for identification, or they may be marked for identification and printed. I have no objection. But I did not offer all that stuff here because I have not made any reference to it. It is simply the Danbury statement.

Mr. KIRBY: I stand on my objection. The witness made no mention of Danbury. It was brought out on cross-examination, and reference to the letter was brought out on cross-examination, and now an effort is made to place in evidence a part of the document.

The **Master**: I cannot tell anything about this until I see it. I want to see a reference to the page where the matter first came up, and I would like to look at the document if it is important, and pass on it now. I should think it would answer your purposes to have it marked for identification and printed, because then, if your motion to strike out the testimony is wrongfully denied, you have got the matter before a court which can remedy it. That is the object of having these excluded questions taken, under our Federal practice. Now, if you get all this printed, as Mr. Mathewson suggests, you have got everything you can get out of it.

Mr. Mathewson: I do not want to offer it as evidence, 6833 because it does not seem to be evidence to me.

The **Master**: To save time I will deny the motion to strike out upon the stipulation made by Mr. Mathewson, here, that he does not object to having the papers printed, and having them marked for identification.

Mr. Kirby: I will take an exception.

Q. I will ask just one more question of Dr. Humphreys which occurs to me. Do you know why the oil gas process of Mr. Edgerton was superseded at New Orleans. Was that through the pleas of promoters, or for any purpose connected with promoters, so far as you know?

A. No, it was to secure greater economy.

Q. When was the oil gas plant of New Orleans superseded by the water gas plant?

A. The oil gas plant in New Orleans was in part superseded; that is, the Edgerton process was in part superseded before 1890. They introduced about 1890 the double superheater water gas plant, in either 1890 or 1891; I was down there myself, and they took me out and showed me what they said was the only part of the Edgerton process remaining—two oil tanks.

Cross-examination by **Mr. Kirby**:

Q. Speaking of New Orleans, what do you mean by the supersession of the Edgerton plant or the Edgerton system there?

A. Abandonment of its use.

Q. Did I understand you to say that was in 1890?

A. I said it was in part superseded at that time by what was known as the Meeze process.

Q. Are you familiar with the earnings of the company prior to 1890?

A. I don't carry them in mind. I know they paid dividends right along.

6834 Q. Do you know what dividends they paid at the time the Edgerton process was in operation?

A. I think I have it, from 1885 to 1900.

Q. What does that state?

A. Eight per cent., six per cent., five and one-half, five per cent., five per cent., five per cent., five per cent., five per cent., five per cent., five and one-half per cent., six per cent., seven and one-half per cent., eight per cent., seven and one-half per cent., five per cent., five per cent., five per cent.

By Mr. **Mathewson**:

Q. Respectively?
A. Yes; that last would be 1900.

By Mr. **Kirby**:

Q. Was there any redemption of bonds during that period?
A. That I do not recollect.

Q. Have you any knowledge or information which would lead you to deny that $500,000 worth of bonds were redeemed during the years 1885, 1886, 1887, 1888, and 1889?

A. No, nor have I any means of knowing how much surplus they had without referring to table.

Q. Have you any knowledge or information as to the surplus after the year 1890?

A. No, not at present.

Q. Or as to whether or not there were bonds redeemed during that period?

A. No, sir; I am basing my calculations on what I saw at the works, statements and all that sort of thing.

Q. Do you know what the candle power of the gas was prior to 1890?

A. On this statement of Mr. Edgerton's referring to New Orleans and accompanying the Bradley letters appears the statement that in July 24, 1885, the candle power ran 32.10, the next day 33.33,
33.20, 33.60, 32.70, 31.80; July 27th, 34. The next one
6835 named is July 28th, 34 and then 33.33, 33.15. I imagine
in each case those are the different tests the same day. It is not very plain. August 4th, 33.15. I remember being puzzled at this, before this August 4th, then in the margin appears "July 28, 29, 30," etc. Taking the last named dates, July 28, 33.15, the next day 32.66, 33, 32.70, 33.20, 33.51; August 3d, 33.51; next day, 32.30, 32.80, 32, 33, 32.80; they seem to run about 32, sometimes to 34, sometimes 33. The last one I have here runs on to November 24th.

Q. And after the change from the Edgerton system have you any knowledge as to what the candle power was that was furnished?

A. No, I presume I have had information, but I haven't got any now.

Q. So it is your impression that it was about 20 candles or below that?

A. My recollection is that the whole system of charging was changed and instead of charging on a candle power basis they came back to charge by volume. When they changed the process I am not sure, but before that I know the charging by the meters was unsatisfactory, and there was considerable question as to whether the meters gave an accurate result, even on the changed candle power.

Q. And you have no knowledge of any increased capitalization?

A. Not accurate knowledge, no. There were great changes in regard to the holding company, recapitalized in a sense. It took on different forms through different holding companies.

Q. Now, in this assumption which you made of costs, or comparison rather, which you made of labor costs in England and labor costs here you simply made a comparison of the wages, did you not?

A. I made a comparison of the wages per hour, yes.

6836 Q. And to apply that to conditions in New York, or in this country, or to any other place than England you would have to assume that labor does the same amount of work, and that the same amount of wages is required to produce the same result, would you not?

A. Yes.

Q. You have spoken of the "one candle as good as another" theory?

A. Yes.

Q. Do you subscribe to that theory?

A. No.

Q. What is your contention in that regard?

A. My contention is that with a flat flame burner and considering the illumination of the flat burner alone, as far as the consumer is concerned he is getting his value, when he considers it by candles, but it does not hold true except in modified degree with regard to stoves and Welsbach burners.

Q. Speaking of the conditions of the U. G. I. lease in Philadelphia, for a moment, what do you understand that the company leases from the city?

—. It leases the works, mains, plant in general; leases the business.

Q. Everything which the company uses in the manufacture and distribution of gas?

A. It leases what Philadelphia turned over to them, with certain exceptions as to property they had to give up. My recollection is they had to abandon part of the plant at Market Street and Schuylkill River, some exceptions of that kind, but it was a lease of the plant and a turning over to the company of its business—the city's business.

Q. And the company pays as a return for this lease or rental or whatever you might call it by furnishing gas to the city free of charge and paying at the present time ten cents on each thousand of cubic feet sold to other consumers?

A. Yes.

Q. You have stated that you consider the conditions at
6837 Holyoke are those well qualified to have low figures of repairs,
renewals and depreciation, that it is a "small and cheap
town." What do you mean by "small and cheap town."

—. Well, it is not very well expressed. It is a small town and the living is cheap there and the prices that prevail are cheaper, you can get construction done cheaper, make repairs to your mains cheaper on account of no expensive pavement, and many other conditions which I may have forgotten at present.

Q. Have you made any comparison of the wages paid at Holyoke with those paid in New York and elsewhere?

A. Not of all, but I made my very close examination at Holyoke at the time I testified as I did in regard to Holyoke, and I made my testimony applicable to Holyoke and Holyoke alone after having made an exhaustive examination of six weeks.

Q. Did you consider that in a small plant the repairs and depreciation and renewals were proportionately less than they are in a large plant?

A. Certainly not.

Q. You have spoken of the explosion in Philadelphia at Market and Sixth Street. When was that explosion?

A. I don't recollect the date. My impression is it was last summer.

Q. Was it not due to blasting in excavation going down in Market Street?

A. My recollection is it was something of that kind.

Q. You have spoken of and made a comparison of the oil contract in New York with the Consolidated and the U. G. I. in Philadelphia, and made a computation of the amount of oil used by Philadelphia, Jersey City, Baltimore and other companies. Will you let me have the details of that calculation, please?

6838 A. How is that, Mr. Mathewson? Having given the testimony as a whole, must I give it as to the detail?

Mr. Mathewson: Yes. I think if you have the details it is proper that you give them, making up the totals. In other words, you stated that certain cities did not use as much as the Consolidated. I suppose he wants the amount for each city, as you have it?

Mr. Kirby: I do.

A. It is in round numbers:

Jersey City	8,800,000
Newark	10,000,000
Philadelphia	33,000,000
New Haven	2,000,000
Baltimore	7,700,000
Total gallons	61,500,000

Q. And the sources of your information were what?

A. Direct from the companies in each case.

Q. By inquiry on your own account?

A. Yes.

Q. From the superintendent or those in charge?

A. In every case higher than the superintendent, a good deal.

Q. Did you ascertain the gravity of these oils?

A. No. I was not concerned with that. I was simply dealing with quantities. I think they are all so called heavy oils, some around 28, that is my impression.

Q. You in your first testimony this afternoon gave some statistics from the calculations of a Mr. Grosser of Chicago?

A. Yes, Mr. Grosser, I think it is.

6839 Q. In which he stated the average structural value per thousand cubic feet of sales was $7.23 and the average capital $8.47. Does this include both producing and distributing system?

A. I think it does. I certainly read it so. Now, that you raise the point——

Mr. MATHEWSON: Yes, it does.

Mr. KIRBY: I assumed that was so but the testimony was not specific.

The WITNESS: You go ahead, Mr. Kirby, and I will look it up and see. Yes, that seems to cover land, buildings, machinery, meters, etc., that was my impression.

Q. When you went to the U. G. I. in 1885, did they have any works in the city of Philadelphia?

A. No.

Q. Where did they have works?

A. They controlled works at Waterbury, Paterson, Jersey City, Pensacola, Yonkers, Savannah, Omaha, Kansas City, I think; Harrisburg and St. Louis; one works in St. Louis.

Q. Is it not a fact that during the period that both you and Mr. Edgerton were with the U. G. I. that Mr. Edgerton was going from one of these works to another making such examinations there as were thought by his company to be necessary and giving such advice to those in charge as he might be called upon to give.

A. Going to the works of the U. G. I. as named and giving orders at those works, you mean instructions for men to follow?

Q. Giving such advice on matters having to do with the running of the works, or so far as they might have arisen, or things which they desire to be advised upon.

A. If so, this is the first I have heard of it, unless it was something that was especially deputed to him at the time. I permitted nobody to give any orders at those works. Even the president of the company would not have been permitted to do it.

6840 Q. As a matter of fact was that one of Mr. Edgerton's most important duties to keep in touch with all of these works, so that any trouble which might arise in the operation of the same might be brought to his attention, and he could advise those managing them on it?

A. Certainly not.

Q. If he did go from one of these works to the other, and spent his time there, you of course would have knowledge of it?

A. Not necessarily, no, not unless I found my orders interfered with, then I would have knowledge of it.

Q. Did Mr. Edgerton take orders from you?

A. No, he was not in the operating department.

Q. Do you know what Mr. Edgerton's salary was from the U. G. I. at the time you went into the employ of the company?

A. My recollection is it was a salary of $5,000 a year.

Q. Would you not feel inclined to believe that it was $9,000 a year?

A. No, I should not be inclined to think so. If so the matter was incorrectly stated to me by other officers of the company.

Q. Have you any reason to doubt that Mr. Edgerton received during these years which you have mentioned, $9,000 a year salary, with enough to make up at least $25,000 a year in royalties on account of his patents which the U. G. I. at that time controlled and used?

A. I know that Mr. Edgerton had a contract with the U. G. I. on a salary basis of some kind and also on a royalty basis, I imagine. And I know also that the U. G. I Company after 1885 when I went in built none of the Edgerton process. Just where the royalties would come from I don't know. I don't know that I ever read the contract with Mr. Edgerton. I don't recollect it. I am not very positive as to what Mr. Edgerton did in connection with the operating department of the U. G. I.

6841 Q. Is it not a fact that during this period Mr. Edgerton was largely employed and spent much time on behalf of the company in experimenting with the Wel*l*sbach lamp for the use of gas oil and introducing gas oil into commercial use and upon high pressure system of gas for use in railroad and trains for the other purposes and did you not often consult with him in reference to these things?

A. I did not. I have no recollection of it. Might have talked matters over, naturally would, if we met, just as I would with an outsider.

Q. Did you not often communicate with him in reference to these various things?

A. I have no recollection of doing so. I might have communicated with him, but I want it distinctly understood that I did not consult with Mr. Edgerton nor was he concerned in the operation of those works which were under my direct charge. If I got any good suggestions from Mr. Edgerton, and he was capable of making them especially in laboratory work, I should undoubtedly have accepted them. I have no recollection, however, of anything of the kind.

Q. Was it not a fact that the U. G. I. at the time you came to it had merely its head office at Philadelphia, that when draughtsmen or a clerical force was necessary, they were used at the works at the various places you have mentioned or at the office of the contractors who had contracts for making or altering these works?

A. Of course, there was the necessary force at each works to conduct the business at those localities. The direction, however, was from the Philadelphia office and from the first my effort was so to concentrate the direction of that office so that they acted under the orders from the Philadelphia office, if it was more convenient to do draughting or anything of that kind at those 6842 places, and if -hey had a man there that could do it, I presume it would give the orders to that effect. The fact was, however, that there was very little talent of that kind in the company at the time I took charge.

Q. Do you know who the president of the company was at that time?

A. At the time I took charge?

Q. Yes.

A. My recollection is that Mr. William G. Warden was at that time. I am not sure whether Mr. Stewart was not, or whether he went out just before that. My information is that it was Mr. Warden. *A*. I think it was.

Q. Is it not a fact that Mr. Warden was regularly in consultation with Mr. Edgerton in reference to the affairs of the company?

A. Not that I know of.

Q. Are you not aware that Mr. Edgerton purchased all the material for New Orleans, Wallingford, Pensacola, and Paterson Works of the U. G. I.?

A. I could not say about that. That was before my time. I testified as to the time after I took charge.

Q. Are you not aware that Mr. Edgerton before the expiration of his contract made application to the president and again to the directors of the company to be relieved from the contract so that he could take up work elsewhere?

A. That does not agree with my information, no.

Q. Is it not a fact that you first met Mr. Edgerton in New Orleans in 1886 while he was engaged in showing the New Orleans works to the trustees of the Philadelphia Gas Works?

A. If so, it has entirely passed from my memory.

Q. Do you remember meeting him at that time?

A. I do not.

6843 Q. Are you not aware that the city authorities of Philadelphia passed an unanimous approval of the methods shown at New Orleans and recommended their adoption at Philadelphia?

A. No, I don't recollect it. I don't deny it at all. I have no recollection one way or the other.

Mr. Mathewson: You mean the City Council of Philadelphia or New Orleans?

Mr. Kirby: The City Council of Philadelphia, which went to New Orleans, passed an unanimous approval of the methods shown at New Orleans and recommended their adoption in Philadelphia.

The Witness: That does bring something back to my mind, now I think that Mr. Edgerton was engaged part of the time in endeavoring to get the Edgerton process introduced in Philadelphia and devoted a good deal of time to it as sort of an advance agent.

Q. And Edgerton's process at that time was under the control of the U. G. I.?

A. Oh, yes. I would like to supplement that by saying that particular point would not be so much impressed upon my mind as it was not until some years later that I was given charge of the contract department, as I originally stated in my testimony.

Q. I presume you are acquaintel with Mr. Edgerton's researches in preparing petroleum products for gas making as anticipating the present practice and as shown in Mr. Edgerton's United States patents?

A. I know he has taken out some patents but I never had any reason to think they were particularly valuable. It is judged by results in these matters rather than patents.

Q. Are you familiar with Mr. Edgerton's patents having to do with the fractionation of oil so as to obtain an oil for gas making purposes with as few fractionations as possible?

6844 A. I have read the patents. I have not looked at it in some time.

Q. With reference to the payment of money and the care of accounts, I ask if you were not aware that it was on Mr. Edgerton's report that the first money was paid out to Dr. Auer's representative, Mr. Montgomery, for the Welsbach burner patents?

A. When was that?

Q. In May, 1886.

A. That the first money was paid to Mr. Montgomery on the Auer patents?

Q. On the recommendation of Mr. Edgerton and on the order of Mr. Edgerton?

A. Unquestionably not on Mr. Edgerton's order. I have no recollection that Mr. Edgerton had anything to do with it. The subject was assigned to me when I had to get time from my other work to take it up, and I went over to Jersey City and set up apparatus there especially for the purpose and assigned to the work, if I recollect, my present partner A. G. Glasgow, F. N. Morton and one other man, I think J. M. Rusby, all graduates of Stevens Institute; and experiments were conducted for six weeks at the Jersey City works on the Auer burner, so-called Welsbach burner. I was repeatedly asked to make a report and repeateedly declined to make a report in recommendation, because my experiments were not completed. Dr. Henry Morton, my predecessor at Stevens, was also in consultation in regard to rare earth's minerals, and I consulted with him at great length. The final decision was made to make an advance payment, because as explained to me by Mr. Gibbs afterwards, the option or something or other was expiring and they could not wait for my final report and they would have to act more or less on a "flier" on my partial report of progress made. It may be

6845 I may have known in the past that Mr. Edgerton had some connection with it, but it comes to me now as a perfect surprise. I worked on that and went back and forth between Philadelphia and Jersey City for six weeks and set up special apparatus for the purpose, and I distinctly remember Mr. Montgomery coming in, almost forcing his way into the laboratory, at that time, and urging me to finish my report.

Q. Did not Mr. C. R. Collins have much to do in the making of those tests?

A. My recollection is that Mr. C. R. Collins did not come into it until later. When I was made general manager of the Welsbach Company in connection with my duties in the U. G. I., when I was general manager of the Welsbach for about six months, as they wished somebody close to the U. G. I., to be in control, I made Mr. Collins, then one of the assistants in the U. G. I., chief engineer of the Welsbach Company, and as such laid out a very large amount of work to do in connection with the Welsbach. That was all after the work that I referred to. My present impression is that Mr. C. R. Collins was not in those original experiments.

Q. Do you know who ordered this first payment to Mr. Montgomery?

A. Who ordered it?

Q. Yes.

A. I guess it was ordered by Mr. W. W. Gibbs, and if you mean to imply it was ordered by Mr. Edgerton it certainly was not; he had nothing to do with the business of the company. The man whose hands it would finally have to go through, and certainly no payment would ever be made without him, is S. T. Bodine.

Q. Is it not a fact that the engineer for the Pintsch Company of Berlin came to this country in 1875, went to Reading, Pennsylvania, and there studied Mr. Edgerton's system of high pressure power lighting, Mr. Edgerton there using gas under a pressure up 6846 to 300 pounds, which was higher than any that had been used by the Pintsch Company at that time?

A. It is quite possible. There is nothing extraordinary in the fact that they should come to this country and try to learn whatever there was to be learned in addition to what they knew. The Pintsch Company did not run at 300 pounds and were absolutely opposed to it, and at the time I was chief engineer of the Pintsch I was in favor of raising the pressure of gas made from American oil, as it would stand compression a little better. They opposed the raising of it. They had the fixed idea of keeping to 150 pounds. The apparatus, however, I have myself used up to 300 pounds, showing it was merely a matter of opinion and judgment on their part as to the lower pressures.

Q. You had reference to the use of Tower scrubbers as early as the 60's?

A. Yes.

Q. Was there anything in the literature of gas making in this country or in England prior to the use of these Tower scrubbers in 1873 by Mr. Edgerton in New Orleans?

A. I am sure I don't know. I imagine if I would look through the English Journal I would find something. I am simply basing my statement as to the erection of these scrubbers by the statements from the people in control.

Q. Referring to Faribault for a moment, do you mean to say that the mains which Mr. Edgerton laid himself, or others which were laid under his direction were not laid in the manner which he has testified to in this hearing?

A. I don't know anything about what mains Mr. Edgerton laid in Faribault. I don't know that he ever laid any there. I don't know that he ever gave any directions. My recollection is he 6847 quoted Faribault as an instance where they followed this practice of shallow mains.

Q. Didn't you read his testimony to the effect that he had laid mains there and that mains had been laid there under his direction and as to how he put them down?

A. I don't recollect just what he said. The general impression he stated about Faribault—there was a certain practice followed, and as to their practice I say it is not their practice. Certain pipes may have been laid there, I think that is probably so, and they found the practice wasn't a good one and abandoned it.

Q. When do you consider that such practice was abandoned?

A. That I don't know. I have got the statement that that is not their practice.

Q. Is that from knowledge you have yourself?

A. I have the information from the secretary of the company, Mr. Cowperthwait, dated November 24, 1906.

Q. And that is the letter which I think Mr. Mathewson had and referred to in his cross-examination of Mr. Edgerton?

Mr. Mathewson: I think so.

A. I don't recollect about the cross-examination.

Mr. Mathewson: I think so, Mr. Kirby.

The Witness: It is the one that states that the main feeders are down 5 to 7 feet.

Mr. Kirby: There is no need of pursuing that further because I think Mr. Edgerton was examined on that himself.

Q. You have spoken of light oil and heavy oil, stating that in your opinion the lighter oils were better than the heavier oils. Is it not a fact that a heavy homogenous oil is better than a
6848 lighter non-homogenous oil?

A. I didn't make any such general statement, Mr. Kirby.

Q. Then I ask you the latter question: Is it not a fact that heavy homogenous oil is better for gas making than a lighter non-homogenous oil?

A. I wouldn't want to say yes or no to that, Mr. Kirby. I am perfectly willing to talk on it. I should not like to use a lighter oil with a wide range of gravity so that I would have to carry varying heats, but I don't want either a very heavy oil such as 28 degree oil that at present is coming into the market to such an extent.

Q. The matter of "Homogenousy," if you may use that term, of the oil, plays a very important part with its proper use for gas making purposes, does it not?

A. I prefer very much to have an oil within a short cut of temperature.

Q. Having read Mr. Edgerton's patent on the subject of oils and the fraction thereof, for gas making apparatus, isn't this the chief claim of that patent?

A. I do not recollect the patent. It did not make much impression on me.

Q. I ask if you will show me anything in Mr. Edgerton's testimony which states that he does not consider it necessary to use more oil in winter than in summer to obtain the same candle power?

A. I don't know as I can at the moment. I think I could do so by looking through. He plainly intimated that it was not necessary to run more oil in winter than summer.

Q. I think you have taken an entirely wrong inference from his testimony?

A. The evidence will show that of course. If I have, I apologize.

Q. Referring to Danbury, I ask if you do not know that the depreciation at Danbury is chagred to profit and loss after operating expenses have been accounted for and that the inclusion of 6849 the depreciation item in the letter to Mr. Bradley was simply for information to give the amount of that item to Mr. Bradley?

A. I simply know what appears in that sheet. I don't know anything about the Danbury books outside that and there it appears as a separate item in that statement, showing what the gas costs. How they cover it in their books I don't know and I don't think it makes any difference whether you write to one account or another, it would have to be paid for by the gas receipts.

Q. That of course is a matter of argument?

A. No, I don't think it admits of any argument whatever.

Q. Two men might differ?

A. They might, of course. You can find them.

Q. Referring to Danbury again do you not understand that the candle power test at Danbury, the results of such tests being included in that letter to which you have made reference as made with a one-foot burner consumed two feet of gas per hour?

A. I don't know whether it is a one foot burner, or what it is. I did understand it was a two-foot pressure burner.

Q. If it were made with a one-foot burner consuming two feet of gas per hour, and if in place of such a burner one were used giving a flame of 25 candles as against 14 candles given by the one foot burner, burning the 2 feet of gas per hour, would not the candle power be raised to 44 candles?

A. I don't know what it would be raised to. I think probably you would get somewhat better result.

Q. A better result than 44?

A. No, a better result than the result obtained with the two foot burner; the two foot consumption

Q. Do you know how much better?

6850 A. No, that would depend upon the gas and its constituents.

Q. On the same gas taken?

A. I say it would depend on that gas as to how much difference there would be as to your method of testing and no man living could tell you that without making an experiment; there is no rule that would apply.

Q. Have you made experiments upon various gas with different burners?

A. I have done a great deal of such work.

Q. Let us assume the gas of candle power manufactured in the way in which Mr. Edgerton has set down in that letter as being used at Danbury, can you tell within say 3 candles?

A. No, not without knowing the gas.

Q. Your experience would not give you sufficient information to draw a conclusion?

A. Certainly not.

Q. Referring to Complainant's Exhibit 392, cost of Danbury gas of 32.95 candle power and pro rata of 24 candle power New York gas based upon the equivalent light theory of H. H. Edgerton are you familiar with the method used at Danbury in ascertaining their candle power?

A. I am familiar with the methods used in these calculations because Mr. Edgerton shows them in his papers and they check out. It is simply a proportion of candle power.

Q. We have here a 32.95 candle power at Danbury?

A. Yes, sir.

Q. I have just asked you in reference to the kind of burned used there and the number of cubic feet of gas burned and the candle power of the flame?

A. Yes.

Q. And as I understand it you are not familiar with the method of taking their candle power, other than that you understood they used a one-foot burner and they used a two-foot flame. That 6851 I understood; as to whether or not it was one foot, I did not know or I have forgotten if I ever knew. I understood that they themselves state the candle power—Mr. Edgerton states it as 32.95, and my impression is that although they state it as 32.95 they charge the people on the basis of its being 44 candle power.

Q. And if it be that they charge the people on the basis of 35, but if it be tested on the same basis as it is tested in New York it gives a candle power of 44, your comparison as set down in that exhibit would not be an accurate one, would it?

A. No, I should advise them to change their method of testing and have their tests conform to what they claim to be the fact in that case.

Q. I presume that in all works the methods of testing are oftentimes th- survival of old and different operations?

A. I think there is a good deal of the survival of the non-fittest. I have had to eliminate a great deal of poor methods in that direction.

Q. You have spoken of the loss in service pipes of about an inch pressure. Is it not stated in the proceedings of the Gas Association that house piping should be such as to confine such loss to within .3 to .4 inches?

A. The rule is a loss of 1 inch for each 50 feet of piping, but of course we have to contend with many houses that are not piped according to the rules. If the rules were always comp*il*ed with the gas man's life would be a much happier one.

Q. And such rules, if applied would bring an average drop of the amount that I have stated?

A. That would be the house alone. You still have the meter to contend with and the service. The meter alone may absorb .5, if there is a large amount of gas passing through it.

6852 Q. A meter properly proportioned for the passage of gas should not absorb so much as that, should it?

A. There is a great difference about that. Some authorities fix it as .5, and hardly any man fixes it below .3 for an average consumption. My recollection is that .2 is accepted as the minimum.

Q. And is it not a fact that Mr. Addicks has stated in the New England proceedings of the Society for Gas Engineers, that the drop in the house pipes, that is from the meter through the services should not exceed .3 of an inch?

A. I dare say. I should be very glad to state the same thing, and say it ought not to, but it will just the same in the houses we have to take under our wing.

Q. The gas companies have ruled, and endeavor to establish rules of piping, so as to keep the drop within these limits, don't they?

A. They do, and have no authority to enforce them, as a general practice. I have given a great deal of personal attention to that matter in a great many companies.

Q. And gas companies would be much happier if they were enforced, would they not?

A. They certainly would. The complaint desk would not be so busy.

Mr. Kirby: I am through.

The Master: Mr. Burr, I want to consult your convenience. Mr. Mathewson says that he is finished with the exception of some odds and ends and will not take more than fifteen minutes, and will not involve any long cross-examination. I will give you such time to-morrow as you want. What time to-morrow would you like to begin?

6853 & 6854 Mr. Burr: Say ten o'clock.

The Master: You are entitled to first consideration.

Mr. Burr: I want to say in view of the number of schedules and tabulations which Dr. Humphreys has put in evidence, I think that a study of them overnight will shorten the examinations, and more than that, I now ask if you would be good enough to produce those records for 1906 from which you made your deductions, so that Dr. Marks may have an opportunity to examine them over night.

The Witness: There is no objection to that I imagine.

Mr. Mathewson: No.

The Master: Then, we will adjourn until 10 o'clock tomorrow morning.

At 5.40 P. M. adjourned to Saturday, February 2nd, 1907, at 10.00 A. M.

Last Exhibits:

Last Compalinant's Exhibit, 394.
Last State's Exhibit, 000.
Last City's Exhibit, 236.

6855 Circuit Court of the United States, Southern District of New York.

Consolidated Gas Company of New York, Complainant,
vs.
Julius M. Mayer, as Attorney General of the State of New York; William Travers Jerome, as District Attorney of New York County; Frederick E. Gunnison, John C. Davies, and Lucian L. Shedden, Constituting the New York State Commission of Gas and Electricity, and The City of New York, Defendants.

Before Arthur H. Masten, Special Master.

New York, *February 2d*, 1907.

Met pursuant to adjournment.

Present: The Master, Mr. Mathewson, Mr. Burr, Mr. Kirby, Mr. Page.

6856 Alexander C. Humphreys resumes.

The Witness: Before you proceed, I would like to draw attention to an omission on my part in those tables. Mr. Burr probably discovered that I referred to a certain letter from Chairman Barker, in connection with Arlington and Brockton, and as it is directly referred to for confirmation, I suppose the letter ought to be put in as part of the tables. The point is this, that in the case of Arlington and Brockton, the capitalization per thousand did not seem to check between the column covering that item, and the individual accounts of the company, so I wrote to the Chairman of the Board saying that I thought his figure was wrong in his deduced column, and this is his explanation of why he made exceptions, in Arlington and Brockton, but otherwise my process was correct. Of course, I had no means of knowing that there was a variation in those figures and only discovered it by finding that my figures as calculated did not agree with the Massachusetts Commission. The letter is as follows:

Commonwealth of Massachusetts:

Board of Gas and Electric Light Commissioners,
Room 145, State House.

Boston, *Nov. 14th*, 1906.

(Answered Nov. 15, 1906, by A. C. H.)

Mr. A. C. Humphreys, New York City.

Dear Sir: We have yours of the 13th inst. giving result of your scrutiny of certain data in the last annual report of the Board and referring particularly to the Arlington and Brockton gas companies.

6857 In general, I may say that in computing "the capital per thousand sold including bonds," we have dealt somewhat differently with the liabilities outside of capital and bonds from our treatment of those two items. That is to say, we have not intended to include notes and accounts payable except so far as, from the facts in our possession, they seem to be to a degree permanent in their character or clearly representing investment in plant.

In the Arlington case you will note toward the top of page 10 of appendix, the item "amounts due from the company not included above $12,457.70." Included in this is the item of $6,924 which for special reasons at the date of the company's return was in the form of an open account but represented the cost of plant additions and under the policy of the company would later be represented either by new capital or some permanent form of debt. We therefore included it in the computation and if you shall also do the same, you will, I think, make the figure of $8.45, as given on page 116.

In the case of the Brockton Company some exception has been apparently made to the usual practice. A large percentage of the floating debt, amounting to $112,235, represents, as we have reason to believe, a liability which accumulated under very peculiar circumstances in the company's history and which does not and never did represent plant investment or perhaps anything other than a loss growing out of speculation in the company's franchise. Being of this character and constituting a debt as to which we understand it is the company's policy to discharge as rapidly as it can, having no purpose to retain it as a permanent debt, we have 6858 not included it in our computation. It is true, of course, that it bears interest which constitutes a part of the burden upon the company and may on the whole be as clearly entitled to be counted a part of the capital as some percentage of the actual capital stock in many companies.

I think these statements will quite fully account for the difficulties revealed by your study of the figures.

Very truly yours,

(Signed) F. E. BARKER, *Chairman.*

Cross-examination by Mr. BURR:

Q. How many gas concerns are you connected with, Doctor?

A. At present?

Q. Yes.

A. I am connected with the Consolidated Gas Company of Baltimore, and am president of the Buffalo Gas Company of Buffalo, and our firm manages the Gas Company of Lawrence; and then in the way I have described as advising companies, we are connected with something over fifty in foreign parts.

Q. And I understood you to say yesterday that *that* you were heavily interested in the Baltimore Company?

A. Yes, sir.

Q. Were you a witness in the investigation or suit in Baltimore regarding those companies here recently?

A. No.

Q. You know there was some investigation as to their capitalization and operation, a few months ago?

A. Yes.

Q. You have been in daily attendance here, Doctor, for most of the testimony that has been given in this inquiury?

6859 A. I have heard a great deal of it. I was not here in the early part, in the summer; I think I commenced about the first of September, somewhere around there.

Q. And you, as I understand, claim to have experience in the construction, installation and operation of gas works and gas plants?

A. Yes, sir.

Q. Both in this country and in Europe?

A. Yes, sir.

Q. And you regard yourself as having some peculiarly personal knowledge with regard to the keeping of accounts of gas companies?

A. Well, I feel that I am quite competent in that line. I have had a great deal to do with it, getting up accounts and as chairman of the committee that developed the uniform system of accounts for the American Gas Association, and I developed the system for the United Gas Improvement Company, and have given a great deal of attention to it.

Q. You are also familiar with the purchase of supplies for gas companies?

A. Yes. I do not give any special attention to it at present.

Q. You are the president of the Stevens Institute?

A. I am.

Q. And that is a college or school of technology?

A. It is.

Q. How often have you testified as an expert in these gas hearing- or where gas business is the subject of scrutiny.

A. My present recollection is that I testified for the Consolidated Company before the New York Gas Commission; in this case also; in two patent suits on gas and once or twice before parliamentary committees in connection with water gas introduction into Great Britain; that is my recollection. I have not done much of it.

6860 Q. Did you not testify in Chicago?

A. Oh, yes.

Q. Did you testify in Syracuse?

A. Yes, I did, but not as an expert; I was subpœnaed to testify as to facts.

Q. Regarding the gas business?

A. Well, regarding some papers. It was to identify a paper I went to Syracuse for, a paper I signed some years before when I was president of the gas company there.

Q. You testified in Holyoke?

A. Yes.

Q. Are there any others that you can recollect?

A. Yes, I testified very briefly in Norwich.

Q. And if I remember aright, you were president of the American Gas Light Association of America?

A. I was for one year. Presidents of late years are always elected for a single year.

Q. And you are connected with many allied societies?

A. Yes.

Q. And in your capacity, and acting as member or officer of these various societies you have from time to time delivered addresses upon the subject of gas operation and management of gas works and gas plants, etc.?

A. I do not remember delivering many addresses on the subject. I think I delivered one as president. I have written papers on the subject.

Q. Well, you have written papers and you have delivered an address that you recall, while you were president of The American Gas Light Association?

A. Yes.

Q. In that address did you not allude to the subject of depreciation, if you recall?

A. I think I did.

Q. How long have you been acting as consulting engineer to the Consolidated Gas Company?

A. I am not consulting engineer to them now.

6861 Q. Well——

A. That is, if you mean that I hold a definite position as consulting engineer.

Q. You are simply consulting engineer for the purposes of this case?

A. I am consulted with regard to this case and with regard to any subject which may come up in connection with it.

Q. Are you interested financially in the Consolidated Gas Company?

A. No.

Q. Have you ever been?

A. I don't think so. My firm I think has had stock in the company, but not personally.

Q. Does it still hold that stock?

A. I am not sure if it does or not; I dare say it does.

Q. In the address to which I have referred did you not state as follows: "To provide a definite scheme to cover deprpeciation, we must, as accurately as possible, decide upon the average life of the plant in question." And further: "Having decided in the case of each division what can be safely assumed as the life of this portion of the plant, we can refer to our annuity tables to determine what percentage of the original cost of plant annually set aside at compound interest will at the end of the period assumed provide a fund equal to the original cost. Having done this in the case of each item on our list, we can find the total amount to be set aside each year, and then find what percentage this represents the total original cost of plant, and this is the amount to be, after some manner, reinvested from the annual profits."

Do you recall using that language?

A. That sounds correct.

Q. And did you not further say *that* in that address:

> "An important point is to determine at what rate we can invest the payments to our sinking fund. In these days of low
> 6862 interest bearing securities, five per cent. seems hardly attainable with safety. But if our business is a growing one, as it

must be if we are to continue in it long enough to make the question of sinking fund important, there will be the opportunity to invest this fund in legitimate extensions of plant required by increased demand for gas. There should not be the slightest difficulty in thus earning five per cent. on this special extension and sinking fund; and, bearing in mind that this new capital has the way prepared for it by the old, the chances are that the new portion of our capital will earn a considerably higher rate. We may then assume five per cent. as a safe figure. You so stated, did you not.

A. That sounds correct.

Q. I have read this from the address given by you as it is printed in the Progressive Age, page 484, November 1st, 1899.

A. Yes.

Q. And I hand it to you to see if I quoted correctly.

A. I do not think it is necessary, it sounds quite natural.

Q. Referring to your testimony in the Holyoke gas case, April 17, 1899, I call your attention to Vol. 2 of the printed record in that case, and especially to pages 242 and 243, and especially calling attention to the statements you made on page 242, that the Holyoke gas works had repair of works and current renewals in the year 1898, of 6.11 cents per thousand feet of gas made, you stated, did you not?

"Now, four cents would be enough for that by the ordinary practice. In the same way, coming to distribution, the repairs of
6863 meters, services and mains, and current renewals of those, come in at 5.166 cents. Now, 2½ cents I think will generally be considered as a fair and perhaps full amount for repairs in that department. In other words, there seems to be an excess of 5.77 cents per thousand, which would amount to $3,030. That is, 2.11 cents on 68,000,000 cubic feet made, and 2.5 cents on 60,000,000 feet sold, and I consider these ample to cover depreciation and final renewals. Q. That is for every thousand feet according to your allotment there is an expenditure apparently for repairs and renewals of something like five cents in excess of what should be so spent. A. Of what is ample to take care of a plant, yes. Q. And you say that that excess amply cares for the question? A. I do."

Q. That is correct, is it not?

A. Yes, sir.

Q. I have correctly quoted you in your testimony?

A. Yes, sir.

Q. Now, as a matter of fact, at Holyoke at that time, was not over three quarters of the gas made Coal gas?

A. About two thirds and one third, I think; that is my recollection.

Q. Your company in Buffalo of which you are president as I understand——

A. Yes.

Q. Has just recently made a return to the Gas Commission as required by law, has it not?

A. Yes.

Q. I call your attention to Question 14——

Mr. Mathewson: Now, if the Master please, he will recall that when Mr. Hazard, the secretary of the Commission was on the stand, that it was expressly said that we should have an opportunity to examine the reports of other companies in addition to the few 6864 selected which were here presented, and counsel for the defendants, the members of the Commission, stated that opportunity should be given us. Immediately in December we wrote asking for information. The Secretary did not give us information, he said the matter would be submitted to the Board. We have had correspondence back and forth and to this day we have not had an opportunity to examine those reports. We have been utterly unable to see them. I have the correspondence here, if it is desired to be shown, but it will not be disputed, I think. And we are in this position, we have been unable to see those, while apparently, counsel for the other side or the witnesses seem to have no difficulty whatsoever in getting access to the reports, and I want to say right here so far as the attorneys before the Master for the members of the Commission are concerned, I know they have acted in perfect good faith in reference to the matter, and have advised the commission that we should be permitted to see those papers, but we have not been permitted to do so, and of course now we shall lose any opportunity to examine them; but in view of this present suggestion, it ought to be stated now so the Master may understand it.

The Witness: May I state something?

Mr. Mathewson: Yes.

Mr. Burr: One moment. I will not delay my examination of this witness to answer the criticism of counsel because that relates to an entirely different matter to the question I have asked this gentleman, and pertinent to the statements made by him on his 6865 direct. Suffice it to say, the book from which I read was not obtained from the Gas Commission but from the city counsel of the City of Buffalo.

The Witness: I will let you know that those answers were answers prepared for the city counsel of Buffalo under the direction of the Commission and in accordance with their orders and given to Mr. Bemis as their expert, and he is using them in this case.

Q. I call your attention to question fourteen which was asked you yesterday and which you answered. The question calls for the following information, does it not: "A separate statement of operating "expenses for each year from June 30, 1901, up to June 30, 1906, "prepared in tabulated form and in accordance with the classifica- "tion of accounts used by the company," and I next call your attention to the answer you made to this question, and referring to the year ending September 30, 1906, will ask you after giving a total cost of distribution as 11.7 you did not deduct the income from the street lamp department, the gas stove department and the gas arc lamp department, 2.55 cents, and if you did not in the line below write the net cost of distribution 8.52 per cent.?

A. I do not recall the figures at all. I don't know that I ever saw that answer. No answers were submitted to me except where there was a question as to the figures and whether that was the form prescribed, or whether it was the form we used at the moment, I am unable to say. The Buffalo Gas Company, I will say, does not use in all respects the uniform system of accounts, because——

6866 Q. One moment. This is on cross-examination. Mr. Mathewson will bring out anything you desire on the redirect, but I am in a hurry to finish my cross-examination. Will you kindly look at the document I show you and see whether that question and answer appears there (handing book).

Mr. **Mathewson**: If the witness is not responsible for it, suppose it does? You are cross-examining an individual and not the Buffalo Gas Company.

A. Where do you find this, in tabulated form? That is the way it appears here.

Q. As a matter of fact——

Mr. **Mathewson**: I objected to the question. Did I get a ruling on that?

The **Master**: What is this, is it a return made by his company over his signature?

Mr. **Burr**: Yes.

The **Witness**: I do not think it is over any signature.

Q. Do you deny that that is made by the Buffalo Gas Company of which you are the president?

A. No.

Q. Are the accounts of that company kept in accordance with your instructions as president?

A. They are kept in accordance with my permission.

Q. How long have you been president of the Buffalo Gas Company?

A. Six or seven years.

Q. Have you ever had occasion to look at the accounts?

A. Every little while.

Q. Are they properly kept?

A. Properly kept for the purpose, yes, to show the facts.

Q. Now, then, I ask you to look at that report and refresh your recollection and say whether what I have read as purporting to be contained in that report is correct?

6867 Mr. **Mathewson**: I object.

The **Master**: Is there any ground for your objection?

Mr. **Mathewson**: I do not think it is competent.

The **Master**: Why is it not competent, if Mr. Burr intends to show that in this report there are some methods of bookkeeping, or some statements which are inconsistent with the theories which Dr. Humphreys has announced on his direct examination.

Mr. **Burr**: That is all the purpose.

Mr. **Mathewson**: I cannot see that it rebuts or it disproves anything, if it be so.

The **Master**: I will allow it and give you an exception.

Mr. **Burr**: It directly controverts the statement made by Dr.

Humphreys yesterday, with regard to the statement of keeping accounts of public lamps and stoves.

Mr. Mathewson: Exception.

(Question not answered.)

Q. Now, Doctor, did you not make similar reports for the past four years showing that as you kept your accounts in Buffalo you deduct income from street lamps and stoves from your operating expenses before reaching the net cost of distribution?

A. No.

Q. Won't you look at page 70 of the record and see if a similar entry showing that you kept your account in this same way the year before does not appear here?

A. No, this would not prove it was kept that way; it shows that form in that way.

Q. Do you desire to be understood as saying that you did not keep your accounts for the past four years in the Buffalo Gas Company in such a manner that you deduct income from street 6868 lamps and stoves from your operating expenses before reaching your net cost of distribution?

A. I am almost positive that we have not.

Q. I call your attention to page 4 of this report which may refresh your recollection in that regard. Question 14 calls for a separate statement of operating expenses for each year, from June 30, 1901, to June 30, 1906, prepared in tabulated form and in accordance with the classification of accounts used by your company, setting opposite each general heading and sub-heading the total cost.

A. Yes.

Q. Is not the statement appearing on page 70 the answer to that question, and the following pages?

A. I presume it is.

Q. And does it not appear by that answer that for the years from 1901 to 1906 you used the same method of accounting?

A. Not at all necessarily, no; not at all.

Q. I call your attention to the statement for the year 1904 and to the item of total cost of distribution and then underneath, less income lamp department, $11,431.75, less income stove department, $1,067.19?

A. Yes.

Q. The total cost of distribution, $87,945.92, and these two items being deducted leave net cost of distribution $77,581.36?

A. I will call attention to one fact right away. I have never seen that statement before, but I see that less income lamp department is given as $11,431.75, then it says less income stove department $1,067.19, and the total deduction is $10,346.56.

Q. I noticed that error in subtraction——

A. I do not believe it is an error.

Q. But the items are there and the statement is there deducting street lamps and stoves from those gross expenses.

6869 Mr. Mathewson: No, it would look as if you had taken street lamps and stoves, and that before you deducted them you deducted one from the other.

The WITNESS: That is the way it strikes me. They have taken the eleven thousand dollars and deducted the one thousand from it, and made a net of ten thousand dollars to deduct.

By Mr. MATHEWSON:

Q. Then they did not deduct stoves?

A. No, it does not appear that they did in that case. It may be different in other cases.

By Mr. BURR:

Q. Look at page 59, Doctor, purporting to give operating statistics in response to Question 14, operating expenses for the year ending September 30, 1905, and do you not find on page 70 the total cost of distribution is given there at $62,161.61 or .1119, and underneath appears the statement, income street lamp department $10,941.16, income gas stove department, $1,888.19; income gas lamps department, $1,737.92, total income $14,567.27, net cost of distribution $47,594.34.

A. That is right. In this case those items all seem to be added in for the deduction. Yes, in that case they are all added together before the deduction is made. I would say that .1119 or something probably means fraction of a dollar and not of a cent.

Q. Does not that same thing occur in the statement in regard to the operating expenses for the year ending September 30, 1906? Does it not appear on page 72 as follows:

Total cost of distribution	$61,351.78
Income street lamp department	10,138.28
Income gas stove department	1,720.69
Income gas arc lamp department	2,306.81
Total income	14,165.78
Net cost of distribution	47,186.00

6870 Does it not so appear there?

A. That is right.

Q. You testified yesterday that you could not argue from the cost of gas in the Lake cities as to the cost of gas in New York, because there were such differences in the cost of manufacture, did you not?

A. Yes, that is right.

Q. Are you aware that in the recent Chicago gas hearings the People's Gas Light and Coke Company reported that its cost for manufacture was 31.8193 and that it supplies 22 candle power gas at the testing stations?

A. That sounds familiar.

Q. Are you not familiar that by law this company must supply 22 candle power gas at testing stations at a distance from the works?

A. That is the requirement, I believe.

Q. And that is the company that reduced its rate to 85 cents, is it not?

A. Yes.

Q. You have referred to the profits of the seven largest Massachusetts companies outside of Boston, Cambridge, Fall River, Lynn, Lowell, Springfield, and Worcester. I call your attention to pages 103 and 104 of the Massachusetts Gas Commission report for the year ending June 30, 1905, which is the last report in print, and ask you whether it does not appear that the dividends in Cambridge were 19.3 cents, in Fall River 19.77——

A. Yes, those are dividends, amounts paid per thousand for dividends.

Q. Lowell, 19.70 cents per thousand feet?

A. Right.

Q. And Springfield 21.18 per thousand?

A. 21.18, yes.

Q. And in Worcester——

Mr. MATHEWSON: Just a moment, Mr. Master, Professor Bemis, when he was on the stand, or Dr. Marks, put in all this evi- 6871 dence as to the amount paid in dividends in these various cities. We in our rebuttal testimony have shown from the same reference that if they paid that amount in dividends they were allowed to earn such an amount upon their capital and that their dividends did not represent all that they were permitted to earn over the operating cost of gas. They may have carried it to surplus or used it in extensions; it does not seem to me it is very valuable to go back again and ask if they did not pay so much dividends, which is not what we are rebutting here.

Mr. BURR: I am leading up to a statement which he made yesterday and calling his attention preliminary to it, by asking the question I am.

Q. I want to call your attention to Worcester, 20.21 cents.

A. That is right.

Q. The only one omitted is Lynn, is it not, of the seven companies.

A. What are the seven?

Q. Cambridge, Fall River, Lowell, Lynn, Springfield and Worcester.

A. I think you have omitted another one. Is not Lawrence in that bunch?

Q. Well, assume Lawrence to be in it, I think it is, according to my recollection. Lawrence and Lynn are left out, because they are both combined electric light and gas plants, are they not?

A. They sell both gas and electricity, yes.

Q. Now, if you will turn to the appendix of this same report in order to determine how much should be added to these companies on account of interest payments do you not find that the sum of interest in Cambridge as given on page 27 of the appendix is $9,413.31?

A. That is right.

6872 Q. While the sales, as given on page 116 of the main report were 439,162,251 feet?

A. That is right.

Q. I will now call your attention to the Fall River Company, page 52 of the appendix. You observe, do you not, that the interest stated there is $3,521.17?

A. Yes, sir.

Q. And you will observe in the main report that the sales for Fall River were 321,119,341?

A. Yes.

Q. Now, referring to Lowell, page 81 of the appendix, don't you find the interest as stated there $734.45?

A. Yes, sir.

Q. And on page 116 of the main report are not the sales given at 482,088,600 feet?

A. Yes, sir.

Q. Referring to Springfield, page 128 of the appendix, don't you find that the interest payment was $391.22?

A. Yes.

Q. While on page 117 of the main report the sales are 311,678,930?

A. Yes.

Q. And on page 152 of the appendix in the case of Worcester, the interest was $1,828.72, was it not?

A. Yes.

Q. While on page 117 you find the sales to be 410,641,700?

A. Yes.

Q. Now, with respect to the Boston company, which was the largest company before the consolidation, you find, do you not, on page 21 of the appendix that the interest payments were $50.53.

A. I find an item of $50.53 as against interest paid. It has no meaning for me in that particular case.

Q. While the dividends per thousand feet of gas sold as given on page 103, was 18.9 cents.

A. Yes.

6873 Q. With respect to the profits, the Massachusetts gas companies are allowed to make and could put into their plant aside from what they pay out in dividends and interest, you are aware, are you not, that it has for many years been the position taken by the Massachusetts Gas Commission, that if profits are put into extensions, the time will ultimately come when the plant being thus paid for, the price of gas will be so reduced as to include only a return on such capital as has been actually put in by the stockholders?

A. No, I don't know anything of the kind. I think they have left their capital away down below the amount paid in by their stockholders.

Q. Are you not aware that in the Haverhill gas case that was the position taken by the Commission as embodying their policy?

A. They made a decision there which has never been sustained and is still in the courts. I don't recollect what the difference was. Haverhill shows at present 63 cents capitalization per thousand.

Mr. MATHEWSON: They are returning about 44 per cent on that.

The WITNESS: Yes.

Mr. BURR: I object to that statement.

Mr. MATHEWSON: It appears in the tables.

Mr. Burr: Then do not interrupt me in the course of my cross-examination, if it appears in the tables.

Q. I call your attention to the 16th annual report of the Board of Gas and Electric Light Commissioners of the Commonwealth of Massachusetts, from the year ending December 31, 1900, including tables from the annual returns for the year ending June 30, 1900. On page 9 of that document don't you find that the Board of Gas and Electric Light Commissioners states as follows:

6874 "The Haverhill Gas Light Company was organized under a special charter in February, 1853, and later, in that year began the supply of gas in Haverhill. Its capital stock was originally $45,000, which was increased in 1871 to $75,000 its present amount.

It has enjoyed the exclusive privilege of supplying gas to the city and people of Haverhill, and with the exception of a period in its earliest history, has been uniformly prosperous. Its management appears to have been exceptionally careful and conservative, so that, in addition to the payment of an average dividend of about 8 per cent., it has accumulated a surplus invested in its plant estimated to represent from $275,000 to $300,000. * * * Accumulated, as it has been, out of profits in the performance of a public service, its existence affords exceptional facilities and imposes peculiar duties upon the corporation in its relation to the public.

As the company has applied this surplus to the cost of improving and enlarging its plant as has been needed to satisfy the public demand, the property in which it has been invested must otherwise have been represented by new capital contributed by the shareholders. Such use of surplus may properly be made of substantial benefit to the consumers and shareholders alike; to the former, by relieving them of some portion of the burden which the investment of fresh capital necessarily imposes, by affording the most ready facility for minor extensions of the company's lines, for superior excellence in its product and by aiding to the most satis-
6875 factory performance of its varied duties toward the public; to the latter, by strengthening the corporation in enhancing the security of the original investments of the shareholders, and in bringing to them a return somewhat higher than that to which they might otherwise be entitled. Such a surplus is by every principle of law the property of the corporation. It has an undoubted legal pro rata to its shareholders in case of liquidation; but, notwithstanding this, the circumstances attending its accumulation impose upon the company, so long as it continues to exercise the functions of a public monopoly, the duty to employ it for the joint advantage of the consumers and the corporation. It need not be dealt with as the exclusive property of either.

Fortunately, in the majority of companies of this class in this State, the recognition of this duty by the directors has been a part of the policy of their management; until recently this has been true also of the company in Haverhill. Now, however, its policy appears to have undergone a very decided change."

Is that correct?

A. I don't doubt it is correct.

Q. Is it not a fact that the Massachusetts Gas Commission has no authority to reduce the price except upon petition of the Mayor or a certain number of consumers?

A. I believe that is true.

Q. Don't you find from your examination of the record of that Commission that where such cases have been brought before them the Commission has reduced the price of gas even though the dividends were not over six per cent.?

A. They have done in some cases as explained by me yesterday.

6876 Q. It is not true also that in the case of new capital the Commission so fixed the price or the premium that not more than five or six per cent. could be realized by the investor?

A. Sometimes.

Q. Now, in the tabulations presented yesterday, you brought out the fact that certain Massachusetts companies quoted by you had a total capitalization both in stocks, bonds and notes of only $2.24 per thousand feet of annual sales. Now, on the basis of the sales of the Consolidated Gas Company last year of about thirteen billion cubic feet, this would amount to a capital of less than thirty million dollars, would it not?

A. I would be glad to compute it for you, acting as your computer, as Mr. Marks says.

Q. And making only a rude calculation, as he also stated?

A. No, I will make a very exact one. What was the figure?

Q. 2.24.

A. You have got a lower one. $2.18.

Mr. Mathewson: And the Haverhill, .63 cents.

The Witness: Yes, but I will take the 2.24 which Mr. Burr asks about. What was the amount, thirteen billion?

Q. I gave you the rough figures on the basis of the sale of thirteen billion.

A. It is thirteen billion, two hundred and eighty-three million and something.

Q. Well, if you want it exactly, yes.

A. I make it $29,753,920. I think probably they took the figures from Exhibit 378, the average for Cambridge, Fall River, Lowell and Worcester, given as $2.24.

Q. In most of those cities you referred to, you recognize, do you not, that they make all their own gas instead of buying part of it, as in the case of the Consolidated?

A. Most of them do, yes, sir.

6877 Q. And that the larger per cent. of that gas is coal gas?

A. I should not want to say without making a careful examination. There is a great deal of water gas made in Massachusetts.

Q. Assuming it to be coal gas, it would mean a more expensive plant, would it not?

A. Yes, sir.

Q. Don't you find the miles of mains are much greater per thousand feet of sales than in the case of the Consolidated Company?

A. I have not looked it up lately.

Q. And is it not your understanding and information that the Massachusetts gas companies you referred to are not working to the limit of the manufacturing capacity, to say nothing of exceeding it, as in the case of the Consolidated?

A. They no doubt have a margin to work on. It would not be safe otherwise.

Q. You referred to the figures you got from the statement of Mr. Grosser of Chicago?

A. Yes.

Q. Do you claim that those figures which you took from that statement present actual structural values?

A. No, I do not know what it represents. I just quoted it as a statement from the census, for what value it might have.

Q. Is it not likely to be more than the structural value?

A. On the average I am not sure; it probably is somewhat more.

Q. You quoted or referred to the statement of Mr. Bemis, as it appears upon page 3093 of the record. Did he not state there "If the companies can stand a reduction of any given amount," etc.? Does not that mean and did you not understand it to mean that if an agreed and reasonable profit on the basis of present sales can be secured by certain reductions in price, then the company can stand a further reduction?

A. I understood it to mean that if the company could stand
6878 any kind of a reduction it could stand additional reduction
down to the actual cost of the gas.

Q. That was your understanding of this statement?

A. Yes.

Q. And upon that understanding you based your statement?

A. Yes.

Q. Now, is it not a fact that although the increase of sales with reduction in price has not been large in London since 1901, you do not deny that reductions in price have led increase in consumption in most large cities, is that true?

A. There is a tendency, of course, in that direction. There is another question which goes there——

Q. With respect to a sinking fund in some Massachusetts municipal plants, you do not dispute the accuracy of Dr. Bemis' statement on the subject as he states, on page 3253, where he stands: The law states as among the expenses of operating a municipal plant this: "The requirements of the sinking fund or debt incurred for the plant." I interpret that to mean that in borrowing for the plant the town or city very likely has to agree to a sinking fund provision, or there may be a State law as to all municipal bonds. You do not dispute that, do you?

A. May I have the question to which that is an answer.

Q. (Handing book) You can read it.

A. Now, what is the question?

Q. I say you do not dispute the accuracy of his statement in regard to the subject of a sinking fund in some Massachusetts municipal plants as it appears at top of page 3253?

A. What you read me was on page 3252; I think Mr. Bemis was not entirely correct there. The provisions for a sinking fund are entirely separate from the point I understand was being referred to there, namely, the three per cent. for depreciation. That had 6879 nothing to do with depreciation, and I should say from the answer that Mr. Bemis was confusing those two points. Of course, there is no doubt in some of these cases there is a provision for a sinking fund in addition to depreciation. That is simply to get rid of the original investment after a stated number of years.

Q. Well, you say that the Consolidated Company should accumulate a reserve fund up to one-tenth of its assets?

A. Yes.

Q. Has it ever done so prior to this year?

A. No, no necessity for it. They have not had to meet a price reduction, a heavy reduction.

Q. Do you mean to say they never had to meet a price reduction before this one?

A. Any such reduction as this cutting down to eighty cents.

Q. So that the necessity you say did not exist before for the reserve fund?

A. No more than has been met by their methods of carrying on the business.

Q. Does that apply to a final renewal fund, also?

A. How do you mean, how does what apply?

Q. When you say that the necessity did not exist for the reserve fund prior to this reduction to 80 cents, I say does that apply also to the final renewal fund you spoke of yesterday?

A. They would not establish a final renewal fund, that would be unusual, they would put into plants amounts to cover renewals.

Q. And have they done that?

A. They have done it to a certain extent. In my opinion it might have been a little heavier.

Q. To what extent have they done it?

A. They have the difference between the amount charged to repairs and the amount charged to total repairs and renewals.

6880 Q. Do you recall what amount that was, or where it appears?

A. About four cents, I should think, that is the amount included in the 10.89.

Mr. Mathewson: It already appears in the exhibits.

Q. You compared the wages in London with wages in New York?

A. Yes.

Q. Upon what basis did you assume the wages in New York to be, what hours per day, and what wages did you use? If you have a tabulation of that, which I presume you have, I will take it and hand it to the stenographer. I would like to get the benefit of that.

A. Do you wish this, Mr. Mathewson?

Mr. Mathewson: If counsel wishes it, I have no objection to his putting it in.

Q. Where did you get your information as to the wages paid in England?

A. The one quoted, Gas Light and Coke Company?

Q. Yes.

A. From the company.

Q. And does that apply to any of the other companies?

A. Do you mean the Edinburgh works, the Granton?

Q. Yes.

A. That was not quoted yesterday, I made no reference to it in my direct-examination. That was obtained from data taken—I forget where it is now.

Q. Are you familiar with the method of operating gas plants in Glasgow and Dundee?

A. Not Dundee. I have been fairly familiar with Glasgow, I put up a plant for them some ten years ago.

Q. Do they pursue the same methods as adopted here by the Consolidated Gas Company of keeping their accounts.

A. I don't just know how they keep their accounts. They are not on our lists. 6881

Mr. Mathewson: That is a municipal plant?

The Witness: That is a municipal plant, yes.

By Mr. Burr:

Q. You haven't got that on your list?

A. No.

Q. They are not one of the fifty clients to whom you send that confidential communication?

A. No. We have a number of municipal plants on our list.

Q. I refer you to the report of the Massachusetts Gas Commission for 1899-1900 and ask you if the following figures are correct for Haverhill before the Commission ordered the reduction from one dollar to eighty cents: Sales, page 123, 115,022,200 feet; profit——

A. You asked me the year before. I will have to trace this back to find out what—on page 123 the Haverhill sales are given as 115,022,200 feet.

Q. On page 72 of the appendix does not the profit appear as $23,060.60?

A. I don't find anything on the page you speak of as referring to Haverhill. I have got it on page 61, there is a reference to Haverhill, but that is not the correct amount.

Q. On page 62 it should be, instead of page 72; excuse me. Referring to page 62 of the appendix, do you not find the profit to be there stated as $23,060.60?

A. Yes. That is on the manufacturing account.

Q. On the same page do you not find the capital stock to be stated as $75,000?

A. $75,000.

Q. Bonds and notes, nothing?

A. Well, there is no notice of it.

6882 Q. Not given?

A. Unpaid bills——

Q. Bonds and notes, no figure opposite?

A. No, I don't find any.

Q. Dividends, $22,500?

A. Now you are referring to the profit and loss statement, $22,500. Yes, the debits to that account.

Q. In your exhibit 390, do you not observe from that exhibit that in the seven cities there referred to that the profits, even omitting Charlestown, increase nearly as fast as the assets, so that the earnings were nearly as large a percentage of the assets after the reduction as before?

A. Well, I should have to calculate that out. It is not shown in the figures on the exhibit. I have figured Lynn and that stands about the same. The rate of profits on the assets remains about the same.

Q. You observe also this was in face of a reduction in price of 9 cents in one company and from 28 to 36 cents in the other companies, omitting Charlesto-n for the reasons you gave for so omitting?

A. Yes. Well, the reductions are shown right on that sheet. I added them afterwards to the amount. I think I added them afterwards to the amount. In Lynn it was $1.22 to .90; in Worcester, $1.09 to $1; in Springfield, $1.37 to $1.01 and etc.

Q. As a matter of fact does not your exhibit 390 show, omitting Charlestown, that with an average of over twenty cents in price the sales in fact increased from 988,739,000 feet at the first date given by you for each company to 1,785,603,000 feet at the last date given by you, an increase of 80 per cent.?

A. I have not shown that here at all. I should have to make up a total to see whether that was so.

Q. I won't ask you to stop to compute it now. It is a matter of computation.

—. ——.

6883 Q. Does not exhibit 390 show that the assets only increase 37.7%, or from $4,312,786.11 to $5,937,706.69, in order to take care of this 80% that I understand you would have to compute?

A. Certainly.

Q. But assuming those statements to be correct that would confirm Professor Bemis' claim that an increase of consumption following the reduction in price does not involve a proportionate increase of capital?

A. I think the facts are shown right in my table. There is given the increase of profit and there the increase of assets, and there are the ratios given.

Q. But if that exhibit shows what I have asked you in the two preceding cases then that would bear out Professor Bemis, would it not?

A. I should have to study his whole deduction very carefully. You mean those two answers?

Q. You cannot say?

A. No, I cannot say without computing. It seems to me that the whole case is covered in my table there, boiled right down.

Q. Now in any given city does doubling of the amount of gas passing through a street main increase its depreciation or need of repairs?

A. The actual passing of the gas through does not injure the pipe at all, but if you have more gas passing through you probably have more consumers and you probably have more services to take care of and the like. It adds to some of the charges in that way.

Q. Does it add to the charges on mains?

A. Yes, it would add to the charges on mains somewhat because the more you dug down to connect services and the like the more you would have to look out for your main. It would not be important in that direction.

6884 Q. The cost of repairs and depreciation does not increase proportionately to the increase in volume of gas passing through the main, does it?

A. Not necessarily, no.

Q. Does it usually?

A. The cost of repair as a whole?

Q. In any way that you want to assume, on mains?

A. I mean on mains. As a whole?

Q. Yes.

A. No, it would not be in proportion. As I stated there would be an increase with the extension of business; some increase.

Q. Compare two mains, one capable of carrying ten times the amount of gas of another. Will the large main require ten times the repair of the smaller?

A. Certainly not.

Q. I call your attention to volume 2, page 211, of the Holyoke Gas Investigation, and ask you does it not appear there that the gas sold June 1st, 1897-98 was 59,875,900 feet?

A. Yes.

Q. And the unaccounted for gas 12.2%?

A. Yes.

Q. On page 15 do you notice that the number of meters in use was 2,457?

A. It does not seem to be very clearly stated as to whether in this one case the meters on hand are shown below.

Q. Will you give the two items that appear with regard to meters?

A. Unless there is some general total that shows it. I don't know. It shows meters, 2,457 meters. It then gives some meters down below as on hand; 110 of them.

Q. On page 16 the mains are given, are they not, Doctor?

A. Yes.

Q. Assuming that the mains there as given show 168,687 feet or 31.93 miles—or may be you can find by a short computation that there is correct?

A. That adds up correctly; 168,587.

6885 Q. Well, we won't bother with it any more. That would be 31.93 miles, would it not?

A. Yes; about that, I should think.

Q. You spoke of the oil used in Philadelphia and elsewhere as mostly 28 degree gravity oil. Is it not mostly Texas oil?

A. I don't think I said I was quite as definite as that. I said I imagined it was. I have no very exact information as to the exact gravity of the oil. As to its being Texas, I have no doubt some of it is Texas oil. As to the proportions, I don't know.

Q. I understood you to say yesterday that by this proposed lease or ordinance to which reference was made, that the proposition of the company in Philadelphia contemplated a reduction for a number of years. I did not quite understand whether you referred to 75 years or 30 years yesterday. What was the correct number of years you had in mind at that time?

A. The year 1927 was the last. After that my recollection is that the proposition contemplated the price staying there.

Q. They were to make the price of gas on December 31, 1907, 90 cents; 1912, 85 cents; 1917, 80 cents; 1927, 75 cents?

A. That was the net to the company, yes. They could juggle it around as they pleased with regard to the city and the consumers.

Q. And this I understand from you was an offer which they made to the Councils in Philadelphia, agreeing to pay $25,000,000 for that, having a capitalization of sixteen millions themselves, and which you figured out would bring them at the end of that period an income over and above about $8,000,000, is that right?

Mr. Mathewson: A sinking fund?
Mr. Burr: A sinking fund.

6886 A. These prices I named to you were the prices of the ordinance, not in connection whatever with regard to the amount of capitalization. I was simply taking Mr. Marks' statement as to that and simply rebutting his statement that it must be a very profitable contract if they were able to pay off any such vast sum of money. I didn't say it would be the actual expenditure, although I did mention if there were such extra expenditures the sinking fund arrangement that I developed on Mr. Marks' statement would leave a margin of some seven million or eight million after paying off those forty-one millions.

Q. As I understood, an offer was made by the U. G. I. to the Council in Philadelphia whereby they offered to enter into a lease with the city authorities and pay $25,000,000 for that lease; is not that true?

A. Oh, it is approximately correct.

Q. And that lease or contract or agreement contemplated the reduction which you have stated?

A. No. You are confounding the two propositions. The ordinance which is now controlling the situation covers these reductions, and the revised proposition, as I recollect, was to commence future payments by the payment of $25,000,000.

Q. They wanted an extension of the present arrangement by which they were willing to pay $25,000,000?

A. Yes, in lieu of the other payments they would have to make otherwise, and commute it; pay it in advance.

Q. That was rejected?

A. Yes.

Q. And caused a great public upheaval, to your knowledge, in the City of Philadelphia?

A. Made quite a fuss.

Q. Do you know where the oil comes from that is used in Philadelphia?

A. No, I do not.

Q. Nor do you know where the oil comes from that is supplied to the Consolidated?

A. No.

6887 Q. Can you state what gas companies in the forty odd cities of the United States of over 100,000 population set aside a reserve or contingent fund such as the Consolidated has introduced into its books since the Boston gas hearing two years ago?

A. Can I tell you how many do it?

Q. Yes.

A. No, I don't think that many of them do it in that form. They cover it by construction.

Q. Do you know any five cities that do it?

A. No.

Q. Do you know any two that do it?

A. I might amend that answer. I don't know of any companies that do it just in this way, but quite a large number of companies are covered by a very definite system providing for depreciation, by the United Gas Improvement Company, they cover it in their general account, not for each individual company.

Q. How many cities over 100,000?

A. In that group?

Q. Yes.

A. Well, let us see. There is Philadelphia; Jersey City, I suppose it well up above 100,000; Kansas City, Omaha. I don't recollect. I cannot for the moment just recollect the number of instances and I would have to take out Jersey City because that is not now under the direct control of the U. G. I., and I don't know what the direct methods would be; simply interested in it through the public service corporation.

Q. Outside of the three controlled by the U. G. I., do you know of any other company?

A. I don't think of any at the moment.

Q. In Exhibit 380 you gave sales, Fall River, for year ending June 30, 1906, as 371,796,000 feet, did you not?

A. No.

Q. It is probably Exhibit 390 then, Doctor.

Mr. Mathewson: 321,119,000.

6888 Q. On page 17 of your copy of the return of that company, the water gas made is stated as 396,903,400, is it not, as the same appears upon page 17 of the return?

Mr. Mathewson: For what year?

Mr. Burr: I will ask that.

A. Yes.

Q. What is the year for which that return is made?

A. That was for the year ending June 30, 1906.

Q. Is the candle power given on page 119 as 20.8?

A. Yes, determined by the State inspector.

Q. Now in your copy of the report for Lowell, page 22, for 1905-6, is not the unaccounted-for oil there stated to be 29,613.88 gallons?

Mr. Mathewson: I do not know how this is cross-examination of anything that this witness testified to.

Mr. Burr: So that there may be no mistake as to the figures, while the witness is on the stand.

The Witness: I have not used any of these figures except sales, and these are makes. I have not used any of these figures.

Mr. Burr: All these matters are matters of computation and correlation of figures and different facts, and I want to call the witness' especial attention to these figures for the purpose of deductions we propose to make if we can.

Mr. Mathewson: I know, but there is nothing in these tables relating to that.

The Master: That is hardly the function of this cross-examination, is it, Mr. Burr?

6889 A. I am not conscious I touched on this, nor am I conscious I ever looked a- these figures before, and I would have to look at them, especially because of all this ringing which was done by the commissioners, and we simply copied it and I shall have to study it out and see just what is meant.

Mr. Mathewson: What does that rebut, Mr. Burr, that we put in yesterday.

Mr. Burr: I will leave that to the brief.

Mr. Mathewson: I am afraid you will have to. That is a prudent answer.

(The witness now proceeds to figure).

Mr. Mathewson: I think it is only fair, in view of the fact that the witness has not examined these figures, to call his attention——

Mr. Burr: If the Doctor finds any difficulty about that I will withdraw the question.

The Witness: I will have it in a minute. There are evidently a lot of adjustments that have been made here.

Mr. Mathewson: Naphtha as well as gas oil was used.

Mr. Burr: The witness is quite competent to understand the question.

Mr. Mathewson: Yes, he understands the question all right, no doubt.

The Witness: Now, what is the question.

The Stenographer (reading): Now in your copy of the report for Lowell, page 22, for 1905-6, is not the unaccounted-for oil there stated to be 29,613.88 gallons?

A. On the line "other oils" I have calculated that out and cannot make it agree with the report at all, and this is all ringed in with certain marks that I don't believe refers to any unaccounted-for oil;

it does not check at all with the figures. I do not believe
6890 that it is, from my investigation.

Q. On page 17 of the Lynn return for 1905-6, the water gas made is given as 206,197,000 feet and the coal gas 230,842,400 feet, is it not?

A. It is given with some marks crossing it out, and I don't recollect just what those marks indicated, whether it was a readjustment by the commissioners or not.

Q. And the coal gas?

A. The coal gas is shown at 230,842,400 feet and the water gas at 206,197,000, and then both have lines crossing them out.

Q. What is the total?

A. 437,039,400.

Q. You referred yesterday to Professor Bemis' statement with regard to the testimony given by Mr. Cowdry in Chicago, and you thought that he had misquoted Mr. Cowdry. I want to refer you to the testimony taken at that investigation; it may refresh your recollection?

A. My impression is that my testimony was more to the fact that he had partially quoted them.

Q. Do you not find on page 41 of the record entitled "Transcript of Proceedings at the Meeting of the Committee on Gas, Oil, Electric Light of the City Council of the City of Chicago held on December 28, 1905; Present; Aldermen Young, chairman; Marks, Smith, Potter, Ryansburg, O'Connell, Sitz, Monohan, Badnock, Raemer," that Mr. Cowdery states on that page (41) referring to repairs of manufacturing plant that the "ordinary repairs in a water gas works would be about two and one-half cents, on an average, whereas coal gas works would be nearer five cents."

A. Page 41?

Q. Yes.

A. I quoted from this little book. I read that in this paper which purports to be a transcript of the proceedings.

6891 Q. Now, refer to page 64 and do you not find he there stated "the repairs to mains and services will take in the average company, an average large company, any way about three cents a thousand."

A. I read from this document handed me, what Mr. Cowdery said: "I don't know that I care to and I don't believe I am called upon particularly to go into all these details, but I have no hesitation in answering that the repairs of mains and services will take in the average company—average large company, about three cents a thousand."

Q. Referring to the pamphlet which you just a moment ago had in your hand, which is the pamphlet that has been referred to many times during the progress of this trial, do you not find on pages 45, 46, 47, 48 and 49 of that pamphlet a letter from you to the Chairman of the Gas Committee of the City Counsel of Chicago, dated January 12, 1906, in which on page 47 you reached by various methods of computation 94.98 cents as a fair basis in Chicago on the manufacture and distribution per thousand cubic feet of gas, and in closing you state, do you not, "finally from the facts given to me in the hearing and now briefly recapitulated I do not hesitate to say that the offer of the Chicago Gas Company to sell gas at a value of 90 cents per thousand is a fair one and should be accepted by the City."

A. Quite correct.

Q. Isn't it a matter to your knowledge within a few days afterward that that company voluntarily reduced its price to 85 cents?

A. Sometime after. I don't recollect how long. I should imagine it was a month or two; not a few days after. It doesn't change my opinion though.

6892 Q. Are you aware that the company has just raised their quarterly dividend to 1½%, to the usual dividend when the price was one dollar?

A. No, I am not aware of that. I have seen in the papers they paid one dividend of that amount. I have no means of knowing that that is to be their rate.

Q. Now, referring to the testimony of Dr. Marks, you have used the chart prepared by him regarding mains and the cost of laying, which is City's Exhibit 50, in making computations of amounts for Cambridge, Fall River, Springfield, Worcester and Lowell, have you not?

A. Yes.

Q. This chart purports to give the cost per ton of 2,000 pounds in New York, does it not?

A. Yes.

Q. And did you observe this at the foot of it, reading "figures include 10% undistributed expense and 15% contractors' profits"?

A. It is some time since I made this table.

Mr. Mathewson: The rates are printed in the record in the form of a table and you may have that instead of the chart?

The Witness: I think I had the record and for a moment I cannot recollect whether that was supposed to include those items or not, but I think it was. I am not sure of that. I should expect to include some such items. Certainly the ten per cent.

Q. Well, you know that this chart was prepared, do you not, to show the prices of laying mains under the peculiar situations that exist in the streets of the City of New York?

A. No, I did not understand it was prepared with the idea of covering various conditions.

Q. Even the "cheap" cities you referred to yesterday.

A. As far as the pavement is concerned, yes.

6893 Q. Doesn't it equally appear "cost per ton of 2,000 pounds in New York"?

A. It is.

Q. You accepted this of course as a basis for the computation of the laying of mains in these other cities?

A. I accepted Mr. Marks in this computation as I accepted his figures in other cases, in rebutting his own testimony.

Q. In your figures you include the 15% though for contractor's profits in your prices?

A. I think I did, yes. I should have to look that up again with my original figures. I think that was prepared some months ago.

Q. Have you noticed the "cost for excavating and filling, city proper, $2.50 per cubic yard," on the excavating line of the diagram, and the $5 per cubic yard for rock excavation?

A. No, I have not particularly noticed. As I say, I think I took my figures from the schedule which stated as to simply laying under the uniform macadam conditions.

Q. This chart was prepared for the purpose of attracting the eye to the similar schedule that was prepared, so that you might readily understand what you mean to show. That is the object of the chart, you understood that, didn't you?

A. It might be the object, I don't see much readily by the chart.

Q. Have you not as a matter of fact allowed a New York contractor's profit of $2.50 per cubic yard for excavations for these Massachusetts towns with which you have instituted comparison?

A. I took Mr. Marks' figures and stated so distinctly. The simple conditions that he stated, and took one of Mr. Marks' low costs.

Q. Then you did not understand that a user of this chart is expected, except for the City of New York, to make proper modifications of different places and that on the chart will be found
6894 every means for so doing?

A. No, I did not understand that.

Q. Is it not a fact that Metropolitan conditions of pipe laying do not obtain in the Massachusetts towns of 100,000 inhabitants, or are the conditions the same as they are in New York?

A. Certainly not.

Q. The conditions of laying mains and the cost of laying mains is the same in these small towns as they are in New York?

A. Certainly not; they are not the same.

Q. So therefore if you base the cost, if he has given here in this chart and in his schedule the cost which according to him would be necessary to be paid for laying mains in the streets of the City of New York and you have used the same figures for the laying of mains in these cities the deduction would be erroneous—there would be some error in it?

A. Yes.

Q. And therefore it would follow that your cost of mains is extravagant—there would be some error in it?

A. Yes.

Q. And therefore it would follow that your cost of mains is extravagant according to Exhibits 384 to 389, since you have not rightly used the data on City's Exhibit 50?

A. I have not acknowledged I have not rightly used it, until I look it up again, and I object to "extravagant." I don't say it would make an extravagant difference on the particular figures I took from Mr. Marks. My recollection is I studied them out at the time and made up my mind that they excluded most of the special conditions.

Q. Have you knowledge of the method by which the Massachusetts companies charge off capital expenditures?

A. The method?

6895 Q. Yes.

A. You mean by that, they have some uniform method and do I know it?

Q. Or do you know the method or methods adopted by them?

A. There is no special method adopted by them so far as I know of. They have their own ways of doing it and there is nothing specified as far as I know by the Commission. They charge up several amounts to depreciation in cases of amounts that already appear in the so-called gas manufacturing account and make special charges of that kind which tend to increase the usual accounts.

Q. Are you willing to swear that the actual cost of main increases has not been entered upon the books of all these companies and depreciation for obsolescence and inadequacy written off?

A. I am inclined to think the charges are all made against the proper account. I cannot imagine they are doing otherwise, and that they have been reduced by credit against those accounts. That would be the conclusion from the study of the figures.

Q. You understand that Dr. Marks divided his working capital roughly into raised capital, stockholders, 13 cents per thousand, borrowed capital on notes 35, total 48 cents per thousand?

Mr. Mathewson: You mean for the seven or four Massachusetts companies?

Mr. Burr: For the Massachusetts companies.

A. I know he makes a distinction between the amounts that he says are borrowed from the stockholders and the amount raised by notes. Of course, the distinction is not a correct one.

Q. Are not notes payable regarded generally and everywhere in the United States as floating debts?

A. There is a very great deal of very loose nomenclature
6896 used in America in regard to such matters. In the Massachusetts gas companies it does not mean anything of the kind, and the Gas Commissioners themselves regard that title as fixed capital temporarily as a rule in the form of notes payable, afterwards to be taken up by the substitutions therefore and stock sold to stockholders or other forms of securities.

Q. You would not say that the mere fact that the Massachusetts Commission treats notes payable as bonds makes them bonds or fixed capital, would you?

A. The mere fact that the Massachusetts Commission considered it fixed capital is sufficient for me for my purposes. I do not care whether you call it notes payable, accounts payable, or anything you please, the fact is it is money borrowed and invested in the plant, and so considered and considered by those who have charge of the accounts, and those who control the gas companies, the Commissioners, and they treated it so, and I have a statement to that effect from the chairman of the Commission, if you wish it. In fact it appears in that letter handed in this morning that that is the way of treating the subject.

Q. Do you know as a matter of fact, Dr. Humphreys, the cash cost of gas in Philadelphia?

A. No.

Q. Referring to that exhibit 384, you gave the company's assets, structural assets of works, as follows: From report June 30th, 1906, to the Massachusetts Commissioners; Cambridge, 1,698,040, is that correct?

A. Yes.

Q. Fall River, 1,038,162?

A. Yes.

Q. Lowell, 1,554,464?

A. Yes.

Q. Worcester, 1,338,305?

A. Yes.

Q. Total, 5,628,971?

A. I don't know about totaling it. It was not totaled by me.

6897 Q. Kindly total it and see what the total is?

A. You selected for comparison Fall River, Worcester and Lowell, was it?

Q. Yes.

A. 5,628,971.

Q. Now, from the reports you have produced here will you check their daily capacity for me?

A. Daily capacity?

Q. Yes, Cambridge, or whatever it is—the first one you have there.

Mr. Mathewson: The daily capacities were all gone over previously, and it appears in the record for daily capacity; at least what was stated in the report of daily capacities by Professor Bemis, or Dr. Marks. I do not see the necessity of doing it again.

Mr. Burr: This is 1906 that Dr. Humphreys has brought in.

Q. From their reports will you check their daily capacity? Cambridge 4,000,000 capacity, is it not?

A. I do not know, sir, I will have to look it up.

Q. Look at page 17.

A. Cambridge is stated on page 17 to be 4,000,000—1,000,000 coal gas and 3,000,000 water gas.

Q. Fall River 2,500,000, same page?

A. Fall River is stated to be 2,500,000.

Q. Look at page 17, Lowell report, and see if you do not find the daily capacity stated there, 4,400,000?

A. 4,400,000.

Q. Look on the same page 17, at the report on Worcester, and see if you do not find the daily capacity stated there to be 4,200,000?

A. 4,200,000; would you like to have it added?

Q. Yes, kindly do so and see if the total is not 15,100,000.

A. It is 15,100,000, as near as I can make it.

Q. The annual 200 times daily capacity is 3,020,000,000.

6898 A. Multiplying 15,100,000 by 200, as your computer, I find it to be 3,020,000,000.

Q. On the basis of those reports made will not this give $1.86

per annual thousand capacity, provided that those works are operated as is the Consolidated Gas Company with a capacity factor of 200 to 204?

Mr. MATHEWSON: Is not that what Dr. Marks testified, that those figures brought out 1.86? It is the same thing and that is what we are rebutting, among other things. It does not prove anything to go back and say that the original figures were different, on a different basis, representing a different thing.

A. That calculation gives it as you say, $1.86.

Q. Of course, "adjusted book assets," in that item you exclude notes payable from your floating debt?

A. Certainly.

Q. And therefore on that item you and he do not agree? I understand that to be the situation.

A. He does not agree with me in that, and he does not agree with the commissioners in that.

Q. Assuming that to be so, does not this result which you find of $1.86 agree within reasonable practical limits with the $1.78 per annual thousand of capacity, deduced by Dr. Marks, for those four same companies for the fiscal year of 1905, as he has testified?

A. I should be as willing to take one figure as another in my calculations that I had to make.

Q. Is not the capacity factor at which the works of the Consolidated Gas Company were operated in 1905, about 204, or a little greater than the 200 which Mr. Marks has assumed?

A. I do not recall exactly, it is about that.

6899 Q. I will ask you this; don't you consider the New York field here in this metropolis of much denser and vastly larger capacity in its demands for gas, than these Massachusetts towns?

A. Yes.

Q. You said that where under the British Law gas companies invited parliamentary investigation, in that event it would be a question for the Board of Trade to say whether that charge should be made against consumers of gas, or fixed in some other manner.

A. I did not say anything of the sort.

Q. Will you kindly tell me what you did say?

A. In that case there is a question, although it is usually charged in the same way as the rest, and certain questions are carried to the Board of Trade in that regard, and they generally follow the advice of their chief auditor or something of that kind.

Q. The language you have used is this:

"Where a company has involved itself in parliamentary investigation, then it is left to the Board of Trade."

Is that true?

A. That may be the way I stated it, but I stated it more correctly now, and fuller than I did then. It is not absolutely referred to the Board of Trade, unless the question comes up. It comes up, as I recall, through the auditor, the Board of Trade's auditor—having an opportunity to go through the account and object to such items, and in such case, as I recall it, it has to be considered by the Board of Trade if the amount is rejected.

Q. Therefore, I understand that under the British procedure, if a company fought against the law fixing the regulations and prices for it, the question would have to be solved by the Board of Trade.

A. No, sir; not at all. You entirely misunderstood me.

6900 In all such cases as that—the ones I referred to, are where they are attacked; in the cases where they have to defend themselves, that is not the question at all; it goes right into the operating expenses, the same as coal itself.

Q. You have stated a number of companies that you act for in an advisory capacity, and you have particular connection with a certain number of companies that you have stated this morning. In addition to that you issue to those fifty clients that you have a confidential communication, so to speak.

A. That is right, sir.

Q. In which you advise them as to the cost of gas as to how to produce the best results; is that right?

A. Yes.

Q. That is, you advise the gas companies how to get the most money out of their working plants?

A. No, only in regard to water gas works, as I stated. I think we advise them as to the plants that we have put in for them and in that connection are given an opportunity to analyze their accounts and make adjustments between coal gas and water gas companies and ourselves, properly, so as to get the cost of the water gas on a comparable basis for the several companies. That is a confidential communication. There is a copy of it, I think that is the last issue. That is sent to every one of these companies or corporations, and I think that number is about fifty.

Q. Your business is, as I understand it, in issuing that confidential communication to advise them how to put money in their pockets?

A. Certainly.

Q. And to produce the best results?

A. Certainly.

6901 Mr. Mathewson: You would not have much sale for one advising them how to lose money, would you?

Mr. Burr: The Greek chorus will please subside while I am cross-examining.

A. I would like to add to that, if you would like to have me do it——

Q. (Interrupting.) No. You testified as to your connection with the U. G. I. Company and you have testified relative to Mr. Bemis' testimony on the differences in candle power between Mr. Walton Clark's home, and the Philadelphia Gas Works, which you said Mr. Clark absolutely denied?

A. Absolutely, in the most positive terms.

Q. Many more miles away. Do you know, or have you read of the paper before the American Gas Institute, October 19, 1906, by W. H. Gartley, engineer of works of the Philadelphia Gas Works?

A. In a general way.

Q. It is printed in the "Progressive Age," for December, 1906, on page 755, giving the experience of that company, he shows at the bottom of the page in a curve the loss of candle power between the works and the City testing stations, does he not?

A. My recollection is that he did do something of that kind.

Q. Do you find there at the bottom of page 755 those curves of loss in candle power by reduction in temperature, and if so, will you look especially at curve C, Philadelphia holder, and distributing mains, at testing stations.

A. Yes.

Q. Now, this curve shows, does it not, that starting with 70 degrees temperature at the works or holder, a drop to 60 degrees reduces the candle power to about 2½ per cent.

6902 A. Give me a little time to look at the paper. It is a very complicated one and very hard to understand. I do not think it is per cents.

Q. Look at the bottom of that diagram and see if you do not find the words "per cent. of candle power loss"?

A. Yes, that is right. This table shows the curve C, a loss of about 15 per cent. at 35 degrees.

Q. A drop to 60 degrees reduces the candle power about 2½ per cent., does it not?

A. Yes.

Q. And a drop to 50 degrees reduces it about 5½ per cent.?

A. About 5 per cent, I think.

Q. A drop to 45 degrees reduces it about 8 per cent.?

A. 8 per cent. is right.

Q. A drop of 40 degrees reduces it about 8 per cent.?

A. 8 per cent. is right.

Q. A drop to 35 degrees reduces it about 15 per cent.?

A. Yes.

Q. All those droppings, so to speak, of percentages, are shown in the tables I have referred to?

A. Yes, shown in the curve.

Q. I call your attention to Mr. Gartley's further statement, which appears on page 746, as follows:

"We are required to maintain 22 candle power at the testing station. Allowing ½ to ¾ candle power extra for any further reduction in dew-point between the testing station and the consumer, we are convinced by hydrometer and photometer observations in other parts of the city, that we have delivered 22 candle power to the remotest points. With this method in use we find that no importance need be attached to the loss of candle power from friction in the mains and other vague causes.

A. Yes.

6903 Q. Do you agree with that statement, or have you any reason to disbelieve it?

A. No, I do not agree with Mr. Gartley as to the effect of friction in mains.

Q. You have no reason to disbelieve it as to the effect in candle power?

A. No, I imagine he is correct; no doubt he thought he was correct when he wrote that.

Q. I will also call your attention to his statement appearing at page 757:

"I have intended in this paper to lay down the general principles of a method for securing not only uniform candle power to the same consumer from hour to hour, but a method that will give gas varying only slightly in candle power over the entire distribution system. In order to show the uniform candle power delivered to the consumer by the application of this method in Philadelphia, I give the average daily candle power during a period of low dew-points, that is from March 16 to April 1. Each day shows the average of the twenty-four hourly observations by the candle power readers at the testing stations. The candle power desired to be carried was 22.75."

Then follows the candle power in three columns, showing the candle power on the days stated in the column, under columns headed A and under the one headed B. Is not that true?

A. Yes.

Mr. **Burr**: I ask to have these columns read as if they were put to the witness and answered.

6904 The columns referred to are as follows:

March 16	22.69	22.96
“ 17	22.52	22.63
“ 18	22.44	22.56
“ 19	22.54	22.83
“ 20	22.90	22.86
“ 21	22.67	22.73
“ 22	22.74	22.71
“ 23	22.60	22.43
“ 24	22.78	22.49
“ 25	23.04	22.79
“ 26	22.75	22.76
“ 27	22.82	22.63
“ 28	22.52	22.35
“ 29	22.88	22.35
“ 30	22.92	22.48
“ 31	22.66	22.44

The **Witness**: Yes.

Q. On page 755 you find a statement made at the head of the chart A, B, and C, from mixed gas, six parts water gas, Texas oil distillate, to one part coal gas; is that so?

A. This is from a mixture of six parts water gas, and one part coal gas?

Q. Yes.

A. Yes, I find that there.

Q. Do you agree with those views expressed by Mr. Gartley?

Mr. **Mathewson**: We do not know what they are.

Q. Have you any doubt as to the accuracy of his statements as he has given them here?

A. I would not express any opinion on that paper without very careful study. I endeavored to give it that study, and did not find time. It is a new proposition which Mr. Gartley has brought forth, and which I presume many engineers would disagree with him about. Still, I have the highest respect for Mr. Gartley, and
6905 I would hesitate a long time before I doubted anything that he stated. Undoubtedly he believes every word he has stated.

Mr. **Burr**: I want to admit that Mr. Bemis was mistaken, when he used the difference in candle power referred to in works; he referred to the testing stations.

The **Master**: It was on that point that this cross-examination has been going on.

Mr. **Burr**: That is all I have to ask.

The **Witness**: Of course, I could not say as to that, I did not ask the question that way.

Cross-examination by Mr. Kirby (Continued):

Q. Of course, when you were at the U. G. I., you were familiar with the letter head of that company?

A. Yes.

Q. I show you a letter addressed to H. H. Edgerton, dated Philadelphia, February 16, 1888, and I ask you if that is upon the letter head of the U. G. I. Company?

A. That is right; I remember it very well.

Q. Do I read this letter head correctly:

United Gas Improvement Company,
Office 333 Walnut Street,
Philadelphia.

George Filler, President.
W. W. Gibbs, Vice-President.
A. O. Granger, General Manager.
H. H. Edgerton, Chemist and Engineer.
Samuel T. Bodine, Secretary and Treasurer.
Edward C. Lee, Asst. Secretary and Treasurer.
Alex. C. Humphreys, General Superintendent.
6906 Joseph H. Collins, Jr., Asst. General Superintendent."

That is correct, isn't it?

A. Yes, that is correct; that was the form for quite a time.

Mr. **Mathewson**: This appears to be a letter addressed by Joseph Collins, Jr., Assistant General Superintendent, to Mr. Edgerton, does it not?

Mr. **Kirby**: It does.

Mr. **Mathewson**: Of course we can introduce things from the officers.

Mr. **Kirby**: I am not introducing the letter. I do not consider that I have any right so to do, or I certainly would have offered it. My inquiry is directed as to the officers of the company which we were speaking of yesterday.

Q. Referring you not to Complainant's Exhibit for identification

No. 377, and especially in reference to the method of testing candle power in use at Danbury, I call your attention to a clause at the bottom of the page headed: "Results from the use of Danbury process of upright retorts," and I ask you if I read the same correctly.

"The candle power is determined by the use of a burner giving a fourteen candle flame; standardized by a burner giving a 22 to 25 candle flame, the rating of the gas would be raised to about 44 candles; or 8.8 candles per cubic foot instead of 7.5 candles?"

A. Yes, that seems to be read correctly.

Q. Now, I read to you a statement which happens to appear in a book entitled: "Gas works, their construction and arrangement, &c., by Samuel Hughes, C. E.," on page 341 thereof:

6907 "Argands are generally made to consume five feet of gas per hour, and they only give the full amount of light the gas is capable of evolving, when burning the maximum quantity for which each burner is made. Moreover the light diminishes materially in proportion as the quantity of gas is reduced; as shown in the following table of the light evolved from an argand under different consumption of gas."

Then follows the table referred to, and it goes on:

"It follows, therefore, that in order to obtain the maximum amount of light from argand burners, the full quantity for which they are made should be consumed by them; and whenever it may be desirable to introduce economy, it is better to have a limited number of burners of the larger dimensions, some of which may be extinguished when desired, rather than have a number which are checked to only a portion of their full consumption."

I read that correctly, do I not?

A. Yes.

I read further:

"The light from a given quantity of gas when consumed in the batwing or fishtail does not vary in the same degree when the flame is reduced, as the argand. Thus, if we suppose either of these burners to yield the light of ten candles when consuming five feet per hour, on reducing -he supply of gas to 2½ feet the light of 2.5 candles will be evolved."

I read that correctly, do I not?

A. Yes.

Q. Do you agree with that proposition as laid down there?

A. The whole thing?

6908 Q. The latter part which I read?

A. Oh, no, not as a general proposition, at all; there are a very great many loose statements made in these text books, as if there were some general law that applied to all qualities of gas, which is not so at all. If you are going to establish a law of that kind you will have to establish it for each particular quality of gas, to commence with.

Q. As a general proposition, taking the same gas, we will assume that we are using a batwing or fishtail, as called for in the last paragraph of the statement:

"Thus, if we suppose either of these burners to yield the light of ten candles when consuming five feet per hour, on reducing the supply of gas to 2½ feet the light of 2.5 candles will be evolved.

That is correct, is it not, that while it may not be a reduction of as much as 2.5 candles, or may be more, it does not follow in a batwing or fishtail burner in the same proportion as it does in an argand?

A. Probably not, but as I say, these cases have to be considered in connection wi-h the gas you are manipulating and burning and testing. You cannot set down any law as to what the increase of light will be due to change of burners.

Q. Therefore one would have to be familiar with any particular gas to know how the candle power would be affected by using different size burners?

A. Certainly; you would have to experiment with the gas. There is no general law.

Q. And that, of course, would be true of Danbury gas the same as any other gas?

A. Of course.

Q. I call your attention further to a part of complainant's 6909 exhibit 377 for identification, being the part of the statement headed "The Danbury process of gas making" and under the subheadings "Photometric Methods used at Danbury."

"Photometric Methods used at Danbury, in reporting candle power. This is an important point, because it is a well known fact that poor gases can be rated a- higher and rich gases at a lower value, than is practically obtained by the consumer, even with the best and most suitable burners in each case. The whole matter rests on the fact that the same gas can obtain different ratings per five cubic feet, according to the greater or less candle power of the flame used to obtain the rating; for instance, if a three-foot rate of consumption is obtained and tested with a suitable flat-flame, and a five-foot rating of the gas given thereby, it will give a decidedly inferior rating to the gas than if burned in a suitable burner at the rate of five-feet. For the above reasons it was determined to standardize the Danbury gas by a standard candle power flame, and the power of the flame was put at fourteen candles, because at that time, 1879, it was the actual five-foot rating of the gas in use (coal cas). The Danbury gas can be actually burned, and is so used by many customers, in flames of thirty to thirty-three candles. There was no obligation to standardize by so small a flame as fourteen candles, save the facility it gave for comparison with the former gas, coal gas. Standardized with a twenty to twenty-five candle flame the pro rata candle power of Danbury gas is raised from fourteen candles for two c. f. rate to 17.6 candles for a two 6910 c. f. rate; and this is the actual comparative value of the gas and——"

And here follows a line which has been chopped off and we have only the top of some of the letters. But I think that reads:

"When compared with"—then we cannot read that—"ordinary methods."

A. Yes, I got that much, but I could not get anything out of the centre of it.

Q. That is a correct quotation from this exhibit, is it not?

A. Yes, sir, I think it is.

Q. Now, referring to the same exhibit for identification, and with especial reference to the oil proposition in that, the first page, I read:

"DANBURY, CONN.
November 22nd, 1905.

W. H. Bradley, Esqr., Chief Eng'r Consolidated Gas Co.
MY DEAR SIR:

The apparently simple questions left for me to answer by Mr. Wood——"

Q. Mr. Wood being in this instance, I take it, one of the engineers of the Consolidated Gas Company and should have been Woods, I think?

A. Yes, I think so.

Q. I will continue:

"relative to the results of making oil gas in vertical retorts according to my plans, has led me into a perfect wilderness of figures and retorts, extending over a period of fifteen years. If Mr. Wood had struck in here about a week after starting; that is to say, about the middle of April, 1890, I could have told him all about it right away without any ifs, ands or buts; *but* when it comes to running 6911 one machine for fifteen years, there's lots of things turn up. There's shortage of naphtha and oil to account for; there's cutting up of gas meters, big ones and little ones; there's leakage of gas to charge up against the machine; the ups and downs of the thermometer, the hoppings of the barometer, the height above the sea——"

The MASTER: Mr. Kirby, this exhibit for identification is all going to be printed, it does not seem necessary to me to spread it on the record again.

Mr. KIRBY: Dr. Humphreys stated yesterday that I asked him in regard to candle power and he did not remember the method used at Danbury, and I want to call his attention to a particular point. I am coming to it right here,

"and the depths of human cussedness and neglect; now as the only way out of the maze, I shall, as you will see, charge them all up against the machines. There seems to be no other way out. I, therefore, send you a table of performances since the beginning. The last six years running has been on gas oil, with an occasional tank of Texas oil; the first nine years on naphtha. A salient feature is, that the machine is carbonizing more oil per hour under fire, and making more gas per hour than it did in the start, also that it has performed a little better on gas oil than on naphtha, but that is possibly due to improved handling. Under the head of naphtha gas made is included the gas made in purging out and the beginning and end of runs, the analysis will show more correctly the proportion of oil and water gas."

6912 Is that correct?

A. Yes, sir, that is correct?

Q. That appears in the exhibit?

A. Yes.

Mr. MATHEWSON: All that appears, and is going to be printed.

Q. I ask if under the heading of "The Danbury process of gas-making," the following appears:

"In fact the operation as a process was being continually made over, to suit the different oils, and as shown by the results, that a fifteen-year-old machine is doing superior work with an inferior and cheaper quality of oil than at the outset. For instance, the first year's running on naphtha took a gallon of material for 95.69 cubic feet of average, 34.38 candle gas; while the year ending May 31, 1905, required a gallon of gas oil (gone from stack) for 106.86 cubic feet of average 34.8 gas. It may as well be stated at this point how the photometry of this gas has been determined and entered in the account."

Thereafter follows the quotation in regard to photometry that I read.

A. Quite correct, sir.

Q. You also made certain comparisons with New York and Danbury, and I call your attention to that part of the communication headed: "Results from the use of the Danbury process" from the setting of nine upright retorts, being schedule of such results for various years. I take it that the total number of hours in a year is 8,760, is it not?

A. I think so.

Q. I have here the year 1890, under "Hours Run," total 2,969.7 hours.

A. That seems to be the statement, yes.

Q. 1891, 2,352.

A. Yes, those were complete years, two half years in each case; that is right.

6913 Q. 1892, 2,962.8?

A. Right.

Q. 1893-4.

A. It is 1893-4; it is for the two years in each case.

Q. But for twelve months?

A. 2,301.2.

Q. 1894-5?

A. 2,824.6.

Q. 1895-6?

A. 2,909.7.

Q. 1896-7?

A. 2,533.9.

Q. 1897-8?

A. 2,426.6.

Q. 1898-9?

A. 2,279.7.
Q. 1889-90?
A. 2,581.1.
Q. 1900-1?
A. 2,635.4.
Q. 1901-2?
A. 2,961.5.
Q. 1902-3?
A. 3,098.7.
Q. 1903-4?
A. 3,351.8.
Q. 1904-5, ending June 1?
A. 3,501; those are right.

Mr. MATHEWSON: Mr. Master, it will take just a moment, but you will recollect that during that summer, during the hot weather, quite a number of papers were put in signed by Oakey Hall, Sweeney and others, and the question was raised as to whether the signatures had been identified; they were considered sufficiently so for admission. Mr. Clark Bell, who drew many of the papers, was then out of town and be could not get him. Now, counsel for the other side have consented that I call Mr. Bell for a moment and have him testify as to the signatures.

Mr. BURR: I have consented to allow Mr. Bell to be called now, because he is an old gentleman and I am informed that Mr. Mathewson will only take a little time with the redirect-examination of Dr. Humphreys.

6914 (In order not to break the sequence of Dr. Humphreys' examination, the testimony of Mr. Bell, although taken at this point, is printed at another part of the record, after the close of the examination of Dr. Humphreys).

(After Mr. Bell's testimony a recess was taken to 2.30 o'clock P. M.)

After Recess.

Redirect-examination by Mr. MATHEWSON:

Q. You say that you became connected with the U. G. I. Company of Philadelphia in 1885, Doctor?
A. Yes.
Q. How long had Mr. Edgerton then been connected with the company?
A. About three years, I think.
Q. And what were you employed to do?
A. I was employed specifically to organize the engineering and operating departments.
Q. Did Mr. Edgerton have anything to do with those after you came there?
A. Not that I know of, except in the case of Pensacola, where we endeavored to use his services in a definite direction.
Q. It has been suggested that he was paid a royalty during the

time, until his contract expired, that is until 1891, and some salary. Is it your information that he did receive some compensation?

A. Yes. He no doubt received some compensation for the trial of his apparatus.

Q. While the U. G. I. Company were experimenting to see if the process proved good?

A. They had a number of different processes at that time, including the Lowe, the Edgerton, the Hamlin-Johnson, and I think the Pierson, and the question when I went into the employ of the company was what process would be finally adopted, and that was one of the problems put up to me to report upon, which I did report upon.

6915 Q. Were any of the Edgerton processes introduced or constructed or established by the U. G. I. Company after the results of the Pensacola experiments in relation to that process were known?

A. They were not. There never were any of the Edgerton processes put into use by the U. G. I. Company in their plants after the results at Pensacola were known.

Q. You said yesterday that if Mr. Edgerton had made suggestions as to laboratory work, you would have been inclined to accept them. Did you intend to make a distinction there?

A. I did. I consider Mr. Edgerton a very skillful man in the laboratory, but do not consider that he is a practical man.

Q. You were asked yesterday if you did not know that payment for the Welsbach process was made on Mr. Edgerton's order, or upon his recommendation. What is the fact in that regard?

A. The fact is, as I stated yesterday, I have always supposed it was made upon a very exhaustive investigation that was made under my direction, and that while my report was not finished it was upon such information as I was able to give them from my investigation that they decided to enter into this proposition, and that understanding I have confirmed by a communication with Mr. Bodine, who is the man who made the payment.

Q. The main offices of -he U. G. I. have always been in Philadelphia, have they not, since you became connected with the company?

A. They have.

Q. Reference was made yesterday to a resolution or assumed resolution of the Philadelphia Council approving the Edgerton process and recommending it for Philadelphia. Did you ever hear of any such resolution before?

A. No, I have not.

6916 Q. Did the Council of Philadelphia have anything to do with the management of the Philadelphia Gas Works?

A. I cannot see what they had to do with the gas works. The gas works at that time were in the hands of the notorious gas trust, and they had charge of the works as trustees for the city.

Q. You refer to the Philadelphia gas trust?

A. The Philadelphia gas trust. It was a political municipal body.

Q. It was asked yesterday whether you could not get more candle power from a five-foot burner than from a two-foot burner, in testing the candle power of this oil, all in connection with the candle power of 32.95 as shown in Mr. Edgerton's letter to Mr. Bradley. What is the fact in that regard, or have you anything you wish to say on the subject?

A. The facts are that as to the highest candle power to be developed from any gas by the selection of a burner depends upon the richness of that gas; if the gas is very, very rich, running up to 50 or 60 candle power, or even 40, you can get higher candle power by using a burner of less than five feet consumption per hour.

Q. What was the character or condition of the photometers that you found in use at the U. G. I. Company's office when you came in, in 1885, do you remember?

A. Very distinctly. Not at the office, but at the several works. I remember that in a number of cases the photometers were in such condition that no reliable result could be obtained from them, especially I remember that the Goodwin candle balances—I remember using the expression in describing them as I went back to the office that they would not weigh sugar correctly, the discs were generally dirty, and frequently the apparatus was out of alignment.

6917 Q. Have your views been modified in any way as to the impracticability of keeping the pressure between one inch and 2½ inches at one time at all points in New York City by any evidence that has been presented?

A. Not at all.

Q. You have been asked whether you had testified heretofore in various places. At whose request or invitation did you testify in Chicago?

A. The invitation of the city, as represented by the chairman of the committee on gas or oil or whatever it was—you have the title in the little blue book. The chairman of that committee, Mr. Young, I think it was, communicated with me. Gas, Oil and Electric Light is the name of the committee.

Q. At whose invitation did you testify before the Parliamentary Committee? At that of the gas companies or others?

A. No, at the invitation of the chairman of the committee.

Q. Who is that, do you remember?

A. I think his name was Lord Belfort, or Belport; I was also invited by a gentleman who is now known as Lord William Ramsey and also by Mr. Haldane, a brother of the present Minister of War.

Q. Referring to your Holyoke testimony, did you give any testimony there that was opposed to your present recommendation of the allowance to the consolidated gas company of an expenditure of 10.89 cents?

A. Not at all, in my opinion.

Q. Plus reserve fund and final renewal fund?

A. No.

Q. You were asked some questions in reference to the Buffalo reports. Will you state the situation at Buffalo, and something further in reference to why that report is in that particular form?

6918 A. When I took charge in Buffalo, the report form being used was in the form stated in the evidence this morning, and it has been simply allowed to go along in that way without change, in spite of the fact that I do not consider it the best form. We have introduced just as little change in Buffalo as possible, even in the matter of printing blanks, as we are on the edge of default on our bonds all the time, due to the tremendous competition with 30 cent natural gas; in fact that is what I was employed by the owners of the company for; to save them from default. It does not alter the facts at all as to the ultimate knowledge and sense.

Q. Nor as to your opinion regarding the proper form to be used?

A. Not the slightest.

Q. Of course, the figures you gave are distribution figures, exclusive of taxes and general management and others?

A. Yes.

Q. In the Buffalo returns there are certain things included for distribution and certain things included for, I think the term is collection, then there is general and executive; more generally in the returns of companies all three of these are included under one heading of distribution, but at Buffalo they distinguish them.

Q. As to dividends on the Massachusetts companies respecting which you were asked, of course, the dividends apply as you understand them, only to the stock issued, the term dividends?

A. That is my recollection.

Mr. Burr: I suggest that Mr. Mathewson ask the direct question and let the witness answer.

Mr. Mathewson: I will, but it will take a little more time. I supposed there was no particular object in doing so.

6919 Q. Does the statement of dividends paid or stock issued and interest paid on notes or bonds issued in any way conflict with the tables which you have put in here showing earnings upon actual assets?

A. Not at all.

Mr. Burr: That is a conclusion which the Master will arrive at, may be, and may be not.

Q. Referring to Complainant's Exhibit 380, are you able to state what the profit per cent. on the paper capital employed would be, and what the profit per thousand of sales would be, provided none of the special amounts, debits to profit and loss, had been included in the cost of gas, but only the ordinary inclusions?

A. I will figure it for you.

Q. No matter, I thought you had it figured.

A. Well, I have it here as 11.78 per cent. 34 cents per thousand. I was going to go over it, but it was just figured by me in pencil, it was not part of the original table.

Q. Your attention was called this morning to Haverhill, which has a paper capital of 63 cents per thousand feet, and your attention was called to the fact that the Commission endeavored in order to reduce the price of gas to 80 cents on the theory that a part of the plant had been built up from contribution by consumers of gas beyond the dividends paid. Is it your information that 80 cents prevails at Haverhill, or ever has prevailed?

A. No.

Q. What is the situation?

A. My recollection is they are charging $1.10 with ten cents discount.

Q. What is your information as to the proceedings there?

A. The matter as I say was carried into Court. I don't know definitely how it stands at present, but the impression in my 6920 mind is that the matter has not been pressed for a number of years by the commission.

Q. Do you remember when this came up first?

A. A great many years ago.

Q. And there has been no decision so far as you know?

A. There has been no decision so far as I know, and the matter is in abeyance entirely.

Q. Will you look at the 21st annual report of the Board of Gas and Electric Light Commissioners and see whether in that volume to which your attention has been called to other matters, Haverhill does not appear to be charging $1.10 now.

A. Yes, it is stated on page 106 that the price is $1.10, discount ten cents per thousand feet if paid on or before the 10th; average price $1.01, and the average price the year before, $1.01.

Mr. Burr: Well, he has stated that matter is in the court.

Mr. Mathewson: I would like to know how long ago the order or decision was made, if you have the report to which you referred.

Mr. Burr: I gave it to the stenographer.

Mr. Mathewson: I suppose it will be conceded that the order to which you refer in Haverhill appears in the report of the Massachusetts Gas Commissioners for the year ending Junue 30, 1900?

Mr. Burr: Yes.

Q. As to the cases in which a rate was fixed where the dividend was six per cent. or less, are these the cases, Dr. Humphreys, to which you referred yesterday and in which you said the Gas Commission of Massachusetts made a special statement in each case as to the reason why?

A. That is right.

6921 Q. And those all appear then in the record, do they not?

A. Yes.

Q. You were asked this morning as to some result taking $2.24 as the capital of the five companies specified in Complainant's Exhibit 378?

A. Yes.

Q. Was that capital paper capital or actual assets?

A. Paper capital.

Q. How do the assets compare with the paper capital, more or less?

A. More.

Q. Now, the Boston Consolidated Company was organized within the last year or so, and do you remember what their capitalization per thousand is, according to the statute, as allowed by the statute?

A. About five dollars, I think.

Q. Do you know the percentage of coal and water gas manufactured in Massachusetts?

A. I know it in certain cases, I do not know it in detail in every case.

Q. You were asked regarding the amount charged for renewals by the Consolidated Gas Company, and you stated it was the difference between the 10.89c. and the repairs. Did you wish to be understood as questioning the propriety of that charge for renewals, or anything of that sort?

A. Certainly not.

Q. And did I understand you in that connection to withdraw your opinion that reserve fund and final renewal should be allowed beyond?

A. Certainly not.

Q. Now, referring to Exhibit 390, showing the increase in profits and increase of assets in the various Massachusetts companies therein specified does it not appear that the increases cover a considerable period of years in many cases?

A. Yes.

Q. And do you find anything in that as to sales? I under-
6922 stood Mr. Burr to refer to the amount of sales?

A. No, there was not anything on the table as to sales.

Q. You were asked as to how many companies you know carrying a reserve fund in the same form in which the Consolidated is now carrying its, that is, as part of a ten cents per thousand charge, and you named only two or three. Do you understand that the carrying of a reserve fund in some form is uncommon by industrial companies?

A. By no means; it is the general practice of nearly all manufacturing concerns.

Q. In reference to the computation for mains in Massachusetts, you assumed Mr. Marks' table for mains laid under macadam, you said in computing for these large but outside cities. Some tears seem to have been shed over that. What is the explanation?

A. The explanation is that I endeavored to find a figure that could not be found fault with, on the other side, at least, so I took the cost that is shown by the curve that runs up to No. 18 at the top.

Q. And what is the endorsement on that curve?

A. Cost per foot for streets with macadam tops outside the city proper, laid and surface restored.

Q. So the curve you took does not appear to be the prices by Mr. Marks for laying mains inside the city proper, does it?

A. I did not understand it so, and the prices developed from it would not indicate it.

Q. You are referring now to what exhibit?

A. City's Exhibit No. 50. It says, page 1404-N, on top of it.

Q. You were asked this morning to make some computations of the same character that Dr. Marks had originally made for a previous year showing assets per thousand of capacity, assuming
6923 the capacity to be as it appears in the Massachusetts Report to the Gas Commissioners.

A. Yes, sir.

Q. And for example, Worcester was stated at a total of 4,200,000 cubic feet, is that correct?

A. That is right, yes, sir.

Q. Has Worcester the capacity to put out 4,200,000 cubic feet?

A. It has not.

Q. What is their capacity to-day?

A. Their balance capacity is three million. This simply refers to generating capacity, distinguishing between coal gas and water gas. It is not the capacity of the works as a whole, no matter what the returns may say.

Q. And from your knowledge as a gas engineer, of the way such reports are made, would you consider it safe to take a statement of that kind as the balance capacity of work in making any computation on which you are to depend?

A. Not unless it was stated specifically. These returns are interpreted in different ways by different men, and I have no doubt that some of those returns appear as the Worcester report appears, and others will appear as the balance capacity, but generally I think you will find the companies put in their generating capacity, especially if there is water gas and coal gas.

Q. And not their capacity in reference to other apparatus necessarily?

A. No, sir.

Q. Now, as a matter of fact, is it not necessary to have a reserve capacity as a rule beyond the real capacity of a plant, so that you cannot count on an output up to the full capacity as a working entity?

A. Certainly, you must have a reserve to take care of sudden fluctuations and accidents; where the capacity is reduced, retorts thrown out of order, a generator has to be repaired, purifier lid has to be fixed, or what not.

6924 Q. Would you think therefore that in such computation as Dr. Marks has made, taking the capacity as found stated in the report referred to would be a safe one?

A. I should say it would be valueless.

Recross-examination by Mr. **Burr**:

Q. What do you mean by the "city proper" in reference to the mains and the figures appearing on the map or chart by Dr. Marks?

A. It was not I that meant it. It was Dr. Marks, but I suppose what he meant was when you get beyond the city conditions and get out into the suburbs of a town. I thought he was taking a general condition.

Q. The city proper as a matter of fact in the City of New York would mean below 59th Street, wouldn't it?

A. I shouldn't think so any more there than anywhere else.

Q. So far as the laying of mains is concerned I mean?

A. No, sir. It is just the same above as below.

Q. I said so far as the laying of mains was concerned?

A. So far as the laying of mains is concerned it is the same. That is a crowded district up there and it is very difficult to lay mains in that district.

Q. You don't mean to say that the officers of your company have grown careless in making up their report because of this competition which you say exists in Buffalo?

A. Oh, no, not at all. We are very careful. We have got all the facts up there to a very fine point.

Q. By reason of the use of these blanks you refer to?

A. Yes, and the use of many other things. We watch those things carefully.

Q. I say they have not grown careless because of using those blanks?

A. No.

6925 Q. Now, as to what you mean by heavy and light oil; what do you understand is the difference?

A. That is rather a loose way of expressing myself. I was referring to say a 28 degree or even lower oil as compared with a 38 degree up to 40, somewhere around there.

Q. Any refined oil consists of hydrogen and carbon in combination, does it not?

A. Yes; somewhat.

Q. Is not all the carbon in a heavy gas oil in combination with hydrogen to form hydro-carbons?

A. We presume it is, although they speak of free carbon. The fact is though that in the heavy oils when you come to distill them you get compounds which are very prompt to let go their carbon and as you distill you get finally free carbon in the form of coke.

Q. A heavy gas oil has been distilled before you get it, hasn't it?

A. Yes.

Q. Isn't a heavy gas oil in which there is more carbon in combination with hydrogen than in a light oil?

A. More carbon?

Q. The carbon and hydrogen being found in any refined oil your per cent. between cannel coal and a-thracite coal, both of which contain a large percentage of uncombined carbon, has no connection with an oil in which oil the carbon has combined; that is, comparing two unlike materials?

A. It is not a good illustration. I simply used it because I wanted to meet the very inaccurate statement made by Mr. Edgerton that an oil was necessarily better for gas making because it had more carbon in it, which is not true.

Recross-examination by Mr. Kirby:

6926 Q. Don't you remember then when you were in New Orleans in 1885 and 1886 that a committee of not only the gas trustees of this Philadelphia company, of which you have spoken, but also of the Council of the City of Philadelphia, including the Mayor of the city, visited New Orleans for the purpose of examining the gas companies there and did make such examination?

A. I have no recollection. I didn't even remember I was in New Orleans in 1885. Evidently you have something which makes you think I was, otherwise I should say I was not. I might have been there.

Q. Weren't you there with a Mr. Adams?

A. I was in New Orleans with a Mr. Adams, yes, and it might have been 1885.

Q. Don't you remember at that time this joint committee from the Gas Trustees and from the Council, which included the Mayor of Philadelphia, visiting New Orleans and examining the works?

A. I have absolutely no recollection of it.

Q. You, of course, would not deny that such a committee did make such a visit for that purpose?

A. Certainly not.

Q. Are you prepared to state that over and above the amount which Mr. Edgerton obtained for royalties while he was in the employ of the U. G. I. that he did not receive a salary as chemist and engineer of that company, which at no time was less than $9,000 a year?

A. I am not prepared to state that it is not true, but I do not believe it, and I have very good reasons for thinking it was very considerably less than that. I know the arrangements made with Mr. Edgerton as I have stated were with regard to his patent and that they wanted to keep the patents under their control until they should determine what was the best patent to develop, and that determination rested upon my report.

6927 Q. Speaking of Mr. Edgerton's patents and processes, I call your attention to an illustration set down in the book issued by the United Gas Improvement Company, appearing on page 35, the year of which does not seem to be given, but on page 35 thereof, and I ask you if you will tell me what that picture illustrates—a man leaning over an apparatus with something in his hand?

A. That looks to me like a man making an ordinary test for sulphuretted hydrogen in a purifier box.

Q. Is that not a man making a test of the mixture in the water gas apparatus to ascertain whether or not there is an excess of carbon or of tar, proportioning the amount of oil?

A. Absolutely no, and I can prove it. There is a purifier house, with a recessed window to get light through without having any flame in the room, and there is the clamp coming down to clamp in underneath the water seal, and there is the edge of the water seal and there is the purifying box coming down with a square into the water seal, and you never saw one of those plants made in that form, the water gas plant. It is unquestionably the purifier box.

Q. Be that as it may, and failing to find herein an illustration which will show that which I now ask you of, is it not a fact that the method of ascertaining the proper proportion of oil in the water gas apparatus proper is not one which was devised by Mr. Edgerton and one which is in use today.

A. I am not sure whether it was devised by Mr. Edgerton, or not. I dare say it was. Mr. Edgerton is an extremely ingenious man about such things. It was used for many years in New York, and I have seen it employed there, and the method of allowing the gas to impinge upon a polished piece of steel like a trowel. 6928 Whether Mr. Edgerton was the inventor or suggestor of that scheme I don't know. As to its reliability I have very great question. It is just a good rough test by the color.

Q. And it is used today by the Consolidated Company, is it not?

A. I am not sure. I should not think so, but it might be.

I would like to put one thing on the record, if I may, Mr. Mathewson, and if I have the Master's permission. I have testified with regard to Mr. Edgerton in this matter, and myself, with very great reluctance. I have never done anything of the kind before, and it was only that I felt necessary on account of the claims he made that I so testified, and I am very sorry I had to do it.

The testimony of Clark Bell is inserted in the record at this point as per previous note .

CLARK BELL, being called as a witness on behalf of the complainant, being duly sworn, testified as follows:

Direct examination by Mr. MATHEWSON:

Q. Are you an attorney and counsellor-at-law?

A. Yes.

Q. Of the City of New York?

A. I am.

Q. How long have you been such?

A. I came here in 1864, since which I have resided here.

Q. And were you attorney for the Anthracite Gas Lighting & Heating Company?

A. Yes.

Q. And subsequently the Union Gas Light Company?

A. Yes.

Q. Have you examined certain original exhibits in this case?

A. They have been presented to me by Mr. Benedict this morning.

Mr. MATHEWSON: I have here a statement which has been 6929 prepared in order to shorten the testimony of Mr. Bell, and by consent I will read it and hand it in to be printed in the record.

(The statement alluded to by Mr. Mathewson is as follows):

The WITNESS: In summary I will say that I have examined the exhibits hereinafter mentioned, and make the following statement in reference thereto:

120. The affidavit of publication is in my handwriting. I know after refreshing my recollection from this paper, that the notice—a copy of which is contained in the exhibit—was published.

201. The signatures of Doolittle, Redfield and Osborn are genuine signatures. This paper was executed in my presence.

103. I recognize this paper. I examined it as counsel about the year 1871 as one of the warrants of title.

109. This instrument is in my handwriting. It was signed by William H. Appleton and by S. D. Law in my presence. The witnesses, George S. Appleton, and John Sickels, signed their names

in my presence. I know that at that time William H. Appleton was President of the Anthracite Gas Lighting & Heating Company of New York, and I know that S. D. Law was secretary of the Company and that the instrument was executed in pursuance of a Resolution of the Board of Directors of the said Company.

179. (Also being No. 180.) I recognize the signatures of Genet, Connolly, Fields, Tweed, Wilbour, Peter B. Sweeney, Hall and Hilton. This paper passed through my hands over thirty years ago. I also recognize the signature of James M. Sweeney.

195. This paper passed through my hands more than
6930 thirty years ago. It was prepared in my office, part of the
body of it is in the handwriting of my then law partner, Judge Edward I. Bartlett. It was executed about the time of its date.

200. I recognize the signatures of Redfield, Doolittle, Graham, Osborn and Porter. The signatures are genuine. The paper was executed in my presence and in part prepared by me. M. A. Potter, the Notary, was Managing Clerk in my office at the date of this instrument.

215. I recognize the signatures of W. Bayard Cutting, M. Bayard Brown, R. Fulton Cutting, William W. Moir, Oliver P. C. Billings, John Sickels and George Howes.

115. This instrument was delivered to me by Charles Edgar Appleby, as Receiver, more than thirty years ago.

145. I know that John J. Bradley customarily acted as attorney in fact for James M. Sweeney. I dealt with him as attorney in fact for Sweeney.

156. Parts of this instrument are in my handwriting. It passed through my hands over thirty years ago.

151. Parts of this instrument are in my handwriting. It passed through my hands over thirty years ago.

188. I know that at the date of this instrument Robert M. C. Graham was President of the Union Gas Light Company and John Sickels was Secretary of the same Company. I was attorney for that Company. I know that the grantors—Foster, Townsend, Turney, Bacon, Appleby, Porter and Young—constituted and acted as an Executive Committee under Chapter 944 of the Laws of 1871. I superintended the execution of this instrument and recognize the
signatures of Appleby and Porter. I saw President Graham
6931 and the Secretary Sickels sign the instrument. That was
over thirty years ago.

196. Parts of this instrument are in the handwriting of Judge Bartlett, who was my law partner at that time. I saw this instrument over thirty years ago.

161. I recognize the signature of A. Oakey Hall. It is his signature.

142. The alteration striking out the word "William" and in writing the word "Henry" was made by me before execution of this instrument.

144. The words "Hugh Smith" were struck out by me in three

places and the words "James M. Sweeney" were written in their places by me before execution and with the authority of the grantor.

165. The William Johnston who signed this instrument was reputed by his associates to be the same person mentioned in Chapter 944 of the Laws of 1871, as William Johnson. The alterations in the fifth and fifteenth line of that instrument in purple ink, were made before execution.

Cross-examination by Mr. **Burr**:

Q. It was prepared by Mr. Benedict?

A. It was prepared by Mr. Benedict and submitted to me, and I corrected some parts of it.

Q. Mr. Benedict of Sherman & Sterling?

A. Yes, it was stated to me that it would be shortened in that way. I have examined the exhibits.

Q. In here you purport, according to this statement, to recognize the signatures of various parties whose signatures are attached or said to be attached to the papers offered in evidence here?

A. Yes.

Q. The papers are not here?

A. Yes, I think the papers are here.

6932 Q. When did you see Bill Tweed last?

A. Along in those days.

Q. When was that?

A. About 1872.

Q. Do you mean to say now that you could recognize the handwriting of William M. Tweed?

A. Why, certainly.

Q. Did you see him write often?

A. I think so, a good many times. He was a well-known character in those days.

Q. Did you have business with him?

A. Certainly.

Q. Were you at that time the President of the Society of Medical Jurisprudence?

A. I think I was elected in 1871.

Q. It was not on that business that you saw Mr. Tweed, was it?

A. No.

Q. Your office was then at 47 Broadway?

A. My recollection is that it was about 20 Nassau Street, but I would not be sure. I think it was 20 Nassau Street.

Q. Don't you recall being on Broadway below the National Express office?

A. You are referring to 1872?

Q. I think so.

A. I think I was at 120 Broadway; first I was at 20 Nassau Street and then I went to 120 Broadway. That is my general recollection; you may correct *wrong* if I am wrong. It is a good many years ago.

Q. Did you have anything to do with the transfer of these various franchises outside of the deed which you and your wife executed?

A. I was the counsel for the company.

Q. For what company?

A. The Anthracite Gas Light and Heating Company. I conducted the negotiations and had the papers executed, transferring to the Union—I think—yes, the Union, subsequeently to the 6933 Knickerbocker; and I was counsel for all of those companies until the final sale. The papers passed through my hands as counsel. My wife had nothing to do with it.

Q. Do you mean to say that you had charge of the transfer of the franchise rights from Peter B. Sweeny and Tweed and all those other men as assignees?

A. Yes, my clients.

Q. To your clients?

A. Yes, sir.

Q. So that you saw them sign the papers yourself?

A. Many of them I did, but every one of them had to pass me as counsel before I would accept them.

Q. You have read this statement correctly, have you?

A. I did not prepare that. First I examined the papers and then I modified his statement. It is not drawn exactly as I would have drawn it, and it was done to shorten it, as I understand. If you will refer to any one you will see.

Q. Do you recognize the signature of William H. Appleton?

A. Yes.

Q. Who was he?

A. He was the president of one of the companies.

Q. And S. D. Law?

A. S. D. Law was the secretary.

Q. Did you know Connolly, the treasurer?

A. Certainly.

Q. You say that as if you were an intimate friend?

A. Well, I was before his misfortune came upon him. Dick Connolly was as good a man as there ever was in this town, and a very good fellow, by the way, and from an elegant family.

Q. Now, you have made a statement here with regard to the affidavit of service. What calls that to your recollection?

A. If you will show me the exhibit; it is numbered there, isn't it?

Q. You also recognize the signature of A. Oakey Hall?

A. Yes.

6934 Q. Still another particular friend?

A. He was, indeed; I was very intimate with him years ago. He was Mayor of this city, if you remember; a prominent man here.

Q. Who was your law partner at that time?

A. Edward T. Bartlett, now of the Court of Appeals.

Q. Was he also the attorney?

A. I seee his handwriting in some of these papers, where I had him to assist me in the work.

Q. I notice in this Complainant's Exhibit 20, marked in the corner is 89½ B. & C. Does that refer to you, that B?

A. I do not know, I recognize this paper. It is a general release. The signature is that of my managing clerk.

Q. Mr. Potter?

A. M. A. Potter was my managing clerk. The body of that is in his handwriting, and the signatures are those of men that I know, Osborne, Doolittle, and Redfield. I recognize the handwriting and they signed that in my presence.

Q. I will call your attention to the affidavit of publication, Complainant's Exhibit 120, purporting to be proofs of publication in compliance with the State grant. Do you recognize that paper?

A. Yes, I do.

Q. And in whose handwriting is that?

A. I do not know. The first page I do not recognize. The affidavit is in my handwriting; William Foster, Jr's. signature.

Q. Do you know that he swore to it?

A. He signed it in my presence.

Q. Is this his signature?

A. Yes, and he swore to it. I will not say I was present when he swore to it, but I have no doubt I was. That is his handwriting and mine.

6935 Q. Do you know the notary, James Klein, notary public, King's County? Do you recognize his signature?

A. I cannot swear to that. I do not remember that I know him. This transaction was a great many years ago. I do not know that I knew Mr. Klein at that time. What is the date?

Q. May 20, 1878.

A. I do not recognize it now, and I do not remember James Klein; very likely I knew him, but I do not remember now.

Q. You do not know when William Foster swore to this affidavit?

A. Oh, yes, I do.

Q. You say you were not present?

A. I did not say I was not. I say I probably was. There is no doubt it was sworn to about the date that it bears date.

Q. And that is his signature?

A. Yes.

Mr. MATHEWSON: Mr. Forstall, will you take the stand.

Mr. BURR: I notice Mr. Mathewson has called Mr. Forstall although he finished with him on his rebuttal and gave all the testimony that was necessary. It is rather a surprise to call Mr. Forstall at this hour for something else, and I object to it. Our time has been limited; we have been held down to a very narrow and limited margin of time, and to call Mr. Forstal again——

The MASTER: I cannot pass on the objection until I see what he is going to ask him. Mr. Mathewson stated last night he would have fifteen minutes of odds and ends today. This may be an odd or an end.

Mr. MATHEWSON: My examination won't exceed five minutes with this witness, and all the rest I have won't take more than five minutes. This rose from something that came up this morning. Fortunately, I was able to answer it.

6936 Mr. BURR: Then this was not one of the odds and ends you referred to yesterday?

Mr. MATHEWSON: No, but I think we can include it in the same time.

Alfred E. Forstall recalled on behalf of complainant in rebuttal.

Direct-examination by Mr. **Mathewson**:

Q. You heard the testimony this morning and the suggestion of counsel in regard to the Danbury tests, that while the test was 32.95 or such a matter with a two-foot burner, yet if a test of such gas as that were made with a large burner it might or would show 44 candle power. As a matter of fact, have you recently made a test in Danbury with a larger burner, say a No. 6 Bray?

A. I have.

Mr. **Page**: This is objected to. I don't know really what relevancy and materiality it has in the case. The statement he is called upon to testify regarding is certainly something brought out by their own witnesses. If they are going to rebut their own testimony we will keep on for some time yet.

Mr. **Mathewson**: It was a statement in Mr. Edgerton's letters to Mr. Bradley upon which an interpretation had been placed by you.

Mr. **Page**: And it was brought out originally by your own cross-examination. I think you asked the question.

The **Master**: Has anbody found yet the page at which this Danbury testimony first came into the case? Nobody had a memorandum of it yesterday, and I was not able to find it.

6937 Mr. **Mathewson**: You will remember that after examining Dr. Humphreys, Mr. Kirby threw down the paper as of no value because the tests there, he said, were made with a two-foot burner or something like that, and the suggestion if a larger one had been used 44 candles would have been found.

The **Master**: It is not a question of what the point is. It is a question whether this is proper rebuttal or not. I want to see this matter in which this Danbury correspondence first came up.

Mr. **Mathewson**: I don't think there is any dispute, Mr. Master, about that.

The **Master**: There wasn't any dispute about it yesterday, and I acted accordingly, but I would like, for my own satisfaction, to see it.

Mr. **Mathewson**: If you have a copy of the cross-examination of Mr. Edgerton I think I can find it here in short order.

Mr. **Page**: Mr. Mathewson, as I remember, asked him if he had not written some letter.

Mr. **Mathewson**: To somebody in Maryland, and he said, no, he had not, but he had sent certain papers to Mr. Bradley, who was then ill. It was a voluntary statement. I did not ask him about it at all, and even though I did, I think it would be competent to use papers that he was the author of to rebutt his theories.

The **Master**: Well, I seem to be unable to find it here, now, so I will overrule the objection. I don't know whether it is proper or not, and I cannot find the reference. An exception may be noted. That will serve the interests of both sides.

6938 Mr. **Mathewson**: Very good. I will take it in that way.

Q. What burners did you use in those tests at Danbury, and have you a statement showing the results of the tests?

A. I used the number 6 low pressure Bray Union jet burner to obtain the candle power, with a consumption at the rate of five cubic feet per hour. Then for comparison I used three burners that were obtained from the office of the gas company in Danbury, such as they give out, and all being those that they give out to their customers. One of these was a lava tip batwing burner, unchecked, without any name or mark on it; another was a Stewart Special Union jet, marked H, which was checked; the third was a No. 3 Bray Regulator Union jet, which had no check, but with wire gauze in the base and muslin just below the tip, and I have a table showing the results of those tests.

Q. Is this it?

A. It is. The results are as follows:

TESTS OF CANDLE POWER OF DANBURY GAS.

Made Jan. 11th, 1907.

No. 6 Low Pressure Bray Union Jet Burner, with a consumption at the rate of 5 cu. ft. per hour. The flame was just on the point of smoking and did smoke with the slightest draft. While the flame in this condition gave the greatest efficiency, it was not a flame that could be used commercially.

1st test	3:25 P. M.	36.6 candles.
2nd test	5:45 P. M.	34.5 candles.

Several other tests were made with the same burner, but were not considered because the candles did not burn 40 grains within the proper time limits.

6939 TESTS OF BURNERS OBTAINED FROM THE OFFICE OF THE GAS CO.

Name of burner.	Rate of consumption cu. ft. per hour.	Candle power of flame.	Candle power for —	
			1 ft.	5 ft.
Lava Tip Batswing Burner Unchecked. No name nor mark	1.96	12.48	6.37	31.85
	2.21	14.52	6.57	32.85
Steward Special Union Jet H. Checked	2.6	16.69	6.42	32.10
No. 3 Bray Regulator Union Jet. No check, but with wire gauze in the base and muslin just below the tip.	3.95	28.07	7.11	35.55

These results are all uncorrected for temperature and pressure. The temperature was from 68 degrees to 70 degrees, and the barometer 29.5 inches.

Cross-examination by Mr. **Kirby**:

Q. You have made no test with Danbury gas which, with the first burner set down in this schedule, lava tip batwing burner, unchecked, would have produced a candle power or flame of 14, have you?

A. No, sir. I came pretty close to it. On the second test, as put down in that table.

Q. But in that you showed 2.21 feet of gas, as against 1.96?

A. Yes.

Q. Are you aware that at Danbury during the time of this test a new apparatus had just been installed and had not as yet got down to what you would call proper working order?

6940 A. I had no knowledge—I have no knowledge of conditions at the Danbury works.

Q. Have you ever made any tests with your third kind of burner, No. 3 Bray Regulator Union jet, which, with the number of cubic feet burned, would give a candle power of 33?

A. No.

Q. Are you prepared to state what the candle power for five feet would be if using your third burner and burning 3¼ feet you got a candle power of 33?

A. I am not prepared to state exactly, but I tried to get that burner burning the quantity of gas at which it seemed to me to give the best flame, and then took the test at that and I think that if I ran it up to 33 candles it would have shown lower than it did under this test with that gas.

Q. Are you not aware that the gas as tested by you at this time was below the standard required at Danbury?

A. I am not. I have information that it was a little higher than it had been before.

Q. What do you mean by before?

A. Well, a week before.

Q. All companies, I presume, fall below standard at times, do they not?

A. No, I won't say that.

Q. I call your attention for instance to Fall River, where it says candle power, number of inspections made, 52; candle power averaged 20.09, highest 24.01; lowest, 18.9. That shows a fluctuation of 5.3 candle power? Does it not?

A. It shows a fluctuation, but doesn't show they fall below the standard.

Walter R. Addicks, recalled in rebuttal, testified as follows:

By Mr. **Mathewson**:

Q. Testimony has been inserted by the defendant in reference to charge for gas at Syracuse, seventy-five cents, and various 6941 other cities in New England. Have you prepared a schedule showing the price charged in each city of this State?

Mr. **Burr**: I object to this, I do not think that is proper at this time. To recall Mr. Addicks and present a lot of charts and figures on them that we know nothing about.

Mr. **Mathewson**: It is not a lot of charts.

Mr. **Burr**: Or give a lot of testimony at this time when our understanding was that he had finished with them in rebuttal the other day, and we have all acted upon that assumption.

The **Master**: I will allow it.

Mr. **Burr**: I except.

Q. Is that it?

A. Yes, sir.

Q. Does this show, in accordance with the lines at the top 50 cents, one dollar, $1.50, $2.00, and $2.50?

A. It does.

Q. The unbroken lines represent the cost per thousand feet, up to $2.50?

A. Yes.

Mr. **Page**: Was this not produced at the hearing before the Com*imss*ion?

The **Witness**: This is not the same.

Mr. **Page**: I think it is the same thing.

Q. What do the broken lines indicate?

A. They indicate the price of gas for fuel.

Mr. **Page**: What is this supposed to rebut?

Mr. **Mathewson**: Testimony that was put in affecting prices at Lynn, Boston, Syracuse, and one thing and another.

Mr. **Burr**: I object to it on that statement.

6942 Mr. **Mathewson**: Also from Brown's directory, various information.

Mr. **Burr**: One moment until I get a ruling on my objection. This purports to be a statement regarding cities in the state of New York?

Mr. **Mathewson**: Yes, that is to say, outside of Greater New York, and outside of the Westchester Lighting Company, of which the Consolida-ed Gas Company owns the stock.

Mr. **Burr**: That is for the year 1906, and have no relation to conditions existing in Massachusetts that have been referred to.

Mr. **Mathewson**: Haven't you quoted the -ports for the year 1906—a dozen of them?

The **Master**: It would not be proper rebuttal of the testimony given in regard to these Massachusetts cities.

The **Witness**: You will see that that 1906 refers to Brown's Directory of 1906.

The **Master**: Are these alike, these two?

The **Witness**: Exactly.

Mr. **Burr**: This is a long chart containing a mass of figures, and we are to end this hearing within a couple of hours. I submit that it is unfair and improper, and I object to it.

The **Master**: The question is whether it is proper rebuttal or not; the other questions have no bearing at this time.

Mr. **Mathewson**: They introduced testimony showing that the price at some cities is so and so, and we introduce a chart of the

State of New York showing charges of other cities in the State of New York.

The **Master**: That is all right. I recall that Mr. Bemis 6943 or somebody else did bring in something about Syracuse and some other towns mentioned here. Of course, that evidence was received and allowed to go in, although it was very doubtful materially anyway; but we had that all out early in the case, about different conditions in different cities, and we concluded that we would let it in, and a lot of it went in, but evidently this table is not rebuttal in any sense, except as it refers to something referred to in the defense; and in reference to something shown here about the price of gas in Syracuse, you cannot come in here and rebut with the price of gas in Geneseo.

Mr. **Mathewson**: Let me ask this question, not necessarily to be answered. If upon their case they bring in the price of gas charged in certain cities as an argument against our charging a certain price here, and if they bring in Brown's Directory and statistics of Dr. Marks and others, must we be excluded unless we go to those same cities, or unless we bring in figures showing how in other cities near home the price is fixed according to authority?

The **Master**: I will hold that it is not rebuttal of anything put in on the defense.

Q. I will ask one or two more questions. These lines represent the gross charges, do they not, and there are in some instances deductions for prompt payment?

Mr. **Burr**: I object to that as incompetent, irrelevant and immaterial.

Mr. **Page**: This is being received under the ruling.

6944 A. There are some in which only the net charges are shown.

Q. And Syracuse appears at 95 cents, which Professor Bemis testified was the price fixed by the Commission. Was the candle power fixed in the same order of the Commission?

A. Not less than 18 candles.

Mr. **Mathewson**: I will ask to have this marked for identification, if the Master excludes it.

The **Master**: I exclude except as stated.

The chart referred to is marked for identification, Complainant's Exhibit 395.

Mr. **Mathewson**: I called attention this morning to the fact that in spite of the directions of their own counsel, as I understand it, we have been unable to get access to reports of the New York State Gas Commission, by which we might present evidence if we saw fit touching some points upon which certain reports were here produced by the Secretary of the Commission; and I do not know as it is essential to put in the correspondence to prove that fact. Perhaps counsel on the other side know it sufficiently, so that it is not necessary.

Mr. **Burr**: I have not the slightest idea myself to what you are alluding.

The **Master**: I recall it.

Mr. **Burr**: I mean as to the correspondence.

Mr. **Mathewson**: Correspondence between Dr. Humphreys representing the complainant and the Gas Commission by its secretary, in reference to examining the reports of various companies filed with the Commission regarding the charges for oil and one or two points respecting which Mr. Hazard testified, and produced here reports of some few companies.

6945 Mr. **Burr**: Do you claim that in any way changes the testimony of Mr. Hazard?

Mr. **Mathewson**: No, but we have had no opportunity to see these very reports in order to present anything that came from them.

(Here Mr. Mathewson refers to page 5017 of the record and quotes therefrom).

We have been trying to see them, but have not been able to, and of course now we cannot see them, and I merely make this *settlement* in order to explain why they have not received attention.

Mr. **Burr**: You remember the testimony of Dr. Humphreys with regard to certain information which he got from the companies; he had no difficulty in getting all the information which he wanted, not only from superintendents but men higher up than superintendents.

Mr. **Mathewson**: We are talking about the Gas Co*mi*m*ss*ion.

Mr. **Burr**: I say, outside of the records of the Gas Commission the complainant could readily find the information which they *so-rt*.

Mr. **Page**: The attitude, as I found it, seems to be that Mr. Hazard having allowed me to look at this as a matter that was brought up before the commission, they have taken the ground, which I think is entirely un*ad*justifiable and told them so, that they were confidential communications from the gas company to them, and not public records.

I told them distinctly just what I had said here and I forced them to give me the copies of the papers, and I had quite a time over that.

6946 Mr. **Burr**: And those copies I understand are given to Mr. Mathewson?

Mr. **Mathewson**: That is all right. That is not what we are talking about. There are others in which Mr. Hazard admitted that four cents or more was paid for oil without specifying, of course, the quality of oil. I will simply say this: If they were confidential documents and their representatives appeared for them here, they being defendants in this case and represented by counsel here, it does seem to us a remarkable proposition that they should exclude us from an examination of the papers; but more than that, if they were confidential, why was this report from Buffalo, upon which Dr. Humphreys has been examined, delivered over to the experts for the other side?

Mr. **Burr**: That did not occur, and that is not the fact. We got that report from the city attorney of Buffalo.

The **Master**: Gentlemen, you have said enough on the record to make your point and I cannot do anything about it.

Mr. MATHEWSON: No, I do not think it is necessary to offer the letters. Mr. Page's statement is very fair about it, and he has acted in the utmost good faith about it, as I would know he would. Now, we have to do the best we can at this time. The question is raised as to the candle power up the State and as to the character of oil that was used, and I now read upon the record in this connection a quotation from the report of the Commission of Gas and Electricity which I have from Mr. Hazard secretary of the Commission as follows:

6947 Mr. BURR: What is this?

Mr. MATHEWSON: It is the current report, it is marked at the top: "To be released for Tuesday Morning Newspapers, January 29, 1907," and sent to us from the commission.

Mr. BURR: I object to it as incompetent, irrelevant and immaterial.

The MASTER: I do not think that is important, I do not think it is material, and I do not think it is competent. I suppose the report will come out in the fullness of time and you can cite from it on your brief as a public document.

Mr. MATHEWSON: Perhaps so, but I think if the Master thinks I am mistaken I shall take the chance and put it in.

The MASTER: All right, I think you are mistaken.

Mr. MATHEWSON: There is no doubt that that is a copy of the report? You do not question that?

Mr. BURR: I dont' know anything at all about it.

Mr. MATHEWSON: I will ask Mr. Addicks, then, I can prove it.

The MASTER: It comes on the paper of the company signed by the secretary, but, if that was to be released some days ago, why has it not appeared in the newspapers?

Mr. MATHEWSON: It has appeared, some days ago. You do not question that this is a copy of the report?

Mr. BURR: I do not doubt that that was written by Mr. Hazard, and that that paper purports to be the report of the Gas Commission about to be published, or is published.

Mr. MATHEWSON: It has been published.

6948 Q. Mr. Addicks, you are still on the stand; is this a copy of the report which was sent to you by the secretary of the Commission?

A. Yes, I sent and got such report with such memorandum on it. I had one of the others.

Q. And this is what you received from the secretary of the Commission?

A. I received that, yes.

Q. With this letter on the paper of the Commission?

A. With that attached to it, yes, sir.

Mr. MATHEWSON: I will now read into the evidence this extract.

Mr. BURR: One moment; that has been excluded.

Mr. PAGE: Yes, but taken under the ruling.

Mr. MATHEWSON: It has been excluded and it is being taken under the ruling. A great many things have been excluded, Mr. Burr, that you have put in.

"The report further shows that although gas for illuminating purposes has been supplied in this State since 1823, no regular or systematic inspection or examination has been made of the purity and illuminating value of the product supplied, except in the City of New York, until during the past year, when the Commission established a department for such purpose. Tests have already been made by order of the Commission in practically every section of the State. The result of these inspections showed that the candle power of the gas furnished was very low, and an order has been issued by the Commission, compelling all companies furnishing
15,000,000 or more cubic feet of gas annually to install an
6949 improved photometer for use in making frequent tests for
candle power. The Commission has also adopted a rule to
report results of tests to the companies in question, and to order improvements where deficiencies are discovered."

Mr. **Mathewson**: Now, I think I have only one thing more. Mr. Burr, at pages 3042 and 3044 of the testimony on behalf of the defendant, read certain extracts from the report of the committee of 1885, against my protest, as appears on the record.

Mr. **Burr**: This is the committee of which Mr. Thomas was chairman?

Mr. **Mathewson**: I think so. I merely, to conclude my case, and in order not to seem discourteous to Mr. Burr, read in evidence the following extract from the same report.

Mr. **Burr**: Why didn't you read it before? What does this rebut?

Mr. **Mathewson**: I did not have to before.

Mr. **Burr**: I think so.

Mr. **Mathewson**: Wait until I read it through and see.

Mr. **Burr**: No, it is a part of your main case.

Mr. **Mathewson**: No, you did not introduce the source from which it came. It had not been made competent until you offered the volumes, or part of it. I did not put it in until you had put it in evidence, statements and report of 1886.

Mr. **Burr**: I beg your pardon; you unintentionally misstate the facts. You offered the inventory of Mr. Rowland long before I made the original report.

Mr. **Mathewson**: No, I had the original report of Mr.
6950 Rowland from the records of the Gas Company, and not
from any book, and I merely offered them as a convenience.

Mr. **Burr**: I object to it as incompetent, irrelevant and immaterial.

The **Master**: I will take it.

Mr. **Burr**: I except.

Mr. **Mathewson** (reading): "It is apparent that a pressure necessary to carry gas to consumers at distant parts of the line would be excessive for intermediate points. As a result the gas passes through the burner faster than is desirable for economical consumption, but does not in New York under the pressure used by the company cause the meter to register gas not passing through it. It does not appear that the companies can furnish a remedy for this. It is the duty of the consumer to graduate the flow, either by the use of a governor or some regulation at the burner. Much then depends upon the care of the consumer and his fidelity to his own interests in the use of gas."

Mr. Burr: I object to that and ask to have it stricken out now on the ground that unless it is admitted by the complainants that the conditions as to mains and pressures were the same in 1885 as they were in 1905.

The Master: I will let it stand for what it is worth, and I will allow your extract to stand.

Mr. Mathewson: The complainant rests.

Mr. Burr: I have no questions to ask Mr. Addicks.

The Master: What is the next in order, gentlemen.

Mr. Burr: I desire to call Dr. Marks.

The Master: You mean in reply?

6951 Mr. Burr: Yes.

The Master: Nothing in this rebuttal calls for any reply, in my judgment. I do not think you are entitled to it. I may be wrong, if you can point out some specific matters.

Mr. Burr: For instance, take the testimony of Mr. Simpson with regard to the errors in City's Exhibit 91, I think it is. Did we explain those?

Mr. Mathewson: The schedules of Dr. Marks?

Mr. Burr: May we explain those errors and show how we arrived at the result of the number of miles of mains on the books of the company?

Mr. Mathewson: Did not Mr. Simpson explain that?

Mr. Burr: Can we not show by the production of testimony and exhibits that pipes are affected by water and by earth without any wandering electric currents, in the same manner as they are claimed to have been affected by electric currents?

The Master: No. I do not think there is any use in counsel spending any time, or for me to spend any time, in having any oral argument on any of the features of this case. I think after the draft report is filed probably all counsel will have enough criticism to pass upon it, as to which they would like to be heard, and as to which I would like to hear them, and that will give the best opportunity for oral argument and the most useful, and the argument can then be directed to a specific point.

Mr. Burr: I except to the ruling of the Master in excluding 6952 the introduction of sur-rebuttal testimony on behalf of the defendants.

I now move to dismiss the complaint of the complainant, if that is the situation, and we can offer no further evidence in sur-rebuttal, on the ground that they have failed in proving any confiscation or anything more than, assuming their own figures to be correct, a reduction in the profits which they formerly obtained, under the decision of the United States Court, in which we are. In the case of Covington & Lexington Turnpike Road against Sanford, decided at the October term, 1906, the Court held that:

"We could not say that the act was unconstitutional merely because the company could not earn more than 4 per cent. on its capital stock; it cannot be said that a corporation is entitled as of right, and without reference to the interest of the public, to realize a given per cent. upon its capital stock."

I also move to dismiss upon all the grounds set out at the close of the complainant's case.

Mr. Mathewson: Your case was a case where the capital stock had been largely inflated beyond the assets.

Mr. Burr: I had not finished. Do you rule upon that now, Mr. Master?

The Master: No.

Mr. Burr: I move to strike out again the evidence regarding which motions were made at the close of the complainant's case, and I except to the rejection of the evidence offered by the defendant. I think that that closes our case. We rest.

6953 Now, as to the next thing, the submission of findings of facts and conclusions of law. I do not understand that the practice is that the complainant will submit to you and serve upon us a copy of its proposed findings, and that thereafter we have time in which either to admit their proposed findings——

The Master: No, there is no obligation on anybody to submit any findings at all. It is merely a matter for my convenience, and if submitted there is no obligation on any party to serve on anybody else.

Mr. Burr: Now, as to the submission of briefs. Of course I need not tell you of the vast magnitude of this case and refer you to the voluminous exhibits that have been presented and have grown during the progress of the trial, but we submit that reasonable time should be allowed in which to present those briefs.

The Master: It is unnecessary to point out that I will need the briefs very badly.

Mr. Page: We have not got our record yet.

Mr. Burr: The record, I understand, will not be completed for a week or so, and that must be considered. Furthermore, the record itself has got to be corrected. It is full of inaccuracies regarding all of us, and should be corrected, and as Mr. Mathewson stated, the other day, in which I fully concur, no one can do that properly except the men who have been engaged in the trial of the action. So, in allowing time for the submission of briefs, I hope you will take those matters into consideration.

The Master: What time can counsel agree upon? That is the best way.

Mr. Burr: I would suggest 60 days.

The Master: The case will be decided before that, if I am well.

6954 Mr. Burr: We are all pretty well exhausted, physically.

The Master: I need briefs, of course, and the quicker I have the briefs, the much less labor it will be for me, and there are parts of this work that will be almost impossible for me without the assistance of counsel. I do not want to fix any time for counsel if you can, by any possibility, agree. You will remember that on the question of findings or draft report, or anything of that kind, I asked counsel along in summer to get some of their junior associates at work on them. I understood that you have had two men working on them for months, Mr. Burr.

Mr. **Burr**: But I found it impossible to do so, because it resulted in a very bad result, because this record is changing from day to day, and even to-day the last thing that the complainants did was to offer this beautiful set of charts, which may require some additional investigation on our part.

The **Master**: But they were excluded.

Mr. **Mathewson**: Yes, they were excluded. There is no need for you to bother about them.

The **Master**: What do you think, Mr. Mathewson? You have the affirmative in this case?

Mr. **Mathewson**: I concur in all that Mr. Burr says to some extent, in reference both to the ability to correct the record and the ability to do solid, accurate work through subordinates. The first is utterly impossible, and as to the second, you can get some assistance by telling what you want and having it picked out; but 6955 difficulty is to read over and see what is there, rather than to remember it and tell them to find it. I do not believe that I could put in a complete brief such as I would like to, within any time at the disposal of the Master in the case. Will it meet the Master's view if we get a brief in by March 1st? That would give, say, a month, or do you think we ought to be more expeditious than that?

Mr. **Page**: That only gives us twenty-seven days.

Mr. **Mathewson**: I am not anxious to curtail the period here within which to submit briefs. If we had time enough I should be content to accept a much longer time.

Mr. **Page**: It will take us a week to correct the record, and get it all, will it not?

Mr. **Mathewson**: I am afraid so; it has been impossible to correct it as we have been going on here.

The **Master**: Do you gentlemen intend to print your briefs?

Mr. **Page**: Yes.

Mr. **Mathewson**: Yes, I think so, as a matter of convenience.

Mr. **Page**: Suppose we have forty days; that would give us time to get up our records and briefs, after the whole thing is completed. Will that be acceptable to you?

Mr. **Mathewson**: Yes, forty days will acceptable to me if I can get it. It seems to me the Master must feel, and I suppose the Court will feel, that we are prepared to do it just as rapidly as we can.

The **Master**: I think if you have forty days that ought to be abundant without any extension. That will give you a week to 6956 get the record corrected and about a month to make up your brief and then pretty nearly a week to get it through the press and have it proof-read, if you are going to have it printed. I should be disposed to think that forty days is sufficient, and I am inclined to fix that time with the understanding that I am going to get the brief then, without any delay.

Mr. **Page**: We do not exchange briefs, as I understand it?

The **Master**: No; there is no point in that, because you will have an opportunity to be heard on the draft report, and any questions at issue can be threshed out then. I will fix a date approximately, the 14th of March; that is approximately forty days. Briefs to be submitted March 14th.

Testimony closed.

6957 UNITED STATES OF AMERICA,
Southern District of New York, ss:

I, John A. Shields, Clerk of the Circuit Court of the United States of America, for the Southern District of New York, in the Second Circuit, do hereby Certify that the foregoing (Vol. 9) pages, numbered from 6175 to 6956 inclusive, contain a true and complete transcript of the record and proceedings had in said Court, in the cause entitled Consolidated Gas Company, Complainant, Appellee, against Julius M. Mayer, as Attorney General, *et al.*, Defendants-Appellants, as the same remain of record and on file in my office (Vol. 9).

In Testimony Whereof, I have caused the seal of the said Court to be hereunto affixed, at the City of New York, in the Southern District of New York, in the Second Circuit, this 15th day of May, in the year of our Lord One Thousand Nine Hundred and eight and of the Independence of the said United States the One Hundred and thirty-second.

[Seal of U. S. Circuit Court, South. Dist. New York.]

JOHN A. SHIELDS, *Clerk.*

[Endorsed:] United States Circut Court of Appeals for the Second Circuit. —— —— *vs.* —— ——. Transcript of Record from the Circuit Court of the United States for the Southern District of New York.

COMPLAINANT'S EXHIBIT 1.

CONSOLIDATION AGREEMENT

BETWEEN

VARIOUS COMPANIES

INTO

CONSOLIDATED GAS COMPANY OF NEW YORK,

Dated September 29, 1884.

Filed in office Secretary of State, Nov. 10, 1884.
" " " N. Y. County Clerk, " " "

This agreement, made this twenty-ninth day of September, one thousand eight hundred and eighty-four, between The New York Gas Light Company, The Manhattan Gas Light Company, The Metropolitan Gas Light Company of the City of New York, The New York Mutual Gas Light Company, The Municipal Gas Light Company of New York, The Knickerbocker Gas Light Company and The Harlem Gas Light Company, each of which is a corporation duly organized and now existing under general or special laws of this State for the purpose of carrying on the manufacturing busi-

ness of making and distributing gas, and herein styled the Consoli-
dated Companies, or between two or more of said Companies the
directors or trustees of which shall enter into this agreement and
whose stockholders shall on or before November 10th, 1884,
6958 sanction and approve of this agreement by the votes of two-
thirds of the stockholders present at a meeting to be called
for that purpose, pursuant to the provisions of the Act entitled "An
Act to authorize the consolidation of manufacturing corporations"
passed May 28, 1884, witnesseth:

That said Companies so sanctioning and approving this agreement have agreed and do hereby agree to consolidate into one corporation under and in accordance with said Act of May 28, 1884, and the following are the terms and conditions of such consolidation and the mode of carrying the same into effect.

ARTICLE I. The said new corporation to be formed shall be called the *Consolidated Gas Company of New York.*

ARTICLE II. The number of the *Trustees* thereof shall be *thirteen.*

ARTICLE III. The names of the Trustees who shall manage the concerns of the new Company for the first year, and until others shall be elected in their places, are Charles Roome, Thomas K. Lees, Oscar Zollikoffer, John P. Kennedy, Charles G. Franklyn, Thomas Rutter, Harrison E. Gawtry, Percy R. Pyne, Samuel Sloan, James W. Smith, Henry Day, Arthur Leary and John P. Huggins.

ARTICLE IV. The term of the existence of the said corporation shall be *Fifty years.*

ARTICLE V. The operations of the said corporation shall be carried on in the City, County and State of New York.

ARTICLE VI. The amount of capital of the said new Com-
6959 pany shall be *Forty-five millions of dollars,* which is the fair
aggregate value of the property, franchises and rights of the
several Companies above named, which are more particularly mentioned in Article VII of this agreement, or if either or any of such Corporations shall fail to sanction and approve this agreement, as provided in said Chapter 367 of the Laws of 1884, before November 10, 1884, then the Capital of such new Corporation shall be as much less than forty-five millions as the amount thereof apportioned by Section VIII to either and all of such above named Companies so failing to sanction and approve this agreement. The capital shall be divided into *four hundred and fifty thousand shares of one hundred dollars each,* or if any Company or Companies fail to sanction and approve this agreement as aforesaid, then into as many shares as the reduced amount of capital will make when divided into shares of one hundred dollars each.

ARTICLE VII. Upon the consolidation of such corporations and the organization of the new Company, all and singular the rights, privileges and interests of each of the Companies whose stockhold-

ers shall have sanctioned and approved of this agreement as hereinbefore expressed and as provided in Chapter 367 of the laws of 1884, including all the real estate belonging to such Company situate in the City of New York and elsewhere with all appurtenances belonging thereto, all lands and rights to lands under water, all leasehold property, all mains, service pipes and meters, all patents and licenses or rights to use patents, all machinery, plant, tools, horses, wagons, carts and all other property used by said Companies in the manufacture of gas, all office furniture and stationery, maps, drawings of property and apparatus owned by each of said Companies at
6960 the present time, together with their and each of their corporate rights, franchises, licenses to lay mains and pipes, and privileges of every kind whatever, reserving and excepting from the property of each such corporation only cash on hand, debts due to the Company and coal and other supplies not included in the schedules furnished for previous valuation, shall be vested in and be the property of the new corporation.

ARTICLE VIII. The said Capital of forty-five millions of dollars shall be and is hereby apportioned among the said Consolidating Companies in full consideration of the property, franchises and rights of each of said Companies transferred to and vested in the new corporation by this agreement and described in Article VII thereof, as follows:

The New York Gas Light Company	$7,821,000
The Manhattan Gas Light Company	$12,352,000
The Metropolitan Gas Light Company	$7,422,000
The New York Mutual Gas Light Company	$5,922,000
The Municipal Gas Light Company	$5,276,000
The Knickerbocker Gas Light Company	$3,104,000
The Harlem Gas Light Company	$3,103,000

Of this sum the new corporation shall retain to its own use and dispose of the sum of one million five hundred thousand dollars, to wit, of fifteen thousand shares thereof for the purchase of supplies and as a working capital, in such manner as may be hereinafter provided.

The remainder of the capital of said new Company shall be and is hereby alloted to and shall be distributed among the stockholders of such consolidated corporations as follows, viz.:

6961 To the Stockholders of the New York Gas Light Company	75,600 shares
To those of the Manhattan Gas Light Company	119,400 shares
To those of the Metropolitan Gas Light Company	71,750 shares
To those of the Mutual Gas Light Company	57,250 shares
To those of the Municipal Gas Light Company	51,000 shares
To those of the Knickerbocker Gas Light Company	30,000 shares
To those of the Harlem Gas Light Company	30,000 shares

If there shall be any outstanding lien or incumbrance by way of mortgages, or otherwise, upon any of the lands of either of said consolidating companies or any outstanding certificates of credit or other indebtedness or obligation of either corporation at the time of the consolidation, as herein provided, then the said new corporation shall assume the payment of such liens, bonds or indebtedness. Such Consolidating Company may at the time consolidation takes effect, pay to the said new Company the amount of such liens, bonds, obligations or indebtedness in cash, and in default of so doing said new Company shall retain in liew of and as a satisfaction of said liens and indebtedness from the capital stock allotted to stockholders of such Company by Article VIII an amount of stock equal to the amount due on such liens and indebtedness for principal and interest to date of consolidation, and the sum to be distributed to stockholders shall be reduced accordingly. Such stock so retained may be sold by the new corporation to provide means to pay such indebtedness.

6962 The said amount of capital stock of the new Company to be received by the stockholders of each of the said Consolidating Companies according to the provision of this Article shall be divided among the said stockholders *pro rata* in proportion to the holdings of each stockholder in the stock of said Company at the time of the closing of the books of such Company previous to consolidation, and such division and distribution shall be made by the new corporation immediately after consolidation is perfected; provided that each stockholder upon and before receiving his or her proportion of stock aforesaid shall assign and deliver to said new corporation, to be cancelled, his or her certificate or certificates of stock in said Company so consolidated; it being understood that the delivery of such certificate and cancelling of same shall not be construed as preventing the consolidating companies or either of them from closing up its affairs and distributing its assets not assigned to said new corporation under any of the provisions of this agreement.

Should any such stockholders on such division of stock be entitled to a fraction of a share, a certificate of the ownership of such fractional share shall be issued to him. Said certificate shall provide that when certificates of fractional shares equal to one or more shares shall be presented to said new corporation a full share or shares of stock equal in amount to such fractional shares shall be issued in place thereof, but such fractional shares shall not be entitled to any dividend until they are exchanged for full shares as aforesaid.

Each consolidating company shall at the time consolidation takes effect, furnish the new corporation with a list of its shareholders and the number of shares of stock of its company to which each is entitled.

6963 ARTICLE IX. Each consolidating Company sanctioning this agreement shall as soon as this agreement has been sanctioned and approved by two or more companies convey to said new corporation, by deed duly executed and acknowledged so as to entitle the same to be recorded, all its property enumerated and described in Article Seven of this agreement and shall furnish a map or maps with a description of all real estate and a particular schedule of all the other property and rights of property described in Article VII.

ARTICLE X. Each consolidating company shall furnish to the new corporation, attested by the signatures of the President of such Company, a full and complete statement of all liens or incumbrances upon the real estate of said Company and a particular list of all outstanding indebtedness and obligations of said Company, with a statement of any unsettled claims or pending law suits against the company.

ARTICLE XI. Should the Board of Directors or Trustees of either of said Companies named as parties to this agreement not enter into the same, or should two-thirds in amount of the stockholders of either of said Companies at a meeting thereof to be called as provided in Chapter 367 of the Laws of 1884, fail before November 10, 1884, to sanction and approve of this agreement, and should the Board of Directors of two or more of such Companies enter into this agreement under their respective corporate seals, and should two-thirds in amount of the stockholders of two or more such companies before November 10, 1884, sanction and approve of this agreement, then the said last named companies whose Directors have entered into this agreement and whose stockholders
6964 have so sanctioned and approved the same, shall and do
agree to consolidate on the terms and in the manner in every respect as hereinbefore mentioned, except that the capital stock of said corporation shall be the aggregate amount of stock apportioned by Article VIII of this agreement to the Companies whose stockholders shall have sanctioned and approved this agreement as above stated, and such non-assenting company or companies shall not be a party or parties to this agreement, but this agreement as thus made shall be valid and binding upon such companies as shall by their Directors or Trustees and stockholders legally assent to the same.

ARTICLE XII. The Trustees of the new corporation shall meet at No. 4 Irving Place, on the 10th of November, 1884, at one o'clock P. M. of that day, for the purpose of choosing officers of said new corporation and organizing the business of the same.

A majority of said Trustees shall constitute a quorum for the transaction of business. In case of failure of the Trustees to meet on the said 10th day of November, a meeting of the same may be called by any three of said Trustees at the same place by a notice in writing addressed to each of said Trustees and left at his usual place of business or given to him personally.

Said Board of Trustees shall adopt by-laws which shall be in accordance with the laws of this State for the government of the business and affairs of said corporation and of the Board of Trustees, and such by-laws shall, among other things, fix the time for the annual meeting of the stockholders for election of Trustees and the number and duties of the officers of the corporation and the method of changing or adding to said by-laws.

6965 ARTICLE XIII. All obligations and contracts of each of the Consolidating Companies shall be assumed by the new corporation.

ARTICLE XIV. Each of said Consolidating Companies shall appoint one of their Directors, Trustees or officers as a member of a committee to be called the Adjusting Committee. This Committee shall choose a Chairman and Secretary, and shall have power to adjust and settle all questions of difference between all or any parties, and any disputes or claims which may arise out of or in perfecting said consolidation and which are not specifically provided for in this agreement. Should any of said Companies herein named fail before November 10, 1884, to sanction and approve this agreement, as provided in said Act, the person designated by such Company as a member of the Adjusting Committee shall cease to be a member of such Committee.

The decision of a majority of such Committee shall be binding on all the Consolidating Companies and all stockholders therein, as well as upon the new Corporation.

ARTICLE XV. Either Consolidating Company may transfer to the new corporation its money on hand, debts due to it, coal and other supplies and material on hand at time of consolidation and not included in the Schedules furnished for previous valuations, or any portion of the same, and the same shall be paid for in stock, or partly in stock and partly in cash, as may be desired by such Company. *Provided, however,* that no stock shall be issued for such payment beyond the million and a half of capital reserved and mentioned in Article IX of this agreement. Notice of the desire to make such transfer shall be given to the Chairman of the Adjusting Committee before November 10, 1884.

6966 The value of the property so transferred shall be determined by the Adjusting Committee. The money to be paid and the stock to be issued in payment therefor shall be distributed proportionately to the stockholders of such Consolidating Company at the same time and in the same proportion as such stockholders shall receive stock named in Article VIII of this Agreement. If any shares of stock remain after paying for such transferred property, they may be disposed of by the new corporation for the purposes aforesaid.

This agre-ment will be executed in different copies each of which shall be considered an original, the execution of one copy by one of the said Companies shall be considered a due execution of the same, although the execution by other companies shall be on another copy.

In testimony whereof, each of the said parties hereto have caused these presents to be signed by their respective Presidents or Vice

Presidents and Secretaries and the seal of their respective corporations to be hereunto affixed.

State of New York, *County of New York, ss:*

I, William Sohmer, Clerk of the said County and Clerk of the Supreme Court of said State for said County, do certify, that I have compared the preceding with the original certificate of Consolidated Gas Company of New York, on file in my office, and that the same is a correct transcript therefrom, and of the whole of such original.

Indorsed and filed and recorded November 10th, 1884, 12h. 30m.

In witness whereof, I have hereunto subscribed my name and affixed my official seal, this 30th day of October, 1901.

[SEAL.] WM. SOHMER, *Clerk.*

6969 COMPLAINANT'S EXHIBIT 2.

CHAP. LXXXV.

AN ACT *to incorporate the Gas Light Company of the City of New York.*

Passed March 26, 1823.

WHEREAS Samuel Leggett, Moses Cunningham, George Youle, Thomas Morris, and William S. Coe, and others, associated to form a Gas Light establishment in the City of New York, for the purpose of better lighting the said city, and the buildings, manufactories, and houses therein, have prayed to be incorporated, the better to enable them to carry on the business of their association: Therefore,

I. *BE it enacted by the People of the State of New York, represented in Senate and Assembly,* That the said Samuel Leggett, George Youle, and Moses Cunningham, and their present and future associates, shall be, and hereby are created, constituted, and declared to be a body politic and corporate in fact, by the name of "The New York Gas Light Company"; and by that name they and their successors may have perpetual succession, and shall, in law, be capable of suing and being sued in all courts and places whatsoever; and may have a common seal, with power to alter the same; and by the name and style aforesaid, the said corporation shall have full power and authority to manufacture, make, and sell gas, to be made of coal, oil, tar, peat, pitch or turpentine, or other materials; and to be used for the purpose of lighting the said city, or the streets thereof, and any buildings, manufactories, or houses therein contained and situate; and to enter into, make and execute any 6970 contracts, agreements or covenants, in relation to the objects of this incorporation, and of enforcing the same, and be capable of purchasing, taking and holding any estate or property, real or personal, as shall be necessary to give effect to the purposes of this incorporation, or for the accommodation of their business and concerns: *Provided,* the value of such real estate shall not exceed one hundred thousand dollars: *And provided also,* That no public street, lane, or highway in the city of New York, shall be dug into, or in any wise injured or defaced without the permission of the corporation of the said city first had and obtained.

II. *And be it further enacted,* That the capital stock of the said corporation, shall not exceed one million of dollars, and that a share in the same shall be fifty dollars, and the subscriptions to the same, or to such part thereof, as from time to time may, by the directors for the time being, be deemed proper and necessary, be opened by the appointment, or under the direction of the directors hereinafter named, or a majority of them, subject to such rules, limitations and conditions, as by them shall be prescribed.

III. *And be it further enacted,* That the stock, property, and affairs and concerns of the said corporation, shall be ordered, managed, and conducted, under the direction of thirteen directors, being stockholders and citizens of this state; that the said directors shall hold their offices from the third Monday of January, inclusive, in every year, for one year, and shall be elected on the second Monday of January in each year, at such time and place within the City of New York, as a majority of the directors for the time being shall appoint; and that notice of the time and place of holding such election, shall be published in at least two of the public news-
6971 papers printed in the city of New York, at least fourteen days previous to the time of holding the said election; and that all election for directors shall be by ballot, and made by such of the stockholders as shall attend for that purpose, either in person or by proxy; and that each stockholder shall be entitled to one vote, for each share which he, she, or they, shall have held in his, her, or their own name or names, at least fourteen days before the time for voting, and that the persons having the greatest number of votes shall be directors; and if it shall happen, that two or more persons have an equal number of votes, the directors in office, at the time of such election, shall, by a plurality of votes given by ballot, determine which of the persons so having an equal number of votes, shall be director or directors, so as to complete the whole number; and the directors so chosen shall, as soon as may be thereafter, proceed in like manner to elect one of their number by ballot, for their president; and if any director shall remove out of this state, or cease to be a stockholder, or shall resign, his office shall be vacant; and whenever any vacancy shall in any manner happen, the same shall be filled by the remaining directors, by plurality of votes, until the next annual election; and that Samuel Leggett, Moses Cunningham, Josiah Ogden Hoffman, George Youle, Richard S. Williams, William Seaman, Thomas Morris, Henry Eckford, Robert Bogardus, George Buckmaster, William S. Coe, Samuel Ackerly, and Thomas H. Smith, shall be the present directors, and shall hold their offices respectively, until the third Monday of January inclusive, which will be in the year of our Lord, one thousand eight hundred and twenty-five, and until others are chosen in their place, and proceed to choose their president at such time and place, as they, or a majority of them shall determine.

6972 IV. *And be it further enacted,* That in case it shall at any time happen, that an election of directors shall not be made on the day appointed by this act for that purpose, the said corporation shall not for that cause, or for any non-user, be deemed to be dissolved, but it shall and may be lawful to hold any election for directors, on any other day, in such manner as shall be provided for by the by-laws and ordinances of the said corporation.

V. *And be it further enacted,* That the directors for the time being shall form a board; and they, or a majority of them, shall be a quorum for transacting the business of the said corporation, and shall have power to make such by-laws, rules and regulations, not repugnant to the constitution or laws of the United States, or of this State, as to them shall seem needful and proper, touching the government of the said corporation, the management and disposition of the stock, property, estate and effects thereof; the duties of the officers, clerks, and servants employed therein; the election of directors, and all such other matters as may appertain to the concerns of the said corporation; and shall also have power to appoint so many officers, clerks, and servants, for carrying on the business thereof, with such salaries and allowances as to them shall seem meet.

VI. *And be it further enacted,* That the stock of the said corporation shall be assignable and transferable, according to such rules and subject to such regulations, as the board of directors shall from time to time make and establish, and shall be considered personal property.

VII. *And be it further enacted,* That it shall and may be lawful for the directors, or a majority of them, to require payment
6973 of the sums to be subscribed, at such time and in such proportions, as they, or a majority of them, shall deem fit, under the penalty of the forfeitures of all previous payments thereon; and that previous notice of the instalments required, after the first, and of the time when the same are to be paid, shall be published at least fourteen days, in two of the public newspapers printed in the city of New York.

VIII. *And be it further enacted,* That if any person or persons shall wilfully do, or cause to be done, any act or acts whatever, whereby the works of the said corporation or any pipe, conduit, plug, cock, reservoir, or any engine, machine or structure, or any matter or thing appertaining to the same, shall be stopped, obstructed, impaired, weakened, injured or destroyed, the person or persons so offending, shall forfeit and pay to the said corporation double the amount of the damages sustained by means of such offence or injury, to be recovered in the name of said corporation, with cost of suit, by action of debt, to be brought in any court of record in this state.

IX. *And be it further enacted,* That nothing in this act contained, shall be construed to authorize any banking or insurance privileges, or the issuing of any notes, bills, or other negotiable paper, all of which are hereby prohibited to the said corporation.

X. *And be it further enacted,* That this act shall be deemed a public act, and shall be benignly and favorably construed, for the purposes therein expressed and declared, in all courts and places whatsoever.

XI. *And be it further enacted,* That the legislature may, at any future time or times hereafter, alter, modify or repeal this act.

CHAP. 313.

AN ACT *to amend an act entitled "An act to incorporate the Gas Light Company of the City of New York," passed* March 26th, 1823.

Passed May 2, 1837.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

§ 1. It shall be lawful for the New York Gas Light Company of the city of New York, to purchase, take and hold any estate or property, real or personal, as shall be necessary to give effect to the purposes contemplated by the said act of incorporation, or for the accommodation of their business and concerns, provided, the value of such real estate shall not exceed two hundred and fifty thousand dollars.

§ 2. So much of section first of the act hereby amended as is inconsistent with this act, is hereby repealed.

COMPLAINANT'S EXHIBIT 4.

CHAP 424.

AN ACT *to amend an act entitled "An act to incorporate the Gas Light Company of the city of New York," passed March twenty-six, eighteen hundred and twenty-three.*

Passed April 13, 1855.

The people of the State of New York, represented in Senate and Assembly, do enact as follows:

§ 1. It shall be lawful for the New York Gas Light Company of the city of New York, to purchase, to take and hold such and so much real estate or property as shall be necessary for their manufacturing and business purposes, and no more, provided the value of such real estate or property shall not exceed the sum of five hundred thousand dollars. 6975

§ 2. So much of the first section of the act hereby amended and of the act amending the same passed May second, eighteen hundred and thirty-seven, as is inconsistent with this act is hereby repealed.

§ 3. This act shall take effect immediately.

COMPLAINANT'S EXHIBIT 5.

CHAPTER 59.

AN ACT *to Incorporate the Manhattan Gas Light Company.*

Passed February 26, 1830.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

§ 1. That Robert McDermut, Mordecai Myers, Moses Judah, and their present and future associates, shall be and are hereby created, constituted, and declared, to be a body politic and corporate, by the name of "The Manhattan Gas Light Company," with full power and authority to manufacture, make and sell gas, to be made of coal, oil, tar, peat, pitch, and turpentine, or other materials, and to be used for the purpose of lighting the city of New York, or the streets thereof, and any buildings, manufactories or houses, therein contained and situate, and to lay pipes for the purposes of conducting the gas in any of the streets or avenues of the said city; *And also,* that the said company will so conduct their manufactory or manufactories of gas, as not to create a nuisance; and that no 6976 public street, lane, or highway, in the city of New York, shall be dug into, or in any way injured or defaced, without the permission of the corporation of said city first had and obtained. But the rights and privileges hereby granted, shall not be construed to impair or affect any exclusive rights or privileges heretofore granted to any incorporated company in said city; and the real estate which this corporation is authorized to hold, shall not exceed in value one hundred thousand dollars.

§ 2. That the capital stock of this corporation shall not exceed five hundred thousand dollars; and that a share in the same shall be fifty dollars; and books of subscriptions to the said capital stock, or to such portion thereof as from time to time may, by the directors for the time being, be deemed proper and necessary, shall be opened by the appointment or under the direction of the directors hereinafter named, subject to such rules, limitations and conditions, as by them shall be prescribed; and the stock of the said corporation shall be deemed and considered personal property.

§ 3. The stock, property and affairs of the said corporation shall be managed and conducted by or under the direction of fifteen directors, being stockholders and citizens of this state; that the said directors shall hold their office for one year from the third Monday of January in each year, and shall be elected on the second Monday of January in each year, at such time and place within the city of New York as a majority of the directors for the time being shall appoint; and that notice of such election shall be published in at least two of the public newspapers printed in the city of New York, at least fourteen days previous to the time of holding such election;

and every such election shall be by ballot, and by such of the
6977 stockholders who shall attend for that purpose, either in person or by proxy; and each stockholder shall be entitled to one vote for each share of the stock which he or she may have held in his or her own name, for at least fourteen days before the time of voting; and the persons having the greatest number of votes shall be the directors; and if it shall happen that two or more persons have an equal number of votes, the directors in office at the time of such election shall, by a plurality of votes given by ballot, determine which of the persons so having an equal number of votes shall be director or directors, so as to complete the whole number to be chosen; and the directors so chosen shall, as soon as may be thereafter, proceed by ballot to elect one of their number for their president; and if any director shall remove out of this state, or cease to be a stockholder, or shall resign, his office shall be vacant; and whenever any vacancy shall happen, the same shall be filled up by the remaining directors, by plurality of votes, until the next annual election.

§ 4. That Robert McDermut, Moses Judah, Noah Jarvis, Thomas Bloodgood, Charles A. Davis, William T. McCoun, Mordecai Myers, William L. Morris, Samuel L. Gouverneur, David C. Colden, Charles Henry Hall, Seth Geer, James Wallace and Charles Graham shall be the first directors of the said company, who shall hold their offices until the third Monday in January in the year one thousand eight hundred and thirty-two, and until others are chosen in their places; and they shall proceed to choose their president at such time and place as they or a majority of them shall determine.

§ 5. In case it shall at any time happen that an election for directors shall not take place on the day appointed by this
6978 act for that purpose, the said corporation shall not, for that cause, or for any non-user, be deemed to be dissolved, but it shall and may be lawful to hold an election for directors on any other day, in such manner as shall be provided for by the by-laws of the said corporation.

§ 6. It shall and may be lawful for the directors, or a majority of them, to require payment of the subscription to the capital stock of the said corporation, at such times and in such proportions as they or a majority of them shall deem fit, under the penalty of forfeiting all previous payment or payments thereon; and that previous notice of the instalments required to be paid, after the first, and of the time when the same are to be paid, shall be published at least fourteen days, in two of the public newspapers printed in the city of New York.

§ 7. If any person or persons shall wilfully do, or cause to be done, any act or acts whatever, whereby the works of the said corporation, or any pipe, conduit, plug, cock, reservoir, or any engine, machine or structure, or any matter or thing appertaining to the same, shall be stopped, obstructed, impaired, weakened, injured or destroyed, the person or persons so offending shall forfeit and pay to the said corporation double the amount of the damage sustained by means of such offense or injury, to be recovered in the name of the said corporation, with costs of suit, in an action of debt, to be brought in any court having cognizance thereof.

§ 8. In addition to the powers herein before enumerated, the corporation hereby created shall have and possess all the powers and privileges, and be subject to all the liabilities, contained in title three of chapter eighteen of the first part of the Revised
6979 Statutes; and all the provisions thereof shall apply to this corporation.

§ 9. This act shall be deemed a public act, and shall be benignly and favorably construed, for the purposes herein expressed and declared, in all courts and places whatsoever.

§ 10. This act shall not take effect unless the American Gas Light Company shall, within sixty days from the passage thereof, surrender all their chartered privileges, under the act entitled, "An act to incorporate the American Gas Light Company," passed March 17, 1827.

COMPLAINANT'S EXHIBIT 6.

CHAP. 163.

AN ACT *to provide for increasing the capital stock of the Manhattan Gas Light Company, of the city of New York.*

Passed April 29, 1847.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

§ 1. The capital stock of the Manhattan Gas Light Company, of the city of New York, incorporated by an act entitled, "An act to incorporate the Manhattan Gas Light Company," passed February 26, 1830, is hereby increased to one million of dollars, to consist of shares of fifty dollars each; and books shall be opened for subscriptions from time to time, in such manner, and under such rules, limitations and conditions as shall be prescribed by the by-laws of said company.

6980 § 2. Such company shall be authorized to hold such real and personal estate as shall be necessary for their manufacturing and business purposes, and no more.

§ 3. The whole amount of debts and liabilities of such company shall not, at any one time, exceed fifty per cent. of the amount of capital actually paid in, and if such amount shall at any time exceed said fifty per cent., the stockholders of such company, who were such at the time such excess shall be incurred, shall be individually, jointly and severally liable for such excess, and any one or more such stockholders, who may be so liable, may be made parties in the same suit, for the collection thereof; provided, such stockholders shall not be individually liable beyond the amount of said excess.

§ 4. Said company shall, at all times, keep a book at their office or usual place of business, in the city of New York, which shall be open to the free inspection of all persons who may desire to inspect the same, at all usual business hours and days of the city of New York, which shall contain an accurate alphabetical list of all stockholders and amounts of stock respectively held by them and showing the time they became such, the amount of capital actually paid in, and the whole amount of debts and liabilities of the company, and such book shall be presumptive evidence, in all places, of what it purports to contain and set forth, in any suit or proceeding against said company, or the stockholders thereof.

§ 5. This act shall take effect immediately.

6981

COMPLAINANT'S EXHIBIT 7.

CHAP. 89.

AN ACT *to increase the Capital Stock of the "Manhattan Gas Light Company" of the city of New York.*

Passed March 25, 1852.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

§ 1. The capital stock of the Manhattan Gas Light Company, of the city of New York, incorporated by an act entitled, "An act to incorporate the Manhattan Gas Light Company," passed February 26, 1830, may be increased one million dollars at such time as the board of directors may prescribe.

§ 2. This act shall take effect immediately.

COMPLAINANT'S EXHIBIT 8.

CHAP. 543.

AN ACT *to increase the capital stock of the Manhattan Gas Light Company of [illegible] city of New York.*

Passed April 17, 1855.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

§ 1. The capital stock of the Manhattan Gas Light Company, of the city of New York, incorporated by an act entitled, "An act to incorporate the Manhattan Gas Light Company," passed February 26, 1830, may be increased two million dollars at such times 6982 and in such manner as the board of directors may prescribe, by resolution of such board. In case such board shall not adopt such resolution within six months from the passage of this act, the said capital stock shall not be so increased.

§ 2. Said company shall supply to every inhabitant of the said city of New York who shall request it, and who shall pay for the same, such inflammable gas made by them as he or she may require, provided said gas is required where the mains or pipes of said company are now or may be hereafter laid, at a price not exceeding three dollars per thousand cubic feet, for the period of one year after the adoption of the resolution named in the foregoing section, and after the expiration of that period, at a price not exceeding two dollars and fifty cents per thousand cubic feet.

§ 3. This act shall take effect immediately.

COMPLAINANT'S EXHIBIT 9.

Pursuant to the provisions of an Act, entitled, "An Act to amend Chapter 37 of the Laws of 1848, entitled 'an act to authorize the formation of Gas Light Companies'" passed April 20, 1867. We, the undersigned, holders of two thirds of the Capital Stock of The Manhattan Gas Light Company, a Gas Company incorporated by Special Act for the purpose of Manufacturing and supplying Gas in the City of New York, do hereby certify

That we desire to form a Company for the purpose of manufacturing and supplying Gas for lighting the streets and public and private buildings of the City of New York.

6983 That the Corporate name of the said Company is The Manhattan Gas Light Company.

That the objects for which the Company is formed are the manufacturing, making and selling gas to be used for the purpose of lighting the City of New York, the streets thereof and any buildings, manufactories, or houses therein contained and situate, and to lay pipes for the purpose of conducting the gas in the streets and avenues of said City.

That the amount of the Capital Stock of the said Company is Four Millions of Dollars

That the term of its existence is fifty years

That the number of shares of which said stock is to consist is eighty thousand

That the number of Directors is nine

That the names of the Directors who shall manage the concerns of the Company for the first year are Henry Young, Moses Taylor, John Alstyne, William H. Smith, John R. Ludlow, John I. Cisco, Benjamin W. Bonney, Samuel Sloan, Charles Roome, and that the operations of the Company are to be carried on in the City and County of New York

In witness whereof we have signed these presents, in duplicate, this sixth day of September one thousand eight hundred and sixty-seven.

ber in the year aforesaid, Frederick Bronson, Frederick Bronson, Executor, Frederick Bronson, Attorney, Mary E. Sayres, Edward Crary, Samuel H. Howard, Trustee, Henry H. Ward, all of whom the said persons above named I then knew, and now know, to be stockholders in The Manhattan Gas Light Company, and to be individuals who signed and executed the foregoing certificate; and the said persons then, in my presence, severally signed the said certificate, and acknowledged that they executed the same; and on the thirtieth day of October, in the said year one thousand eight 6998 hundred and sixty-seven, personally came before me Marcus P. Woodruff, whom I know to be the individual, who, as the attorney of Isaac O. Woodruff, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney for that purpose, duly constituted by the said Isaac O. Woodruff, and the said Marcus P. Woodruff, as such attorney, then, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said Isaac O. Woodruff; and on the said thirtieth day of October, Personally came before me Marcus P. Woodruff, whom I know to be the individual who, as the attorney of Arethusa H. Woodruff, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney for that purpose, duly constituted by the — Arethusa H. Woodruff, and the said Marcus P. Woodruff, as such attorney, then, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said Arethusa H. Woodruff; and on the thirty-first day of October, in the year aforesaid, before me personally came Henry Young, whom I know to be the individual, who, as the attorney of Henry L. Young, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney for that purpose duly constituted by the said Henry L. Young, and the said Henry Young, as such attorney, then, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said Henry L. Young; and on the said thirty-first day of October, in the year aforesaid, before me personally came William P. 6999 Powers, whom I know to be the individual, who as the attorney of Ann Craig, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney for that purpose duly constituted by the said Ann Craig, and the said William P. Powers, as such attorney, then, in my presence, signed said certificate and acknowledged that he executed the same as the act and deed of the said Ann Craig; and on the said thirty-first day of October, in the year aforesaid, personally came before me Jeremiah Wilbur, whom I know to be the individual, who, as the attorney of Anna M. Bulkley, a stockholder in the Manhattan Gas-Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney, for that purpose duly constituted by the said Anna M. Bulkley, and the said Jeremiah Wilbur,

then, as such attorney, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said Anna M. Bulkley, and on the said thirty-first day of October, in the year aforesaid before me personally came Jeremiah Wilbur, whom I know to be the individual who as the attorney of Harriet J. Rogers, a stockholder in the Manhattan Gas-Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney for that purpose duly constituted by the said Harriet J. Rogers, and the said Jeremiah Wilbur, as such attorney, then, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said Harriet J. Rogers; and on the twelfth day of November, in the year aforesaid, before me personally came Moses Taylor, whom I know to be the individual who as the attorney of Mary Lewis, a stockholder in The Manhattan Gas-Light Company, signed and
7000 executed the foregoing certificate, and whom I then knew and now know to be the attorney for that purpose duly constituted by the said Mary Lewis, and the said Moses Taylor, as such attorney, then, in my presence, signed the said certificate, and acknowledged that he executed the same, as the act and deed of the said Mary Lewis.

And on the said twelfth day of November, before me personally came Moses Taylor, whom I know to be the individual who as the attorney of John D. Wolfe, a stockholder, in The Manhattan Gas-Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney for that purpose duly constituted by the said John D. Wolfe, and the said Moses Taylor, as such attorney, then, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said John D. Wolfe; and on the said twelfth day of November, before me personally came Moses Taylor, whom I know to be the individual who as the attorney of William H. Smith, a stockholder in The Manhattan Gas-Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney for that purpose duly constituted by the said William H. Smith, and the said Moses Taylor, as such attorney, then, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said William H. Smith; and on the said twelfth day of November, before me, personally came Moses Taylor, whom I know to be the individual who as the attorney of David W. Bishop, a stockholder in The Manhattan Gas-Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney for that purpose duly constituted by the said David W. Bishop, and the
7001 said Moses Taylor as such attorney, then, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said David W. Bishop; and on the said twelfth day of November, before me personally came Moses Taylor, whom I know to be the individual who signed and executed the foregoing certificate as the attorney of David W. Bishop, Executor of the last will and testament of Japhet Bishop,

deceased, the said David W. Bishop, Executor as aforesaid, being a stockholder in the Manhattan Gas Light Company, and whom I also know to be the attorney for that purpose duly constituted by the said David W. Bishop, Executor as aforesaid, and the said Moses Taylor, as such attorney, then, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said David W. Bishop, Executor as aforesaid; and on the said twelfth day of November, before me personally came Moses Taylor, whom I know to be the individual who, as the attorney of Henry A. Hurlbut, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew, and now know, to be the attorney for that purpose, duly constituted by the said Henry A. Hurlbut, and the said Moses Taylor, as such attorney, then, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said Henry A. Hurlbut; and on the twenty-fifth day of November, in the year aforesaid, before me personally came Samuel H. Howard, whom I know to be the individual who, as the attorney of John H. Watkinson, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew, and now know to be the attorney for that purpose duly constituted by the said John W. Watkinson; and the said Samuel H. Howard, as such attorney, 7002
then in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said John H. Watkinson; and on the said twenty-fifth day of November, in the year aforesaid, before me personally came Samuel H. Howard, whom I know to be the individual who, as the attorney of Abner J. Leavenworth, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney for that purpose duly constituted by the said Abner J. Leavenworth, and the said Samuel H. Howard, as such attorney, then, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said Abner J. Leavenworth; and on the said twenty-fifth day of November, in the year aforesaid, before me personally came Samuel H. Howard, whom I know to be the individual who, as the attorney of Robert Donaldson, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew, and now know to be the attorney for that purpose duly constituted by the said Robert Donaldson, and the said Samuel H. Howard as such attorney, then, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said Robert Donaldson; and on the said twenty-fifth day of November, in the year aforesaid, before me personally came Samuel H. Howard, whom I know to be the individual who, as the attorney of Samuel B. Gardiner, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew, and now know to be the attorney for that purpose duly constituted by the said Samuel B. Gardiner;

and the said Samuel H. Howard, as such attorney, then in
7003 my presence signed the said certificate, and acknowledged
that he executed the same as the act and deed of the said Samuel B. Gardiner; and on the said twenty-fifth day of November, in the year aforesaid, before me personally came Samuel H. Howard, whom I know to be the individual who, as the attorney of Charles H. Minot, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew, and now know to be the attorney for that purpose duly constituted by the said Charles Minot, and the said Samuel H. Howard, as such attorney, then in my presence signed the said certificate, and acknowledged that he executed the same as the act and deed of the said Charles H. Minot; and on the said twenty-fifth day of November, in the year aforesaid, before me personally came Samuel H. Howard, whom I know to be the individual who, as the attorney of George H. Norman, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney for that purpose, duly constituted by the said George H. Norman, and the said Samuel H. Howard, as such attorney, then in my presence signed the said certificate, and acknowledged that he executed the same as the act and deed of the said George H. Norman; and on the said twenty-fifth day of November, in the year aforesaid, before me personally came Samuel H. Howard, whom I know to be the individual who, as the attorney of Edward M. Osborn, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney, for that purpose duly constituted, by the said Edward M. Osborn, and the said Samuel H. Howard, as such attorney, then in my
presence signed the said certificate and acknowledged that he
7004 executed the same as the act and deed of the said Edward
M. Osborn; and on the said twenty-fifth day of November, in the year aforesaid, before me personally came N. W. H. Judson, whom I know to be the individual who, as the attorney of Mary R. Miller, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney for that purpose duly constituted, of the said Mary R. Miller, and the said N. W. H. Judson, as such attorney, then in my presence signed the said certificate and acknowledged that he executed the same as the act and deed of the said Mary R. Miller; and on the twenty-seventh day of December, in the year aforesaid, before me personally came John T. Lord, whom I know to be the individual who, as the attorney of George W. Taylor, sole surviving executor of James S. Taylor, deceased, and a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney, for that purpose duly constituted by the said George W. Taylor, sole surviving executor as aforesaid, and the said John T. Lord, as such attorney, then in my presence signed the said certificate and acknowledged that he executed the same as the act and deed of the said George W. Taylor, sole surviving executor as afore-

said; and on the said twenty-seventh day of December, in the year aforesaid, before me personally came Samuel H. Howard, whom I know to be the individual who as the attorney of Eliza P. Toole, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney, for that purpose duly constituted by the said Eliza P. Toole, and the said Samuel H. Howard, as such attorney, then in my presence signed the said certificate and 7005 acknowledged that he executed the same as the act and deed of the said Eliza P. Toole; and on the said twenty-seventh day of December, in the year aforesaid, before me personally came Samuel H. Howard, whom I know to be the individual who, as the attorney of Smith Woodhull, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew, and now know to be the attorney for that purpose duly constituted by the said Smith Woodhull, and the said Samuel H. Howard, as such attorney, then in my presence signed the said certificate, and acknowledged that he executed the same as the act and deed of the said Smith Woodhull; and on the said twenty-seventh day of December, in the year aforesaid, before me personally came Samuel H. Howard, whom I know to be the individual who, as the attorney of Delia Perry, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney, for that purpose duly constituted by the said Delia Perry, and the said Samuel H. Howard, as such attorney, then in my presence signed the said certificate, and acknowledged that he executed the same as the act and deed of the said Delia Perry; and on the said twenty-seventh day of December, in the year aforesaid, before me personally came Samuel H. Howard, whom I know to be the individual who, as the attorney of Diedrich Knubel, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew, and now know to be the attorney for that purpose duly constituted by the said Diedrich Knubel, and the said Samuel H. Howard, as such attorney, then, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of the said Died- 7006 rich Knubel; and on the said twenty-seventh day of December before me personally came Samuel H. Howard, whom I know to be the individual who, as the attorney of William Barton, a stockholder in The Manhattan Gas Light Company, signed and executed the foregoing certificate, and whom I then knew and now know to be the attorney, for that purpose duly constituted by the said William Barton, and the said Samuel H. Howard, as such attorney, then, in my presence signed the said certificate and acknowledged that he executed the same as the act and deed of the said William Barton; and before me personally came on the said twenty-seventh day of December, H. R. Baltzer and William G. Taaks, composing the firm of Baltzer & Taaks, John J. Cisco and John A. Cisco, composing the firm of John J. Cisco & Son, Henry H. Ward, Ezra P. Davis, Julia Battersby, Charlotte Brinkerhoff, Louisa Troup and Lucretia Salisbury, and on the twenty-eighth day of December, in the year aforesaid, Alexander Van Rennselear, all of whom I then knew and now know to be stockholders in The Manhattan Gas Light Company, and to be individuals who signed and executed the foregoing certificate, and the said persons, then, in my presence severally signed the said certificate and acknowledged that they executed the same.

In witness whereof, I have hereunto set my hand and affixed my notarial Seal at the city of New York, this thirtieth day of December, in the year one thousand eight hundred and sixty-seven.

[L. S.] THOS. STEVENSON,
Notary Public.

7007 STATE OF NEW YORK, *City and County of New York, ss:*

I, William C. Conner, Clerk of the City and County of New York, and also Clerk of the Supreme Court for the said City and County, the same being a Court of Record, do hereby certify that Thomas Stevenson, whose name is subscribed to the certificate of the proof or acknowledgment of the annexed instrument and thereon written, was at the time of taking such proof or acknowledgment a Notary Public in and for the City and County of New York, dwelling in the said city, commissioned and sworn and duly authorized to take the same. And further that I am well acquainted with the handwriting of such notary and verily believe that the signature to the said certificate of proof or acknowledgment is genuine. I further certify that said instrument is executed and acknowledged according to the law of the State of New York.

In Testimony Whereof, I have hereunto set my hand and affixed the seal of the said Court and County the 30th day of December, 1867.

[5 ct. stamp]

WM. C. CONNER, *Clerk.*

7008 STATE OF NEW YORK, *City and County of New York, ss:*

Before me, Richard C. Greene, a Commissioner of Deeds, duly commissioned and sworn, dwelling in the city and county of New York at the times hereinafter set forth personally came the following named persons, viz.: On the second day of December, in the year one thousand eight hundred and sixty-seven, Francis Tomes, Jr., and John C. Parsons; on the third day of December, in the year one thousand eight hundred and sixty-seven, George W. Welsh, William R. Talbot and Cynthia A. Allen, and on the twenty-sixth day of December, in the year aforesaid, George Rudd, all of whom the said persons above named I then knew and now know to be stockholders in The Manhattan Gas Light Company, and to be individuals who signed and executed the foregoing certificate of organization, and the said persons then, in my presence, severally signed the said certificate and acknowledged that they executed the same.

And on the second day of December, in the year aforesaid, before me also personally came John C. Parsons, trustee of Mary H. Webb and of Mrs. E. S. Newton, and whom I then knew and now know to be a stockholder in The Manhattan Gas Light Company, and to be one of the individuals who signed the foregoing certificate, and the said John C. Parsons, trustee as aforesaid, then in my presence, signed the said certificate and acknowledged that he executed the same.

And on the twenty-sixth day of December, in the year aforesaid, before me personally came George T. Trimble, whom I know to be the Treasurer of The Roosevelt Hospital, a corporation in the city of New York, and which said Hospital is a stockholder in The
7009 Manhattan Gas Light Company, and to be one of the individuals who signed the foregoing certificate; and the said George T. Trimble, Treasurer as aforesaid, then, in my presence, signed the said certificate, and acknowledged that he executed the same as the act and deed of The Roosevelt Hospital aforesaid, and being by me duly affirmed, did say that he resided in the city of New York, that he was Treasurer of said The Roosevelt Hospital, and that he so signed and acknowledged the execution of said certificate by authority of said corporation.

And on the twenty-eighth day of December, in the year aforesaid, before me personally came A. Major and J. H. McKim, whom I then knew and now know to be stockholders in The Manhattan Gas Light Company, and to be individuals who signed and executed the foregoing certificate, and the said persons then, in my presence, severally signed the said certificate, and acknowledged that they executed the same.

In witness whereof, I have hereunto set my hand at the City of New York, this thirtieth day of December, in the year one thousand eight hundred and sixty-seven.

RICHD. C. GREENE,
Commissioner of Deeds.

STATE OF NEW YORK, *City and County of New York, ss:*

I, William C. Connor, Clerk of the City and County of New York, and also Clerk of the Supreme Court for the said City and County, the same being a Court of Record, do hereby certify that Richard C. Green, whose name is subscribed to the certificate of the proof or acknowledgment of the annexed instrument and thereon
7010 written, was at the time of taking such proof or acknowledgment a Commissioner of Deeds in and for the City and County of New York, dwelling in the said city, commissioned and sworn and duly authorized to take the same. And further that I am well acquainted with the handwriting of such commissioner and verily believe that the signature to the said certificate of proof or acknowledgment is genuine. I further certify that said instrument is executed and acknowledged according to the law of the State of New York.

In testimony whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 30th day of December, 1867.

[5c. stamp]

WM. C. CONNER,
Chief Clerk.

STATE OF NEW YORK, *Office of the Secretary of State:*

I have compared the preceding with the original certificate of organization of The Manhattan Gas Light Company, with acknowledgment thereto annexed, filed in this office on the thirty-first day of December, 1867, and hereby certify the same to be a correct transcript therefrom and of the whole of said original.

Witness my hand and seal of office of the Secretary of State at the city of Albany, this thirty-first day of December, one thousand eight hundred and sixty-seven.

[L. S.] ERASTUS CLARKE,
Deputy Secretary of State.

7011 STATE OF NEW YORK, *City and County of New York, ss:*

I, William C. Conner, Clerk of the said city and county, and Clerk of the Supreme Court of said state for said county, do certify that I have compared the preceding with the original certificate of organization of the "Manhattan Gas Light Company," on file in my office, and that the same is a correct transcript therefrom, and of the whole of such original.

In witness whereof I have hereunto subscribed my name and affixed my official seal, this thirtieth day of December, 1867.

[L. S.] W. C. CONNER, *Clerk.*

COMPLAINANT'S EXHIBIT 10.

CHAP. 545.

AN ACT *to incorporate the Metropolitan Gas Light Company of the city of New York.*

Passed April 17, 1855.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

§ 1. That James Bowen, James Freeborn, William H. Edwards, Rufus F. Andrews, John Callaghan, Charles Spear, Isaac M. Marsh, John H. Platt, Charles W. Baker, Hugh Smith, William McDermott and Isaac H. Cady, and their present and future associates, shall be and are hereby created, constituted and declared to be a body politic and corporate by the name of "The Metropolitan Gas Light Company of the City of New York," with full power and authority at any time hereafter to manufacture, make and sell gas, to be 7012 made of coal, oil, tar, peat, pitch and turpentine or other materials, and to be used for the purpose of lighting the city of New York, and the streets, avenues, lanes, alleys and squares thereof, and any building, manufactories or houses therein contained and situate, and to lay pipes for the purpose of conducting the gas in any of the streets, avenues, lanes, alleys and squares of the said city, and to adopt any other necessary means to furnish gas to any inhabitant of said city, and also that the said company will so conduct their manufactory or manufactories of gas as not to create a nuisance, and that no public street, avenue, lane, alley, square or highway in the said city shall be dug into or defaced or other means adopted in regard thereto for the purpose aforesaid, without the permission of the two boards of the Common Council of said city first had and obtained, and the said boards are hereby authorized to grant and vest exclusive permission and authority to and in said company for said purposes to such extent and under such regulations as to them shall seem expedient, and such permission and authority shall be conclusive and shall continue as thus fixed during the period designated by said boards at the time of granting the same. But the rights and privileges hereby granted shall not be construed to affect or impair any exclusive rights or privileges vested in any incorporated company in said city.

§ 2. That the capital stock of this corporation shall not exceed two million, five hundred thousand dollars. And that a share in the same shall be one hundred dollars; and books of subscription to the said capital stock or to such portion thereof as from time to time may, by the directors, for the time being, be deemed proper and necessary shall be opened by the appointment or under the direction
of the directors hereinafter named subject to such rules lim-
7013 itations and conditions as by them shall be prescribed; and
the stock of the said corporation shall be deemed and considered personal property.

§ 3. The stock, property and affairs of the said corporation shall be managed and conducted by or under the direction of twelve directors, being stockholders and citizens of this state; that the said directors shall hold their offices for one year, except as provided in Section 4 of this act, and shall be elected at such time and place within the city of New York as a majority of the directors for the time being shall appoint, and that notice of such election shall be given in at least two of the public newspapers printed in the city of New York, at least fourteen days previous to the time of holding such election, and every such election shall be by ballot and by such of the stockholders who shall attend for that purpose, either in person or by proxy, and each stockholder shall be entitled to one vote for each share of the stock which he or she may have held in his or her own name for at least fourteen days before the time of voting, and the persons having the greatest number of votes shall be the directors, and if it shall happen that two or more persons shall have an equal number of votes the directors in office at the time of election shall, by a plurality of votes given by ballot, determine which of the persons so having an equal number of votes shall be director or directors, so as to complete the whole number to be chosen; and the directors so chosen shall, as soon as may be thereafter, proceed by ballot to elect one of their number president, and if any director shall remove out of this state, or cease to be a stockholder, or shall resign, his office shall be vacant, and whenever any vacancy shall
happen the same shall be filled up by the remaining directors
7014 by a plurality for the unexpired term, except as provided in
Section 4 of this act.

§ 4. That James Bowen, Isaac H. Cady, Rufus F. Andrews, Charles W. Baker, James F. Freeborn, John Callaghan, Isaac M. Marsh, Hugh Smith, William McDermott, William H. Edwards, John H. Platt and Charles Spear shall be the first directors of the said company, who shall hold their offices until one year after the said company shall be organized and in practical operation, and until others are chosen in their places, and they shall proceed to choose their president at such time and place as they or a majority of them shall determine. Any of the above named directors on resigning may designate the person or persons to fill the vacancy, provided that the person or persons so designated are stockholders of said company, for the unexpired term. Vacancies by death shall be filled by the remaining directors by a plurality, for the unexpired term.

§ 5. Each stockholder of any company formed under this act shall be individually liable to the creditors of such company, to an amount equal to the amount of the stock held by him, for all the debts and liabilities of such company, until the whole amount of the capital stock so held by him shall have been paid into the company, and all the stockholders of any such company shall be jointly and severally liable for all the debts due or owing to any of its laborers and servants for services performed for said corporation, but shall not be liable for an action therefor before an execution shall be returned unsatisfied in whole or in part against the corporation, and then the amount due on such execution shall be the amount recoverable with costs against such stockholders.

7015 § 6. Every corporation formed under this act shall, in addition to the powers hereinbefore conferred, and the powers conferred on corporations in the third title of the eighteenth chapter of the first part of the Revised Statutes, have power:

1. To purchase and hold real estate.
2. To erect and maintain all necessary and convenient buildings, fixtures and machinery, for the aforesaid purposes, or incident or necessary thereto.
3. From time to time to borrow such sums of money as may be necessary for the aforesaid objects, and to issue and dispose of their bonds for any amount so borrowed, and to mortgage their corporate property and franchises to secure the payment of any debt contracted by the company for the purposes aforesaid; and the directors of the company may confer on any holder of any bond issued for money borrowed as aforesaid, the right to convert the principal due or owing thereon into stock of said company, at any time not exceeding ten years from the date of the bond, under such regulations as the directors may see fit to adopt.

§ 7. It shall and may be lawful for the directors or a majority of them to require payment of the subscription to the capital stock of the said corporation, at such times and in such proportions as they or a majority of them shall deem fit, under the penalty of forfeiting any previous payment or payments thereon; and that previous notice of the instalments required to be paid, after the first, and of the time when the same are to be paid, shall be published at least fourteen days in two of the public newspapers printed in the 7016 city of New York; provided that no such forfeiture shall be made until the company shall be organized and in practical operation.

§ 8. If any person or persons wilfully do or cause to be done any act or acts whatever, whereby the works of the said corporation, or any pipe, conduit, plug, cock, reservoir, or any engine, machine or structure, or any matter or thing appertaining to the same, shall be stopped, obstructed, or impaired, weakened, injured or destroyed, the person or persons so offending shall forfeit and pay to the said corporation treble the amount of the damage sustained by means of such offence or injury, to be recovered in the name of the said corporation, with costs of suit, in any court having cognizance thereof.

§ 9. The said company shall be deemed to be organized when the president shall be elected, and shall be deemed to be in practical operation from the time the permission and authority provided for in the first section is obtained.

§ 10. The said company may receive, in lieu of cash subscriptions, property suitable to be used for its purposes, at a valuation to be agreed upon.

§ 11. This act shall be deemed a public act, and shall be favorably construed for the purposes herein expressed, and declared in all courts and places whatsoever.

7017 COMPLAINANT'S EXHIBIT 11.

CHAP. 476.

AN ACT *to provide for the payment of certain certificates of indebtedness of the Metropolitan Gas Light Company of the city of New York.*

Passed June 8, 1881; three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

§ 1. The Metropolitan Gas Light Company of the city of New York, in order to provide for the payment of the outstanding scrip certificates of the company, issued March 24 and November 30, 1870, may, by resolution of the board of directors of the company, issue its bonds to an amount not exceeding the sum of nine hundred thousand dollars, payable within twenty years, the money so provided by the issue of the bonds of the company, as herein provided, to be applied to the payment of the said certificates outstanding, and to no other purpose whatever.

§ 2. This act shall take effect immediately.

COMPLAINANT'S EXHIBIT 12.

CERTIFICATE OF REORGANIZATION UNDER GENERAL LAWS OF 1848 OF THE NEW YORK GAS LIGHT COMPANY.

READ ON BEHALF OF COMPLAINANTS.

(Filed in office of N. Y. County Clerk June 1, 1871.)

(Filed in office of Secretary of State June 1, 1871.)

7018 Pursuant to the provisions of an Act entitled "An Act to amend Chapter 37 of the Laws of 1848, entitled An Act to authorize the formation of Gas Light Companies," passed April 20, 1867, we, the undersigned, owners of two-thirds of the Capital Stock of the New York Gas Light Company, a Gas Company incorporated by special Act for the purpose of manufacturing and supplying gas in the City of New York, do hereby certify:

That we desire to form a Company for the purpose of manufacturing and supplying gas for lighting the streets and public and private buildings of the City of New York;

That the corporate name of the said Company is the New York Gas Light Company;

That the objects for which the Company is formed are the manufacturing, making and selling gas to be used for the purpose of lighting the City of New York, the streets thereof, and any buildings, manufactories or houses therein contained and situate, and to lay pipes for the purpose of conducting gas in the streets and avenues of said City.

That the amount of the Capital Stock of the said Company is four millions of dollars.

That the term of its existence is fifty years.

That the number of shares of which said Stock is to consist is forty thousand.

That the number of Directors is nine.

That the names of the Directors who shall manage the concerns of the Company for the first year are Joseph Sampson, William A. Hadden, James R. Taylor, Cornelius L. Everitt, Henry R. Remsen, Moses Taylor, John J. Astor, Frederick W. Stevens and Thomas K. Lee, and that the operations of the Company are to be carried on in the City and County of New York.

In Witness Whereof, we have signed these presents in duplicate this first day of May, one thousand eight hundred and seventy-one.

(U. S. int. rev. 5c. stamp, cancelled.)

(Here follow signatures and acknowledgments.)

7019 COMPLAINANT'S EXHIBIT 13.

CERTIFICATE OF INCORPORATION OF THE HARLEM GAS LIGHT COMPANY.

READ ON BEHALF OF COMPLAINANTS.

We, Burr Wakeman, Henry P. McGown, Walter Brady, Lemuel Arnold and John M. Reed, all of the City and County of New York, whose names are hereunto subscribed, being desirous to form a Company for the purpose of manufacturing and supplying gas for lighting the streets and public and private buildings, and for other purposes, situated and being in all that part of the City and County of New York lying north of the center line of Seventy-ninth Street in said City,

Do for that purpose make and sign and acknowledge, this certificate by which we certify that the corporate name of said Company shall be and is "The Harlem Gas Light Company" and

That the objects for which said Company is intended to be formed are the manufacturing and supplying gas for lighting the streets and the public and private buildings and for other purposes, situated and being in all that part of the City and County of New York lying north of the center line of Seventy-ninth Street in said City.

That the amount of the Capital Stock of said Company shall be and is one hundred and twenty thousand dollars to be divided into two thousand four hundred shares of fifty dollars each.

That the term of existence of said corporation shall be fifty years.

That the number of the Directors of said Company shall be five, and that Burr Wakeman, Henry P. McGown, Walter Brady, Lemuel Arnold and John M. Reed, hereinbefore named, shall be Directors of said corporation for the first year, and that the operations 7020 of said Company are intended to be and shall be carried on in the City and County of New York.

This certificate is made, signed and acknowledged in said City and County of New York before Joseph O. Brown, a Commissioner of Deeds in and for the City and County of New York, an officer competent to take the acknowledgment of deeds, to the intent that he shall duly certify to such making, signing and acknowledgment and with intent that the same shall be filed in the office of the Clerk of said City and County, and a duplicate thereof in the office of the Secretary of State, the whole to be done with intent thereby to form a corporation under and pursuant to the provisions of the Act entitled "An Act to authorize the formation of Gas Light Companies," passed February 16, 1848, and any amendment thereof.

Made, signed and acknowledged in duplicate in the City and County of New York this first day of February in the year of one thousand eight hundred and fifty-five.

In the presence of
JOS. O. BROWN.

BURR WAKEMAN. [SEAL.]
HENRY P. McGOWN. [SEAL.]
WALTER BRADY. [SEAL.]
LEMUEL ARNOLD [SEAL.]
JOHN M. REED. [SEAL.]

STATE OF NEW YORK, *City and County of New York, ss:*

On the first day of February, A. D. eighteen fifty-five, before me came Burr Wakeman, Henry P. McGown, Walter Brady, Lemuel Arnold, John M. Reed, all known to me to be the individuals described in and who executed the foregoing certificate and acknowledged to me that they executed the same.

JOSEPH O. BROWN,
Commissioner of Deeds.

7021 STATE OF NEW YORK, *City and County of New York, ss:*

I, Richard B. Connelly, Clerk of the City and County of New York, do certify hereby, that Joseph O. Brown, whose name is subscribed to the certificate of proof or acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Commissioner of Deeds for said City and County, dwelling in the said City, commissioned, and sworn, and duly authorized to take the same, and further, that I am well acquainted with the handwriting of such Commissioner, and verily believe the said signature to the said certificate of proof or acknowledgment is genuine.

In Testimony Whereof, I have hereunto set my hand and affixed the seal of the County, the second day of February, eighteen fifty-five.

[SEAL.] RICH. B. CONNELLY, *Clerk.*

COMPLAINANT'S EXHIBIT 14.

CERTIFICATE OF INCREASE OF CAPITAL STOCK OF THE HARLEM GAS LIGHT COMPANY.

READ ON BEHALF OF COMPLAINANT'S.

We, Burr Wakeman, Chairman, and Henry P. McGown, Secretary, do hereby certify that a meeting of the Stockholders of "The Harlem Gas Light Company" was held at the office of the Company, corner First Avenue and One Hundred and Eleventh Street, in the City of New York, on the twenty-first day of June, A. D. One thousand eight hundred and sixty-nine, at ten (10) o'clock a. m. 7022 of that day, at which meeting seventeen thousand three hundred and seventeen (17,317) shares of the Capital Stock of said Company was represented, being more than two-thirds of all the shares of Stock of said Company.

That such meeting was held for the purpose of voting for or against increasing the Capital Stock of said Company the sum of ($1,000,000) one million dollars, the Capital Stock of said Company being previous to said meeting the sum of ($1,000,000) one million dollars, the proposed increase being one million dollars ($1,000,000), making the Capital Stock the sum of ($2,000,000) two million dollars, said meeting being held under, by virtue of, and in pursuance of the requirements of sections (20) twenty and (21) twenty-one of an Act entitled "An Act to authorize the formation of Gas Light Companies," passed February sixteenth, eighteen hundred and forty-eight, and Acts amendatory thereof.

That at such meeting Burr Wakeman, one of the Directors of said Company, was chosen Chairman of the meeting, and Henry P. McGown was chosen Secretary.

The said stockholders thereupon proceeded to vote for such proposed increase; that the polls were kept open until eleven o'clock a. m. of that day; that upon canvassing the votes cast it appeared that seventeen thousand three hundred and seventeen (17,317) shares of the Capital Stock of said Company had been voted upon, and that all of said votes cast were in favor of such proposed increase.

And we further certify, that a notice of such proposed increase, signed by all of the Directors of said Company, has been regularly published in the *Express*, a daily newspaper printed and published in the City and County of New York, for at least three successive weeks previous to the twenty-first day of June, one thousand eight hundred and sixty-nine, the time of holding such meeting as 7023 aforesaid, as appears by an affidavit of such publication hereto annexed, and also that a printed copy of such notice was deposited in the New York Post Office, addressed to each and every one of the stockholders of said Company, at his usual place of residence, at least three weeks previous to the day fixed upon for holding such meeting, as appears by the affidavit of N. Gano Dunn, annexed.

That (20,000) twenty thousand shares, being the whole of the Capital Stock of said Company, amounting to the sum of ($1,000,000)one million dollars, has actually been paid in. That the whole amount of the debts and liabilities of said Company does not exceed the sum of ($103,000) one hundred and three thousand dollars, and that the amount to which the Capital Stock is increased is the sum of ($2,000,000) two million dollars.

That this certificate is made, signed and acknowledged in said City and County of New York before N. Gano Dunn, a Notary Public in and for the City and County of New York, an officer competent and authorized to take the acknowledgment of deeds, to the intent that he shall duly certify to such signing and acknowledgment, and to the intent that the same shall be filed in the office of the Clerk of the City and County of New York, that being the County in which the business of said Company is carried on, and a duplicate thereof in the office of the Secretary of State, the whole to be done with the intent thereby to increase the Capital Stock of said Company the sum of ($1,000,000) one million dollars in pursuance of section twenty-two of act hereinbefore referred to, and any amendment thereof.

Made, signed and acknowledged in duplicate in the City and County of New York this twenty-first day of July, in the year One thousand eight hundred and sixty-nine.

BURR WAKEMAN.

In the presence of
N. GANO DUNN.
Attest:
HENRY P. McGOWN, *Secr'y.*

7024 STATE OF NEW YORK, *City and County of New York, ss:*

Burr Wakeman, of said City, being duly sworn, doth depose and say that the foregoing certificate, signed by him, is true to the best of his knowledge, information or belief, and further deponent saith not.

BURR WAKEMAN.

COMPLAINANT'S EXHIBIT 16.

ORDER CHANGING NAME OF MUNICIPAL OXYGEN GAS COMPANY TO MUNICIPAL GAS LIGHT COMPANY.

READ ON BEHALF OF COMPLAINANTS.

At a Special Term of the Supreme Court of the State of New York, in and for the County of New York, held at the Court House in the City of New York, on the fifth day of June, 1876.

Present: Hon. Charles Donohue, Justice.

In the Matter of the Application of THE MUNICIPAL OXYGEN GAS COMPANY OF THE CITY OF NEW YORK, for Leave to Change its Corporate Name and Assume the Name and Title of the Municipal Gas Light Company of New York.

7030 The Municipal Oxygen Gas Company of the City of New York, having applied by petition to this Court for leave to change its corporate name and to assume the name and title of the Municipal Gas Light Company of New York, in accordance with the provisions of the Statutes in such case made and provided;

And it appearing by said petition that notice of application for such change of name has been published for six weeks in the State paper, and in two newspapers in the City and County of New York, where the only business office and principal corporate property of said Corporation are situate, one of the said newspapers being one of those designated to publish the Session Laws in and for said County; and also that such application was made in pursuance of a resolution of the Board of Directors of said Corporation; and it appearing to the satisfaction of this Court that there is no reasonable objection to granting such petition, and allowing said corporation to change its name and assume the name and title mentioned in said petition.

Now, on reading and filing said petition, and on motion of Varnum and Harison, of counsel for the petitioners, it is ordered that the prayer of said petition be and the same hereby is granted, and that the said Municipal Oxygen Gas Company of the City of New York be and they are hereby authorized, from and after the seventh day of July, 1876, to change their name and assume, be known by and use the name and title of the "Municipal Gas Light Company of New York," upon complying with the provisions and requirements of the Statutes in such case made and provided.

And it is further ordered that a copy of this order be filed in the office of the Secretary of State and with the Clerk of the City and County of New York, and be published once in each week for four weeks successively in the *Daily Register*, a newspaper published in the City and County of New York.

CHARLES DONOHUE, *J. S. C.*

7031 STATE OF NEW YORK, *City and County of New York, ss:*

I, William Walsh, Clerk of the City and County, and Clerk of the Supreme Court of said State for said County, do certify, that I have compared the preceding with the original order for change of name on file in my office, and that the same is a correct transcript therefrom, and of the whole of such original.

Endorsed, filed and recorded 7 June, 1876, 11 h. 40 m.

In Witness Whereof, I have hereunto subscribed my name and affixed my official seal this 7th day of June, 1876.

[SEAL.] WM. WALSH, *Clerk.*

COMPLAINANT'S EXHIBIT 17.

CERTIFICATE OF INCREASE OF STOCK OF THE MUNICIPAL GAS LIGHT COMPANY OF NEW YORK.

READ ON BEHALF OF COMPLAINANTS.

STATE OF NEW YORK, *City and County of New York, ss:*

This is to certify that a meeting of the stockholders of the Municipal Gas Light Company of New York was held at the office of the company, No. 360 Fourth Avenue, New York City, on the 26th day of February, 1880, pursuant to a notice signed by C. G. Francklyn, Peter Gardner, George W. King, Oswald O. Hendorfer, E. Stern, William Schwartzwaelder, L. Delmonico, S. Hawk and Samuel C. Thompson, stating that a meeting of the stockholders of said 7032 company would be held at the office of the said Company, No. 360 Fourth Avenut, New York City, on Thursday, the 26th day of February, one thousand eight hundred and eighty, between the hours of noon and one o'clock p. m., and that the object of such meeting was to increase the Capital Stock of the Company pursuant to law from two millions of dollars to three millions of dollars.

That said notice was duly published in the *Evening Post,* a newspaper published in the County of New York, in which the business of the Company is carried on, for three successive weeks, and that a printed copy of such notice addressed to each stockholder of said Company was deposited in the post office in the City of New York at least three weeks previous to the date fixed upon for holding such meeting (a copy of said notice with due proof of the publication thereof and of the deposit of copies thereof in the post office addressed as above stated is hereto annexed).

That at the time and place specified in said notice stockholders appeared in person or by proxy in numbers representing more than two-thirds of all the shares of the Capital Stock of said Company and organized by choosing Mr. William Schwartzwaelder, one of the Directors of said Company, Chairman of the meeting, and Mr. Philip Allen, a suitable person, Secretary, and the meeting thereupon proceeded to a vote of those present in person and by proxy on the question of increasing the Capital Stock of said Company from two millions of dollars to three millions of dollars as specified in the notice of meeting, and on canvassing, it appeared that votes representing seventeen thousand and fourteen (17,014) shares, being more than two-thirds of all the shares of Stock of said Company, were cast and given in favor of increasing the Capital Stock of said Company from two millions of dollars to three millions of dollars and none against such increase.

7033 And it is further certified that the amount of the Capital Stock of the Company actually paid in and the whole amount of its debts and liabilities are as follows:

Seven thousand shares of said Stock (of the par value of seven hundred thousand dollars) have been issued in payment for patents, rights, lands, buildings, mains, and machinery transferred to the Company at fair valuations and valued at $700,000. Thirteen thousand shares of said stock of the par value of $1,300,000 have been subscribed for and their par value actually paid in in cash. The whole amount of the debts and liabilities of the Company is about and does not exceed $773,235.76, of which sum $765,597.13 is owing for principal and accrued interest upon Bonds issued or the payment of which has been assumed by said Company and which are secured by Mortgage on real estate owned by it.

And it is further certified that the Capital Stock of the Company has heretofore been two millions of dollars, divided into twenty thousand shares of one hundred dollars each, and that the amount to which it is to be increased is three millions of dollars, in thirty thousand shares of one hundred dollars each.

In Witness Whereof the said William Schwartzwaelder, the Chairman of said meeting, and the said Philip Allen, the Secretary thereof, have hereunto set their hands, this third day of March, One thousand eight hundred and eighty.

WM. SCHWARTZWAELDER.

Countersigned by:
PHILIP ALLEN.

7034 STATE OF NEW YORK, *City and County of New York, ss:*

William Schwartzwaelder, being duly sworn, said that he was the Chairman of the meeting of stockholders of the Municipal Gas Light Company of New York referred to in the above certificate, and that the matters in said certificate set forth are true to the best of his knowledge, information and belief.

WM. SCHWARTZWAELDER.

Sworn to before me this 3d day of March, 1880.

SAMUEL J. YOUNG,
Notary Public, Kings County.

Certificate filed (956).

CITY AND COUNTY OF NEW YORK, *ss:*

On the third day of March, in the year one thousand eight hundred and eighty, before me personally appeared William Schwartzwaelder, to me personally known and known to me to be the individual described in and who executed the foregoing instrument, and acknowledged that he executed the same.

SAMUEL J. YOUNG,
Notary Public, Kings County.

Certificate filed (956).

STATE OF NEW YORK, *City and County of New York, ss:*

Philip Allen, being duly sworn, saith that he is the Secretary of the Municipal Gas Light Company of New York, that the schedule hereto annexed marked "A" contains a true and correct list of the stockholders of said Company, on the fourth day of February,
7035 1880, and of their respective residences as they appeared on the books of said Company on that day, and that said list is in all respects correct to the best of deponent's knowledge and belief.

PHILIP ALLEN.

Sworn to before me this 3d day of March, 1880.

SAMUEL J. YOUNG,
Notary Public, Kings County.

Certificate filed (956).

STATE OF NEW YORK, *City and County of New York, ss:*

George W. Beckwith, being duly sworn, saith that on the fourth day of February, 1880, he deposited in the post office at No. 401 Third Avenue, near 29th Street, in the City of New York, a printed copy of the notice hereto annexed marked "B," contained in a securely closed postpaid wrapper addressed to each of the persons mentioned in the schedule hereto annexed marked "A," at their respective residences as therein specified.

GEORGE W. BECKWITH.

Sworn to before me this 3d day of March, 1880.

SAMUEL J. YOUNG,
Notary Public, Kings County.

Certificate filed (956).

STATE OF NEW YORK, *City and County of New York, ss:*

I, William A. Butler, Clerk of the City and County of New York, and also Clerk of the Supreme Court for the said City and
7036 County, being a Court of Record, do hereby certify that Samuel J. Young has filed in the Clerk's office of the County of New York a certified copy of his appointment as Notary Public for the County of Kings with his autograph signature, and was at the time of taking the annexed deposition duly authorized to take the same, and that I am well acquainted with the handwriting of said Notary Public, and verily believe that the signature to the annexed certificate to be genuine.

In Testimony whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 6th day of March, 1880.

[SEAL.] WM. A. BUTLER, *Clerk.*

COMPLAINANT'S EXHIBIT 18.

CERTIFICATE OF INCORPORATION OF KNICKERBOCKER GAS LIGHT COMPANY.

READ ON BEHALF OF COMPLAINANTS.

We, the undersigned, being desirous to form a Company under and by virtue of the Act of the Legislature of the State of New York, passed February 16th, 1848, entitled "An Act to authorize the formation of Gas Light Companies," and the various Acts amendatory and supplementary thereof, for the purpose of manufacturing and supplying gas for lighting the streets and public and private buildings of the City and County of New York, State of New York, do hereby certify, that the corporate name of said Company shall be the Knickerbocker Gas Light Company.

7037 That the object for which the Company is formed is the manufacturing, supplying, vending and conducting of gas and doing all necessary things for the purpose of manufacturing and vending gas and lighting public and private buildings, streets, avenues and parks in the City of New York with the same.

That the amount of the Capital Stock is one million five hundred thousand dollars.

That the term of existence of the Company shall be fifty years.

That the Capital Stock shall consist of Fifteen thousand shares of the par value of one hundred dollars each.

That the number of Directors who shall manage the concerns of the Company for the first year shall be five and their names are:

Robert M. C. Graham, of New York City.
Jared E. Redfield, of Essex, Connecticut.
Tilbon E. Doolittle, of New Haven, Conn.
John Sickles, of New York City.
George Howes, of New York City.

The operations of said Company are to be carried on in the City and County and State of New York.

In Witness Whereof, we have hereunto set our hands and seals this twenty-fourth day of June, in the year one thousand eight hundred and seventy-six.

ROBERT M. C. GRAHAM. [SEAL.]
TILBON E. DOOLITTLE. [SEAL.]
JARED E. REDFIELD. [SEAL.]
JOHN SICKLES. [SEAL.]
GEORGE HOWES. [SEAL.]

STATE OF NEW YORK, *City and County of New York, ss:*

On this twenty-fourth day of June, in the year of our Lord one thousand eight hundred and seventy-six, before me personally appeared Robert M. C. Graham, Tilbon E. Doolittle, Jared E. Redfield, John Sickles and George Howes, to me known to be the 7038 individuals described in and who executed the foregoing certificate, and they severally before me signed the said certificate and acknowledged that they signed the same for the purposes therein mentioned.

M. A. POTTER,
Notary Public, N. Y. Co.

STATE OF NEW YORK, *City and County of New York, ss:*

I, William Walsh, Clerk of the City and County of New York, and also Clerk of the Supreme Court for the said City and County, the same being a Court of Record, do hereby certify, that M. A. Potter, whose name is subscribed to the certificate of proof or acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Notary Public in and for the City and County of New York, dwelling in the said City, commissioned and sworn, and duly authorized to take the same. And further, that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said certificate of proof or acknowledgment is genuine. I further certify that said instrument is executed and acknowledged according to the law of the State of New York.

In Testimony Whereof, I have hereunto set my hand and affixed the Seal of the said Court and County, the 10th day of July, 1876.

WILLIAM WALSH, *Clerk.*

7039 By consent, simply the description of the lands conveyed by the deeds offered and received in evidence as Complainant's Exhibits 19 to 47, both inclusive, are incorporated in the printed book of exhibits in the case, as follows:

COMPLAINANT'S EXHIBIT 19.

DESCRIPTION OF PROPERTY CONVEYED BY

THE NEW YORK GAS LIGHT COMPANY

TO THE

CONSOLIDATED GAS COMPANY OF NEW YORK.

Dated November 10, 1884.

Conveying the following property:

ALL THOSE certain lots, pieces or parcels of land situate, lying and being in the City of New York, with the buildings thereon, which are severally bounded and described as follows, viz.:

FIRST. Beginning at a point in the southerly line of Twentieth Street distant westerly ninety-three feet ten and one-half inches from the corner formed by the intersection of the westerly line of

Avenue A with the southerly line of Twentieth Street, running thence southwardly parallel with the westerly line of Avenue A, ninety-two feet to the centre line of the block; thence westwardly along said centre line, parallel with the southerly line of Twentieth Street, one hundred and seventy-six feet; thence northwardly again parallel with the westerly line of Avenue A ninety-two feet to the southerly line of Twentieth Street; thence eastwardly along the southerly line of Twentieth Street one hundred and seventy-six feet to the point of beginning.

7040 SECOND. ALL that certain parcel of land bounded as follows: Beginning at a point in the northerly line of Twentieth Street, distant eastwardly ninety-six feet from the corner formed by the intersection of the easterly line of First Avenue with the northerly line of Twentieth Street; and running thence northwardly parallel with the easterly line of the First Avenue to the southerly line of Twenty-first Street, thence eastwardly along said southerly line of Twenty-first Street to the corner formed by the intersection of the said southerly line of Twenty-first Street with the Westerly line of Avenue A, thence southwardly along said westerly line of Avenue A one hundred and four feet; thence westwardly parallel with the southerly line of Twenty-first Street seventy feet; thence again southwardly parallel with the westerly line of Avenue A eighty feet to the northerly line of Twentieth Street; and thence again westwardly along said northerly line of Twentieth Street to the point of beginning.

THIRD. ALL that certain lot of land bounded as follows: Beginning at the corner formed by the intersection of the northerly line of Twentieth Street with the westerly line of Avenue A and running thence northwardly along said westerly line of Avenue A twenty feet; thence westwardly, parallel with the northerly line of Twentieth Street, seventy feet; thence southwardly parallel with the westerly line of Avenue A twenty feet to the northerly line of Twentieth Street, and thence eastwardly along the northerly line of Twentieth Street seventy feet to the point of beginning. Together with the right to use as a party wall the southerly wall of the building standing on the premises adjoining on the north the last-described lot of land.

7041 FOURTH. ALL the block bounded northwardly by Twenty-second Street, southwardly by Twenty-first Street, eastwardly by Avenue A and westwardly by the First Avenue.

FIFTH. ALL that certain parcel of land bounded as follows: Beginning at the intersection of the southerly line of Twenty-first Street with the easterly line of Avenue A and running thence eastwardly along said southerly line of Twenty-first Street and the same line continued into the East River to the easterly boundary of the lands and lands under water which were granted by the Mayor, Aldermen Commonalty of the City of New York to Edward Roberts and Joseph A. Benjamin by a certain grant bearing date the twenty-third day of February, one thousand eight hundred and fifty-two, and recorded in the Comptroller's Office of the City of New York in

Book I of City Grants, page 79; thence southwardly along said easterly boundary until said boundary meets an extension of the northerly line of Twentieth Street; thence westwardly along such extension of the northerly line of Twentieth Street and the northerly line of Twentieth Street to a point on said northerly line distant eastwardly seventy feet from the corner formed by the intersection of said southerly line of Twentieth Street with the easterly line of Avenue A; thence northwardly parallel with the easterly line of Avenue A to the centre line of the block; thence again westwardly along said centre line and parallel with the northerly line of Twentieth Street, seventy feet to the easterly line of Avenue A; thence northwardly along said easterly line of Avenue A twenty-three feet; thence easterly parallel with the northerly line of Twentieth Street seventy feet; thence northwardly parallel with the easterly line of Avenue A twenty-three feet; thence westwardly parallel with the northerly line of Twentieth Street to the easterly line of Avenue A; and thence northwardly along said easterly line of Avenue A forty-six feet to the corner, the point of beginning. TOGETHER with the 7042 northerly half of Twentieth Street and the southerly half of Twenty-first Street lying in front of said premises or included in the said grant to Edward Roberts and Joseph A. Benjamin, and ALSO, all water rights, water privileges, wharfage, cranage, rights of wharfage and cranage, lands covered with water and pre-emptive or other rights to land to be gained out of the East River appurtenant to the said premises or to which the party of the first part is or may be or become entitled by reason of the ownership of the said premises or of any part thereof.

SIXTH. ALL that certain parcel of land bounded as follows: Beginning at the southeasterly corner of Twenty-second Street and Avenue A, running thence eastwardly along the southerly line of Twenty-second Street, and an extension of said line into the East River to the easterly boundary of the land and land under water which were granted to the party of the first part by the Mayor, Aldermen and Commonalty of the City of New York, by a certain Indenture bearing date the twenty-third day of February, one thousand eight hundred and fifty-two, and recorded in the office of the Register of the City and County of New York on the eighth day of January, one thousand eight hundred and fifty-three, in Liber 625 of Conveyances, page 91; thence southwardly along said easterly boundary to an extension of the northerly line of Twenty-first Street; thence westwardly along such extended line of Twenty-first Street and said northerly line of Twenty-first Street to Avenue A; thence northwardly along Avenue A to the corner the point of beginning. TOGETHER with the northerly half of Twenty-first Street and the southerly half of Twenty-second Street lying in front of said premises, or included in the said grant to the party of the first part. ALSO, ALL water rights, water privileges, wharfage, cranage, rights of wharfage and cranage, lands covered with water and pre-7043 emptive or other rights to land to be gained out of the East River, appurtenant to the said premises or to which the party of the first part is or may be or become entitled by reason of the ownership of the said premises or of any part thereof. ALSO, the pier or wharf extending into the East River built partly on the said premises and partly upon the premises in this indenture fifthly described.

SEVENTH. ALL that parcel of land bounded as follows: Beginning at the corner formed by the intersection of the northerly side of Hester Street with the easterly side of Elizabeth Street, and running thence northwardly along Elizabeth Street one hundred and fifty feet to land now or late of Jacob Hanly; thence eastwardly parallel with Hester Street and along said last-mentioned land one hundred feet to land now or late of Norman Cook; thence southwardly along said land and along lands now or late of Isaac Underhill and others, and parallel with Elizabeth Street one hundred and fifty feet to Hester Street; and thence westwardly along Hester Street, one hundred feet to the said corner the point or place of beginning.

ALSO, all other real estate belonging to the party of the first part, situate in the City of New York and elsewhere, with all appurtenances belonging thereto, all lands and rights to lands under water, all leasehold property, all mains, service pipes and meters, all patents and licenses or rights to use patents, all machinery, plant, tools, horses, wagons, carts and all other property used by said party of the first part in the manufacture of gas; all office furniture and stationery, maps, drawings of property and apparatus owned by the said party of the first part, and all licenses to lay mains and pipes.

TOGETHER with all and singular the tenements, hereditaments and appurtenances thereunto belonging, or in any wise appertaining, and the reversion and reversions, remainder and remainders, rents, issues and profits thereof. AND ALSO, all the estate, right, title, interest, property, possession, claim and demand whatsoever, as well in law as in equity, of the said party of the first part, of, in and to the above-described premises and every part and parcel thereof with the appurtenances. 7044

COMPLAINANT'S EXHIBIT 20.

ALL THOSE certain lots, pieces or parcels of land situate, lying and being in the City of New York, which are severally bounded and described as follows, viz:

FIRST. ALL that certain parcel of land bounded northerly by the centre line of Fifteenth Street; southerly by the centre line of Fourteenth Street; westerly by the centre line of Avenue D, and easterly by the East River. AND ALSO ALL the bulkhead along said East River between the centre line of Fourteenth Street and the centre line of Fifteenth Street; and also all the water front, water rights, water privileges, wharfage and cranage, rights of wharfage and cranage, lands covered with water and pre-emptive or other rights to land which may hereafter be gained out of the East River by reason of any grant or extension of the exterior line of the City of New York into the East River, or otherwise, between said centre lines of Fourteenth and Fifteenth Streets as continued into the East River in front of or adjoining said bulkhead and premises.

SECOND. ALL that certain parcel of land bounded northerly by the centre line of Sixteenth Street; southerly by the centre line of Fifteenth Street; westerly by the centre line of Avenue D, 7045 and easterly by the East River, together with the bulkhead built along said East River from the centre line of Fifteenth Street to the centre line of Sixteenth Street; and also all the right, title, interest, property and claims of the said party of the first part in and to the water rights, water property, water privileges, wharfage, cranage, rights of wharfage and cranage, land covered with water and pre-emptive or other rights to land which may hereafter be gained out of the East River by reason of any grant or extension of the exterior line of the City of New York or otherwise between the centre line of said Fifteenth Street and the centre line of said Sixteenth Street as continued into the said East River in front of the said premises.

THIRD. ALL the block bounded southerly by Fourteenth Street, northerly by Fifteenth Street, easterly by Avenue D, and westerly by Avenue C.

FOURTH. ALL the block bounded southerly by Fifteenth Street, northerly by Sixteenth Street, easterly by Avenue D, and westerly by Avenue C.

FIFTH. ALL those certain lots of land bounded as follows: Beginning at the corner formed by the intersection of the westerly line of Avenue C with the northerly line of Fourteenth Street, and running thence northerly along the westerly line of Avenue C to the southerly line of Fifteenth Street two hundred and six feet and six inches: thence westwardly along said southerly line of Fifteenth Street four hundred and thirty-four feet, thence southwardly parallel with the westerly line of Avenue C one hundred and three feet three inches to the centre line of the block; thence westwardly, along said centre line ten and one-half inches, thence again southwardly and parallel with the westerly line of Avenue C one hundred and three feet three inches to the northerly line of Fourteenth Street, and thence eastwardly along said northerly line of Fourteenth 7046 Street four hundred and thirty-four feet ten and one-half inches to the corner the place of beginning.

SIXTH. ALL those certain lots of land bounded as follows: Beginning at a point on the northerly line of Seventeenth Street distant one hundred and eighty-eight feet, westerly, from the northwesterly corner of said Seventeenth Street and Avenue C; thence running northwardly parallel with the westerly line of Avenue C, one hundred and eighty-four feet to the southerly line of Eighteenth Street; thence westwardly along said southerly line of Eighteenth Street, three hundred and fifty feet; thence southwardly and parallel with the westerly line of Avenue C, one hundred and eighty-four feet to the northerly line of Seventeenth Street, and thence eastwardly along said northerly line of Seventeenth Street, three hundred and fifty feet to the point the place of beginning.

SEVENTH. ALL that certain piece or parcel of land bounded as follows: Beginning at a point on the southerly line of Fifteenth Street, distant westerly three hundred feet from the southwesterly corner of said Fifteenth Street and Avenue B, running thence southwardly parallel with the westerly line of Avenue B, one hundred and three feet and three inches; thence northwestwardly and parallel with the said southerly line of Fifteenth Street, one hundred and fifty feet; thence northeastwardly and parallel with the westerly line of Avenue B, ten feet and six inches, or thereabouts, to a line drawn east and west through the centre of a piece of ground heretofore called Stuyvesant Street; thence, eastwardly, along said last-mentioned line one hundred and sixty-five feet and four inches, or thereabouts, to a point in the said southerly line of Fifteenth Street distant three hundred and fifty-two feet and nine inches easterly from the southeasterly corner of said Fifteenth Street and Avenue A, 7047 and thence southeastwardly along said southerly line of Fifteenth Street, thirteen feet three inches to the point or place of beginning.

EIGHTH. ALL that certain parcel of land bounded as follows: Beginning at the point formed by the intersection of the easterly line of Irving Place with the southerly line of Fifteenth Street, and running thence southwardly along said easterly line of Irving Place, fifty-nine feet; thence eastwardly, and parallel with the southerly line of Fifteenth Street, ninety-two feet; thence again southwardly, parallel with the Easterly line of Irving Place, twenty-five feet; thence again eastwardly, parallel with the southerly line of Fifteenth Street; fifty feet; thence northwardly, again parallel with the easterly line of Irving Place, eighty-four feet, to the southerly line of Fifteenth Street, and thence westwardly along said southerly line of Fifteenth Street, one hundred and forty-two feet to the point the place of beginning.

NINTH. ALL the block bounded southerly by Sixteenth Street, northerly by Seventeenth Street, easterly by Tenth Avenue, and westerly by the Eleventh Avenue.

TENTH. ALL the block bounded southerly by Seventeenth Street, northerly by Eighteenth Street, easterly by the Tenth Avenue, and westerly by the Eleventh Avenue.

ELEVENTH. ALL that certain parcel of land bounded as follows: Beginning at the point formed by the intersection of the westerly line of the Tenth Avenue with the southerly line of Nineteenth Street, and running thence westwardly along said southerly line of Nineteenth Street, one hundred and twenty-five feet; thence southwardly, parallel with the westerly line of the Tenth Avenue, ninety-two feet to the centre line of the block between Eighteenth 7048 and Nineteenth Streets; thence westwardly along said centre line and parallel with the southerly line of Nineteenth Street, two hundred and fifty feet; thence northwardly parallel with the westerly line of the Tenth Avenue, ninety-two feet, to the southerly line of Nineteenth Street; thence westwardly, along said southerly line of Nineteenth Street, one hundred and fifty feet; thence southwardly, parallel with the westerly line of the Tenth Avenue, one hundred and eighty-four feet, to the northerly line of Eighteenth Street, thence eastwardly, along said northerly line of Eighteenth Street, five hundred and twenty-five feet to the westerly line of the Tenth Avenue, and thence northwardly along said westerly line of Tenth Avenue, one hundred and eighty-four feet, to the point the place of beginning.

TWELFTH. ALL that certain parcel of land bounded as follows: Beginning at a point on the southerly line of Nineteenth Street, distant, westerly, one hundred and seventy-five feet from the corner formed by the intersection of said southerly line of Nineteenth Street with the westerly line of the Tenth Avenue, and running thence southwardly and parallel with the westerly line of the Tenth Avenue, ninety-two feet, to the centre line of the block; thence westwardly, along said centre line, and parallel with the southerly line of Nineteenth Street, twenty-five feet; thence northwardly, and again parallel with the westerly line of the Tenth Avenue, nine--two feet to the southerly line of Nineteenth Street, and thence eastwardly along said southerly line of Nineteenth Street, twenty-five feet to the point the place of beginning.

THIRTEENTH. ALL that certain parcel of land bounded as follows: Beginning at a point on the southerly line of Nineteenth Street, distant westerly two hundred and twenty-five feet from the corner formed by the intersection of the westerly line of the
7049 Tenth Avenue with the southerly line of Nineteenth Street,
and running southwardly parallel with the westerly line of the Tenth Avenue, ninety-two feet to the centre of the block; thence westwardly along said centre line and parallel with the southerly line of Nineteenth Street, one hundred feet; thence northwardly, again parallel with the westerly line of the Tenth Avenue, ninety-two feet to the southerly line of Nineteenth Street, and thence eastwardly along said southerly line, one hundred feet to the point the place of beginning.

FOURTEENTH. ALL that certain parcel of land bounded as follows: Beginning at the corner formed by the intersection of the easterly line of the Eleventh Avenue with the northerly line of Nineteenth Street, and running thence eastwardly along the said northerly line of Nineteenth Street, three hundred and fifty feet; thence northwardly, parallel with the westerly line of the Eleventh Avenue, one hundred and eighty-four feet to the southerly line of Twentieth Street; thence westwardly along said southerly line of Twentieth Street, three hundred and fifty feet to the easterly line of the Eleventh Avenue, and thence southwardly along said easterly line one hundred and eighty-four feet to the corner the place of beginning.

FIFTEENTH. ALL the block bounded easterly by the Eleventh Avenue, northerly by Seventeenth Street, southerly by Sixteenth Street, and westerly by the Thirteenth Avenue, and also all the bulkhead on the Hudson River in front of the said premises, together with all water front, water rights, water privileges, wharfage, cranage, and rights of wharfage and cranage and the pre-emptive or other rights of the party of the first part to land which may hereafter be gained out of the Hudson River in front of or adjoining said premises or bulkhead.

7050 SIXTEENTH. ALL the block bounded northerly by Eighteenth Street, southerly by Seventeenth Street, easterly by the Eleventh Avenue, and westerly by the Thirteenth Avenue; and also all the bulkhead on the Hudson River in front of the said premises, together with all the water front, water rights, water privileges, wharfage, cranage, and rights of wharfage and cranage and the pre-emptive or other rights of the party of the first part to land which may hereafter be gained out of the Hudson River, in front of or adjoining said premises or bulkhead.

AND ALL other real estate belonging to the party of the first part, situate in the City of New York and elsewhere, with all appurtenances belonging thereto, all lands and rights to lands under water, all leasehold property, all mains, service pipes and meters, all patents and licenses or rights to use patents, all machinery, plant, tools, horses, wagons, carts and all other property used by said party of the first part in the manufacture of gas, all office furniture and stationery, maps, drawings of property and apparatus owned by the said party of the first part, and all licenses to lay mains and pipes.

TOGETHER with all and singular the tenements, hereditaments and appurtenances thereunto belonging, or in anywise appertaining, and the reversion and reversions, remainder and remainders, rents, issues and profits thereof.

And also all the estate, right, title, interest, property, possession, claim and demand whatsoever as well in law as in equity, of the said party of the first part, of, in and to the above-described premises, and every part and parcel with the appurtenances.

7051 COMPLAINANT'S EXHIBIT 21.

ALL those certain lots, pieces or parcels of land with the buildings thereon erected situate, lying and being in the Twenty-second Ward of the City of New York and bounded and described as follows, viz.:

Beginning at a point on the northerly side of Forty-fourth Street, distant one hundred feet easterly from the westerly line of Eleventh Avenue and running thence westerly along the said northerly side of Forty-fourth Street to the exterior line of the City of New York; thence northerly along said exterior line to the southerly line of Forty-sixth Street; thence easterly along said southerly line of Forty-sixth Street to a point distant three hundred feet westerly from the westerly line of Eleventh Avenue; thence southerly and parallel with Eleventh Avenue to the southerly line of Forty-fifth Street, thence easterly along said southerly line of Forty-fifth Street, one hundred feet to a point distant two hundred feet westerly from the westerly line of Eleventh Avenue; thence southerly and parallel with Eleventh Avenue, one hundred feet five inches to the centre line of the block between Forty-fourth and Forty-fifth Streets; thence easterly along said centre line one hundred feet; thence southerly and parallel with Eleventh Avenue, one hundred feet five inches to the point or place of beginning; and also all the right, title and interest of the party of the first part of, in and to said Forty-fourth. Forty-fifth and Forty-sixth Streets, and of and to the land lying in the Hudson River in front of said premises.

AND also that certain other lot of land bounded and described as follows: Beginning at a point on the southerly side of Forty-fifth Street, distant one hundred and fifty-eight feet four inches westerly from Eleventh Avenue and running thence westerly along 7052 the southerly side of Forty-fifth Street, sixteen feet eight inches; thence southerly and parallel with Eleventh Avenue, one hundred feet five inches, to the middle line of the block; thence easterly along said middle line sixteen feet eight inches; thence northerly and parallel with Eleventh Avenue, one hundred feet five inches to the southerly side of Forty-fifth Street to the point or place of beginning.

And also all other real estate belonging to the said party of the first part in the City of New York and elsewhere and all the appurtenances and all lands and rights to lands under water, all leasehold property, all mains, services, pipes and meters, all patents and licenses or rights to use patents, all machinery, plant, tools horses wagons carts, and all other property used by said company in the manufacture of gas all office furniture and stationery, maps, drawings of property and apparatus owned by said company at the present time, together with its corporate rights, franchises, licenses to lay mains and pipes and privileges of every kind whatsoever.

COMPLAINANT'S EXHIBIT 22.

ALL those certain lots, pieces or parcels of land with the buildings thereon erected situate, lying and being in the Twelfth Ward of the City of New York and bounded and described as follows:

Beginning at the point formed by the intersection of the centre line of Ninety-eighth Street with the centre line of Second Avenue and running thence easterly along the centre line of Ninety-eighth Street to the Harlem River; thence in a northerly direction along the said Harlem River to the centre line of Ninety-ninth Street; thence westerly along said centre line of Ninety-ninth Street to the centre line of Second Avenue; thence southerly along the centre line of Second Avenue to the point or place of beginning.

7053 AND also all other real estate belonging to the said party of the first part in the City of New York and elsewhere, and all the appurtenances and all lands and rights to lands under water, all leasehold property, all mains, services, pipes and meters, all patents and licenses or rights to use patents, all machinery, plant, tools, horses, wagons, carts, and all office furniture and stationery, maps, drawings of property and apparatus owned by said company at the present time, together with its corporate rights, franchises, licenses to lay mains and pipes and privileges of every kind whatsoever.

COMPLAINANT'S EXHIBIT 23.

ALL those certain lots, pieces or parcels of land situate, lying and being in the City of New York which are severally bounded and described as follows, viz:

FIRST. ALL that certain tract, piece or parcel of land situate, lying and being in the Twelfth Ward of the City of New York, which is more particularly bounded and described as follows, to wit: Beginning at the corner formed by the intersection of the southerly line of One Hundred and Eleventh Street with the westerly line of First Avenue, and thence westerly along said southerly line of One Hundred and Eleventh Street, four hundred and seventy-five feet; thence southerly and parallel with First Avenue, one hundred and twenty feet eleven and three-quarter inches to the southwesterly boundary line of property formerly belonging to the Estate of George Bradish, deceased; thence southeasterly along said southwesterly boundary line of said Bradish Estate, one hundred and twenty-five feet to the point where said southwesterly boundary line of the Bradish Estate intersects the northerly line of One Hundred 7054 and Tenth Street, and thence easterly along the said northerly line of One Hundred and Tenth Street, four hundred and one feet and seven inches, to the corner formed by the intersection of the said northerly line of One Hundred and Tenth Street with the said westerly line of First Avenue, and thence northerly along said westerly line of First Avenue two hundred and one feet and ten inches to the point or place of beginning.

SECOND. All that certain lot, piece or parcel of land, situate, lying and being in the Twelfth Ward of the City of New York which is more particularly bounded and described as follows to wit: Beginning at the corner formed by the intersection of the northerly line of One Hundred and Eleventh Street with the westerly line of First Avenue, and running thence northerly along said westerly line of the First Avenue seventy-five feet ten and three-quarter inches; thence westerly and parallel with One Hundred and Eleventh Street, one hundred feet; thence northwesterly along the easterly boundary line of lands formerly belonging to the Estate of George Bradish, deceased, to a point in the southerly line of One Hundred and Twelfth Street; where the said easterly boundary line of the said Bradish Estate intersects the said southerly line of One Hundred and Twelfth Street, and thence westerly along the said southerly line of One Hundred and Twelfth Street seventeen feet and two inches; thence southerly and parallel with the First Avenue two hundred and one feet and ten inches to the northerly line of One Hundred and Eleventh Street, and thence easterly along the said northerly line of One Hundred and Eleventh Street, two hundred and twenty-five feet to the point or place of beginning.

THIRD. All that certain tract, piece or parcel of land bounded northerly by the centre line of One Hundred and Eleventh 7055 Street; southerly by the centre line of One Hundred and Tenth Street; westerly by the centre line of the First Avenue, and easterly by the original high-water line of the Harlem River, as the same winds and turns.

FOURTH. ALL that certain tract, piece or parcel of land situate, lying and being in the Twelfth Ward of the City of New York which is more particularly bounded and described as follows, to wit: Beginning at the corner formed by the intersection of the northerly line of One Hundred and Eleventh Street with the easterly line of the First Avenue, running thence easterly along said northerly line of One Hundred and Eleventh Street, two hundred and ninety-five feet; thence northerly and parallel with First Avenue, one hundred feet and eleven inches to the centre line of the block between One Hundred and Eleventh and One Hundred and Twelfth Streets; thence westerly along said centre line one hundred and fifty feet; thence northerly again parallel with the First Avenue, one hundred feet and eleven inches to the southerly line of One Hundred and Twelfth Street; thence westerly along said southerly line of One Hundred and Twelfth Street, fifty feet; thence southerly parallel with the First Avenue, fifty-one feet; thence westerly and parallel with One Hundred and Twelfth Street, ninety-five feet to the easterly line of the First Avenue; thence southerly along said easterly line of the First Avenue, one hundred and fifty feet eleven inches to the point or place of beginning.

FIFTH. ALL that certain piece or parcel of land under water in the Harlem River, situate, lying and being in the City of New York adjoining and in front of uplands owned by the said party of the first part and bounded and described as follows, to wit: Beginning at the point where the original high-water line of the said river intersects the continuation of the centre line of One Hundred and Tenth Street; running thence easterly along the 7056 continuation of the said centre line one hundred and twenty feet to the exterior or bulkhead line of the said City of New York; thence in a northerly direction along said exterior or bulkhead line two hundred and sixty-five feet and six inches to the intersection of said exterior or bulkhead line with the continuation of the centre line of One Hundred and Eleventh Street; thence along the continuation of the centre line of One Hundred and Eleventh Street in a westerly direction, one hundred and thirty-two feet to the intersection thereof with the original high-water line of said river; thence along said orginal high-water line in a southerly direction as the same winds and turns along the land belonging to the said party of the first part to the intersection thereof with the said centre line of One Hundred and Tenth Street at the point of place of beginning; being the premises which are delineated and colored pink upon a map or diagram annexed to a certain conveyance bearing date the 20th day of May, one thousand eight hundred and seventy, made by the Mayor, Aldermen and Commonalty of the City of New York to the said party of the first part, and recorded in the office of the Register of the City and County of New York in liber 1113 of Conveyances, page 626, on the 7th day of September, 1870, saving and reserving out of the last-mentioned premises so much thereof as may form part of any street or streets, avenues or avenue that may now or hereafter be assigned, designated or laid out through said premises according to law for the uses and purposes of public streets, avenues and highways.

And also all the bulkhead along the said Harlem River between the centre line of One Hundred and Tenth Street and the centre line of One Hundred and Eleventh Street; and also all the water front, water rights, water privileges, wharfage and cranage, rights of wharfage and cranage, lands covered with water and pre-
7057 emption or other rights to land which may hereafter be
gained out of the Harlem River by reason of any grant or extension of the exterior line of the City of New York into the Harlem River between the said centre lines of One Hundred and Tenth and One Hundred and Eleventh Streets as continued into the Harlem River in front of or adjoining said bulkhead and premises.

SIXTH. ALL those certain pieces or parcels of land, situate, lying and being in the Twelfth Ward of the City of New York which are more particularly bounded and described as follows, to wit: Beginning at a point in the easterly line of Broadway or Kingsbridge Road as widened at the southwesterly side of plot number 44 on a certain map entitled "Map of one hundred and twenty-eight acres of land situate in the Twelfth Ward of the City of New York, part of the Estate of Isaac Dykman, deceased, known as Fort George Property," dated September 15th, one thousand eight hundred and sixty-eight, R. Rosa, Surveyor, and filed in the office of the Register of the City and County of New York, November 7th, one thousand eight hundred and sixty-eight, as Map No. 697, running thence southeasterly along the southwesterly side of said plot No. 44, and parallel with the new street laid out by the Commissioners of Central Park, and designated upon said map as Boulevard, or Dykman Street, one hundred and eighty-eight feet and ten inches; thence running southwesterly and at right angles with said Dykman Street, fifty feet; thence running southeasterly and parallel with said Boulevard, four hundred and twenty-six feet, to the centre line of a new street or avenue laid out by the Commissioners of Central Park and designated upon said map as Sherman Avenue; thence running southwesterly along said centre line of Sherman Avenue ninety-three feet and eight inches; thence running northwesterly and parallel with said Boulevard or Dykman Street and along the rear of plots Nos. fifty-two, fifty-one, fifty, forty-nine, forty-eight and
7058 forty-seven, three hundred and fifty-four feet and five inches;
thence running northwesterly along plot No. forty-seven on said map one hundred and thirty-one feet and nine inches to the easterly line of Broadway or Kingsbridge Road, and thence running northeasterly along said easterly line of Broadway or Kingsbridge Road three hundred and two feet and seven inches to the point or place of beginning; together with all the right, title and interest of the party of the first part to the one-half part of Broadway or Kingsbridge Road in front of or adjacent to said premises.

SEVENTH. ALL that lot of land situate at Harlem in the City of New York and bounded and described as follows: Beginning at the corner formed by the intersection of the westerly line of the Third Avenue with the northerly line of One Hundred and Fourteenth Street, and thence running westerly along the northerly line of One Hundred and Fourteenth Street one hundred and eight feet and three inches; thence northerly and parallel with the Third Avenue, one hundred feet and eleven inches to the centre line of the block between One Hundred and Fourteenth and One Hundred and Fifteenth Streets; thence easterly along said centre line eight feet and three inches; thence southerly and parallel with the Third Avenue, seventy-five feet eight and one-quarter inches; thence easterly and parallel with One Hundred and Fourteenth Street, one hundred feet to the Third Avenue, and thence southerly along the westerly side of the Third Avenue, twenty-five feet two and three-quarter inches to the place of beginning, and all other real estate belonging to the party of the first part situate in the City of New York and elsewhere with all the appurtenances belonging thereto, all lands and rights to land under water, all leasehold property, all mains, service pipes and meters, all patents or licenses, etc.

7059 COMPLAINANT'S EXHIBIT 24.

FIRSTLY. All that certain block, piece or parcel of land situated, lying and being in the Twenty-second Ward of the City of New York, bounded and described as follows, viz: Beginning at the southwesterly corner of Eleventh Avenue and Forty-second Street; running thence westerly along the southerly side of Forty-second Street, eight hundred feet, to Twelfth Avenue; thence southerly along the easterly side of Twelfth Avenue, one hundred and ninety-seven feet six inches, to Forty-first Street; thence easterly, along the northerly side of Forty-first Street, eight hundred feet, to Eleventh Avenue, and thence northerly, along the westerly side of Eleventh Avenue, one hundred and ninety-seven feet six inches, to the place of beginning. Together with the right and title of the parties of the first part hereto, of, in and to the said streets and avenues adjoining the said premises to the centres thereof respectively.

AND ALSO, all the estate, right, title and interest of the parties of the first part, of, in and to the land and soil under water, to be made land and gained out of the Hudson or North River, lying in front of the premises hereinabove described, bounded and described as follows, viz: Northerly by the middle of Forty-second Street; easterly by the middle of Twelfth Avenue and the premises hereinabove described; southerly by the middle of Forty-first Street, and westerly by the westerly side of Thirteenth Avenue. And all wharfage, cranage, advantages, emoluments and rights of every name and nature appertaining to the premises hereby conveyed; as the same were granted to Charles Edgar Appleby by the Mayor, Aldermen and Commonalty of the City of New York by Grant or Deed bearing date the twenty-seventh day of August, 1853. Recorded in the office of the Register of the City and County of New York, 7060 in Liber 660 of Conveyances, page 309, March 25, 1854, subject nevertheless to the covenants, restrictions, reservations and conditions in the said Grant or Deed contained, which covenants and conditions the parties hereto of the second part assume and agree to perform. And being the same premises conveyed to the parties of the first part by the said Charles Edgar Appleby and Sarah E., his wife, by deed dated February 1, 1860, and recorded in the office of the Register of the City and County of New York on the 20th day of July, 1860, in Liber 815 of Conveyances, at page 410.

SECONDLY. ALL those eight certain lots, pieces or parcels of land and premises, situate, lying and being in the Twenty-second Ward of the City of New York in the County and State of New York, which together are bounded and described as follows: Commencing at a point on the northerly side of Forty-first Street, distant one hundred feet easterly from the easterly side of Eleventh Avenue; thence running northerly and parallel with Eleventh Avenue, ninety-eight feet and nine inches to the middle line of the block between Forty-first and Forty-second Streets; thence easterly along said middle line, two hundred feet; thence, southerly, parallel with Eleventh Avenue, ninety-eight feet and nine inches, to the line of Forty-first Street; thence westerly along Forty-first Street two hundred feet to the point or place of beginning. Each of said lots being twenty-five feet front and rear by ninety-eight feet and nine inches in depth. And being the same premises conveyed to the party of the first party by deed dated October 20, 1883, and recorded in Liber 1755 of Conveyances, page 263, on the 20th day of October, A. D. 1883.

THIRDLY. ALL those five certain lots, pieces or parcels of land, situate, lying and being in the Twenty-second Ward of the City of New York, on the northerly side of Forty-second Street, between
7061 the Eleventh and Twelfth Avenues, and designated by the numbers 87, 88, 89, 90 and 91, on a certain map entitled "Map of 245 lots of ground situate in the Twelfth Ward of the City of New York, belonging to the estate of James Clinton Norton, deceased," surveyed May, 1847, by Daniel Ewen, City Surveyor—and which said map was filed in the office of the Register of the City and County of New York, on the — day of July, 1847—which said lots, taken together, are bounded and described as follows to wit: Commencing at a point in the northerly line of Forty-second Street, distant one hundred feet westerly from the northwesterly corner of the Eleventh Avenue and said Forty-second Street, and running thence westerly along the northerly side of Forty-second Street, one hundred and twenty-five feet to lot No. 92; thence northerly, along the easterly side of lot 92, one hundred feet five inches to lot No. 74; thence easterly, along lots Nos. 74, 75, 76, 77 and 78, one hundred and twenty-five feet to lot No. 83; thence southerly, along lots Nos. 83, 84, 85 and 86, one hundred feet five inches to the northerly side of Forty-second Street, the point or place of beginning. Each lot being twenty-five feet in width in front and rear and one hundred feet five inches in depth on each side, and being the same premises conveyed to the party of the first part, by deed dated the 23d day of April, 1868, and recorded in the office of the Register of the City and County of New York, on the 14th day of May, 1868, in Liber 1047 of Conveyances, page 381.

FOURTHLY. ALL that certain lot, piece or parcel of land, situate, lying and being in the City of New York, and bounded and described as follows: Beginning at a point on the northerly side of Forty-second (42d) Street, distant two hundred and twenty-five (225) feet westerly from the intersection of the westerly side of the Eleventh (11th) Avenue with the northerly side of 7062 Forty-second Street; running thence northerly and parallel to the Eleventh Avenue, one hundred (100) feet and five (5) inches to the center line of the block; thence westerly, along such centre line, and parallel to Forty-second Street, twenty-five (25) feet; thence southerly and parallel to the Eleventh Avenue, one hundred (100) feet and five (5) inches, to the northerly side of Forty-second Street; thence easterly, along the northerly side of Forty-second Street, twenty-five (25) feet to the point or place of beginning. And being the same premises conveyed to the party of the first part, by deed dated twelfth day of June, 1868, and recorded in the office of the Register of the City and County of New York, the 27th day of July, 1868, in Liber 1064 of Conveyances, page 508.

FIFTHLY. All those two certain pieces and parcels of land, situate in the Twenty-second (formerly Ninth and Twelfth) Ward of the City of New York, being part of the Estate of John Somarindyck, late of said city, deceased, and designated and described on a certain map of the said estate, made by William Bridges, sworn surveyor, in November, 1808, and the Deed from the other heirs of the said John Somarindyck, by Lots No. 8 and Letter "H"; bounded westerly in front by Hudson River; northern by lots designated on said map by letter "I" and No. 9; easterly by the Tenth Avenue, and southerly by lots designated on said map by No. 7 and letter "G"—the said premises hereby conveyed or intended so to be, lying between the Tenth Avenue on the east, the Hudson River on the west, Sixty-fifth Street on the south, and Sixty-sixth Street on the north. Together with the rights and interest of the parties of the first part in and to the said streets and avenues to the centre thereof respectively—excepting and reserving all the right, title and interest of the Hudson River Railroad Company in and to that portion of the said premises heretofore conveyed to them by 7063 certain indentures. And being a portion of the same premises conveyed to the party of the first part, by deed dated the 24th day of June, 1863, and recorded in the office of the Register of the City and County of New York, in Liber 882 of Conveyances at page 259, July 1, 1863.

SIXTHLY. All that certain lot, piece or parcel of land, situate, lying and being in the Nineteenth Ward of the City of New York, bounded and described as follows, to wit: Beginning at a point on the southerly side of Sixty-third Street, distant two hundred and eighty-one feet and five inches westerly from the southwesterly corner of Sixty-third Street and Avenue A; thence running southerly and parallel with Avenue A, one hundred feet and five inches to the centre line of the block between Sixty-third and Sixty-second Streets; thence westerly, along said centre line of the block and parallel with Sixty-third Street, twenty-five feet; thence northerly and parallel with Avenue A, one hundred feet and five inches to the southerly side of Sixty-third Street, and thence easterly, along the easterly side of Sixty-third Street, twenty-five feet, to the point or place of beginning. Together with all the right, title and interest of the parties of the first part and to the one-half in width of that portion of Sixty-third Street lying in front of said premises, being the same premises which were conveyed to Benjamin W. Hicks by Samuel Borrowe and wife, by deed bearing date the fifteenth day of December, 1865, and recorded in the Register's office of the City and County of New York, in Liber 945 of Conveyances, page 481, on the twenty-second day of December, 1865. And being the same premises conveyed to the party of the first part, by deed dated the 21st day of April, 1884, and recorded in the office of the Register of the City and County of New York, in Liber 1803 of Conveyances, page 66, on the 23d day of April, A. D. 1884.

7064 SEVENTHLY. ALL that certain piece of land, situate in the City of New York, and bounded and containing as follows: Beginning at a point on the northerly side of Sixty-second Street, distant two hundred and twenty-five feet westerly from the westerly side of Avenue A; running thence westerly, along Sixty-second Street, eighty-six feet five inches; thence northerly and parallel with Avenue A, one hundred feet five inches to the centre line of the block; thence easterly along said centre line twenty-five feet; thence northerly and parallel with Avenue A, one hundred feet five inches to the southerly side of Sixty-third Street; thence easterly, along Sixty-third Street, sixty-one feet five inches; and thence southerly and parallel with Avenue A, two hundred feet ten inches to the place of beginning. And being the same premises conveyed to the party of the first part, by deed dated the 17th day of April, 1882, and recorded in the office of the Register of the City and County of New York, in Liber 1658 of Conveyances, page 234, on the 8th day of June, A. D. 1882.

EIGHTHLY. ALL those twelve certain lots of land, situated in the City of New York and taken together bounded and containing as follows, to wit: Beginning at a point on the northerly side of Sixty-second Street, distant one hundred and thirty-one feet five inches; easterly from the easterly side of First Avenue; running thence northerly and parallel with First Avenue, one hundred feet five inches to the centre line of the block; thence easterly, and parallel with Sixty-second Street, fifty feet; thence northerly, and parallel with First Avenue, one hundred feet five inches to the southerly side of Sixty-third Street; thence easterly, along Sixty-third Street, one hundred and twenty-five feet; thence southerly and parallel with First Avenue, two hundred feet ten inches to the northerly side of Sixty-second Street; and thence westerly along Sixty-second Street, one hundred and seventy-five feet to the
7065 place of beginning. Being lots known on a map of property belonging to the heirs of Abraham K. Beekman and William Beekman, made by Samuel S. Doughty, City Surveyor, dated July 21, 1837, as Lots Nos. five hundred and fifty to five hundred and fifty-six (550 to 556), both inclusive and five hundred and sixty-nine to five hundred and seventy-three (559 to 573), both inclusive. And being the same premises conveyed to the party of the first part, by deed dated the 28th day of October, 1882, and re-

corded in the office of the Register of the City and County of New York, in Liber 1721 of Conveyances, page 195, on the 18th day of April, A. D. 1883.

NINTHLY. ALL those certain lots, pieces or parcels of land, situate, lying and being in the Nineteenth Ward of the City of New York, and which taken together are bounded as follows, to wit: Easterly by the westerly line of Avenue A, extending from Sixty-second Street to Sixty-third Street; westerly by a line running parallel with the said westerly line of Avenue A, and distant two hundred and twenty feet westerly therefrom, and extending from Sixty-second Street to Sixty-third Street, aforesaid; northerly by the southerly line of Sixty-third Street, and southerly by the northerly line of Sixty-second Street. And also, all the right, title and interest of the said party of the first part, of, in and to the said streets and avenue respectively, in front of and adjoining the above described premises, to the centres of said streets and avenue respectively. And being the same premises conveyed to the party of the first part by deed dated the 1st day of May, 1872, and recorded in the office of the Register of the City and County of New York, in Liber 1212 of Conveyances, page 281, on the 20th day of May, A. D. 1872.

7066 TENTHLY. All that certain piece or parcel of land, with the buildings thereon, situated in the City of New York, and bounded and containing as follows, to wit: Beginning at the northwesterly corner of the Eastern Boulevard, lately called Avenue A, and Sixtieth Street; running thence northerly along the westerly side of said Boulevard two hundred feet ten inches to the southerly side of Sixty-first Street; thence westerly along the southerly side of Sixty-first Street, three hundred and thirteen feet; thence southerly, and parallel with said Boulevard, two hundred feet ten inches, to the northerly side of Sixtieth Street; and thence easterly, along the northerly side of Sixtieth Street, three hundred and thirteen feet to the place of beginning.

And also, all that certain piece or parcel of land, situate in the said City of New York, bounded southerly by Sixtieth Street, westerly by the easterly side of said Boulevard and northeasterly by the original high-water line of the East River.

And also, all the right, title and interest of the said parties of the first part, in and to the land now or formerly under the waters of the East River between Sixtieth and Sixty-first Streets in front of the premises above conveyed.

It being the intention of the party of the first part by this deed, to convey unto the party of the second part, all the lands, water rights and property of every description which were conveyed to the said party of the first part by Thomas Rutter and Georgianna R., his wife, by deed bearing date the 1st day of June, one thousand eight hundred and eighty-one, and recorded in the office of the Register of the City and County of New York, in Liber 1611 of Conveyances, page 67, excepting so much thereof as has been taken for said Eastern Boulevard or Avenue A.

ELEVENTHLY. ALL that certain piece or parcel of land, situate, lying and being on the west bank of the Hudson River in

the township of Ridgefield, County of Bergen and State of
7067 New Jersey, bounded and described as follows: Beginning at
the northwest corner of a parcel of land now or lately occupied by William Hennen, being the southwest corner of that certain parcel of land marked No. 6 on a certain map of the Estate of Samuel Ellis, deceased, on file in the office of the Surrogate of Bergen County and running thence along the division fence between said land of William Hennen and said parcel No. 6, and through the centre line of the ditch in a continuation of said partition fence and along the dividing line between the premises hereby conveyed or intended so to be and the lot marked No. 5 on said map, in a southeasterly direction, thirteen chains more or less to the Hudson River; thence northerly along said river four hundred and ninety-five feet, more or less, to the centre line of another ditch dividing the parcel of land hereby conveyed from the parcel of land now occupied by the heirs of Hannah Ellis Miller—being parcel No. 4 on said map; thence through the centre of said ditch and along the dividing line between the premises hereby conveyed or intended so to be, and the lot marked No. 4 on said map, and in a northwesterly direction ten chains and fifty links, more or less, to the road leading from Bull's Ferry to Fort Lee; thence along said road in a southwesterly direction, eight chains and sixty links, more or less, to the point or place of beginning. And being the same premises conveyed to the party of the first part by deed dated the 18th day of November, 1882, and recorded in the office of the Clerk of the County of Bergen on the 29th day of November, A. D. 1882, in Liber H-11 of Deeds, on pages 44, etc.

TWELFTHLY. ALL that parcel of land, flowed by tide water, lying at Shady Side in the County of Bergen and State of New Jersey, described as follows: Beginning at a point in the high-water
mark of the westerly shore of the Hudson River where the
7068 same is intersected by the division line between lands of Ezra
Miller and lands of the said The Metropolitan Gas Light Company of the City of New York, and from thence running south fifty-four degrees and thirty minutes, east six hundred and sixty-nine and four-tenths feet to the new exterior line for solid filling, established December 11th, 1875, by the Commissioners appointed under the authority of the Act entitled "An Act to ascertain the rights of the State and of riparian owners in the lands lying under the water of the Bay of New York and elsewhere in this State." Approved April 11th, A. D. 1864, and the supplements thereto; thence along said new exterior line for solid filling, south thirty-five degrees and thirty minutes west, four hundred and eighty-six and nine one-hundredths feet; thence north, fifty-four degrees and thirty minutes, west, six hundred and seventy and sixty-seven one-hundredths feet to high-water mark of the westerly shore of the Hudson River, where the same is intersected by the division land of Isaac P. Martin, formerly Melville, and lands of the said Metropolitan Gas Light Company of the City of New York; thence northeasterly along said high-water mark to the place of beginning. With the right, liberty, privilege and franchise to exclude the tide water from so much of the lands

above described as lie under tide water by filling in, or otherwise including the same, and to appropriate the lands above described to its exclusive private uses.

And also, all and singular the lands under water lying between the exterior line for solid filling and the exterior line for piers, as fixed by the Commissioners appointed under the authority of the Act aforesaid and the supplements thereto; and bounded by the northerly and southerly lines of the above described tract extended easterly to said pier line. With the right, liberty, privilege and franchise of building piers alone upon the lands last above conveyed, that is to say, that which lies between the exterior lines already fixed and above mentioned.

And if and when said exterior line shall be fixed at any
7069 other points or places further out into said river.

Also any and all lands under water, lying between the present exterior lines above described and the new exterior line or lines that may be hereafter fixed, the same to be used for solid filling and for piers respectively, agreeably to the terms of such extension. And being the same premises conveyed to the party of the first part, by a grant from the State of New Jersey, dated the 6th day of January, 1883, and recorded in the Bergen County Clerk's Office on the 17th day of January, A. D. 1883, in Liber G-11 of Deeds, pages 668, etc.

COMPLAINANT'S EXHIBIT 25.

ALL those certain lots, pieces or parcels of land, situate, lying and being in the Twelfth Ward of the City of New York, being in Block No. sixteen hundred and forty-three (1643) in Section No. six (6), as shown on the Land Map of the City of New York and which taken together are bounded and described as follows: Beginning at the southwesterly corner of Lexington Avenue and East One Hundred and Sixteenth Street; thence running westwardly, but along the southerly line of East One Hundred and Sixteenth Street, eighty (80) feet; thence running southwardly, but parallel with Lexington Avenue, one hundred feet (100) and eleven (11) inches; thence running eastwardly, but parallel with East One Hundred and Sixteenth Street, eighty (80) feet to the westerly line of Lexington Avenue; and thence running northwardly but along said westerly line of Lexington Avenue, one hundred (100) feet and eleven (11) inches to the southwesterly corner of Lexington Avenue and East One Hundred and Sixteenth Street, the point or place of beginning.
7070 A portion of the premises above described being conveyed by the parties of the first part to the party of the second part by deed bearing even date herewith and containing the usual covenants.

COMPLAINANT'S EXHIBIT 26.

ALL those certain lots, pieces or parcels of land, situate, lying and being in the Twelfth Ward of the City of New York, being in Block No. sixteen hundred and forty-three (1643) in Section No. six (6), as shown on the Land Map of the City of New York, and which taken together are bounded and described as follows: Beginning at the southwesterly corner of Lexington Avenue and East One Hundred and Sixteenth Street; thence running westwardly, but along the southerly line of East One Hundred and Sixteenth Street; eighty (80) feet, more or less, to the easterly line of the wall of the building adjoining on the west the premises hereby conveyed; thence running southwardly by a line parallel with Lexington Avenue and eighty (80) feet westwardly therefrom, but along the easterly line of said wall so far as the same extends one hundred (100) feet and ten (10) inches; thence running eastwardly, and parallel with East One Hundred and Sixteenth Street, but part of the distance along the northerly line of the wall of the building adjoining on the south the premises hereby conveyed, eighty (80) feet to the westerly line of Lexington Avenue, and thence running northwardly, but along said westerly line of Lexington Avenue, one hundred (100) feet and ten (10) inches, more or less, to the southwesterly corner of Lexington Avenue and East One Hundred and Sixteenth Street, the point or place of beginning.

7071

COMPLAINANT'S EXHIBIT 27.

ALL those two certain lots, pieces or parcels of land with the buildings thereon erected, situate, lying and being in the Twelfth Ward of the City of New York, and which taken together are bounded and described as follows: Beginning at a point on the northerly side of One Hundred and Fourteenth Street, distant one hundred and eight (108) feet and three (3) inches westerly from the northwesterly corner of One Hundred and Fourteenth Street and Third Avenue; thence running westerly along the northerly side of One Hundred and Fourteenth Street, forty-two (42) feet and two (2) inches; thence northerly parallel with Third Avenue and distant one hundred and fifty (150) feet and five (5) inches westerly therefrom, one hundred (100) feet and eleven (11) inches to the centre line of the block between One Hundred and Fourteenth and One Hundred and Fifteenth Streets; thence running easterly along said centre line forty-two (42) feet and two (2) inches; thence running southerly on a line parallel to Third Avenue, one hundred (100) feet and eleven (11) inches to the northerly side of One Hundred and Fourteenth Street at the point or place of beginning be said distance and dimensions more or less.

COMPLAINANT'S EXHIBIT 28.

ALL that certain dwelling house and lot, piece or parcel of land, situate, lying and being in the Eighteenth Ward of the City of New York on the southeasterly side of Irving Place, between Fourteenth and Fifteenth Streets and bounded northwesterly in front by Irving Place, southeasterly in the rear by a line drawn parallel to Irving Place on the southeasterly side thereof, and distant therefrom

7072 ninety-two feet, northeasterly by a line drawn parallel to Fifteenth Street on the southwesterly side thereof and distant therefrom fifty-nine feet, southwesterly by a line drawn parallel to the said Fifteenth Street on the southwesterly side thereof and distant therefrom eighty-four feet and being twenty-five feet in width and ninety-two feet in depth.

COMPLAINANT'S EXHIBIT 29.

ALL that certain lot, piece or parcel of land situate, lying and being in the Eighteenth, late Sixteenth, Ward of the City of New York, bounded and described as follows, viz: Beginning at a point on the southerly side of Fifteenth Street, distant one hundred and forty-two (142) feet easterly from the southeasterly corner of Irving Place and Fifteenth Street, running thence easterly along the said southerly side of Fifteenth Street, thirteen feet and six inches (13 feet 6 inches) to the centre of a party wall which forms the westerly wall of the building now erected on the premises that adjoins on the east the premises hereby conveyed, running thence southerly and parallel with Irving Place through and along the centre of the said party wall, eighty-four (84) feet; thence westerly parallel with Fifteenth Street, thirteen feet and six inches (13 feet and 6 inches); thence northerly and parallel with Irving Place, eighty-four (84) feet to the point or place of beginning.

COMPLAINANT'S EXHIBIT 30.

ALL those three certain lots, pieces or parcels of land with the buildings thereon erected, situate, lying and being in the Eighteenth Ward of the Borough of Manhattan in the City of New York, and taken together are bounded and described as follows, viz: Beginning at a point on the westerly side of Avenue A, distant twenty feet northerly from the corner formed by the intersection of the westerly line of said Avenue A and the northerly line of Twentieth Street and running thence northerly along the westerly line of said Avenue A, sixty feet; thence westerly at right angles with the said Avenue, seventy feet; thence southerly on a line parallel with the said Avenue A, sixty feet, and thence easterly parallel with Twentieth Street, seventy feet to the westerly line of said Avenue at the point of beginning. 7073

BEING the same premises conveyed to Benjamin Weed, party of the first part hereto, by Antoinette Kellogg, by deed dated 28th February, 1899, and recorded in the office of the Register of the City and County of New York on the 14th March, 1899, in Liber of Section 3, Block Series of Conveyances, page ——.

COMPLAINANT'S EXHIBIT 31.

ALL that certain lot, piece or parcel of land, with the buildings thereon erected, situate in the Eighteenth Ward of the City of New York, bounded and described as follows: That is to say, BEGINNING on the easterly side of Avenue A at a point distant twenty-

three feet and one inch and one-half inch or thereabouts northwardly from the corner formed by the intersection of the easterly line of Avenue A by the northerly line of Twentieth Street, such point of beginning being immediately adjoining the northerly side wall of the house erected on the lot situate on the northeasterly corner of Avenue A and Twentieth Street and running thence northwardly along the easterly line of Avenue A twenty-three feet and three-quarters of an inch or thereabouts, to the centre line of the party wall between the house erected on the premises hereby
7074 conveyed and the house adjoining the same on the northerly
side thereof; thence eastwardly through the centre line of such party wall and along a line in continuation of such centre line parallel with Twentieth Street, seventy feet; thence southwardly parallel with Avenue A, twenty-three feet and three-quarters of an inch, and thence westwardly parallel with Twentieth Street and along the northerly side of the wall of the said house erected on the lot situate on the northeasterly corner of Avenue A and Twentieth Street, seventy feet to the point or place of beginning. Being the same premises conveyed to the said Henry Fuldner by Simon P. Flannery, by deed dated the first day of March, 1890, and recorded in the office of the Register of the County of New York on the same date in Liber 2296 of Conveyances, page 231; subject, however, to a mortgage for eight thousand dollars ($8,000), the payment of which is hereby assumed by the said party of the second part. And likewise ALL that certain lot, piece or parcel of land situate in the Eighteenth Ward of the City of New York and bounded and described as follows: That is to say, BEGINNING on the easterly side of Avenue A at a point distant forty-six and one-half inches or thereabouts northwardly from the corner formed by the intersection of the easterly line of Avenue A by the northerly line of Twentieth Street, and running thence northwardly along the easterly line of Avenue A, twenty-three (23) feet and one and one-half inches or thereabouts to the centre line of the party wall between the premises hereby conveyed and the lot adjoining the same on the northerly side thereof; thence eastwardly through the centre line of such party wall and along a line in continuation of such centre line parallel with Twentieth Street, seventy feet; thence southwardly parallel with Avenue A, twenty-three feet and one-half inches; and thence westwardly parallel with Twentieth Street and a part of the way through the centre of a party wall seventy feet to the place or
7075 point of beginning; subject, however, to a mortgage for eight
thousand dollars ($8,000), the payment of which is hereby assumed by the party of the second part, being the same premises conveyed to the said Henry Fulner by Virginia Quinn by deed dated the first day of March, 1890, and recorded in the office of the Register of the County of New York in Liber 2306 of Conveyances, page 92.

TOGETHER with the appurtenances and all the estate and rights of the parties of the first part in and to said premises.

COMPLAINANT'S EXHIBIT 32.

ALL that certain lot, piece or parcel of land, with the building thereon erected, situate, lying and being in the Borough of Manhattan of the City of New York, and bounded and described as follows:

Beginning at the corner formed by the intersection of the easterly side of Avenue A with the northerly side of Twentieth Street, and running thence northerly along the easterly side of Avenue A, twenty-three (23) feet; thence eastwardly parallel with Twentieth Street seventy (70) feet; thence southwardly parallel with Avenue A, twenty-three (23) feet to the northerly side of Twentieth Street; and thence westwardly along said northerly side of Twentieth Street, seventy (70) feet to the place of beginning. Being part of the lot known on a map of lands belonging to the estate of Thomas H. Smith on file in the office of the Register of New York County as lot No. one hundred and ninety-three (193), and being the same premises which were conveyed to the said Michael John Farrell by James T. O'Hara, Joseph F. O'Hara and John P. O'Hara, by deed dated the first day of September, 1884, and recorded on the same day in said Register's office in Liber 1831 of Conveyances, page 235.

7076

COMPLAINANT'S EXHIBIT 33.

ALL that certain lot of land together with the buildings thereon erected, situate, lying and being in the City, County and State of New York and bounded and described as follows:

Beginning at a point on the easterly side of Avenue A, distant forty-six feet southerly from the corner formed by the intersection of the said easterly side of Avenue A and the southerly side of Twenty-first Street; thence running easterly and parallel with said street seventy feet; thence southerly and parallel with the said avenue twenty-three feet; thence westerly again parallel with said street seventy feet to the easterly side of the said avenue; and thence northerly along said avenue twenty-three feet to the point or place of beginning.

COMPLAINANT'S EXHIBIT 34.

ALL that certain triangular plot or parcel of land and premises hereinafter particularly described, situate, lying and being in the Township of Ridgefield, County of Bergen and State of New Jersey, and being more fully described as follows: Said land beginning at a point in the centre of the old River Road, the same being the easterly corner of the land hereby intended to be conveyed as shown on map hereto attached; and from thence running (1) north forty-one degrees and twenty-one minutes west (N.41° 21′ W.), ninety (90) feet to the centre of the new highway; thence (2) southwesterly along the centre of the new highway a distance of two hundred and thirty-two (232) feet to the centre of the Old River

Road to a point distant two hundred and thirty (230) feet westerly from the point of beginning; thence (3) easterly along the centre of the Old River Road a distance of two hundred and thirty 7077 (230) feet to the point or place of beginning; containing two hundred and twenty-nine one thousandths (0.229) of an acre, be the same more or less, but all measurements to be subordinate to this, namely, that the property hereby conveyed goes to and along the centre of the new road.

COMPLAINANT'S EXHIBIT 35.

ALL that certain lot, piece or parcel of land situate lying and being in the Twenty-second Ward of the City of New York, bounded and described as follows: BEGINNING at a point formed by the intersection of the northerly line of Forty-first Street with the easterly line of the Eleventh Avenue and running thence northerly along the said easterly line of Eleventh Avenue, twenty feet; thence easterly parallel with Forty-first Street, sixty-two feet through the centre of a party wall; thence southerly and parallel with Eleventh Avenue, twenty feet to the northerly line of Forty-first Street, and thence westerly along the said northerly line of Forty-first Street, sixty-two feet to the point or place of beginning, together with the buildings thereon erected and the right to the party wall on the northerly side of said lot hereby conveyed as the buildings on the said lot and the adjoining lot now stand. Being a portion of the premises conveyed by the parties of the first part hereto to Harrison E. Gawtry by deed dated the 23d day of January, 1896, and recorded in the office of the Register of the City and County of New York, in Liber 45 of Section 4, Block Series of Conveyances, page 370, and by said Harrison E. Gawtry and wife conveyed to the party of the second part hereto by deed dated the 5th day of February, 1898, and to be recorded in said Register's office.

ALSO all those four certain lots of land, situate, lying and 7078 being on the northerly side of Forty-second street in the City, County and State of New York, which taken together are bounded and described as follows: Beginning at a point on the said northerly side of Forty-second Street distant two hundred and twenty-five feet easterly from the easterly side of Eleventh Avenue, running thence northerly parallel with Eleventh Avenue, one hundred feet five inches to the centre line of the block between Forty-second and Forty-third Streets; thence easterly parallel with Forty-second Street one hundred feet; thence southerly parallel with Eleventh Avenue, one hundred feet five inches to the northerly side of Forty-second Street, and thence westerly along said northerly side of Forty-second Street, one hundred feet to the point or place of beginning. BEING the same premises conveyed by the parties of the first part hereto to the party of the second part by deed dated the 7th day of October, 1896, and recorded in said Register's office, in Liber 51 of Section 4, Block Series of Conveyances at page 411. This conveyance being given to perfect and confirm the title of the party of the second part hereto in and to said premises.

COMPLAINANT'S EXHIBIT 36.

ALL that piece or parcel of land with the buildings thereon erected, situate, lying and being in the Twenty-second Ward of the City of New York, being in Section No. four (4) in Block No. one thousand and ninety-three (1093), as shown on the Land Map of the City of New York, and being bounded and described as follows: Beginning at a point on the northerly line of West Forty-fifth Street, distant two hundred and twenty-five (225) feet westwardly from the northwesterly corner of West Forty-fifth Street and Eleventh Avenue; thence running northwardly, but parallel, with said 7079 Eleventh Avenue, one hundred (100) feet five (5) inches to the middle line of the block; thence running westwardly, but along said middle line of the block fifty-six (56) feet three (3) inches; thence running southwardly, but again parallel, with said Eleventh Avenue, and to and through a party wall so far as the same extends, one hundred (100) feet five (5) inches to the northerly line of said Forty-fifth Street, and thence eastwardly, but along said northerly line of Forty-fifth Street, fifty-six (56) feet three (3) inches to the point or place of beginning.

COMPLAINANT'S EXHIBIT 37.

ALL that certain piece or parcel of land with the building thereon erected, situate, lying and being in the City of New York, on the northerly side of Forty-fifth Street, and bounded and described as follows: Commencing at a point on the said northerly side of Forty-fifth Street, distant westerly two hundred and eighty-one feet and three inches from the northwesterly corner of Forty-fifth Street and Eleventh Avenue; thence running northerly but parallel with Eleventh Avenue and partly through the middle of a certain party wall, one hundred feet and five inches; thence westerly, but parallel, with Forty-fifth Street, eighteen feet and nine inches; thence southerly, but again parallel, with Eleventh Avenue, one hundred feet and five inches to the northerly side of Forty-fifth Street, and thence easterly along the northerly side of Forty-fifth Street, eighteen feet and nine inches, to the place of beginning, be the said dimensions more or less.

COMPLAINANT'S EXHIBIT 38.

7080 ALL that certain lot, piece or parcel of land, with the buildings thereon erected, situate, lying and being in the Twenty-second Ward of the City of New York, being in block number ten hundred and ninety-two, in section number four, as shown on the land map of the City of New York, and being bounded and described as follows:

Beginning at a point in the southerly line of West Forty-fifth Street, distant one hundred and twenty-five feet, more or less, westwardly from the southwesterly corner of Eleventh Avenue and West

Forty-fifth Street, but opposite to the easterly line of an independent wall, being the easterly wall of the building on the premises hereby conveyed; thence running southwardly, but parallel with Eleventh Avenue, and along the easterly line of said independent wall, so far as the same extends, one hundred feet and five inches to the middle line of the block; thence running westwardly, but along said middle line of the block sixteen feet eight inches; thence running northwardly and again parallel with Eleventh Avenue, and to and through a party wall, so far as the same extends, one hundred feet and five inches to said southerly line of West Forty-fifth Street, and thence running eastwerdly, but along said southerly line of West Forty-fifth Street, sixteen feet eight inches, more or less, to the point or place of beginning, said premises being known by the street number 606 West Forty-fifth Street.

COMPLAINANT'S EXHIBIT 39.

ALL that certain lot, piece or parcel of land, with the buildings thereon erected, situate, lying and being in the Twenty-second Ward of the City of New York, and being in block one thousand and ninety-two (1092) in section four (4) as shown on the land map of the City of New York, and being bounded and described as follows:

Beginning at a point on the southerly line of West Forty-
7081 fifth Street, distant one hundred and forty-one feet (141)
eight (8) inches, more or less, westwardly from the southwesterly corner of Eleventh Avenue and West Forty-fifth Street, but at or opposite to the middle of a party wall; thence running southwardly and parallel with Eleventh Avenue and to and through the middle line of said party wall so far as the same extends, one hundred (100) feet five (5) inches to the middle line of the block; thence running westwardly but along said middle line of the block sixteen (16) feet eight (8) inches; thence running northwardly but again parallel with Eleventh Avenue, and to and through the middle line of another party wall so far as the same extends, one hundred (100) feet five (5) inches to said southerly line of West Forty-fifth Street, and thence running eastwardly but along said southerly line of West Forty-fifth Street, sixteen (16) feet eight (8) inches to the point or place of beginning.

Being the same property conveyed to me by deed recorded in the office of the Registrar of the City and County of New York, in Liber 948 of Conveyances, at page 158.

COMPLAINANT'S EXHIBIT 40.

ALL that certain lot, piece or parcel of land with the buildings and erections thereon, situated, lying and being in the Twenty-second Ward of the City of New York, known as number 612 West Forty-Fifth Street, and bounded and described as follows, to wit: Beginning at a point on the southerly line of West Forty-fifth Street, distant one hundred and seventy-five (175) feet westwardly from the southwesterly corner of said West Forty-fifth Street and Eleventh

Avenue, and thence running southwardly but parallel with said Eleventh Avenue, one hundred (100) feet five (5) inches to
7082 the middle line of the block; thence westwardly, but along the said middle line of the block, twenty-five (25) feet; thence northwardly, but again parallel with said Eleventh Avenue, one hundred (100) feet and five (5) inches to the said southerly line of West Forty-fifth Street, and thence eastwardly, but along the said southerly line of West Forty-fifth Street twenty-five (25) feet to the point or place of beginning; the said premises being the premises designated as Lot No. 79 on a map made by Thomas R. Ludlam, City Surveyor, and filed in the office of the Registrar of the City and County of New York as map No. 137, in a tin case, and being also the same premises which were conveyed to the said Robert Auld by Matthew Allen and Agnes, his wife, by deed dated February 1st, 1860, and recorded in the office of the Registrar of the City and County of New York, in Liber 797, Conveyances, page 660, March 22d, 1860.

COMPLAINANT'S EXHIBIT 41.

ALL those seven lots of land, situate in the Twenty-second Ward of the City of New York, which, taken together, are bounded and described as follows:

Beginning on the southerly side of Forty-sixth Street, distant three hundred and twenty-five feet westerly of the southwest corner of said Forty-sixth Street and Eleventh Avenue, and running thence westerly along the southerly side of West Forty-sixth Street, one hundred and seventy-five feet; thence southerly, parallel with said Eleventh Avenue, one hundred feet five inches to the middle line of the block between Forty-fifth and Forty-sixth Streets; thence easterly along said middle line one hundred and seventy-five feet; thence northerly and parallel with said Eleventh Avenue, one hundred feet five inches to the point or place of beginning.

7083 COMPLAINANT'S EXHIBIT 42.

BEGINNING at a point in the southerly side of Sixty-fifth Street, four hundred (400) feet east of West End Avenue; running thence southerly parallel with West End Avenue, one hundred (100) feet five (5) inches; thence easterly parallel with Sixty-fifth Street, one hundred (100) feet; thence northerly parallel with West End Avenue, one hundred (100) feet five (5) inches to the southerly side of Sixty-fifth Street, and thence westerly along the same one hundred (100) feet to the point or place of beginning. Said premises being known by the street numbers 222, 224, 226 and 228 West Sixty-fifth Street.

COMPLAINANT'S EXHIBIT 43.

ALL that triangular piece of land in the Twelfth Ward of the City of New York bounded and described as follows: Beginning at a point on the northerly side of One Hundred and Tenth Street, distant one hundred and seventy-five (175) feet, easterly from the point formed by the intersection of the northerly side of One Hundred and Tenth Street with the easterly side of Second Avenue; thence running northerly in a line parallel with the easterly side of Second Avenue, eighty (80) feet ten (10) inches, to the westerly side of an old lane formerly called Roosevelt's Lane; thence southerly along the westerly line of said Lane, one hundred and nine (109) feet, two and one-quarter (2¼) inches to the northerly side of One Hundred and Tenth Street, at a point thereon distant easterly from the northeasterly corner of said Street and Second Avenue, two hundred and forty-eight (248) feet five (5) inches; thence westerly along said northerly side of One Hundred and Tenth Street, seventy-three (73) feet five (5) inches to the point or place of beginning, be the said several dimensions more or less.

7084

COMPLAINANT'S EXHIBIT 44.

ALL that certain triangular piece or parcel of land, situate, lying and being in the Twelfth Ward of the City of New York, and bounded and described as follows: Beginning at a point on the southerly line of East One Hundred and Twelfth Street, distant one hundred and seventy-five feet westwardly from the southwesterly corner of First Avenue and East one Hundred and Twelfth Street; thence running southwardly but parallel with said First Avenue, thirty-six feet and three-quarters of an inch, more or less, to the easterly line of lands of the said Consolidated Gas Company; thence running northwardly but along said easterly line of lands of said Gas Company to the southerly line of One Hundred and Twelfth Street, at a point distant two hundred and seven feet and ten inches westwardly from the southwesterly corner of One Hundred and Twelfth Street and First Avenue, and running thence eastwardly but along said southerly line of East One Hundred and Twelfth Street, thirty-two feet ten inches, more or less, to the point or place of beginning—the said premises being situated in block 1683 on the land map made pursuant to Chapter 349, Laws of 1889, and the amendments thereto.

COMPLAINANT'S EXHIBIT 45.

BEGINNING at a point in the centre line of the block between One Hundred and Twelfth and One Hundred and Eleventh Streets, distant one hundred feet westerly from the westerly side of First Avenue, and running thence southerly, parallel with the westerly side of First Avenue and along the land now or formerly of Peter

Marine, seventeen feet and two inches, to land formerly belonging to the Estate of George Bradish, deceased, but now owned by The Consolidated Gas Company, the party of the second part; thence northwesterly, along said land, twenty-three feet and twenty-six one-hundredths of a foot to the centre line of the block; thence easterly along said centre line and along land owned by the party of the first part, fifteen feet eight inches and forty-one one-hundredths of an inch to the point of beginning, be said several distances and dimensions more or less. 7085

BEING A PART OF THE PREMISES conveyed to the party of the first part by Maria Cipollaro and Erico Cipollaro, her husband, by deed dated June 27th, 1905, and recorded June 28th, 1905, in the office of the Registrar of the County of New York, in Liber 102, Section 6 of Conveyances, at page 463.

COMPLAINANT'S EXHIBIT 46.

DESCRIPTION OF PROPERTY CONVEYED BY

JOHN D. CRIMMINS

TO

CONSOLIDATED GAS COMPANY OF NEW YORK.

Dated December 24, 1892.

ALL that certain plot, piece or parcel of land, situate, lying and being in the Twelfth Ward of the City of New York, being in block number nineteen hundred and ninety-nine (1999) in Section Number Seven (7) as shown on the Land Map of the City of New York, and bounded and described as follows: Beginning at the northeasterly corner of West One Hundred and Thirty-second Street and Twelfth Avenue, and thence running eastwardly, but along the northerly line of West One Hundred and Thirty-second Street, six hundred and seventy-five (675) feet; thence northwardly, but parallel with said Twelfth Avenue, ninety-nine (99) feet eleven (11) inches, to the middle line of the block; thence running westwardly, but along said middle line of the block, twenty-five (25) feet; thence running northwardly, but again parallel with said Twelfth Avenue, ninety-nine (99) feet eleven (11) inches to the southerly line of West One Hundred and Thirty-third Street; thence running westwardly, but along the said southerly line of West One Hundred and Thirty-third Street, six hundred and fifty (650) feet to the southeasterly corner of said West One Hundred and Thirty-third Street, and said Twelfth Avenue; thence running southwardly, but along the easterly line of said Twelfth Avenue, one hundred and ninety-nine (199) feet ten (10) inches to the said northeasterly corner of West One Hundred and Thirty-second Street and Twelfth Avenue, the point or place of beginning. 7086

TOGETHER with the appurtenances, and all the estate and rights of the said party of the first part, in and to said premises.

COMPLAINANT'S EXHIBIT 47.

ALL that certain plot, piece of parcel of land, formerly land under water and now filled in on the Harlem River, bounded and described as follows, to wit:

ALL those certain lots, pieces and parcels of land, formerly under water, situate, lying and being in the Twelfth Ward of the City of New York, bounded on the north by the southerly line of the Ninety-ninth Street, and on the south by the northerly line of Ninety-7087 eighth Street, and on the east by the westerly line of the Exterior Street as now established by law, and on the west by the original line of high water from its intersection with the southerly line of Ninety-ninth street as it winds and turns to its intersection with the easterly line of First Avenue; thence southerly to the point of intersection of the easterly line of First Avenue with the northerly line of Ninety-eighth Street; being the said premises shown upon the map hereto annexed and made part hereof, colored yellow, together with all and singular the tenements, hereditaments, and appurtenances thereunto belonging or in anywise appertaining and reversion and reversions, remainder and remainders, rents, issues, and profits thereof. ALSO ALL the estate, right, title, interests, property, possession, claim and demand whatsoever as well in law as in equity of the said party of the first part of, in and to the above described premises and every part thereof with the appurtenances.

Said deed contains the following:

And the said party of the second part, for itself, its successors and assigns, does hereby covenant and agree to and with the said party of the first part, its successors and assigns, that if the said party of the second part, its successors and assigns, shall and will within three months next after they shall be thereunto required, by the said party of the first part, or the Common Council of the City of New York or its successors or the Board of Commissioners of the Department of Docks of said City, at its own proper costs and charges build, erect, make and finish, or cause to be built, erected, made and finished according to any resolution or ordinance of the said party of the first part, the said Common Council or its successors, or the Board of Department of Docks, already passed or adopted, or that may hereafter be passed or adopted, a good and sufficient street which shall 7088 form the northerly one-half part of Ninety-eighth Street, and another good and sufficient street which shall form the southerly one-half part of Ninety-ninth Street, said streets lying contiguous to the premises hereinbefore described and extending from the original line of high water mark to the westerly side of the exterior street, wharf or place determined upon by the Department of Docks; and will fill in the same with good and sufficient earth and regulate and pave the same and lay the sidewalks thereof.

And also that the said party of the second part, its successors and assigns, shall and will from time to time, and at all times forever hereafter at its own proper costs and charges, and expenses, uphold and keep in good order and repair all of said parts of such streets and sidewalks which the said party of the second part has covenanted and agreed to make, erect and build as aforesaid, and will at all times hereafter obey, fulfill and observe such ordinances, resolutions, orders and directions as the said party of the first part or the said Common Council and its successors, or the said Board of the Department of Docks shall from time to time pass or make relative thereto.

And also that the said streets shall forever thereafter continue to be and remain public streets and highways for the free and common use of the inhabitants of the City of New York and all others to pass and re-pass by, through and along the same in like manner as the other public streets and avenues of said city now are or lawfully ought to be.

And in case default shall be made by the said party of the second part, its successors or assigns, in building, erecting, making and finishing the said streets, by them covenanted herein to be built, erected, made and finished, and in filling in the same or any part thereof, or in complying with any ordinance, resolution or order of the
7089 said party of the first part, the said Common Council or its successors, or said Board of the Department of Docks when required, then and in that case it shall and may be lawful for the said party of the first part or its successors to build, erect, make and finish, or cause to be built, erected, made and finished, the streets aforesaid, and to fill in the same and to regulate and pave the same and to lay the sidewalks for and on account of, and at the proper costs and charges of the said party of the second part, its successors and assigns, and to charge to and recover in an action at law from the said party of the second part, its successors and assigns the amount thereof, together with the interest thereon and all the costs, and charges of the proceedings relative to the same or to sell and dispose of the whole of the said hereby granted premises or any part thereof at public auction for the most that can be obtained for the same, and in case of any deficiency to charge with and recover from the said party of the second part, its successors and assigns, the amount of such deficiency, or to adopt and pursue any legal right or remedy that the said party of the first part now possesses or enjoys under and by virtue of any act of the Legislature of the State of New York, or that may hereafter be granted unto the said party of the first part, or its successors by the Legislature of the State of New York, or to enter into or upon the whole or any part of the hereby granted premises and to grant the same to any person or persons, their heirs or assigns forever.

* * * * * * *

And it is further mutually agreed by and between the parties to these presents that the estate hereby granted is upon this express condition, that if at any time hereafter it shall appear that the said party of the second part was not at the time of the date of
7090 these presents seized of a good, sure, absolute and indefeasible estate of inheritance in fee simple of, in and to the land and premises on the westerly side of and adjacent to the premises hereby conveyed or so intended to be conveyed, that then and in every such case these presents and every article, clause and thing herein con-

tained shall be absolutely null and void, and the said party of the first part, and its successors and assigns, shall and may forthwith thereupon enter into the said premises hereby granted and shall be thereafter seized of the said premises with the appurtenances, free, clear and discharged of and from any claim, right or pretence of claim or right of the said party of the second part, its successors and assigns, anything herein contained to the contrary notwithstanding.

And it is hereby further mutually agreed and understood that if the said party of the second part, its successors and assigns, shall make default in the performance of any or either of the covenants herein contained on their part and behalf to be observed, performed, fulfilled and kept, then and in every such case these presents and every article, clause or thing herein contained shall be and become absolutely null and void, and the said party of the first part, its successors and assigns shall and may forthwith thereupon enter into and upon the said premises hereby granted and shall thereafter be seized of the same with the appurtenances free, clear and discharged of and from all claim or right or pretence of claim or right of the said party of the second part, its successors and assigns, anything herein contained to the contrary notwithstanding.

COMPLAINANT'S EXHIBIT 49.

(Blue Print.)

COMPLAINANT'S EXHIBIT 50.

"All those several certain lots, pieces or parcels of land, situate lying and being in the Borough of Queens, City of New York, and State of New York, and which taken separately, are bounded and described as follows:

First Parcel. All that certain tract of land and meadow, with the improvements thereon, situate, lying and being at Hell Gate Neck, in Newtown, Long Island, formerly known as Willoughby's Point, but now commonly called Casina, containing by estimation ninety acres of land, more or less, and bounded northwesterly and northeasterly by the Sound and Bay; southeasterly by a creek and ditch that divide it from the meadow now or late of Elbert Luyster, and by the land now or late of Cornelius Berrian; southerly by land now or late of Jacob Rapalje, Jr., and southwesterly by land now or late of Abraham Polhemus, Jr., and Samuel Lawrence, running down to the Sound aforesaid, being part of the premises conveyed to George M. Woolsey by Samuel A. Willoughby and Margaretta, his wife, by deed dated the twelfth day of July, 1841, and recorded in the office of the Clerk of the County of Queens in Liber 55 of Deeds, at page 242.

7092 Second Parcel. All that certain piece of land situate in Newtown aforesaid, and known on a map entitled "Map of property belonging to the Estate of Abraham Polhemus, deceased, in the Town of Newtown, Queens County" etc., surveyed by Gardner A. Sage, City Surveyor, December 3d, 1844, and filed in the Clerk's office of Queens County as lot number seven (7) bounded southwesterly by a road in common running through the said farm five hundred and eighteen feet; northwesterly by the rears of lots number four (4), five (5) and six (6) on said map, six hundred and eighty-six feet six inches; northeasterly by land late of George M. Woolsey, five hundred and twenty-five feet, and southeasterly by lot number twelve (12) on said map belonging to Harriet S. Robertson, six hundred and twenty-four feet, according to said map, containing seven and seventy-nine one-hundredths (7 79/100) acres. Also, all the right, title and interest of the said party of the first part, if any, of, in and to the road in front of said premises laid down on said map; being the same premises described in a deed from Abraham Polhemus and Eliza B., his wife, to the said George M. Woolsey, dated the thirteenth day of January, 1847, and recorded in the office of the Clerk of said County in Liber 70 of Deeds, at page 306.

Third Parcel. All that certain piece of land, situate in Newtown aforesaid, known on said map entitled "Map of property belonging to Estate of Abraham Polhemus, deceased," as lot number six (6), bounded northwesterly in front by the East River; northeasterly by land late of George M. Woolsey; southeasterly in the rear by lot number seven (7) on said map, and southwesterly by lot number five (5) on said map, belonging to Harriet S. Robertson, containing eight and thirty-three one-hundredths (8 33/100) 7093 acres according to said map; being the same premises described in a certain deed from James S. Polhemus and Anne E., his wife, to said George M. Woolsey, bearing date the 13th day of January, 1847, and recorded in the office of the Clerk of said County of Queens in Liber 70 of Deeds, at page 288.

Fourth Parcel. All that certain farm of lands, situate in Newtown aforesaid bounded and described as follows:

Beginning at dock and thence running south eleven degrees west six chains; thence south nineteen degrees west two chains seventy-six links; thence south forty-two degrees west one chain, eighty-five links; thence due west four chains sixty-seven links; thence south fifty-seven degrees west four chains sixty links; thence south fifteen degrees west eight chains; thence due west six chains four links; which courses are along the River and Creek; thence north twenty-eight degrees west four chains eighty-five links along Peter Rapalje's land, thence north sixty degrees west two chains sixty links; thence north seventy degrees west four chains, which two last courses are along land conveyed by Dows Ditmars and wife to Ezra N. Berrian, hereinafter described; thence north sixteen degrees thirty minutes west four chains forty links along land late of Edward J. Woolsey; thence north forty-five degrees east five chains eight links along said Woolsey's land; thence north twenty-four degrees west sixty links; thence north seventy degrees east fourteen chains along the land of

George Kouwenhoven; thence north sixteen degrees east eleven chains seventy-five links, and thence south forty degrees east fourteen chains eighty links, to the place of beginning; containing
7094 forty-three acres, fifteen perches of land, more or less, being the same premises described in a certain deed made by John M. McDonald, Master in Chancery, to Ezra M. Berrian, dated the 1st day of August, 1829, and recorded in the office of the Clerk of the County of Queens, in Liber MM of Conveyances, at page 169.

Fifth Parcel. All that certain tract, piece or parcel of land and meadow, situate, lying and being as follows: Bounded on the northwest and northeast by land and meadow late of Ezra M. Berrian, and formerly belonging to Samuel Berrian, deceased; on the southeast and southwest by land and meadow lately belonging to the Estate of Jacob Rapalje, deceased; containing two acres, more or less, being the same premises described in a certain deed to said Ezra M. Berrian by Dowd Ditmars and wife, dated the 24th day of April, 1848, and recorded in the Clerk's office of said County of Queens in Liber 80 of Deeds, at page 455.

Sixth Parcel. All the right, title and interest of said party of the first part of, in and to all that certain piece of land with the improvements thereon, situate in Newtown aforesaid, bounded as follows: Northerly by the highway leading from Hell Gate and Astoria along the River from the Bowery and Newtown; easterly by land of the Estate of Jacob Rapalje, and southerly and westerly by land late of George M. Woolsey; containing along the highway seventy-one feet, on the easterly side one hundred and twenty-three feet; on the southerly side seventy-two feet, and on the westerly side one hundred and twenty-seven feet, as the said premises are now enclosed.

Seventh Parcel. All that certain piece or parcel of land
7095 under the waters of the East River in front of the adjoining upland, now or late belonging to Edward J. Woolsey, situate in Long Island City, bounded and described as follows: Beginning at a point on the southerly shore of the East River at common high water mark and the boundary line dividing the lands of R. A. Robertson from the said lands now or late of Edward J. Woolsey, and running thence along said high water mark the following courses and distances, viz.: North forty-three and one-quarter degrees, east three hundred and ten and five-tenths (310.5) feet; north fifty-five degrees, sixteen minutes, east four hundred and ninety-two (492) feet; north forty-five degrees, thirty-nine minutes east one hundred and forty-eight (148) feet; north thirty-six degrees, fourteen minutes east three hundred and eighty (380) feet; north sixty-one degrees five minutes east three hundred and sixteen and seven-tenths (316.7) feet; north sixty-seven degrees twenty-three minutes east two hundred and ninety-eight and seven-tenths (298.7) feet; north fifty-five degrees twenty minutes east five hundred and seventy-three and seven-tenths (573.7) feet; south fifty-four degrees, twenty-three minutes east two hundred and ninety-five and five-tenths (295.5) feet; south thirteen degrees thirty minutes west one hundred and twenty-two and seven-tenths (122.7) feet; south thirty-seven degrees forty-seven minutes east one hundred and forty-five and three-tenths

(145.3) feet; south thirty-seven degrees, fifty-one minutes west one hundred and sixty-three and three-tenths (163.3) feet; south twenty-one degrees twelve minutes east six hundred and fifty-five and nine-tenths (655.9) feet; south twenty-seven degrees, forty minutes east four hundred and forty-two and three-tenths (442.3) feet; south six degrees west three hundred and sixteen (316) feet; south sixty-nine degrees east seventy (70) feet; to the middle of a creek 7096 dividing said lands now or late of Edward J. Woolsey from those of George Kouwenhoven; thence and along the centre line of said creek north twenty-six degrees thirty minutes east four hundred and ninety (490) feet; thence north twenty degrees east twelve hundred and eighty (1280) feet; to the permanent bulkhead and pier line; thence along said bulkhead and pier line the following courses and distances: North seventy degrees, forty-five minutes west thirteen hundred and eighty (1380) feet; south fifty-nine degrees west fourteen hundred and fifty (1450) feet; south forty-five degrees fifteen minutes west twelve hundred and twenty-five (1225) feet; thence south thirty-four degrees, forty-five minutes east one hundred and fifty (150) feet; to the place or point of beginning.

Eighth Parcel. All the right, title and interest of said party of the first part of, in and to all that certain tract, piece or parcel of land and land under water, situate in Long Island City aforesaid, being all the land lying between the easterly line of the above described premises and the centre of the creek which separates the said land from the land of Steinway.

Ninth Parcel. All the right, title and interest of said party of the first part of, in and to the other land under water, adjoining the premises hereby conveyed, and the wharfage and cranage therein, and also in and to the lanes, roads and avenues running through or immediately adjoining said premises, excepting, however, from the premises designated above as the third and seventh parcels all that certain tract, piece or parcel of land bounded and described as follows: Beginning at a point on the southerly side of the Shore Road, at the division line between the hereby granted premises and 7097 land of R. A. Robertson, and running thence along said land and premises of R. A. Robertson, south thirty-five degrees thirty-six minutes east two hundred and two feet, seven and three eighths inches; thence south thirty-four degrees, forty-five minutes east eight hundred and seven feet three and five-eighths inches to the centre line of a strip of land laid down on a map or survey of Long Island City, filed in the office of the Secretary of State, made by the Commissioners of Streets, Roads, Avenues and Parks in said City, and designated as Van Alst Avenue; thence along the center line of said strip so described, north forty-nine degrees thirty-nine minutes east six hundred and twelve feet two and three-eighths inches to the Old Bowery Bay Road; thence northwesterly along the Bowery Bay Road as it turns to its intersection with the Shore Road aforesaid; thence southerly along the Shore Road to the point of beginning, containing nine acres and nine hundred and seventy one-thousandths (970/1000) of an acre, and also excepting all land under water in front of said premises so excepted, and in front of lot number twenty (20) and twenty-five (25) included in block 184 hereinafter mentioned.

Excepting also from above granted premises, a certain tract of land which on a "Map of property of the Casina Land Company, dated Long Island City, December 4th, 1897, and made by Leonard C. L. Smith, City Surveyor, is designated as lots 1-6 and 15-20, both inclusive, in block 167B; lots 20-25, both inclusive, in block 184; lots 13 and 14 in block 168B, and lots 32-41, both inclusive, in block 100.

Excepting also so much of the streets and avenues adjoining and in front of the last excepted premises, excepting also from the above granted premises, a portion thereof conveyed by Edward J. Woolsey
and wife to Patrick Ward, by deed dated the 25th day of
7098 April, 1894, and recorded on the 8th day of January, 1895,
in the office of the Clerk of said County of Queens in Liber
1052 of Conveyances, at page 67, and a certain other deed between the same parties, dated the 5th day of January, 1895, and recorded in the office of the Clerk of said County of Queens on the 7th day of January, 1895, in Liber 1051, of Conveyances, at page 458.

For a more particular description of the above granted premises other than the land under water, reference is hereby made to a certain map entitled "Map of the property of the Casina Land Company, made by Stevenson Towle, City Surveyor, dated November 30th, 1898, and filed or intended to be filed in the office of the Clerk of said County of Queens, upon which map such portion of the above granted premises is distinguished by the color blue.

And also all that certain piece or parcel of salt meadow, upland and marsh situated at Hell Gate Neck, in Long Island City, in the Borough of Queens, in the City of New York and in the County of Queens in the State of New York, and bounded as follows, to wit: Beginning at a point on the road or lane leading from the public highway to Berrian's Point, at the southeasterly corner of premises devised to Luke Kouwenhoven by George Kouwenhoven in and by his Will, which point is distant five hundred and eight feet easterly from a ditch separating the said premises so devised to said Luke Kouwenhoven from land formerly of the late Edward J. Woolsey, and running thence north nine degrees and forty minutes west, along said premises so devised to said Luke Kouwenhoven, to the center of a creek separating the premises hereby granted from marsh formerly of the said Edward J. Woolsey; thence northerly and westerly along the center of said creek as it winds and turns to the East River;
thence southeasterly along the East River as it winds and
7099 turns to the center of another creek separating the premises
hereby granted from meadow and marsh formerly of Eliza
N. Berrian and afterwards of the said Edward J. Woolsey; thence southerly along the center of said creek as it winds and turns and said meadow and marsh formerly of Ezra N. Berrian and afterwards of said Edward J. Woolsey to said road or land leading to Berrian's Point, and thence westerly along said road or lane to the place of beginning. Also any right of way of the said party of the first part from the said premises to the public highway; also all the right, title

and interest of the said party of the first part to the lands under the waters of the East River and Berrian's Creek in front of the said piece or parcel of salt meadow, upland and marsh above described, and also the right, title and interest of the said party of the first part in the land constituting the said road or lane in front of and adjoining the premises hereinabove granted.

And also all that certain piece or parcel of meadow and upland situated at Hell Gate Neck in Long Island City, in the Borough of Queens of the City of New York, and in the County of Queens in the State of New York, and bounded as follows, to wit: Beginning at a point on the northerly side of the road or lane leading from the public highway to Berrian's Point, where the same is intersected by a ditch separating the premises hereby granted from the land of the late Edward J. Woolsey, and running thence easterly along the said road or lane leading to Berrian's Point, five hundred and eighty feet to premises devised to Francis D. Kouwenhoven by George Kouwenhoven in and by his Will; thence north nine degrees and forty minutes west along the said premises so devised to the said Francis D. Kouwenhoven, to the center of a creek separating
7100 the premises hereby granted from meadow and marsh of the said Edward J. Woolsey, and then along the center of said creek and said ditch, as the same winds and turns to the place of beginning. Also any right of way of the said party of the first part from the said premises to the public highway. Also the right, title and interest of the said party of the first part in the land constituting the said road or lane in front of and adjoining the said premises herein above granted.

And also all that certain Island situated in the East River in the County of Queens and State of New York, commonly called Berrian's Island, which Island contains about forty-five acres of land and lies opposite to a farm formerly owned by Edward J. Woolsey, and being separated therefrom by a creek called Berrian's Creek, being the same premises conveyed to Edward J. Woolsey, the elder by two deeds, one executed by Moses Longstreet and wife and Samuel Berrian to Edward J. Woolsey, dated the 17th day of August, 1849, recorded on the 18th day of August, 1849, in the office of the Clerk of the County of Queens in Liber 80 of Deeds, at page 268, and one executed by Ezra N. Berrian and wife to Edward J. Woolsey, dated the 18th day of February, 1853, and recorded on the 3d day of March, 1853, in said Clerk's office in Liber 104 of Deeds, at page 141.

Also all that parcel of land under water adjoining said Island between high and low water mark described as follows: Beginning at a stake at common high water mark at the southeasterly corner of the said Berrian's Island; running thence along said high water mark north forty-six degrees, thirty minutes east six hundred feet; thence south ten degrees, thirty-eight minutes east, one hundred and thirty-eight feet; thence south twenty-seven degrees, ten
7101 minutes east, three hundred and thirty-two feet; thence south fifty degrees, forty-two minutes east two hundred and ninety-four feet; thence south eight *eight* degrees, eighteen minutes east

one hundred and eighty-four feet; thence south twelve degrees, thirty-nine minutes east, seven hundred and fifty-three feet; thence south twelve degrees, forty minutes west, five hundred and sixty feet; thence south forty-nine degrees thirty-five minutes west, five hundred and fifty-six feet; thence south eighty-two degrees, forty-five minutes west, one hundred and thirty-one feet; thence south nine degrees thirty minutes west, one hundred and forty-five feet to the center line of a creek between said Island and lands now or late of George Kouwenhoven; thence through the center of said creek south seventy-one degrees, thirty minutes east, one hundred and fifty feet; thence north fifty-three degrees east, 1455 feet to permanent bulkhead and pier line; thence along said bulkhead and pier line, north thirty degrees thirty minutes west twelve hundred and fifty feet; thence north forty-four degrees thirty minutes west nine hundred and sixty-five feet; thence north seventy degrees, forty-five minutes west, three hundred and twenty feet; thence south twenty-one degrees, thirty minutes west, nine hundred and sixty feet to the center line of said creek; thence along the center line of said creek; south thirty-eight degrees, thirty minutes east, two hundred and fifteen feet; thence north forty-five degrees east two hundred and twenty-five feet to common high water mark on Berrian's Island; and thence along said high water mark on Berrian's Island north thirty-nine degrees, thirty minutes west two hundred and twenty-six feet to the point or place of beginning, containing twenty-seven and seven-tenths (27 7/10) acres, being the same premises which were granted by the People of the State of New York to Edward J. Woolsey, 7102 by Letters Patent, dated October 6th, 1873, and recorded December 18th, 1873, in the office of the Clerk of the County of Queens in Liber 427 of Deeds, at page 93.

All the premises above described being all the land and land under water conveyed to the party of the first part by the Casina Land Company and Kate T. Woolsey by Deed bearing date the 14th day of December, 1898, by Joseph Pasovsky and Josephine Pasovsky, his wife, by Deed bearing date the 15th day of December, 1898, by the Berrian's Island Company, by Deed bearing date the 3d day of December, 1898, by Frank S. Martyny and Mary Martyny, his wife, by Deed bearing date the 14th day of December, 1898; by Francis D. Kouwenhoven and Harriet, his wife, by Deed bearing date the 8th day of December, 1898, and by Luke Kouwenhoven, by Deed bearing date the 8th day of December, 1898."

COMPLAINANT'S EXHIBIT 51.

"All that certain tract of land, comprising certain lots which, on a certain map entitled 'Map of property belonging to Kate T. Woolsey,' being part of property known as "Casina Farm" in the Fifth Ward of Long Island City, Queens county, N. Y., Long Island City, August 16, 1895, Julius von Hunerbein, City Surveyor," and filed in the office of the Clerk of Queens county September 17, 1895, by the map No. 221, are designated as lots 1 to 6 inclusive and 15 to 20 inclusive, on Block 167B, together with a portion of Block 184 on

said map, lying to the westerly of said lots, and which tract of land hereby intended to be conveyed is more particularly described as follows: Beginning at the point formed by the intersection
7103 of the northerly side of Trimble place with the westerly side of Casina avenue, and running thence northerly along said westerly side of Casina avenue, 150 feet; thence westerly, parallel with Trimble place, to high water mark on the East River; thence southerly along high water mark of the East River, to a point where the westerly extension of said northerly side of Trimble place would intersect the same, and thence easterly in the line of such extension, and along said northerly side of Trimble place, to the point or place of beginning; together with all the right, title and interest of the parties of the first part of, in and to the lands below high water mark and lands under water in the East River in front of and adjacent to said premises, so far as the same may extend; also all the right, title and interest of the parties of the first part of, in and to the land lying in Trimble place and Casina avenue and in front of and adjacent to said premises, to the middle of said Trimble place and Casina avenue, respectively; also all the right, title and interest that the parties of the first part may have in any other lands or lands under water, shown on said map; being the same premises conveyed to the parties of the first part by the Casina Land Company, by deed bearing date the 25th day of November, 1895, and recorded in the office of the Clerk of Queens County on the 2d day of December, 1895, in Liber 1091 of Conveyances, at page 354.

COMPLAINANT'S EXHIBIT 52.

"All his right, title and interest to all real property owned by him in Long Island City, forming part of what was formerly known as Woolsey Manor, or Casina Farm, together with all his right, title and interest in a certain lease made by the Casina
7104 Beach Land Company, body corporate, to him, and bearing date the 6th day of October, 1898; and the party of the first part does hereby sell, transfer and assign unto the said party of the second part all buildings owned by him in said Long Island City which are at present upon the property heretofore owned by the Casina Land Company and by Kate T. Woolsey."

COMPLAINANT'S EXHIBIT 53.

"All those certain lots, pieces or parcels of land and premises and land under water, situated, lying and being in the Borough of Queens, in the County of Queens, in the City and State of New York, and bounded and described as follows: Beginning at a point in the centre line of Riker avenue equi-distant from the centre lines of Lawrence street and De Bevoise avenue as the same are laid down on the map and filed by the commissioners for laying out streets, avenues, roads and parks in Long Island City, and running thence northerly and along the land of the said party of the second part hereto, to a point where the centre line of the block between De

Bevoise and Lawrence streets, if extended northerly, would intersect the centre line of Berrian Creek and thence running easterly, southeasterly and southerly along the said centre line of said Berrian Creek and the proposed canal, as the same winds and turns to a point where the centre line of said Riker avenue if extended easterly would intersect said centre line of said creek and canal, and from the last named point of intersection running westerly and along the land of the said party of the second part hereto to the point or place of beginning; it being intended hereby to convey to the
7105 said party of the second part all those premises bounded on the south and west by the land of the party of the second part hereto, and on the northeast, east and sontheast by the centre line of Berrian Creek and the proposed canal together with all the right, title and interest of the said parties of the first part in and to the land under water adjoining the same, or appurtenant thereto under said Berrian Creek or said canal."

COMPLAINANT'S EXHIBIT 54.

All those five certain pieces or parcels of land under waters of the East River or Berrian Creek in front of and adjacent to uplands owned by the grantee herein in Lond Island City, Borough of Queens, County of Queens, City and State of New York, bounded and described as follows:

Parcel Number One. Beginning at a point on the south shore of Berrian Creek at the centre line of the creek separating the lands formerly owned by Francis D. Kouwenhoven and the land formerly owned by Edward J. Woolsey at common high-water line and running north 45° east one hundred and eighty feet to the Bulkhead and Pier line of 1890, thence along said line the following courses and distances, south 35° 30′ east five hundred twenty foot, and south 34° 30′ east two hundred one feet, thence south 51° 30′ west thirty-nine feet to common high-water and to a point on the line dividing the land formerly of Patrick Ward and the lands of the grantee herein; thence along high-water line north 35° 30′ west three hundred one feet; thence north 50° 30′ west four hundred nineteen feet to the place of beginning, containing one and eighty-three one-hundre-ths acres.

7106 Parcel Number Two. Beginning at high-water line of Berrian Creek at the line dividing the lands of the Astoria Light Heat and Power Company formerly owned by Edward J. Woolsey and the land formerly owned by Patrick Ward, thence running north 51° 30′ east thirty-nine feet to the Bulkhead and Pier line established 1890, thence along said Bulkhead and Pier line the following courses and distances: South 5° east two-hundred thirty-seven feet, south 13° 47′ west five hundred fifty-two feet, south 35° 30′ west two hundred feet, to a creek known as Luyster Creek, separating the land of the grantee herein from the lands formerly of William, Theodore and Albert Steinway; thence to and along common high-water line of Berrian Creek and the upland of the grantee herein the following courses and distances: north 17° 30′ east three hundred ninety feet, north 13° 47′ east four hundred sixty-three feet, north

2° 30′ west two hundred twelve feet to the place of beginning, containing seventy-six one-hundredths of an acre.

Parcel Number Three. Beginning at common high-water at the south-east corner of Berrian Island at lands granted by the State of New York, October 6th, 1873, to Edward J. Woolsey; thence along said high-water line the following courses and distances: North 9° 30′ east seven hundred eight feet, north 17° 30′ west six hundred feet, north 37° 30′ west five hundred feet, to the lands granted by the State of New York to Edward J. Woolsey, October 6th, 1873; thence along the said lands so granted South 45° west ninety-four feet, to the Bulkhead and Pier line; thence along the said Bulkhead and Pier line south 35° 30′ east five hundred forty-four feet, south 34° 30′ east two hundred one feet, south 5° 30′ east three hundred sixty-four feet, south 13° 47′ west four hundred forty-six feet,
7107 south 21° 15′, east two hundred thirty-five feet to the above-
mentioned granted lands; thence along said granted lands north 9° 30′ east fifty-six feet to the place of beginning, containing four and sixty-nine one-hundre-ths acres.

Parcel Number Four. Beginning at common high-water line of the East River, at the center of the creek dividing the lands formerly owned by Edward J. Woolsey and the lands adjacent to the lands herein granted, and running thence north 20° east seven hundred ten feet, to the established Bulkhead and Pier line of 1890; thence along said Bulkhead and Pier line south 35° 30′ east nine hundred eighty-two feet, to a point opposite the center of another creek dividing the lands of the grantee herein adjacent to the lands herein granted and the lands of the grantee herein formerly owned by Edward J. Woolsey; thence south 45° west one hundred eighty feet to common high-water line and the uplands of the grantee herein; thence along said high-water line north 69° 10′ west seven hundred thirty-three feet to the place of beginning, containing eight and one-tenth acres.

Parcel Number Five. Also all those certain lands under water at the westerly end of Berrian Island bounded on the east by the lands granted to Edward J. Woolsey, October 6th, 1873, by the State of New York, and on the west by the Bulkhead and Pier line established of 1890, containing ninety-three and one-hundredths of an acre.

These letters-patent are issued pursuant to a resolution of the Commissioners of the Land Office adopted December 7, 1899, and are subject to the following exception and reservation:

Excepting and reserving to all and every the said People,
7108 the full and free right, liberty and privilege of entering upon
and using all and every party of the above-described premises, in as ample a manner as they might have done had this power and authority not been given, until the same shall have been actually appropriated and applied to the purposes of Commerce, by erecting a Dock or Docks or other improvements of a substantial character thereon, or for the beneficial enjoyment of the same by the adjacent owner; provided that unless the fulfillment of the purposes set forth in the application and the grant be entered upon in good faith within five years, this grant be null and void.

COMPLAINANT'S EXHIBIT 55.

ALL those two certain lots, pieces or parcels of land situate, lying and being in the First Ward of the Borough of Queens (late Fifth Ward of Long Island City), Queens County and State of New York, and known and distinguished upon a certain map entitled "Map of property belonging to Kate T. Woolsey, being part of property known as 'Casina Farm' in the Fifth Ward of Long Island City, Queens County, N. Y., made by Julius von Hunerbein, City Surveyor, dated Long Island City, August 16, 1895," and filed in the office of the Clerk of the County of Queens as Lots Nos. 13 (thirteen), 14 (fourteen), in Block No. one hundred and sixty-eight B (168 B), and which said two lots are more particularly bounded and described with reference to said map as follows, viz.: Beginning at a point on the southeasterly side of Boulevard as laid down on said map, distant fifty (50) feet, one and one-quarter (1¼) inches southwesterly from the corner formed by the intersection of the southeasterly side of Boulevard with the southwesterly side of Riker 7109 avenue as laid down on said map; running thence southeasterly and parallel with Riker avenue, one hundred and twenty-two (122) feet, six (6) inches; thence northeasterly and at right angles to Riker avenue, fifty (50) feet to the said southwesterly side of Riker avenue; thence northwesterly along the southwesterly side of Riker avenue, one hundred and nineteen (119) feet, three and one-eighth (3⅛) inches to the southeasterly side of the Boulevard; thence southwesterly along the southeasterly side of the Boulevard, fifty (50) feet, one and one-quarter (1¼) inches to the point or place of beginning TOGETHER with all the right, title and interest of the parties of the first part hereto, of, in and to those portions of Boulevard and Riker avenue, lying in front of and adjacent to said property to the centre lines of said Boulevard and Riker avenue, except for the public use.

COMPLAINANT'S EXHIBIT 56.

ALL those certain lots, pieces or parcels of land, situate, lying and being in the Borough of Queens, City and State of New York, and known as and by lot numbers 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280 and 281 on a certain map entitled "Map of 281 lots of ground situate in the Fifth Ward of Long Island City, Queens County, New York, belonging to the estate of Peter Rapelje, Dec'd surveyed April, 1874, by P. G. Van Alst, City Surveyor," and filed in the office of the Clerk of the County of Queens, July 24th, 1874, and which said lots 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280 and 281, according to said map, are bounded as follows: BEGINNING at a point in the northeasterly side of Winthrop Avenue distant 78 feet and 11⅝ inches southeasterly from the south- 7110 easterly intersection of De Bevoise and Winthrop Avenues, and running thence northeast and along the lands now or formerly owned by Sarah De Bevoise 407 feet 4½ inches more or less to a point on the southeasterly side of the Witch or Small Creek, and running thence with and along said Witch or Small Creek and adjacent to the Meadow Land now or formerly owned by E. J. Woolsey in a general west and northwesterly direction to the southeasterly side of De Bevoise Avenue, and thence southwest along the said southeasterly side of De Bevoise Avenue 300 feet more or less, to the northeasterly intersection of De Bevoise and Winthrop Avenues, and thence southeasterly 78 feet 11⅝ inches to the point or place of beginning. TOGETHER also with all that lot, piece or parcel of land situate, and being in the said Borough of Queens, City and State of New York and known as Lot No. 269 on aforementioned map and described as follows: BEGINNING at a point in the southeasterly intersection of De Bevoise and Winthrop Avenues, and running thence southwest and along southeast side of De Bevoise Avenue 145 feet 11⅜ inches, and thence northeast from De Bevoise Avenue 154 feet 7¼ inches, to a point in the southwest side of Winthrop Avenue and thence northwest and along Winthrop Avenue 51 feet ⅛ inches to lot, point or place of beginning. Together with all the right, title and interest of the party of the first part in and to the streets in front of and adjoining said lots 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280 and 281.

Being the same premises conveyed to the party of the first part by William M. D. de Peyster, by a deed dated September 26, 1901, and recorded in the office of the Register of the County of Queens in Liber 1264 of Conveyances, page 64, on October 3, 1901.

7111 COMPLAINANT'S EXHIBIT 57.

ALL those fifteen lots, pieces or parcels of land situate, lying and being in Long Island City, County of Queens and State of New York known and distinguished on a certain map filed in the office of the Clerk of the County of Queens, entitled "Map of two hundred eighty-one lots of ground situate in the Fifth Ward of Long Island City, Queens County, New York, belonging to the estate of Peter Rapelje, dec.," surveyed April, 1874, by P. G. Van Alst, City Surveyor, as lots numbered from (30) thirty to (44) forty-four, both inclusive, and with reference to the streets and avenues, as established by the commissioners of streets under "An act to provide for the laying out of streets, avenues, roads and parks in Long Island City, passed April 26th, 1871, and the acts amendatory thereof, and laid down on the map aforesaid, which said lots numbered (30) thirty to (44) forty-four, both inclusive, taken together, are bounded and described as follows:

BEGINNING at the northerly corner of De Bevoise and Winthrop Avenues, running thence northwesterly along Winthrop Avenue, one hundred and ninety-seven feet eleven inches and five-eighths of an inch to land of E. J. Woolsey; thence easterly along land of said Woolsey three hundred and sixty-six feet one inch and five-eighths of an inch to a corner, thence southerly along land of said Woolsey, fifty-two feet nine inches and one-eighth of an inch to De Bevoise Avenue, and thence southwesterly along De Bevoise Avenue, three hundred and twenty-one feet one inch and three-eighths of an inch to the point or place of beginning. With one-half of the streets and avenues belonging to said estate of Peter Rapelje, deceased, in front of and adjoining said premises to the centre line of said 7112 streets and avenues, subject to the right of way over such part of said street and avenues in favor of the owners of any part of the lots laid down on said map.

These premises are conveyed without any right of way over or dedication of that part of De Bevoise Avenue which lies within Wolcott Avenue and the Old Bowery Bay Road.

This property being a part of the property conveyed to Edwin Bellman by Francis D. Kouwenhoven and Luke Kouwenhoven, sole acting Executors of the Last Will and Testament of Peter Rapelje late of Long Island City, Queens County, New York, by deed dated July 21st, 1874, and recorded in Queens County Clerk's office in Liber 442 of Deeds, page 354, on July 9, 1874.

Being the same premises described in a certain deed of conveyance to William V. Clark, one of the parties of the first part hereto by Marion M. Bellman, widow of Edwin Bellman, and John J. Bellman and others, children and devisees under the Last Will and Testament of Edwin Bellman, deceased, dated November 18, 1901.

It being intended by this instrument to convey unto the said party of the second part, its successors and assigns, all the right, title and interest of, in and to the said premises that was, or has been, conveyed to the said William V. Clark by such deed or Marion M. Bellman, the widow, and John J. Bellman and others, children and devisees under the Last Will and Testament of Edwin Bellman, deceased, and in and by a certain deed of conveyance made and executed to the said William V. Clark by Jean R. Phillips and others, children of the children of said Edwin Bellman, deceased, dated November 18, 1901.

7113 COMPLAINANT'S EXHIBIT 58.

"All those seventeen lots, pieces or parcels of land, situate, lying and being in the First Ward of the Borough of Queens, City of New York, formerly known as Long Island City, County of Queens and State of New York, and known and distinguished on a certain map entitled "Map of 190 lots of ground, situate in the Fifth Ward of Long Island City, Queens County, New York, belonging to Sarah J. De Bevoise" surveyed April 1874 by P. G. Van Alst, surveyor, filed in the Queens County Clerk's office May 17, 1893, as lot- numbers one to seventeen inclusive (1 to 17), said lots being all of the lots on said map lying Northeast of Winthrop Avenue as there laid down.

AND ALSO all that certain other piece or parcel of land situate, lying and being in the First Ward of the Borough of Queens, City of New York, formerly known as Long Island City, County of Queens and State of New York, and bounded and containing as follows, to wit:

BEGINNING at the corner formed by the intersection of the Northeasterly side of Winthrop Avenue as laid down on the map made and filed by the Commissioners for laying out streets, avenues, roads and parks in Long Island City, and the Northwesterly side of Rapelje Avenue as laid down on said map, and running thence Northwesterly along said Winthrop Avenue twenty-seven feet and eight inches more or less to land formerly belonging to Jacob Rapelje and subsequently to Peter Rapelje, and conveyed or intended to be conveyed by Sarah Jane De Bevoise to Henry W. Biffar and Ada E. Biffar, his wife, and Melchior P. Biffar by deed, bearing date the twenty-second day of May, 1893, thence Northwesterly along 7114 said last mentioned land and nearly parallel with Rapelje Avenue one hundred feet more or less to a ditch or creek separating the said last mentioned land from the said piece or parcel of land hereby described and herein granted and conveyed; thence still Northeasterly along the centre line of the said ditch or creek to the intersection of the same by a ditch or creek separating the said land formerly belonging to Jacob Rapelje and now of the said Henry W. Biffar, Ada E. Biffar, his wife, and Melchior P. Biffar, from land formerly of Samuel Berrian and recently of Edward J. Woolsey, deceased; thence Easterly along the centre line of the main ditch or creek separating the said last mentioned land from the piece or parcel of land hereby described and herein granted and conveyed, to a point on the Northwesterly side of Rapelje Avenue, distant three hundred and fifteen feet more or less Northeasterly from the said place of beginning, and thence Southwesterly along said Rapelje Avenue three hundred and fifteen feet, more or less to the point and place of beginning.

AND ALSO all that other piece or parcel of land situate, lying and being in the First Ward of the Borough of Queens, City of New York, formerly known as Long Island City, County of Queens and State of New York, and bounded and containing as follows, to wit:

BEGINNING at a point on the southeasterly side of Rapelje Avenue as laid down on the map made and filed by the Commissioners for laying out streets, avenues, roads and parks in Long Island City, distant one hundred and thirty-seven feet and six inches Northeasterly from the corner formed by the intersection of the Southeasterly side of Rapelje Avenue and the Northeasterly side of Winthrop Avenue, as laid down on said map, and running thence North- 7115 easterly along said Rapelje Avenue one hundred and sixty-seven feet and six inches, more or less, to the centre line of the main ditch or creek separating the piece or parcel of land hereby described and herein granted and conveyed from land formerly of Samuel Berrian, and recently of Edward J. Woolsey, deceased; thence southerly along the centre line of the said main ditch or creek to a line drawn parallel with and distant one hundred and seventy feet Southeasterly from the Southeasterly side of Rapelje Avenue; thence Southwesterly and parallel with said Rapelje Avenue about seventy-five feet to a line drawn parallel with and distant one hundred and thirty-seven feet and six inches Northeasterly from the Northeasterly side of said Winthrop Avenue, and thence Northwesterly and parallel with said Winthrop Avenue one hundred and seventy feet to the place of beginning.

ALSO the estate and interest of the said party of the first part in and to the land included within the limits of said Rapelje Avenue and said Winthrop Avenue in front of and adjoining the said pieces or parcels of land above described and hereby conveyed to the centre lines of said avenues respectively.

ANY reference hereinabove contained to Rapelje Avenue and Winthrop Avenue as the same are laid down on the map made and filed by the Commissioners for laying out streets, avenues, roads and parks in Long Island City, for the convenience of description only, and it is not intended thereby to dedicate to the use of the public an*d* land included in said Rapelje Avenue, nor any land included in said Winthrop Avenue.

BEING the same premises conveyed to the party of the first part by Frederic N. Gilbert, by a deed, dated April twenty-four, 1902, and recorded in the office of the Clerk of Queens County in Book 1278 of Conveyances, page 427."

7116

COMPLAINANT'S EXHIBIT 59.

"ALL those four certain plots, pieces or parcels of land, situate, lying and being in the County of Queens, City and State of New York, known and designated on a certain map entitled 'Map of property belonging to the Estate of Abraham Polhemus, deceased, in the Town of Newtown, Queens County, State of New York, December 3rd, 1844, surveyed by Gardiner A. Sage, City Surveyor,' and filed in the office of the Clerk of the County of Queens on the 29th day of April, 1845, as and by plots Nos. Five (5), Twelve (12) and Eleven (11) and more particularly described as follows (excepting only the grave yard situate in plot No. Five (5) as reserved in original Deed of 1781).

Plot No. 5: Beginning at a point on the southeasterly side of the Shore Road as laid down on said map adjoining the northeasterly side of Plot No. 4, as shown on said Map; running thence southeasterly along the northeasterly side of Lot No. 4, Eleven hundred and forty (1140) feet to Lot No. 7, as shown on said Map, property of the Astoria Light, Heat and Power Company; thence northeasterly along said Lot No. 7, Two hundred and eighty-seven (287) feet to Lot No. 6 on said Map, property of the Astoria Light, Heat and Power Company, thence northwesterly along said Lot No. 6, Twelve hundred and thirty-three (1233) feet to the southeasterly side of the Shore Road; and thence southwesterly along the said southeasterly side of said Shore Road as the same winds and turns to the point or place of beginning, containing Eight and thirty-three one hundredths (8.33) acres, be the said dimensions and acreage more or less.

Plot Nos. 12 and 11. Beginning at a point on the northeasterly side of a certain road laid down on the aforesaid Map and 7117 designated as "Road in Common, fifty (50) feet wide," distant Sixteen hundred and thirty-eight (1638) feet southeasterly from the corner formed by the intersection of the southeasterly side of said Shore Road and Plot No. 4, as laid down on said

Map; running thence northeasterly along Plot No. 7, property of the Astoria Light, Heat and Power Company, Six hundred and twenty-four (624) feet to other lands of the Astoria Light, Heat and Power Company; thence southeasterly along the said last mentioned land, Twelve hundred and twelve (1212) feet to lands belonging to Jacob Rapelje, as shown on said Map; thence southwesterly along said last mentioned land, Four hundred and seventy-nine (479) feet to the northeasterly side of said road designated as "Road in Common," as aforesaid, and thence northwesterly along the northeasterly side of said road. Twelve hundred and fifty-one (1251) feet to the point or place of beginning, containing Fifteen and fifty-seven one hundredths (15.57) acres, be the said dimensions and acreage more or less.

Also all that land and lands under water beginning at the westerly corner of Lot No. 5, and running northeasterly along the said Shore Road to the northerly corner of said Lot No. 5, running thence northwesterly along the northeasterly line of said Lot No. 5 extended, to the bulkhead and pier head line, thence southwesterly along the said bulkhead and pier line about Three hundred and fifteen (315) feet to a point in the East River where the said bulkhead and pier line is intersected by the southwesterly line of said Lot No. 5 extended, thence southeasterly along the said southwesterly line of said Lot No. 5 extended to the point or place of beginning, containing about Forty-eight thousand, five hundred and thirteen (48,513) square feet.

7118 Also all the right, title and interest of the party of the first part of, in and to the said Shore Road, and said "Road in Common," as laid down on said Map and also all right, title and interest of the party of the first part of, in and to the lands under water in front of and adjoining said Plot No. 5, so far as the rights of the party of the first part extend.

And also all the right, title and interest of the party of the first part of, in and to any and all Awards made for the opening of Walcott Avenue."

COMPLAINANT'S EXHIBIT 60.

ALL that certain piece or parcel of land under waters of the East River or Luyster Creek, in front of and adjacent to upland of the grantee herein, in the Borough of Queens, in the County of Queens, in The City of New York and State of New York, described as follows:

BEGINNING at a point in the Pier and Bulkhead Line established by the War Department, 1891, on the Westerly side of Luyster Creek, and in the easterly line of lands under water granted to The Astoria Light, Heat and Power Company, December 12th, 1899, which point is distant seven hundred and eighty feet northerly from the northerly line of Riker Avenue produced, measured on a line at right angles thereto, and distant six hundred feet westerly from the westerly line of Blackwell Street, measured on a line at right angles thereto; thence northerly and westerly along said Pier and Bulkhead Line as the same bends, and along the said granted lands two thousand five hundred and fifty feet to the lands under water adjacent to Lawrence Point granted to Edward J. Woolsey, October 6th, 1873, and now owned by the grantee herein; thence north twenty degrees east and along said granted lands six 7119 hundred and ten feet to the Pier and Bulkhead Line, established by the War Department in 1903, for the easterly shore of the East River at Lawrence Point; thence along said line of 1903, south sixty-seven degrees fifty-nine minutes east seven hundred and forty feet to its point of intersection with the lands under water adjacent to Berrian Island granted to Edward J. Woolsey, October 6th, 1873, now owned by the grantee herein; thence south twenty-one degrees thirty minutes west and along said granted lands three hundred and ten feet to the Pier and Bulkhead line of Berrian Island established 1891, which line is also the westerly boundary line of lands under water adjacent to Berrian Island granted to The Astoria Light, Heat and Power Company, December 12th, 1899; thence in a southerly direction and along said Pier and Bulkhead line of 1891, as the same bends and along said granted lands five hundred and ten feet to the lands under water granted to Edward J. Woolsey, aforesaid, now owned by the grantee herein; thence along the said granted lands the following course and distances; south twenty-one degrees thirty minutes west one hundred and sixty feet; south thirty-eight degrees thirty minutes east two hundred and fifteen feet; north forty-five degrees east one hundred and twenty-nine feet to the Pier and Bulkhead Line established by the War Department, 1891, for the northeasterly side of Berrian Creek, which line is also the southerly and westerly boundary of the lands under water adjacent to Berrian Island granted to The Astoria Light, Heat and Power Company, December 12th, 1899; thence southerly and easterly along said Pier and Bulkhead Line of 1891, as the same bends, and along said granted lands one thousand eight hundred feet to lands under water granted to Edward J. 7120 Woolsey, aforesaid, and now owned by the grantee herein; thence south nine degrees thirty minutes west and along said granted lands fifteen feet to the Pier and Bulkhead Line established 1903, thence north seventy-six degrees eleven minutes west and along said Pier and Bulkhead line of 1903, three hundred and fifty feet to the point or place of beginning, containing twenty-one acres and fifty-two hundredths of an acre. The bearings are magnetic.

COMPLAINANT'S EXHIBIT 61.

"All that certain tract, piece or parcel of land situate in the First Ward of the Borough of Queens of the City of New York, in the County of Queens and State of New York (formerly in the Fifth Ward of Long Island City, in the said County and State), and more particularly bounded and described as follows:

BEGINNING at the corner formed by the intersection of the northerly side of Wolcott Lane with the easterly side of the Shore

Road, as the said lane and road existed immediately previous to the making and filing of the map made and filed by the commissioners for laying out streets, avenues, roads and parks in Long Island City; running thence easterly along the said northerly side of Wolcott Lane one thousand and thirty-six (1,036) feet and nine and one-half (9½) inches; thence northerly and at an angle of ninety-one (91) degrees, twenty-seven (27) minutes and forty (40) seconds with the last course one hundred and twenty-seven (127) feet one and one-half (1½) inches to land formerly of Cornelia P. Trowbridge; thence northwesterly and along said land formerly of Cornelia P. Trowbridge; one thousand and forty-one (1,041) 7121 feet, four and one-half (4½) inches, more or less, to the said Easterly side of the Shore Road; and thence Southerly along the said Easterly side of the Shore Road Two hundred and three (203) feet and three (3) inches, more or less, to the point or place of beginning.

Excepting, however, from the premises above described so much thereof as has heretofore been acquired by The City of New York for the opening or widening of Wolcott Avenue.

Together with all the right, title and interest of the party of the first part of, in and to the land lying in said Wolcott Lane and the Shore Road in front of and adjacent to, said premises.

Also all the right, title and interest of the party of the first part, of, in and to the land under the waters of the East River in front of, and adjacent to said premises, granted by The People of the State of New York to Eliza B. Polhemus by Letters Patent bearing date July 22nd, 1873, and recorded in the office of the Clerk of the County of Queens on the 5th day of September, 1873, in Liber 419 of Conveyances, Page 288, and described in said Letters Patent as follows: the land under water and between high and low water mark, described as follows, to wit:

All that certain piece or parcel of land under the waters of the East River in front of and adjacent to the uplands belonging to said Eliza B. Polhemus, situate in Long Island City, County of Queens and which is bounded and described as follows, to wit:

BEGINNING at a point in the Southerly shore of the East River at common high water mark and in the boundary line dividing the lands owned by Cornelia P. Trowbridge from the lands of the said Eliza P. Polhemus, and running thence North thirty-four 7122 (34) degrees and forty-five (45) minutes West One hundred and ninety-four (194) feet to the permanent Bulkhead and Pier Line; thence along the said permanent Bulkhead and Pier Line South Seventy-nine (79) degrees and forty-five minutes West Two hundred and eighteen (218) feet, thence South thirty-nine (39) degrees and thirty (30) minutes East Two hundred and twenty-five (225) feet to common high water mark; thence along the said common high water mark North forty-nine (49) degrees and thirty (30) minutes East Two hundred (200) feet to the point or place of beginning. CONTAINING an area of Forty-three thousand nine hundred and ninety-five (43,995) square feet of land, being the same premises conveyed to the party of the first part by Gustave Goetze and others by Deed dated December 21st, 1904."

COMPLAINANT'S EXHIBIT 62.

Description of Property Conveyed by

FREDERIC N. GILBERT

TO

THE ASTORIA LIGHT, HEAT AND POWER COMPANY.

Dated March 24, 1903.

ALL that certain tract or parcel of land with the buildings thereon erected, situate, lying and being in Long Island City (formerly Newtown, and now Borough of Queens), in the County of Queens and State of New York, and bounded and containing as follows, viz.:

7123 BEGINNING at a point on the southerly side of the Shore Road at the division line between the hereby granted premises and the land of R. A. Robertson, and running thence along the land and premises of said R. A. Robertson, south thirty-five degrees, thirty-six minutes, east two hundred and two feet, seven and three-eighths inches; thence south thirty-four degrees, forty-five minutes, East eight hundred and seven feet three and five-eighths inches to the center line of the strip of land down on the map or survey of Long Island City, filed in the office of the Clerk of said County of Queens and in the office of the Secretary of State, made by the Commissioners of streets, wards, avenues and parks in said City, and thereon designated as Van Alst Avenue; thence along the center line of said strip so designated as Van Alst Avenue north forty-nine degrees, thirty-nine minutes, East six hundred and twelve feet two and three-eighths inches to the Old Bowery Bay Road; thence northwestwardly along the Bowery Bay Road as it winds and turns to its intersection with the Shore Road aforesaid; and thence southerly along the Shore Road to the place of beginning; containing nine acres and nine hundred and seventy-one thousandths acres, more or less.

Also all that certain other tract or parcel of land and land under water situate in the City aforesaid and opposite to the parcel of land herein firstly described:

BEGINNING at a point on the northerly side of the said Shore Road at the boundary line of the lands of R. A. Robertson and the land and premises hereby intended to be conveyed, and running thence along the Shore Road north forty-five degrees fifty-six minutes, east ninety-two feet one and three-quarter inches; thence north forty-two degrees and thirty-two minutes and thirteen seconds east two hundred and one feet four inches; and thence still along

7124 said Shore Road north fifty-four degrees fifty minutes, east one hundred and thirty-eight feet ten inches; thence running on a line at right angles to the Shore Road, or nearly so, north thirty-five degrees forty-five minutes and ten seconds, west to the permanent bulkhead and pier line as established by law; thence southerly along the said permanent bulkhead and pier line to a point opposite to the place of beginning; and thence south thirty-four degrees forty-five minutes, east to the point or place of beginning; and also the right, title and interest of the party of the first part in and to the Old Bowery Bay Road and the Old Shore Road lying in front of and adjoining the premises first herein described.

Being the same premises conveyed to the party of the first part, by William E. Strong and wife by a deed dated February 24, 1903, and recorded in the office of the Clerk of Queens County.

TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises.

COMPLAINANT'S EXHIBIT 64.

SECTION 889 OF THE GREATER NEW YORK CHARTER, IN REGARD TO ASSESSMENT OF REAL ESTATE FOR THE PURPOSE OF TAXATION.

DEPUTY TAX COMMISSIONERS; DUTIES OF IN ASSESSING TAXABLE PROPERTY.

SEC. 889. It shall be the duty of the deputy tax commissioners, under the direction of the board of taxes and assessments, to assess all the taxable property in the several districts that may be assigned to them for that purpose by said board, and they shall furnish to the said board, under oath, a detailed statement of all such property, showing that said deputies have personally examined each and every house, building lot, pier or other assessable property, giving the street, lot, ward, town and map number of such real estate embraced within said districts, together with the name of the owner or occupant, if known; also the sum for which, in their judgment, each separately assessed parcel of real estate under ordinary circumstances would sell if it were wholly unimproved; and separately stated, the sum for which, under ordinary circumstances, the same parcel of real estate would sell with the improvements, if any, thereon; with such other information in detail relative to personal property or otherwise, as the said board may, from time to time require. Such deputies shall commence to assess real and personal estate on the first Tuesday in September in each and every year.

(As amended by L. 1903, ch. 454.)

7126

COMPLAINANT'S EXHIBIT 65.

SECTION 892 OF THE GREATER NEW YORK CHARTER IN REGARD TO ASSESSMENT OF REAL ESTATE FOR THE PURPOSE OF TAXATION.

ANNUAL RECORD OF ASSESSED VALUATION; WHAT THEY CONTAIN AND WHEN TO BE OPEN FOR EXAMINATION AND CORRECTION.

SEC. 892. There shall be kept in the several offices established by the department of taxes and assessments books to be called "the annual record of the assessed valuation of real and personal estate of the borough of ——," in which shall be entered in detail the assessed valuation of such property within the limits of the several boroughs of the city of New York as established by this act. In such books the assessed value of real estate shall be set down in two columns; in the first column shall be given, opposite each separately assessed parcel of real estate, the sum for which such parcel under ordinary circumstances would sell if wholly unimproved; and in the second column shall be set down the sum for which the said parcel under ordinary circumstances would sell, with the improvements, if any, thereon. The said books shall be open for public inspection, examination and correction from the second Monday in January until the first day of April in each year; but on the said last mentioned day the same shall be closed to enable the board of taxes and assessments to prepare assessment rolls of the several boroughs for delivery to the board of aldermen. The said board previous to and during the time the said books are open as aforesaid for inspection shall adver- 7127 tise the fact in the City Record and in such other newspaper or newspapers published in the several boroughs created by this act as may be authorized by the board of city record.

(As amended by L. 1903, ch. 454.)

COMPLAINANT'S EXHIBIT 66.

July 17th, 1906.

Lease of Bulkheads between 20th and 21st and 21st and 22d Streets, East River, Borough of Manhattan: Dated July 19, 1901.

All that certain wharf property situated on the East River in the Borough of Manhattan, City of New York, known and described as follows:

"Bulkhead on the East River between the northerly side of East 20th Street and the southerly side of East 21st Street, and between the northerly side of East 21st Street and the southerly side of East 22d Street, together with the right to enter upon the said wharf property for the purposes of this lease and to collect the said wharfage."

Term of the lease is for ten years with privilege of two renewals of ten years each.

Lease to begin at time of completion by the City of the said bulkheads.

Occupancy was given to the Gas Company of the bulkhead between 20th and 21st Streets on October 1st, 1902:

Of the bulkhead between 21st and 22d Streets, December 1st, 1901.

Rental is 5 per cent. of the cost to the City of New York of the improvements at the said water front.

Amount of rental is $17,806 per annum, as per letter from Dock Department, April 16th, 1904, filed with lease.

7128 An increased rental of 5 per cent. is to be paid from the beginning of each renewal term.

The Gas Company is to keep in good repair at its own cost all of said bulkheads.

COMPLAINANT'S EXHIBIT 67.

July 17th, 1906.

Lease of northerly half of pier foot of East 21st Street, Borough of Manhattan:

Description of property: "All and singular the wharfage which may arise, accrue or become due for the use and occupation in the manner and at the rates prescribed by law of all that certain public wharf property, situated at the East River, in the Borough of Manhattan, City and County of New York, and known and described as follows, to wit:

"Northerly half of the pier foot of East 21st Street, together with the right to enter upon said wharf property for the purposes of this lease and to collect said wharfage."

Annual rental, $3,000.

Gas Company also agrees to maintain the pier in good repair and condition and do all necessary dredging.

Date of lease, November 1st, 1902.

Term: Five years.

VALUATION OF THE WEST EIGHTEENTH STREET STATION OF THE MANHATTAN GAS-LIGHT COMPANY.

NEW YORK, *August* 25, 1884.

BLOCK NO. 1.

On Tenth and Eleventh Avenues, between W. 17th and W. 18th Streets contains: Coal Houses, Retort Houses, Condensing and Purifier Houses, Meter House, Shops, etc. detailed as follows:

1. Office and laboratory, 90 feet by 34 feet, two stories: Brick building with timber roof slated	$22,000	
Office and drawing-room furniture, upstairs	2,000	
Office and drawing-room furniture, downstairs	3,500	
Photometer room, laboratory apparatus, etc.	4,200	
Experimental gas-works apparatus	4,000	
		$35,700
Carried Forward		$35,700

7135

Brought Forward	$35,700
2. Coal houses, 146 feet x 184 feet 10 in., in four sections, brick buildings on pile and concrete foundations, heavy timbered roof, with series of cast-iron supporting columns, and covered with slate	74,896
3. Gangway shed, brick building, on piles, arched sides, iron columns, wooden roof, slated gutters, etc.	9,223
4. Tar well, four tar wells	4,222
5 and 6. Boiler house and chimney 45	

	feet by 15 feet. Brick building, wooden roof tinned, including chimney, forty feet high	$2,314	
	Including boiler and engine etc.	4,000	
	Including coal apparatus	4,326	
			10,640
7.	Retort house, 402 feet x 115½ feet in two sections, brick building on piles, iron roof in two spans, supported in center on one row of columns—girders, etc., Louvre blinds, gutters, etc., of iron		159,936
8.	Coal bunkers and railings, elevated coal bunkers, both inside and outside, including rails and cars	$52,295	
	Carried Forward		$294,617
7136			
	Brought Forward		$294,617
	Stoker railway, transferable and turntable	3,441	
			55,736
9.	Four hydraulic elevators with pumping apparatus, pipes, valves, foundations, etc.		15,500
10.	Benches, foundations for 200 benches	$41,252	
	Bench masonry and iron work for ninety-eight benches of sixes, at $1,850	181,300	
	Bench masonry and iron work for thirty-six benches of fives, at $1,700.	61,200	
			283,752
11.	Stoking apparatus, five charging machines at $6,000	$30,000	
	Five raking machines at $7,000	35,000	
			65,000
12.	Retort house connections, take-off valves and tar connections with gas mains, supports, etc.		8,070
13.	Retort house tools, tools for benches		6,000
14.	Condenser House, 43 feet 10 inches x 59 feet 9 inches, brick building, iron roof, slated		11,132
15.	Condensers, two multitubular condensers each containing 480 four-inch tubes		30,000
16.	Zig zag scrubber, including trays, etc.		7,640
	Carried Forward		$777,447

7137	*Brought Forward*	$777,447
17.	Connections in condenser house, twenty-four-inch valves, thirty-inch valves, pipes for gas, tar and water	6,645
18.	Foundations for two condensers and one scrubber of brick with stone trimming	2,370
19.	Tower scrubbers, complete with trays, stair tower, water and steam connections	37,840
20.	Foundations on piles with brick and granite finish	7,239
21.	Tower scrubber connections, gas connections, valves, etc.	1,418
22.	This item included in detail No. 5.	
23.	Purifier and meter house, 184 x 88, two wings, extensions for lime and meters, iron roof slated	59,589
24.	Purifying apparatus, twelve purifiers complete with trays, three center seals and connections; elevated railway, and galleries with two carriages and rails	67,592
25.	Included in detail No. 24.	
26.	Deodorizing apparatus, consisting of washer, steam jet, etc., apparatus underground iron and cement pipe, three culverts, etc., lime barrows	14,098
27.	Two station meters, wih connections, valves and all complete without foundations, which latter are included in the estimate of building	22,706
	Carried Forward	$996,944
7138	*Brought Forward*	$996,944
28.	Tin shop, tools, stock and fixtures	950
29.	Store-room and rigging loft, tools, stock and fixtures	7,500
29*a*.	Hose carriage room, tools, stock and fixtures	2,700
30.	Boiler and engine-house, 47 feet 6 x 47 feet 6, of brick, with roof consisting of cast iron water tank for roof and chimney stairs	18,330
31.	Contents of boiler and engine-house, one boiler set in brick work, one horizontal engine, two feed pumps and fittings, one Worthen pump, one compensator, two rotary exhausters, recording and pressure gauges, and all mains, small pipes, etc.	10,630
32.	Machine shop over engine room, all machine tools, shafting, pulleys and belts, small tools, work benches, etc.	3,045
33.	Work-shop buildings, all mason and carpenter work complete, wooden roof covered with slate	13,659
34.	Machine shop contents in work-shop building, tools, stock and fixtures	4,990
35.	Carpenter shop contents, tools, stock and fixtures	3,995
36.	Blacksmith shop contents, tools, stock and fixtures	1,080
37.	Pipe shop contents, tools, stock and fixtures	4,915
	Carried Forward	**$1,068,738**

7139	*Brought Forward*	$1,068,738
38.	Fitting shop contents, tools, stock and fixtures	2,150
39.	Tool House contents, bars, shovels, etc.	500
40.	Street Department material, tools, stock and fixtures	1,600
41.	Office store room contents, tools, stock and fixtures.	600
42.	Paint shop contents, tools, stock and fixtures	975
43.	Tile house contents, tools, stock and fixtures	150
44.	Coke yard wall of brick	3,431
		$1,078,144

BLOCK NO. 2.

West 18th Street, above 10th Avenue, two inclosed gas holders, also well.

1.	Gas holder building, 188 x 92, brick, with heavy stone trimmings, extra heavy roof and internal posts, framing, etc.	$45,251
2.	Two gas holders, Nos. 1 and 2, guide rails on the frame, counter weights, etc.	34,186
3.	Two tanks, with inlet pipe, guide plates, well and cover	41,800
4.	This item is included in detail 3.	
5.	Street department shed, brick building and frame addition	1,900
6.	Well	15,000
		$138,137

7140

BLOCK NO. 3.

On 10th and 11th Avenues, between West 16th and West 17th Streets, contains four gas holders and two coal storage yards, etc.

1.	Four gas holders, Nos. 5, 6, 7, 8	$100,000
2.	Four tanks for above holders, including inlet pipe and well	120,800
3.	Valve house, brick, with connections	2,200
4.	Tank yard, wall brick, with gates, etc	10,950
5.	Coal yard No. 1, with brick engine and boiler house, and coal distributing machinery	32,032
6.	Coal yard No. 2, with brick engine and boiler-house and coal-distributing machinery	36,782
7.	Pump-shed and contents, building of wood, including two pumps, etc	1,500
		$304,264

BLOCK NO. 4.

On 10th and 11th Avenues, between West 18th and West 19th Streets; contains two gas-holders, coal yards, etc.

1.	Two gas-holders, Nos. 3 and 4	$52,000
2.	Two tanks, for above holders, including inlet-pipe and well	60,800
3.	Valve-house, of brick with connections	1,800
3*a*.	Fence around pipe-yard, wooden fence	230
4.	Boiler-house, of brick, with chimney, including machinery	3,930
	Carried Forward	$118,760

7141

	Brought Forward	$118,760
5.	Tank-yard wall, of brick, with retaining-wall, grading, etc.	6,300
6.	Coal yard No. 4, timber fence, etc., and flooring	7,855
		$132,915

BLOCK NO. 5.

On 11th Avenue, between West 19th and 20th Streets; contains two gas-holders and storage yard.

1.	Two gas-holders, Nos. 9 and 10	$52,000
2.	Two tanks, for above holders, including inlet pipe and well	60,800
3.	Boiler-house and yard sheds, buildings of wood, including boiler and fixtures	1,184
4.	Coal yard No. 5, on 11th Avenue, fence and floor	5,539
5.	Tank-yard fence, of wood, ten feet high	411
		$119,934

BLOCK NO. 6.

Corner 11th Avenue and West 18th Street.

1.	Coal yard No. 3, with boiler-house of brick	$2,060

BLOCK NO. 7.

1.	Weigh-office, 14 feet by 30 feet, of brick, with scales	$2,000
2.	Deodorizing block, 11th Avenue, brick and wood buildings with apparatus	6,226
		$8,226

7142 BLOCK NO. 8.

1.	Stable 22 feet by 72 feet, brick buildings, with stalls, etc.	$4,100
2.	Wagon-house, 20 feet by 22 feet, brick building	1,250
3.	Wagon-house 27 x 28, brick building—two stories	3,500
4.	Truck shed, frame building	360
5.	Horses and carts	8,814
6.	Stable yard, wall of brick, 8 and 10 feet high	1,342
		$19,366

MISCELLANEOUS.

1.	Mains about works, includes water-meters, fire hydrants, valves, culverts, cement sewer-pipe, etc.	$53,475
2.	Pipe in yard, forty-two tons, pipe on hand	1,680
3.	Specials, seventy-five tons on hand	4,500
4.	Paving materials, Belgian block on hand	800
5.	Yard pavement, flagging in rear of office, Belgian pavement and grading about works	11,441
6.	Ladders	500
7.	Tin cans	50
8.	Gauges of various kinds on hand	650
9.	This item included in detail No. 1, block No. 1.	
10.	Meters about the works	320
11.	Sundry instruments, surveying instruments, etc.	500
12.	Sewers, grading, etc., including sundry small piping and valves	10,000
13.	Street paving, consisting of sidewalks, curbs, gutters, bridge stones and iron cover plates	21,818
14.	Iron fencing on property line	7,575
		$113,309

7143 RECAPITULATION.

Block No. 1	$1,078,144
Block No. 2	138,137
Block No. 3	304,264
Block No. 4	132,915
Block No. 5	119,934
Block No. 6	2,060
Block No. 7	8,226
Block No. 8	19,366
Miscellaneous	113,309
	$1,916,355

The foregoing appraisal, that is to say, one million, nine hundred and sixteen thousand, three hundred and fifty-five dollars ($1,916,355), setting forth the present value of the buildings, gas producing and gas storage plant, coal storage, fixtures, tools, implements and betterments of every description (excepting the river bulkhead), comprising the property of the "Manhattan Gas-Light Company," known as the 18th Street Station, has been carefully revised and corrected by me, and I believe the said sum to be the just and true *present value* thereof.

(Signed) THOMAS F. ROWLAND.

August 25, 1884.
103

7144 VALUATION OF THE EAST FOURTEENTH STREET STATION OF THE MANHATTAN GAS-LIGHT COMPANY.

NEW YORK, *August* 26, 1884.

BLOCK No. 1.

Bounded by E. 14th and 15th Streets and Avenues C and D, contains: Coal-houses, retort-house, workshops, condenser-house, scrubbers and office, etc.

1.	Office, 22 feet by 31 feet, two stories:		
	Brick building on piles, with wood roof covered with tin	$7,500	
	Furniture	1,400	
	Photometer apparatus	1,000	
			$9,900
2.	Pay and store building, 26 feet by 46 feet, two stories:		
	Brick building on piles, with wood roof covered with slate, including all flagging, paving and flooring	$5,740	
	Paint shop, tools, etc., including water meter	758	
	Tin shops, tools, etc	367	
			$6,865
3.	Coal-houses, 186 feet by 206 feet, in five sections, brick building on piles, heavy wood roof covered with slate and supported on columns, with distributing and weighing apparatus		96,520
	Carried Forward		$113,285

7145	*Brought Forward*			$113,285
4.	Gangway shed, 63½ feet by 132 feet, brick building on piles, arched walls, iron columns, wood roof slated			11,498
5.	Coal shed, boiler-house, 13 feet by 42 feet:			
	Brick building on piles, with chimney, wood roof covered with tin		$2,200	
	Boiler, engine, pump and fixtures		3,900	
				$6,100
6.	Retort-house, main building, 186 feet by 245-½ feet, with wings, 7-½ and 13-½ by 245-½, Brick Building on piles with iron roof in three spans, slated and supported on columns and girders, Louvre blinds, etc., including flagging and paving		$136,418	
	Foundations for 180 benches		37,081	
	Bench masonry and iron work for 120 benches, $1,850		222,000	
	Tools for benches		6,124	
	All gas-mains, valves, tar and water connections		13,800	
	Brick, wood and corrugated iron building, including all turn-tables and tracks		9,256	
	Carried Forward		$424,679	$130,883

	Boiler and setting, engine and foundations, two pumps and fixtures, two exhausters, shafting and pulleys, coal bunkers, gauges and small fixtures	9,7775	$24,200
13.	Avenue "C," workshops, 26 by 60, two stories, cellar, machine shop, pipe shop, wagon shop, grinding-room, blower-room, wing:		
	Brick building on piles, wood roof covered with slate, with wings	$7,787	
	Tools, stock and fixtures	3,645	
	Tools, stock and fixtures	1,004	
	Tools, stock and fixtures	2,155	
	Tools, stock and fixtures	1,050	
	Tools, stock and fixtures	2,570	
	Compensator	850	
	New exhauster and engine complete, with valves, set up in working order	4,350	
	Line shaft	550	$23,961
14.	Carpenter and blacksmith shop, 36 feet by 51 feet, two stories, carpenter and smith shops:		
	Brick buildings with wood roof covered with slate	$5,000	
	Tools, stock and fixtures	1,055	
	Tools, stock and fixtures	1,785	$7,840
15.	Fences, brick and iron fences on this block		6,371
			$764,881

7148

BLOCK NO. 2.

Bounded by East 14th and 15th Streets and Avenues B and C, contain-: Purifier, Meter and Lime House and six Gas Holders with Valve and Boiler Houses.

16.	Purifying house 62 x 120 feet, with two wings, 42 and one-fourth by 62 feet, and one wing, 36 by 41 feet, brick building on piles, iron roof covered with slate		$60,501
17.	Purifying apparatus:		
	Eight purifiers complete with trays supported on iron beams and columns, five center seals and connections, iron floor, elevated track, galleries and carriages	$56,734	
	One elevator, eight lime barrows and elevated tracks, in foul lime house	2,350	
			$59,084
18.	Meters, two meters, valves and connections without foundations, which latter are included in the building		$22,706
19.	Gas holder tanks, six tanks, Nos. 1, 2, 3, 4, 5 and 6, including guide-plates and inlets		198,000
20.	Walls, grading, etc., tank yard walls, retaining walls, grading, paving, steps, etc		19,034
21.	Gas holders, six gas holders and frames		198,000
	Carried Forward		$557,325

7149

	Brought Forward		557,325
22.	Valve house, 12 x 20 feet, house and contents		2,200
23.	Fencing, this item included in detail No. 20.		
24.	Boiler house:		
	Brick building with chimney on piles, wood roof covered with tin	$2,500	
	Boiler and fixtures	2,000	
			$4,500
			$564,025

BLOCK NO. 3.

Bounded by East 14th and 15th Streets and Avenue D and Tompkins Street, contains Coal Yard No. 1.

25.	Engine and boiler house, 11 feet x 25 feet, brick building on piles, wood roof covered with tin, including boiler, engine and fixtures............	$3,875
26.	Coal Yard No. 1, yard inclosed and coal distributing machinery	27,532
	Total	$31,407

BLOCK NO. 4.

Bounded by East 15th and 16th Streets, and Avenues C and D, contains, Coal Yard No. 2, stable, tar and ammonia wells, rigging, loft, kiln and storage yard.

27.	Engine and boiler house 16-½ feet x 19 feet, brick building on piles, wood roof covered with tin, including boiler, engine and fixtures............	$4,075
	Carried Forward.........................	$4,075

7150

	Brought Forward.........................	$4,075
28.	Coal yard No. 2, yard inclosure and coal distributing machinery	28,444
29.	Tar and ammonia wells, all wells for tar and ammonia on this block.......................	7,100
30.	Stables, two stories, 19 feet x 85-¼ feet, brick building on piles, wood roof covered with tin, including board fence.........................	6,413
31.	Stable contents, horses, trucks, carts, harness, hay, tools, etc................................	3,760
32.	Kiln, shed and storage shed, 40 feet x 150 feet, wooden building with gravel roof including kiln and tools, paving, etc......................	3,552
33.	Rigging loft, tools, stock and fixtures............	7,070
		$60,414

BLOCK NO. 5.

Bounded by East 15th and 16th Streets, and Avenue D and Tompkins Street, contains, Engine and Boiler House, Coal Yard No. 3, Weigh Office and Deodorizing Apparatus.

34.	Engine and boiler house, 18-1/3 feet, x 20 feet, brick building on piles, wood roof covered with tin, including boiler, engine and fixtures	$3,575
35.	Coal Yard No. 3, yard inclosure, including coal distributing machinery	20,952
	Carried Forward	$24,527

7151

	Brought Forward	$24,527
36.	Weigh office, 16½ feet x 26½ feet, brick building on piles, wood roof covered with gravel, including chimney	2,000
37.	Deodorizing houses, one—20 feet 8 inches by 46 feet 7 inches, one—20 feet 8 inches by 36 feet 7 inches, with chimney between, brick buildings on piles, wood roof covered with gravel, including chimney	5,837
38.	Deodorizing apparatus, cement pipe (steam jet, pipe and valves in purifying house cellar), boxes, trays, etc	14,714
		$47,078

BLOCK NO. 6.

Bounded by East 14th and 15th Streets and Avenues A and B; contains Boiler-house and well.

39.	Well, well complete		$15,000
	Boiler-house, 13 feet, 9 inches by 28 feet, brick building, wood roof, including chimney, gangway	1,800	
	Shed and well-house	1,000	
	Boiler and fixtures and two Worthington pumps, tools, etc	2,030	
			$4,830
			$19,830

7152

BLOCK NO. 7.

Bounded by East 17th and 18th Streets and Avenues B and C, contains gas-holder tanks, gas-holders and boiler-house.

40.	Gas-holder tanks, two tanks, including guide-plates and well	$60,800
41.	Gas-holders, two gas-holders and frames	52,000
42.	Boiler house, wooden building with upright boiler, pump and fixtures, valve pits, valves, sundry valves, and fence	3,564
		$116,364

MISCELLANEOUS.

43.	Mains about works, including 20-inch main to holders, Nos. 7 and 8, and all valves outside the buildings	$42,213
44.	Hydrants, sewers and culverts	16,165
45.	Small steam, water and gas-pipes, valves, etc., about the works	10,000
46.	Fifty tons of pipe	2,000
	Fifty tons of specials	3,000
47.	Twenty-two patent iron coal tubs	800
48.	Nine hundred malleable retort mouth-lids	2,700
49.	Small gas-meters about works	175
50.	Spare purifier trays (new stock)	3,000
51.	Street flagging, consisting of sidewalks, curbs, gutters, bridge stones and iron cover plates	22,242
		$102,295

7153

RECAPITULATION.

Block No. 1.	$764,881
Block No. 2.	564,025
Block No. 3.	31,407
Block No. 4.	60,414
Block No. 5.	47,078
Block No. 6.	19,830
Block No. 7.	116,364
Miscellaneous	102,295
	$1,706,294

The foregoing appraisal, amounting to the total sum of one million seven hundred and six thousand two hundred and ninety-four dollars ($1,706,294), setting forth the present value of the buildings, gas-producing and gas storage plant, coal storage, tools, fixtures, implements and betterments of every description (excepting the river bulkhead, which is not included in this estimate), comprising the property of the Manhattan Gas-Light Company, known as the Fourteenth Street Station, has been carefully revised and corrected by me, and I hereby certify the said sum to be the just and true present value thereof to the best of my knowledge and belief.

(Signed) THOMAS F. ROWLAND.

B.

VALUATION OF THE BUILDINGS, GAS PRODUCING, GAS STORAGE, COAL STORAGE, OIL STORAGE, TOOLS, FIXTURES, IMPLEMENTS AND BETTERMENTS OF EVERY DESCRIPTION, CONSTITUTING THE PLANT OF THE NEW YORK GAS-LIGHT COMPANY, LOCATED BETWEEN FIRST AVENUE, 20TH STREET, EAST RIVER, AND 22D STREET.

By Thos. F. Rowland, Continental Works, Brooklyn, September 1, 1884.

Block No. 1.

Bounded by avenue A, 21st street, East river, and 22d street.

1. 7160	Office building, 46 feet 2x29 feet 8, three stories, brick building, Philadelphia, fronts, and finish, blue stone trim, containing quarters for engineer, assistant paymaster, etc., drafting room, stationary closets, laboratory, gas testing room, photometer room, etc., all newly fitted in the best manner	$25,000	
	Fittings and furniture of office laboratory, library, photometer rooms, etc.	4,500	
			$29,500
2.	Engineer's store room, 26 feet 6x52 feet, two story, contents of engineers' store room (Brick room adjoining office), one spare horizontal engine complete, 5x12, two Copeland and Bacon hoisting engines, 8x8, one Root rotary hoisting engine, eight 3-inch shaft hangers, spare shafting and pulleys for small blower, eight Cameron pumps, 3 No. 2, 1 No. 3, 1 No. 4, 1 No. 9, 2 No. 8, one Worthington steam pump, 7x10, one Woods' pipe cutter, 30-inch, 1 Woods' pipe cutter, 20-inch, two gas governor tanks and float-1, 12-inch; 1, 16-inch, two spare Westinghouse engine fly-wheels, 34-inch, one pair extra sheaves for same, three governor rods, weights and		
	Carried Forward........................		$29,500

7161	*Brought Forward*...........................		$29,500
	safety valves, oil cabinet, tanks, cans, measures, waste bin, closets, work bench risers, tools, etc........	5,725	
	Second story of engineer's room, contents, boiler tube brushes, steam and vacuum gauges, governor valves, oil cans, gauge glasses, inspirator gauge cock, engine brasses, pyrometer, Babbit metal pump piston, oil cups, boiler water column and steam gauge, whistle, lamp wick, antifriction metal, Judson engine governor hemp, rubber and packing, etc., foreman's room, desk, bookcases, closets, etc................	1,000	
			$6,725
3.	Main building, 198 feet x 513 feet, with stone front on avenue A, and brick walls on 21st and 22d streets, also iron lattice work, and brick filling at rear, covered with wrought-iron framed roof, slated, supported on wrought-iron columns and girders, size 198 feet x 513 feet, less parallelogram at south-west corner, 29 feet 8 x 46 feet 2, occupied by office building; contained within said building are engineer's store-room, engine, blower and exhauster rooms, blacksmith shop,		
	Carried Forward...........................		$36,225
7162	*Brought Forward*...........................		$36,225
	pipe and carpenter shops, carburetter room, coal-gas benches, water-gas benches, gasogenes, boilers, etc..................................		257,801
4.	Machinery departments, 50 feet x 160 feet, two stories, of brick with gravel roof, consisting of rooms for stores, machinery and work-shops, including foundations for machinery...........		$24,774
5.	Carburetter room, 33 feet x 36 feet, composed of brick walls, doors, carburetter, foundations and slatted floor		3,789
6.	Coal-gas plant: Consisting of 100 benches in all their detail, each bench 7 feet 6 inches wide, containing six retorts per bench. The value of these benches, if in working order, would be twenty-two hundred and fifty dollars each ($2,250), but the retorts are useless while the ovens are in good working condition, therefore the sum		

	of four hundred and fifty dollars ($450) per bench must be deducted from the above price for said renewal, then 100 benches at $2,250 less $450 each, $1,800 each........	$180,000	
	Carried Forward...............	$180,000	$322,589
7163			
	Brought Forward..............	$180,000	$322,589
	Foundations for the above benches....	25,000	
	Twenty take-offs 24 inches in diameter with valves (four to each stack), also 24 inch and 30 inch delivery pipe leading the length of and across the retort house to the exhauster room, together with the tar drains to tar wells	27,895	
	Tools for working partially worn out..	2,500	
			$235,395
	Capacity of this plant 3,000,000 per day.		
7.	Water-gas plant, consisting of fourteen gasogenes with galleries upon which are situated seven water boxes (one box common to each pair gasogenes), lifting cranes, take-off pipes, purge valves, chimney hoods, etc., fitted complete.....		84,000
8.	Gasogene foundations, sixteen gasogene foundations		3,792
9.	Blower fixtures, blast pipes, relief valves and fixtures, commencing at the blowers and terminating at gasogenes and boilers...............		4,442
9*a*.	Hydrogen connections, consisting of 30-inch wrought and cast iron pipes, specials, valves, drips, etc., commencing at the hydrogen holder and terminating (after passing hydraulic main) at 21st street wall of building................		26,000
	Carried Forward........................		$676,218
7164			
	Brought Forward		$676,218
10.	Boilers, eight horizontal tubular boilers set in two batteries, each boiler independent of others, having its own smoke stack, feeding and delivery appliances, including an underground brick water tank located between the batteries........		24,700
11.	Engines, blowers, etc., two Continental works beam engine 15 x 24 with steam connections, two blowers with blast domes and valves to main blast pipe, shaftings, hangers, pulleys, belts, gallery ladders, tools, self-oiler and sundry fixtures.....		15,818

12.	Exhausting apparatus, three Westinghouse engines, 8 x 8, with steam piping, valves, 3 Huntoon governors and fixtures complete, two Smith & Sayre rotary exhausters with compensators, 24-inch valves and connections to main, counter-shafting, friction pulleys, with gallery and stairs for same, also belts, tools, gauges, etc		16,416
13.	Elevated railroad about the gasogenes with surface turntables, tracks, etc., to coal house and boiler, switch and scale and pumps, etc.		22,930
14.	Carburetters, four carburetters with valves, connections, etc., complete		18,450
	Carried Forward		$774,532
7165			
	Brought Forward		$774,532
15.	Naphtha benches:		
	Sixteen through benches complete, containing 6 retorts, each equivalent to 32 ordinary coal benches with the attachments of valves, etc., for controlling the naptha additional thereto, at $2,000 per bench	$64,000	
	Foundations for the above benches	6,400	
			$70,400
16.	Naphtha storage:		
	Twelve wrought iron storage naphtha tanks, 40 feet long, 8 feet in diameter, 15,000 gallons' capacity each, and two distributing naphtha tanks with the necessary pipes for distribution	$32,008	
	Pump house, two-story brick building with slate roof, 19 feet x 23 feet	1,769	
	Two large Cameron steam pumps for naphtha, one small Cameron steam pump for well-water, two small Worthington pumps for naphtha, tools, etc., with large pipes and valves, etc., to docks and tanks	6,100	
			$39,877
	Carried Forward		$884,809
7166			
	Brought Forward		$884,809
17.	Water tower, tank, etc.:		
	Circular brick building, 20 feet diameter, 25 feet high, with water closets and connections	$2,640	
	One wrought iron tank on building 20 feet high for well water with float and gauge and necessary piping	3,300	
			$5,940

18.	Tar wells, six circular brick tanks, underground, roofed and paved over with the necessary pipes and connections, etc., for collecting tar and other residuals		$10,789
19.	Coal house No. 1, 69 feet x 153 feet:		
	Brick building with pile and concrete foundations, slate roof, capacity 5,000 tons of coal	$27,253	
	Two Hunt's automatic railroads with two Copeland & Bacon's engines, boiler, coal tubs, cars, two Fairbanks scales	7,477	
			$34,730
20.	Blacksmith shop, 18 feet x 49 feet, one story, contains one No. 3 shears, one double forge, one steamgrindstone, one steam hammer, one steam drill press, one screw cutting machine, lathe, anvils, tools, etc., etc.		$1,825
	Carried Forward		$938,093
7167			
	Brought Forward		$938,093
21.	Pipe shop, 26 feet x 49 feet, contains shop tools consisting of one Copeland and Bacon engine 8 x 8, one 2-inch Chase pipe cutter, one Cameron steam pump for pumping drips, one 6-inch Sandercon's pipe cutter, one iron sink, shafting, hangers, pulleys, etc., 14 spare hand drip pumps, desks, closets, ladders, hand trucks, work benches, tools, stock, etc.		4,300
	The cost of special pumping machinery for the elevators is included in the railroad system.		
22.	Carpenter shops on second floor, contents, one large and one small saw table, complete, and boring machine, one sticking machine, complete, one mortising machine, complete, three work benches, tools, etc., countershafting pulleys, hangers, belting, iron sink, desk, clothes closets, steam heater, stove and stock		1,060
23.	Small piping, steam, water and gas lighting of various sizes from 3-8 to 6 inches		11,143
24.	Sundry fittings, furniture, etc., two closets, two pipe cutters 12-in. and 16-in., two 4-inch water meters, gas fixtures, water closets, one 8-inch valve, one cart and horse, wood partition in retort house, two ladders, two lamp posts, seven		
	Carried Forward		$954,596

7168	*Brought Forward*	$954,596
	water troughs (cast iron) and fixtures, three iron stairways, bench tools, tools for ice boxes, scales	3,820
25.	Gasogene tools, tools for gasogenes and twelve coal cars	3,600
26.	Fuel main, fuel main at water benches	1,504
27.	Fences, brick fence at rear of block and wood fence around tar and naphtha tank	4,050
28.	Sewers, main sewers on block No. 1	4,694
29.	Paving, paving in rear of retort house	2,440
	Total, block No. 1	$974,704

BLOCK No. 2.

Bounded partially by Avenue A and other property on Avenue A, 20th Street, East River and 21st Street.

1.	Meter-house, 45 feet, 6 inches x 71 feet, 5 inches:		
	Brick building, with composite roof and wood floors, also meter foundations		$10,950
	One station meter with wrought-iron case and cast-iron pedestals, with gauges, index, etc., complete capacity, 4,000,000 per day		18,250
	Carried Forward		$29,200
7169			
	Brought Forward		$29,200
1*a*.	Appliances for measuring the gas, etc.:		
	Two station meters, with cast-iron cases and pedestals, with gauges, indices, etc., individual capacity, 1,500,000 per day		12,282
	Wrought and cast-iron pipes, specials, valves and connections, contained within meter-house	$5,217	
	One large Bray burner, with ornamental lantern erected complete	350	
			5,567
			$47,049
2.	Purifying-house, 66 feet x 184 feet:		
	(House No. 10), brick building on concrete foundations, composite roof, lime room, and foundations for iron work	$33,265	

2*a*. Purifying appliances:		
Eight purifiers, with covers, tray bars and trays, two carriages and rails, two dry center-seal valves with pipes, beams and columns for boxes and all connections, valves and tar pipe....	63,314	
Three lime wagons, fifty lime boxes, four foul lime barrows, gauges and tools for handling lime............	767	97,346
Carried Forward		$144,395
7170		
Brought Forward.........................		$144,395
3. (House No. 9), 66 feet x 184 feet for lime (both fresh and foul): Brick walls on 20th and 21st streets, with wood roof, supported on walls of purifier and condenser-house, a runway for lime with gallery and tar well		18,313
4. Condenser and scrubber-house, 66 feet x 184 feet:		
(House No. 8), brick structure, covered with slated composite roof, the portion containing scrubbers being raised above the main building, the transverse wall thereof being supported on wrought-iron girders and columns; also including the brick foundations for the apparatus and the galleries surrounding it........	$43,517	
Four condensers	43,500	
Two edge condensers...............	6,000	
Two scrubbers with stairs...........	21,250	
Valves, pipes, drips, over-flows, gauges, thermometers, etc................	16,050	130,317
5. Storage warehouse, 66 feet x 184 feet: (House No. 7), brick building, with gravel roof, tracks and turn-tables for handling coal, also plank floor with storage bulkhead.............		24,435
Carried Forward.........................		$317,460
7171		
Brought Forward.......................		$317,460
6. Storage warehouse, 66 feet x 184 feet:		
(House No. 6), same as No. 7, *i. e.* (with gravel roof, tracks and turn-tables for handling coal), elevator tower, boiler and pump room, also plank floor	27,335	

	One pipe truck, one hoisting winch, one circular saw table, one platform scale, forty test weights, one hydraulic jack, screw jacks, three derricks, and tools for masons and riggers	4,700	
6*a*.	Hydraulic machinery: One upright boiler, one hydraulic pumping engine, one accumulator, one iron water tank with piping, valves, etc., complete	7,450	
			39,485
7.	Storage warehouse, 66 feet x 184 feet: (House No. 5), generally like No. 7..	$23,135	
	Six buggy wagons for gas coal, one experimental carburetter, iron railing coping, manhole covers, doors, sashes, etc.	1,625	
			24,760
8.	Storage warehouse, 66 feet x 184 feet: (House No. 4), generally, like No. 7, with the addition of an elevator tower	$26,135	
	Carried Forward	$26,135	$381,705
7172	*Brought Forward*	$26,135	$381,705
	Contents: One experimental scrubber, one experimental condenser, four experimental purifiers with covers, three iron steam expansion joint boxes	750	
			26,885
9.	Storage warehouse, 66 feet x 184 feet: (House No. 3), generally, same as No. 7, excepting floor, which is asphalt paved	$24,771	
	Contents: Three iron buggy wagons, twelve roof coal cars, four coal tubs	2,375	
			27,146
10.	Storage warehouse, 66 feet x 184 feet: (House No. 2), generally, same as No. 7, excepting floor, which is asphalt paved and has three lines of car tracks thereon		25,443
11.	Inclosure east of storage warehouses, wooden fences inclosing the property east of storage warehouses, bounded by 20th street, East river, and 21st street, also two dumps, two small brick buildings and one wooden stable		1,934
	Carried Forward		$463,113

7173	*Brought Forward*	$463,113
12.	Water, steam and gas lighting pipes, fixtures, etc., about the building, water-pipes, running from hydraulic towers all along the storage buildings, also steam and gas lighting pipes	1,850
	Total block No. 2	$464,963

BLOCK No. 3.

Bounded by First avenue, Twenty-first street, Avenue A and Twenty-second street.

1.	Purifying-house, 50 feet 6 x 211 feet 6, one-story brick building with iron and slate roof, S. E. corner of Twenty-second street and First avenue, has been used for a purifying-house, now vacant, building considered of no value, only value is in foundation and excavation		$5,000
2.	Condenser-house, 50 feet x 66 feet, one story brick building with iron and slate roof, on First avenue, south of above purifying-house, has been used for condensers and washers, not now in use. Scrubber-house, 50 feet 8 x 21 feet, tall brick building with mansard roof (slate and gravel), on First avenue south of condenser, has been used for scrubbers, not now in use		12,825
3.	Purifying-house, 49 feet x 100 feet and drying-house, 49 feet 110 feet 6: One-story brick building with gravel roof, corner Twenty-first street and First avenue	$17,200	
	Carried Forward	$17,200	$17,825
7174	*Brought Forward*	$17,200	$17,825
	Drying-room, a continuation of the purifying house	12,900	
	Set of old purifiers, beams, columns, etc.	4,500	
			34,600
4.	Boiler-house, 40 feet x 58 feet: One-story brick building with slate roof, 178 feet east of First avenue	$6,000	
	Contains (2) two locomotive boilers (80 H. P. each) set in brick work and fitted with feeding and delivery appliances complete	9,000	
			15,000

5.	Holders, Nos. 3, 4, 5 and 6:		
	Four triple sectional telescopic gas holders, arranged to work separately or together, capacity of each holder 400,000 cubic feet	$220,000	
	Four tanks for above holders 90 feet 8 diameter arranged with 24-inch inlet and 24-inch outlet pipes going into the 30-inch to governor house, tanks reinforced with iron bands	140,000	
			360,000
6.	Valve-house, 24 feet x 24 feet:		
	Brick building with slate roof	$2,000	
	Contains (4) four inlet and (4) outlet valves for holders	3,500	
			5,500
	Carried Forward		$432,925

7175

	Brought Forward		$432,925
7.	Governor-house, 26 feet x 23 feet 6:		
	One-story brick building with slate roof	$4,000	
	Contains inlet and outlet valves, wall holders, valves to street mains, etc., with the necessary gauges, pressure registers, etc., holders 3 and 6 can be worked as one holder from this house	8,000	
			12,000
8.	Street main valve-house, 10 feet x 15 feet 6:		
	Low brick building with tin roof	$400	
	Contains the four transit main valves, and is the point from which the street mains commence	1,800	
			2,200
9.	Drafting and experimental house, 17 x 28 feet:		
	Two-story brick building with gravel roof, used for experimental purposes	$3,500	
	Contains experimental bench, condenser, scrubber, purifiers, meter, etc.	2,800	
	At the rear of the building is an experimental gas holder 1,500 cubic feet capacity and iron tank both inclosed in galvanized iron building	4,500	
			10,800
	Carried Forward		$457,925

7176	*Brought Forward*		$457,925
10.	Holder No. 1, single lift hydrogen holder, capacity 80,000 cubic feet, acts as governor for carburetters and benches of water gas plant	$15,000	
	Tank for same fitted with 24-inch inlet and outlet pipes	30,000	
			45,000
11.	Holder No. 2, double-sectioned telescopic gas-holder 190,000 cubic feet capacity	$25,000	
	Tank for same with 24-inch inlet and outlet fixtures so arranged that the gas-holder may be used for either hydrogen or illuminating gas	30,500	
			55,500
12.	Cast and wrought-iron gas mains: Cast and wrought-iron gas mains, crosses, tees, specials and general connections (within this block) between holder to valve house and to street mains		21,625
13.	Governor: Holder, governor and fixtures		1,000
14.	Ammonia wells, etc., Ammonia wells, sewers, manholes, etc.		3,275
15.	Walls: Brick walls surrounding this block with gates, etc.	$21,845	
	Carried Forward	$21,845	$584,325
7177			
	Brought Forward	$21,845	$584,325
	Walls, storerooms, etc., walls in the north-east and south-east corners of the block; adjoining the walls are store-houses, one in each corner used for paint shop, storage, etc.	1,300	
			23,145
16.	Steam piping, etc.: Steam pipes, cocks, valves, small water pipes, water meter, etc.		2,650
17.	Fixtures for lighting: Small gas pipes, fittings, lighting fixtures, Siemen's burner on top of governor-house, gas meter for above		1,000
18.	Grading and paving:		
	Grading around the tanks	$5,000	
	Inside paving and flagging	4,176	
			9,176
	Total, Block No. 3		$620,296

BLOCK NO. 4.

Bounded by 20th street, lots on 1st avenue, 21st street, lots on Avenue A.

1. Holder No. 7:		
Two-lift telescopic holder, 18-inch cup and 6-inch dams, capacity 1,500,000	$140,000	
Tank with valve house and well......	196,500	
		$336,500
Carried Forward.........................		$336,500

7178

Brought Forward.........................		$336,500
2. Holder No. 8:		
Two-lift telescopic holder, 18-inch cup and 6-inch dams, capacity 1,500,000	$140,000	
Tank with valve house and well......	196,500	
		336,500
3. Boiler-house, 27 feet x 40 feet:		
Contains one locomotive boiler (25 horse-power) complete, with extra length of smokestack.............	$1,050	
Boiler	950	
		2,000
4. Hose for holders, tools, etc...........		1,180
5. Stables:		
Across the eastern end of the plot of ground extending from 20th to 21st streets are the stables, wagon house, etc.	$6,030	
Contents, 13 horses, 1 coupe rockaway, 2 top wagons, 1 box wagon, 1 4-wheel truck, 1 lumber wagon, 1 sprinkling cart, 1 spring cart, 2 drip carts, 2 Concord wagons (express), 6 coal carts (no springs), 1 coal cart (springs), 3 coke carts (springs), 6 brick carts, harness, blankets, sheets, etc., tools, carts, etc., used by street department	8,550	
		14,580
Carried Forward.......................		$690,760

7179	*Brought Forward*	$690,760
6.	Walls, brick walls on 20th and 21st streets, inclosing the holders, Nos. 7 and 8, including gates and retaining walls, concrete paving, etc.	16,930
7.	Cesspools, etc., cesspools, sewers, water piping and steam piping and under-ground work	1,969
8.	Mains, valves, specials, etc., constituting the conveying pipes for connecting the various portions of the works, service pipes underground leading from gas holders to street and in First avenue, 21st street to valve house, located on south side of block No. 3, also in 22d street and Avenue A, including all the main gas pipes of all sizes located outside of the works proper	60,783
	Total block No. 4	$770,442

MISCELLANEOUS.

1.	Pipe in yard, sixty tons pipe on hand	$2,400
2.	Specials, sixty-five tons on hand	3,900
3.	Wells, eight Andrews driven wells with pump and piping to water tower	3,600
4.	Sidewalks, etc., sidewalks, curbing, gutter, iron bridges, etc., for all the blocks	27,219
5.	Sewers, sewer in 21st street built and owned by the Company	5,800
	Carried Forward	$42,919
7180	*Brought Forward*	$42,919
6.	Water and gas services, small water-service pipe, connections, etc., also test gas pipe leading from fixing lights at benches to the station meters all located in 21st street	1,600
	Total Miscellaneous	$44,519

RECAPITULATION.

Block No. 1	$974,702
Block No. 2	464,963
Block No. 3	620,296
Block No. 4	770,442
Miscellaneous	44,519
	$2,874,922

The foregoing estimate of values, the original of which was produced by my assistants during my absence from the country, has been carefully revised and corrected by me, I having personally examined the details thereof and eliminated therefrom all errors which I have discovered therein. I therefore hereby declare that the sum of two million eight hundred and seventy-four thousand nine hundred and twenty-two dollars ($2,874,922), being the sum of the revised appraisal, is the just and true *present value* thereof to the best of my knowledge and belief.

(Signed) THOMAS F. ROWLAND.

September 1, 1884.

C.

VALUATION OF THE METROPOLITAN GAS-LIGHT COMPANY, AUGUST 5, 1884.

The diagram or plan of the lots designated in this Schedule is appended to the original, of which this is a copy.

5 lots situated at the northeast corner of Avenue "A" and 60th Street, partly under water	$22,000	
8 lots fronting Avenue "A," on the west side, between E. 60th and 61st streets, at $7,000	56,000	
Add for corners	4,000	
8½ lots fronting on the north side of 60th street, between 1st Avenue and Avenue "A," commencing 100 feet west of Avenue "A," at $4,500	38,250	
8½ lots fronting on the south side of 61st street, between 1st Avenue and Avenue "A" commencing 100 feet west of Avenue "A," at $4,500	38,250	$158,500
8 lots fronting Avenue "A" on the west side, between East 62d and 63d streets, at 8,000	64,000	
Add for corners	4,000	
Carried Forward	$68,000	$158,500

7188

Brought Forward	$68,000	$158,500
13¼ lots fronting on the south side of 63d street and commencing 100 feet west of Avenue "A" at $6,000	79,500	
15¼ lots fronting on the north side of 62d street and commencing 100 feet west of Avenue "A" at $5,000	76,250	223,750
8 lots fronting 41st street on the north side, between 10th and 11th avenues, commencing 100 feet east of 11th avenue, at $6,000	48,000	
8 lots fronting 10th avenue on the west side from northwest corner of 65th street to southwest corner of 66th street at $7,000	56,000	
Add for corner lots	4,000	
8 lots fronting 11th avenue on the east side, commencing at the northeast corner of 65th street and extending to the southeast corner of 66th street, at $5,000	40,000	
Add for corner lots	4,000	

24 lots fronting north side of 65th street, commencing 100 feet west of 10th avenue, at $4,500	108,000	
24 lots fronting south side of 66th street, commencing 100 feet west of 10th avenue, at $4,500	108,000	368,000
Carried Forward		$750,250
7189 *Brought Forward*		$750,250
6 inside lots fronting west side of 11th avenue, between 41st and 42nd streets	$54,000	
1 lot northwest corner of 11th avenue and 41st street	10,000	
1 lot southwest corner of 11th avenue and 42d street	15,000	
28 lots fronting north side of 41st street, between 11th and 12th avenues, commencing about 100 feet west of 11th avenue, at $6,000	168,000	
28 lots fronting south side of 42d street, between 11th and 12th avenues, commencing about 100 feet west of 11th avenue, at $9,000	252,000	499,000
6 lots fronting on the north side of 42nd street, between 11th and 12th avenues, commencing 100 feet west of 42d street, at $10,000		60,000
8 lots fronting on the west side of 11th avenue, between 65th and 66th streets, at $5,000	40,000	
Add for corners	4,000	
17-75/100 lots, having a frontage of 199 feet 9 inches on the north side of 65th street, and 234 feet 9 inches on the south side of 66th street, between 11th avenue and the H. R. R. R. cut, commencing 100 feet west of 11th ave., at $4,000	71,000	115,000
Carried Forward		$1,424,250
7190 *Brought Forward*		$1,424,250
57 lots, bounded by the west side of 12th avenue, the center line of 41st street, the west side of the former 13th avenue and the center line of 42d street, with water rights and grants as to wharfage, cranage, etc.		300,000
16-76/100 acres of land (7-48/100 acres under water) situated on the west shore of the Hudson river at Shady Side, Bergen county, N. J.		50,000
		$1,774,250

7192 *Avenue A and 1st Avenue, 60th and 61st Streets.*

Frame dwelling house, situate standing detached about 30 feet south side of 61st street, commencing about 100 feet west of Avenue A	$5,000	
Frame dwelling-house, situate standing detached about 35 feet on the north side of 60th street, commencing about 100 feet west of Avenue A....................	6,000	
Stable building, two-story frame filled with brick, shingle roof, situate on 60th and 61st streets, about 290 feet west of Avenue A............................	1,500	
		$12,500

Avenue A and 1st Avenue, 62d and 63d Streets.

Two gas-holder tanks of 94 feet diameter and 26 feet net depth, built of brick with concrete bottoms, at $40,000............	$80,000	
Two telescopic gas-holders, 92 feet 6 inches diameter of outer section, 91 feet diameter of inner section, 26 feet height of each lift. Holders have cast iron columns, 24-inch inlet and 20 inch outlet pipe, capacity each 325,000 feet....................	56,000	
Valve house built between the two holders, brick cellar, frame upper part, slate roof, house is octagon, 17 feet long, 15 feet wide	2,000	
Carried Forward............................		$138,000

7193

Brought Forward............................		$138,000
It contains three 30-inch branches, two 30-inch valves, with hand wheels, two 24-inch valves, two 20-inch valves..............	$1,500	
It contains further on furniture, 1 desk, chairs, clock, steam heater, gas fixtures...	150	
Engine room building on 63d street, 32 feet x 56 feet, frame with basement 10 feet high, built of masonry, slate roof.......	6,000	
Basement contains workshop with pipe and parallel vise, stock and dies, pipe tongs, hammer, chisels, drip-pump, 6 snow shovels, saw and ladder..................	100	
Under engine room, foundation for steam engine and exhauster included in cost of building six 24-inch tees, four 24-inch bends, five 24-inch valves, one 24-inch self-acting valve, 48 feet of 24-inch heavy flange pipe	3,000	

In boiler room, one cylindrical tubular boiler 4 feet in diameter and twelve feet in length, with thirty-three 3-inch tubes; boiler is built into brick work with cast iron front, including gauges and valves..	2,000	
One No. 3 Woodward pump for feeding boiler, including connections...........	250	
One reel with 100 feet of ¾-inch hydrant hose any clay-pipe....................	25	
		13,025
Carried Forward............................		$151,025

7194

Brought Forward............................		$151,025
Iron stairway and platform leading to engine room on main floor of building, engine room containing one twenty-horse power horizontal steam engine, cylinder 10 inches diameter by 18 inches stroke......	$1,400	
One Mackenzie's patent exhauster of 150,000 feet per hour capacity for 24-inch connections	5,000	
One Mercury compensator for same........	600	
Fifteen feet of 3-inch counter-shaft with two pulleys	200	
One friction pulley, 62 feet of 10-inch belting	275	
One each of King's pressure and vacuum gauges and connections...............	125	
One arch pressure gauge................	25	
One valve stand with hand wheel.........	60	
Two steam heaters, gas fixtures, chairs.....	100	
Office in front part containing 1 desk, 1 washstand, chairs, bench, steam heater...	125	
One set photometer.....................	115	
One self-registering pressure gauge........	175	
In and under yard, 146 feet of 20-inch pipe, 24 feet of 24-inch pipe, two 20-inch branches, two 24-inch x 20-inch reducers, two 20-inch bends....................	1,500	
Vault for water meter and water meter...	175	
		9,875
Carried Forward............................		$160,900

7195

Brought Forward............................		$160,900
Twenty-five feet of 4-inch water pipe......	$25	
One hundred and fifty feet of 2-inch water pipe	50	
One hundred and twenty feet of 1½-inch steam pipe	50	

Forty feet of 1-inch steam hose	10	
Eighty feet of 4-inch cast iron sewer pipe	125	
One lantern at gate on 63d street	15	
Frame blacksmith shop for street department	75	
Frame carpenter shop for street department	50	
Frame shed used by street department	50	
One blacksmith hearth, bellows, anvil and set of tools in blacksmith shop	150	
Work-bench in carpenter shop	25	
Two hundred feet ten inches of brick wall 16-inch, with 20-inch panels (on Avenue "A")	2,000	
Nine hundred and fifty feet of wooden fence on 62d and 63d streets	1,000	
		3,625
		$164,525

10th and 11th Aves., 41st and 42d Sts.

Retort house, one story, brick, walls 16 inches thick, iron roof frame, covered with corrugated iron, building is 17 feet high inside measurement, floor paved with brick		$1,500
Carried Forward		$1,500

7196

Brought Forward		$1,500
Boiler room, one story, brick, 30 feet x 30 feet 10 inches, iron roof, 17 feet high, floor paved with brick, 12-inch walls	750	
Lime room, 1 story, brick, 12 inch walls, wooden roof, floor paved with brick, 13 feet high, building 25 feet 5 inches x 31 feet 2½ inches	600	
Purifier house, basement, one story, 16-inch brick walls with 12-inch panels, wooden roof slated, wooden floor in main story	1,500	
Gas holder tank, 49 feet 6 inches diameter, 15 feet deep, dismantled	1,750	
Brick chimney next retort-house, 9 feet square at base and about 60 feet high	850	
Small brick building, 16 feet 4 inches square, 12-inch walls, wooden roof	500	
Wooden shed, 14x16 feet, adjoining the above, frame shed in front of boiler-room	100	
One hundred and nine feet of brick fence wall without coping; one wooden gate	350	
One hundred and nine feet of parapet or retaining wall at N. E. corner of property	350	
		$8,250

7197 *11th avenue and Hudson River, 41st and 42d streets.*
Holder yard:

Four gas holder tanks, 96½ feet diameter, 21 feet 6 inches depth, built of brick and cement with concrete bottoms...........	$120,000	
Four telescopic gas holders, 95 feet diameter of lower lift, 93 feet 6 inches diameter of upper lift; each lift 20 feet deep, cast iron columns with lattice girders, 16-inch inlet and outlet pipes, each holder having a capacity of 250,000 feet.................	90,000	
Brick governor and valve house, one story high with cellar and vault..............	3,500	
Containing:		
Governor	3,100	
Valves: One 30-inch $210, one 24-inch $168, five 16-inch $560............	938	
Carpet, desk and chairs, gas fixtures and steam heater	200	
Three arch pressure gauges..........	75	
One drip pump....................	8	
One drip barrel on wheels............	15	
One-story brick meter-house, 12-inch walls, slate roof, no cellar containing..........	1,200	
Station meter No. 4, of a capacity of 500,000 feet per 24 hours, with 10-inch rotary bypass valve, overflow, clock and pressure gauges complete	1,800	
Carried Forward..............................		$220,836

7198

Brought Forward..............................		$220,836
Two hundred and sixty-seven feet of brick wall, 12-inch with 16-inch piers on 42nd street side of holder yard, $20 per foot...	$5,340	
Four hundred and forty feet of wooden fence inclosing holder yard on 41st street and 11th avenue sides, $1.50 per foot........	660	
Cast iron pipes in holder yard and connections to works, 204 feet of 30-inch pipe from works to governor-house, 3 30-inch bends and 90 feet of 24-inch pipe from governor-house to city, 1 24-inch bend...	3,000	
Two hundred and seventy-five feet of 20-inch pipe for two outlets to city, 3 20-inch bends, 2 20-inch branches, 1 20-inch valve 2 20 x 16-inch reducers...........	2,000	

Three hundred and ten feet of 16-inch pipe, 1 16-inch valve, 4 branches, 4 drips, 220 feet of 10-inch pipe, 2 10-inch valves, 12 bends, 100 feet of 8-inch pipe, 3 8-inch valves, 4 8-inch bends and 6 16-inch bends	3,150	
Office building, 57 feet 4 inch- x 29 feet inside measurement of brick, cellar, two stories and garret, slate roof with cupola or dome, walls 12-inch with 16-inch piers, vault under sidewalk on 42nd street, 36 feet x 18 feet x 8 feet high covered with

Brought Forward............................		$234,986
brick arches on iron beams, area 5 feet wide on 42nd street inclosed by iron railing with skylights for vault below, area 5 feet wide 10 feet deep along office building on holder yard side with iron steps leading down and covered with iron grating, contains water closet and urinal.....	$22,500	
Cellar is concreted and contains 106 feet 30-inch heavy flange pipe (for meter and two holders)	1,500	
Two 30-inch branches, 1 bend, 2 valves (for meter and two holders)................	620	
Forty-five feet of 24-inch pipe (heavy) to exhauster No. 3......................	500	
Five 24-inch valves, 5 branches, 9 bends...	1,450	
One hundred and five feet of 16-inch pipe for meter connections, 6 valves and 9 bends	1,420	
One 24-inch self-acting by-pass...........	310	
Foundation for 3-station meters...........	1,500	
Foundation for steam engine and pillow block	550	
Foundation for exhauster................	450	
One water meter.......................	150	
First floor contains—office with office furniture and fixtures....................	500	
One iron safe.........................	150	
Two self-registering pressure and vacuum gauges	400	
Nine syphon pressure gauges with connections from cellar....................	225	
Carried Forward..................	$32,225	$234,986

7200 *Brought Forward*	$32,225	$234,986
Four arch pressure gauges with connections	100	
One station meter (No. 1), 14 x 14 feet of 2,000,000 feet capacity	6,000	
One station meter (No. 2), 12 x 12 feet of 1,450,000 feet capacity	5,000	
One station meter (No. 3), 10 feet six inches x 10 feet nine inches of 1,150,000 feet capacity	4,000	
All with the proper gauges, overflows, etc.		
Density test, timers, naphtha and ammoniacal liquor test	100	
Movable platform scales	125	
Four ornamental valve stands	300	
Engine room No. 11 contains: one 25 horse power steam engine, horizontal, cylinder 12 x 24 inches	1,500	
One gas governor with throttle valve for this engine complete	250	
One Mackenzie part rotary exhauster (No. 3), 3,600,000 feet per 24 hours capacity	5,000	
with one compensator	600	
One friction pulley	85	
One King's pressure gauge, $50; one King's Vacuum gauge, $50	100	
One set photometer	115	
Closet for tools	25	
Carried Forward	$55,525	$234,986
7201 *Brought Forward*	$55,525	$234,986
One mercury steam gauge and connections	100	
Forty-five feet of 10-inch triple belt	110	
Four valve stands with wheels for four 24-inch valves, two valve stands with arrows for self-acting by-pass and key for valve of independent by-pass	350	
Second floor contains: Engineer's private office, containing 1 desk, 1 table, chairs, closet with shelves, and washstand; closet for writing materials, black walnut book case with books and periodicals on Gas Engineering	400	
Sulphur and ammonia testing apparatus	25	
Draughtsman's room contains: 1 desk, 1 glass book-case, 1 large book-case with drawers, full set of drawing boards, mathematical instruments, 1 theodolite, closet for drawing paper, steam heater and gas fixtures	600	

Drawings of works and apparatus—President's room contains desk, table, chairs, steam heater and gas fixtures...........	120	
Porter's room contains, closet, table, chairs, gas-stove, etc.........................	50	
Photometer room contains, a complete set Bunsen Letheby Bar Photometer with

cubic foot gas test, gas holder and connections to various points of works.........	2,000	
(Garret used for storage of various materials.)		
		59,280
Purifying house, frame, 70 x 160 feet with brick extension on 41st street 38 x 21 feet, one story high with wooden, felt and tan covered roof, cellar underneath the whole building with brick walls 16 inches thick, area along holder yard (walls 2 feet thick), cellar concreted and sewered throughout	30,000	
Cellar containing brick and iron foundations for 16 boxes of purifiers, centre valve 16-inch dry for purifier set 1, with tar tank below	1,200	
Centre valve 16-inch dry for purifier set 2, with tar tank below..................	1,200	
Centre valve 20-inch dry purifier for set 3, with tar tank below..................	1,500	
One hundred and sixty-eight feet of heavy 24-inch flange pipe (for inlet and by-pass to purifiers) with piers................	1,680	
Three 24-inch branches, 4 bends, 2 valves..	650	
Four hundred and seven feet of twenty-inch flange pipe (inlet and outlet to set No. 3, and connections for same..............	2,450	
Nine 20-inch bends, 1 branch, 3 valves.....	675	
Carried Forward................	$39,355	$294,266

7203

Brought Forward................	$39,355	$294,266
One 20-inch special casting for outlet......	125	
Inlet and outlet connections between boxes of sets No-. 1 and 2:		
482 feet of 16-inch socket pipe............	2,175	
Eight 16-inch branches, 9 bends, 4 valves..	800	
One 16-inch double bend, 1-16-inch cross...	90	

Connections for deodorizing apparatus:

113 feet of 20-inch socket pipe	700	
129 feet of 16-inch socket pipe	600	
One 20-inch cross, 1 20-inch x 16-inch reducer	65	
One 16-inch cross, 3 16-inch branches, 2 16-inch sleeves	105	
Twelve 16-inch bends, 12 16-inch valves	1,580	

Connections for set No. 4:

395 feet of 10-inch pipe	1,000	
Three 10-inch branches, 17 10-inch bends, 3 sleeves	220	
One 10-inch valve	70	
One hundred and ten feet of 6-inch pipe socket	175	
One 6-inch bend	5	
Seven drip pots with overflows	70	
Foundations for 12 boxes of purifiers, brick and iron, at $1,100	13,200	
Carried Forward	$60,335	$294,266

7204

Brought Forward	$60,335	$294,266
Main floor—purifier set 1: 4 boxes, 20 feet x 20 feet x 3 feet 6 inches deep, with wrought iron covers, cups 20 inches deep and hoisting carriage running on track on floor; 7 rows of sieves	11,500	
Purifier set 2, same as 1	11,500	
Purifier set 3, 4 boxes, 27 feet, 5¾ inches x 15 feet, 11 inches x 3 feet 6 inches deep, wrought iron covers, 20 inches depth of cups in hoisting carriage moving on track on main floor	12,500	
Lime sheds, partly on 41st St., sidewalk, frame, 1 story	600	
Tools as shovels, brooms, etc., for 12 men, 12 wooden wheelbarrows, 24 bushels-baskets, 6 wooden and 6 iron pails	200	
Purifier set 4, 7 feet 8 inches x 11 feet 8 inches x 3 feet 3 inches deep, 6 rows of sieves, carriage, dry centre valve for 10 connections	3,000	
		99,635
Vault under sidewalk on 41st street, 100 feet long, 13 feet wide, 8 feet 6 inches high, covered with brick arches resting on iron beams	$5,000	

Contains 44 feet of 20-inch socket pipe, 1 20-inch branch, direct connections between purifiers and holders..................	300	
Twelve feet of 10-inch pipe, 1 10-inch bend, connection between purifier set 4 and meter 4	50	
		5,350
Carried Forward...........................		$399,251
7205		
Brought Forward...........................		$399,251
Entrance to works from 42nd street:		
900 square yards of flags.................	$300	
Two gates	100	
Below flags, 37 feet of 24-inch cast iron flange pipe, for inlet to exhauster No. 3..	500	
Eighteen feet of 10-inch socket pipe, and 1 10-inch bend, inlet to purifier set 4.......	85	
		985
Entrance to works from 41st street, iron gate..........		311
Flagged yard with vaulted basement below. Flagged yard 300 feet x 38 feet between purifying engine and retort houses with basement underneath, flags resting on brick arches turned between iron beams. Building (including 4 chimneys).......	$26,000	
Fourteen skylights of glass and iron for lighting basement	3,000	
Two straight and 2 circular iron stairways leading to basement..................	1,000	
		30,000
Old engine room. Situated in basement of flagged yard, 22 x 38 feet concrete floor; used at present as store room for cast iron materials, as bends, branches, valves, part of machinery. It contains further, a brick cistern, 5 feet x 5 feet x 5 feet deep for accumulation of tar from low lying drips..	$500	
Carried Forward................	$500	$430,547
7206		
Brought Forward................	$500	$430,547
A No. 0 Woodward pump for removing tar.	125	
In connection with this cistern there are extending through cellars, under purifying and condenser houses, 445 feet of 6-inch cast iron pipes (sockets)..............	750	
Seventeen cast iron cesspools with covers, and 3 cast iron bends..................	550	
Eighty feet 1½-inch wrought-iron discharge pipe	15	
		1,940

Further, inlet to exhauster No. 111; 35 feet 24-inch heavy flange pipe	$400	
One 24-inch branch	35	
Outlet from exhauster No. 111; 24 feet of 24-inch flange pipe	275	
One 24-inch bend	30	
Twenty feet of 20-inch cast-iron socket pipe (belonging to deodorizer)	175	
Fourteen feet of 16-inch flange pipe	75	
Two 16-inch bends, 1 24-inch x 16-inch reducer, outlet from condenser 1	75	
		1,065
In passage between purifier house and condenser house No. 11. Cellars. Inlet to exhauster No. 111, 44 feet of 24-inch flange pipe	459	
One 24-inch bend, $35; 1 branch, $40; 1 valve, $170	245	
Carried Forward	$704	$430,547
7207 *Brought Forward*	$704	$430,547
Inlet to washer-scrubber, 5 feet of 24-inch flange pipe	533	
One 24-inch bend, 1 cross, 1 branch, 1 double bend and two valves	590	
Inlet to purifier set No. 11 from water-gas bench 44 feet of 6-inch pipe	65	
Outlet from oil exhauster	75	
Eleven feet of 12-inch elbows, 3 drip pots	25	
		1,992
Boiler-room, 18 feet x 53 feet 6, contains 1 locomotive boiler of 70 H. P., built in 1881, fire-box 5 feet square inside, 6 feet outside, 86 3-inch tubes, 12 feet long	$3,000	
Fitted with draught regulator	50	
Two locomotive boilers of 45 H. P. each, built in 1871; fire-boxes inside 4 feet square, outside 5 feet square; each boiler contains 54 3-inch tubes 8 feet long	4,500	
There is one wrought-iron smoke stack 24-inch diameter 65 feet high (above flags in yard) for large boiler, and one 24-inch diameter 50 feet high for 2 smaller ones		
Two Blake's No. 3 boiler-feed pumps	450	
One Niagara No. 5 pump (formerly used for pumping ammonia liquor)	600	
Carried Forward	$8,600	$435,544

7208 *Brought Forward*	$8,600	$435,544
One complete set of stoking tools, 2 coke boxes, 6 wooden wheel-barrows	200	
		8,800
Vault between old engine-room and boiler-room, 10 feet x 18 feet, contains one condenser for steam, 4 feet diameter and 6 feet high, and one No. 11 feed-water heater with brass coil, connection between condensers I and II, 42 feet of heavy cast iron 20-inch pipe		800
Store-room, 18 x 22 feet, used for storage of waste, shovels, pig lead, white lead, fittings, etc., one No. 9 Blake's pump for pumping out tanks with 60 feet 3-inch and 30 feet 6-inch suction pipe	$800	
One old steam engine of 15 H. P. 8-inch cylinder, 20-inch stroke, with fly-wheel, 2 pulleys	350	
One gas governor	100	
One 6-inch jet exhauster with by-pass valves, etc., complete	500	
		1,750
Pipe and fitting shop, 18 feet wide, 36 feet 6 inches long, containing 2 work benches with 4 parallel vises, 1 pipe vise, 1 pipe vise on iron stand, 2 closets, 1 oscillating steam engine of 5 H. P., 1 horizontal drilling machine with full set of twist drills from half inch to 1½ inch.,		
Carried Forward		$446,894
7209		
Brought Forward		$446,894
1 line of shafting with 5 pull*ies*, 1 pipe cutting and threading machine (cuts up to 4½ inch), 1 grindstone and full set of tools for 6 pipe fitters, steam heater, 1 punching press, 1 shearing machine, 1 punch for use on holders, 4 screw jacks, 1 hydraulic jack, 1 derrick for hoisting pipes, etc., with blocks and fall, and 1 drip pump, 1 pump for cleaning pipes, 2 chain blocks and 1 small truck for hauling pipe		3,000
Blacksmith shop, 18 feet x 53 feet, contains 2 blacksmith's hearths and bellows, 2 anvils, 1 work bench, with parallel vise and full set of tools for 2 blacksmiths and helpers		1,000
Paint shop, 18 feet x 14 feet 6 inches, containing work bench, closets, steam heater and full set of tools for painter and helpers, machine for grinding paint, and tar boiling over		200

Stable, 18 feet x 37 feet 6 inches, contains stalls for 3 horses, blankets, etc., feed box, steam heater, 1 brown horse, 1 roan horse, 1 brown mare, 3 light wagons, and 1 drip wagon		2,000
Condenser house No. 1, two stories and basement (upper story, including air condenser now being erected), brick walls 16		
Carried Forward		$453,094

7210

Brought Forward		$453,094
inches thick, 20 piers, iron roof covered with slates, with iron floors, iron dooors and windows	$16,000	
Basement contains one cast-iron washer for deodorizing foul gas from purifiers, 3 feet x 7 feet 6 inches x 9 feet high (inside measurements), divided into 4 compartments, filled with wooden trays, and provided with jets of water. Washer has drip pot attached to it	1,800	
One 20-inch steam jet exhauster for deodorizing apparatus	350	
Connections to deodorizing apparatus, 50 feet of 20-inch socket pipe, 7 20-inch elbows	500	
Connections to condenser No. 2, 1 16-inch x 16-inch tee, 1 16-inch elbow, 10 feet of 16-inch pipe, 2 16-inch valves, 1 16-inch x 20-inch reducer	400	
Tar connections, 43 feet of 8-inch cast-iron tar pipe, 50 feet of 6-inch cast-iron tar pipe, 30 feet of 6-inch cast-iron tar pipe, 2 tar pots, 3 8-inch valves, 3 8-inch tees, and 3 8-inch elbows	500	
First floor, two round cast-iron dry scrubbers, 8 feet diameter, 18 feet high, fitted with wooden trays, provided with necessary manholes and drip connections	3,500	
Foundation for same	800	
Carried Forward	$23,850	$453,094

7211

Brought Forward	$23,850	$453,094
One multitubular condenser, 42 feet long, 4 feet 6 inches wide, and 14 feet high, 12 compartments, with 48 4-inch cast-iron tubes each being 11 feet long	9,000	
Foundation for same	1,500	

Connections as follows, 50 feet of 16-inch cast-iron socket pipe, 4 16-inch elbows, 2 16-inch valves, 1 10-inch saddle-piece, 3 elbows, 1 valve, 1 24-inch elbow, 1 24-inch x 20-inch reducer, 1 24-inch valve, 5 feet of 24-inch pipe........................	1,050	
Second floor, one air condenser, composed of two sets of 4 each cast-iron seal mains, 24 inches x 26 inches inside, x 14 feet 8 inches long, and 32 wrought iron, 16-inch tubes, 45 feet 10 inches long each, whole apparatus resting on wrought iron girders	11,000	
Connections as follows, 48 feet of 24-inch wrought-iron pipe, 17 feet 24-inch cast-iron pipe, 6 24-inch elbows, 4 tees and 6 valves	2,000	
		48,400
Condenser house No. 2: One story brick building, 28 feet x 57 feet, with cellar, iron roof covered with slates, walls 16 inches thick, with 20-inch piers, area on 41st street covered with iron grating.........	13,000	
Carried Forward..........................		$501,494
7212 *Brought Forward*.................	$13,000	$501,494
Cellar and main floor contain: One multitubular condenser of the same size and description as the one in condenser house No. 1	12,000	
Brick foundation for same................	1,500	
Two cast-iron scrubbers, 9 feet square, 18 feet high, filled with wooden trays and fitted with water sprinkling apparatus, used as dry scrubbers at present...............	6,000	
Brick foundation for scrubbers...........	1,000	
One Kirkham-Hulett washer scrubber of two millions per diem capacity, 8 feet dtr., 16 feet 4-½ inch long, outside measurement with 13 compartments, gearing, counter shaft, 3 pulleys and belting......	15,000	
Small water supply tank with self-regulating ball cock, washer....................	50	
Resting on iron frame-work and columns..	500	
One cast-iron dry scrubber for naphtha gas, 6 feet 10 inches long, 4 feet 10 inches wide, 14 feet high, divided into four compartments, fitted with wooden slats.......	1,800	
Two round, wrought-iron multitubular condensers used for naphtha gas; diameter of each shell 5 feet; total height 22 feet 11 inches; 127 3-inch galvanized tubes, 19		
Carried Forward.................	$50,850	$501,494

7213 *Brought Forward*..................	$50,850	$501,494
feet 10 inches long in each condenser. They are provided with self-acting water supply apparatus, and also with quick opening valves for inlet, worked with rods and levers from main floor..............	8,000	
One condenser composed of two lengths of 24-inch pipe, forming a water tank with about 40 feet of 6-inch condensing pipe inside of it; not in use at present........	275	
Connections to large condenser, scrubbers and washer; 140 feet of cast-iron 24-inch flange pipe, 12 24-inch bends, 9 branches, 11 valves and 9 ornamental valve stands.	6,000	
Inlets from retort house No. 2; 36 feet of 20-inch flange pipe, 2 20-inch bends and 2 valves	650	
Connections for naphtha gas apparatus, 100 feet of 12-inch socket and flange pipe, 9 12-inch bends, 11 branches, 6 valves.....	450	
Tar connections to large condenser and scrubbers, 40 feet of 8-inch pipe, 6 8-inch branches, 6 valves; 16 feet of 4-inch pipe, 6 4-inch bends...................	550	
One large and 3 small tar pots............	50	
Tar connections to naphtha gas apparatus, 40 feet of 3-inch wrought-iron pipe, 20		
Carried Forward.................	$66,825	$501,424
7214		
Brought Forward.................	$66,825	$501,424
feet of 2-inch wrought-iron pipe, 95 feet of 1½-inch wrought-iron pipe..........	75	
		66,900
Vault in 41st street in front of condenser house No. 2, under sidewalk, 30 feet 6 inches long and 8 feet wide, covered with brick arches between iron beams........	$2,000	
Contains one wrought iron tank 10 feet x 6 feet 9 inches x 3 feet 3 inches, used for storage of naphtha tar.................	150	
One No. O Blake's pump for pumping this tar	100	
Eighteen feet of 4-inch cast-iron pipe, leading to water meter, 1 4-inch valve.......	46	
One meter for Croton water..............	150	
		2,446

Engine room No. 1, adjoining condenser room No. 2: One story and basement brick building 28 feet x 37 feet, with iron and slate roof. Basement concreted and sewered, main floor has double floor, upper one of hard wood, wooden ceiling with octagonal dome, 8 ft. across extending 8 feet above peak of roof................	12,000	
Contains in cellar and main floor: One 65 horse-power steam engine, cylinder 16		
Carried Forward.................	$12,000	$570,840

7215

Brought Forward.................	$12,000	$570,840
inches in diameter by 30-inch stroke, variable cut-off, fly-wheel, driving pulley 57 inches in diameter....................	3,000	
Engine resting on brick pier and iron beams as foundation	650	
Speed of engine regulated by one gas governor acting upon throttle valve of engine	400	
One large Smith & Sayre exhauster No. 1, of 5,760,000 feet capacity for 24 hours for 24-inch connections with driving pulley, 54 inches diameter................	6,000	
One Smith & Sayre exhauster No. 2, of 3,600,000 feet capacity for 24 hours for 24-inch connections with driving pulley, 48 inches diameter..................	5,000	
Exhauster is fitted with compensator......	600	
Bed-plates of both exhausters resting on brick arches, turned between iron beams supported by cast-iron columns.........	500	
One Smith & Sayre exhauster of 864,000 feet capacity per 24 hours and 12-inch connections (used for naphtha gas), steam engine of 7 horse power, with cylinder 6 inches in diameter 6 inches stroke on same and bedplate with exhauster and gas governor	2,500	
Bed-plate resting on brick pier...........	425	
A platform 28 feet 7 inches of cast-iron plates running across engine room 16 feet		
Carried Forward................	$31,075	$570,840

7216 *Brought Forward*	$31,075	$570,840
above main floor and supported by wrought-iron girders and cast-iron ornamental columns	1,500	
Platform support 3-1/2 inches, counter-shaft 17 feet long, counter-shaft provided with 3 pulleys 42 inches in diameter in connection with engine and exhausters 1 and 2, pulleys for exhausters provided with friction-clutches and belt tighteners worked from main floor	700	
Forty-three feet of 15-inch double belt and 82 feet of 10-1/2-inch double belt	700	
Iron stairway leading from main floor to platform	350	
One 12 horse power Greenfield upright engine, cylinder 8 inches in diameter x 8 inches stroke (driving Kirkham-Hulett washer scrubber included in valuation of scrubber		
One set photometer with governor for testing finished gas	115	
One set photometer for testing coal gas by itself	80	
Two of King's pressure gauges	100	
Two of King's vacuum gauges	100	
One set of tools for use of engine driver, set of oil cans and closets	125	
Six ornamental valve stands	350	
One reflector gas fixture and 2 ornamental side brackets	60	
Carried Forward	$35,255	$570,840
7217		
Brought Forward	$35,255	$570,840
One mercury column steam gauge	100	
One steam heater	25	
Connections to exhausters 1 and 2: Ninety-five feet of cast-iron 24-inch flange pipe, eleven 24-inch bends, 7 branches, 6 valves, 1 self-acting by-pass valve. Connections from condensers Nos. 1 and 2. Forty-eight feet of 20-inch flange pipe, one 20-inch bend, 1 branch, 1 24 x 20-inch reducer. Connections to naphtha gas exhauster: Fourteen feet of 12-inch socket pipe, five 12-inch elbows, 2 tees, 3 valves, 14 cast-iron columns for support of pipes, three drip pots	5,000	
		40,380

Storage house: Elevated between purifier and condenser house No. 2, iron frame covered with corrugated iron resting on iron columns and girders; it is used for the storage of naphtha and contains one tubular tank 4 feet 6 inches x 25 feet long, covered with felt and has a capacity of 3,000 gallons		2,000
Retort house No. 1: Two hundred and sixty feet long, 56 feet wide, 22 feet from main floor, to square of building with a paved cellar 11 feet deep, walls above main floor		
Carried Forward		$613,220

7218

Brought Forward		$613,220
16 inches wide with 20-inch piers, main floor composed of castiron beams and floor plates. Wrought-iron trussed roof covered with slates	$75,000	
Contains three sections of benches: East section, 20 benches of 6 retorts each, built back to back, 10 in a row; skeletons 6 feet 4 inches wide; retorts 14 inches x 24 inches by 9 feet 4 inches long; each bench fitted with a generator, which is fitted from main floor and slag drawn off in cellar; mouth-pieces fitted with self-sealing retort lids, stand bridge and dip pipes 6 inches diameter, of cast-iron; 1 hydraulic main for each side, made of 3/8-inch boiler iron, 24 inches wide x 30 inches deep	50,000	
Middle section, 20 benches of 6 retorts each built back to back, of same construction as east section	50,000	
West section: 20 benches of 6 retorts each built back to back same as East section, retorts are 14 inches x 24 inches by 10 feet 2 inches long	50,000	
Twenty-inch take-off main on south and east walls 28 feet of 20-inch wrought-iron pipe; 180 feet of cast-iron socket pipe; 4		
Carried Forward	$225,000	$613,220

7219 *Brought Forward*.................	$225,000	$613,220
20-inch branches, 1 bend, 1 valve; 2 24-inch branches; 1 24-inch bend; 16-inch take-off main on top of benches; 222 feet of 16-inch flange pipe; 120 inches x 16 inches reducer; 3 branches, 4 bends, 3 valves. Connections between hydraulic and take-off main; 92 feet of 12-inch socket pipe, 3 12-inch branches, 1 bend, 2 12 inches x 10 inches reducers, and 2 12-inch valves. Connections from retort house No. 4 to scrubber 1: 95 feet of 10-inch socket pipe, 2 10-inch branches, 3 10-inch bends. Take-off mains, 160 feet of 10-inch pipe, 8 branches, 8 bends, 8 valves, 50 feet of 6-inch pipe, 6 branches, 4 bends, 4 valves. Tar connections to hydraulic main; 157 feet of 4-inch socket pipe, 2 4-inch branches, 8 4-inch bends, 6 4-inch tar gates, and 6 4-inch seal pots.........	8,000	
		233,000
Scale-house, between retort-house 1 and coal sheds 1 and 2 frame 3 feet x 14 feet, with one Riehle's platform scale, 1 weigher's desk, chair, closet, gas fixtures and steam heater, 1 movable frame scale house 6 x 8 feet..		900
Retort house No. 2, 95 feet long x 56 feet wide, 22 feet 6 inches high from main		
Carried Forward...........................		$847,120
7220		
Brought Forward...........................		$847,120
floor to square of building; north and south walls 16 inches thick with 20-inch piers; east wall 16 inches thick, west end is formed by 9 piers 2 feet thick with roof frame of wrought iron, covered with connecting arches for support of roof; slates, main floor composed of cast-iron beams and plates; cellar is 11 feet deep and is paved; area on 41st street 4 feet wide covered with iron grating; vault under 41st street walk; full width of retort house, iron doors and windows......	$28,000	
Retort-house contains: One stack of 20 benches of 7 retorts each, built back to back, width of skeletons 7 feet 2 inches, size of retorts, 14 inches x 23 inches x 10 feet 3½ inches long; each bench provided with a generator furnace; the 12 northerly benches are used for coal gas		

purposes, and the 8 southerly ones for naphtha gas have through retorts; wrought-iron hydraulic mains 24 inches x 30 inches, 86 feet long each; stand, bridge and dip pipes 6 inches diameter, with 3-inch by-passes to seal; mouthpieces 13 inches by 21 inches, with self-sealing lids	54,000	
Carried Forward................	$82,000	$847,120

7221

Brought Forward................	$82,000	$847,120
Two movable platforms running on tracks for charging top retorts of coal gas benches	600	
One iron tar tank, on gable wall, half round, holding 200 gallons..................	100	
One iron naphtha tank, holding 945 gallons	350	
Two iron naphtha tanks, holding 452 gallons	450	
Two naphtha meters in retorthouse........	75	
Two sets of apparatus for distributing naphtha to retorts, complete............	950	
One naphtha still 3 feet diameter, 4 feet high with steam coil of ¾-inch pipe.....	100	
		84,625
Retort-house, No. 3, of same size and construction as retort-house No. 2, including vault on 41st street...................	$29,000	
Contains: one stack of 20 benches of 6 retorts each, built back to back; 6 benches have generators, 14 old-fashioned furnaces; width of skeletons, 7 feet 2 inches; size of retorts 13 inches x 24 inches x 9 feet 5 inches long; mouth pieces, 12 inches x 20 inches, fitted with self-sealing lids; bridge, stand and dip-pipes 7 inches diameter, cast-iron hydraulic; mains 20 inches wide, 24 inches deep, and 86 feet long each............	36,000	
Carried Forward................	$65,000	$931,745

7222

Brought Forward................	$65,000	$931,745
Take-off mains on walls in retort-houses No. 2 and 3 inclusive; connection to retort house No. 1, across yard; 228 feet of 20-inch flange and socket-pipe; 7 20-inch tees, 1 bend, 2 valves, 2 reducers, 20 inches x 16 inches; 132 feet of 16-inch socket-pipe, 7 16-inch branches, 1 bend, 1 valve; take-off main for naphtha gas, 68 feet of 12-inch socket-pipe, 7 12-inch		

branches, 4 bends, 4 valves. Connection from retort-house 4 to scrubber 1; 158 feet of 10-inch pipe (socket), 1 10-inch branch, 3 bends; connection between hydraulic and take-off main, 12 feet of 10-inch pipe, 4 10-inch bends and 6 10-inch valves. Connection to experimental bench in retort-house No. 4; 243 feet of 6-inch socket-pipe, 4 branches, 7 bends, 4 valves. Tar connection to tar main in 41st street; 375 feet of 6-inch socket-pipe, 4 6-inch branches, 9 6-inch bends, 144 feet of 4-inch socket-pipe, 4 4-inch bends, 8 tar-gates, 5 seal pots....................	8,000	
		$73,000
Retort-house No. 4 fronting on 41st street and adjoining retort-house 3 to the west; 33 feet wide, 34 feet long, 22 feet 6		
Carried Forward...........................		$1,004,745
7223		
Brought Forward...........................		$1,004,745
inches high with cellar 11 feet deep; walls 16 inches with 20-inch piers, iron roof covered with slate, iron main floor, cellar paved with brick....................	$8,000	
Containing 3 benches for experimental purposes, 2 with six and one with 7 retorts; retort 12 inches x 20 inches x 12 feet long, open on both ends, with mouth-pieces and self-sealing lids; one bench fitted with generator, the other with ordinary furnaces, naphtha distributing apparatus; 6-inch stand, bridge and dip-pipes; one bench with fanners, the other two with ordinary 3-inch by-pass valves; wrought-iron hydraulic main 2 feet square, 25 feet 7 inches long, made of 7/16-inch boiler iron	6,500	
One water gas bench with 12 upright retorts 22½ inches x 6 inches x 8 feet long, and one retort 16 inches x 10 inches x 8 feet long, clay super-heaters, 3-inch take-off pipes for every retort; steam pipes, complete with all valves; 6-inch pipes leading to a small cast-iron hydraulic main, 36 inches x 20 inches x 23 inches; ordinary furnace in cellar, two 10-inch jet exhausters, four 10-inch bends, 3 branches, 2 valves; one 8-inch valve, 1 10-inch x		
Carried Forward.................	$14,500	$1,004,745

7224	*Brought Forward*	$14,500	$1,004,745
	8-inch reducer, 154 feet of 6-inch cast-iron pipe, 18 6-inch bends, 12 6-inch branches 11 6-inch valves, 85 feet of 4-inch cast-iron pipes, 4 4-inch bends, 2 2-inch branches, 1 drip-pot, 2 4-inch tar valves	4,000	
			$18,500
	Retort-house tools: Full set of retort-house tools for working all the benches in retort-houses 1, 2, 3, 4, as shovels, rakes, scoops, lid-openers, augers, 18 iron wheel-barrows, coal wheelers' shovels and 24 tin lanterns		2,500
	Coal yard: west of retort-houses 3 and 4 with 300 feet of elevated track for dumping coal	1,500	
	One hundred and ten feet of run for wheeling coke from cellar	300	
	And 80 feet of run for wheeling coal from coal-shed 3	150	
	Scale-house in coal yard, frame, 1 story, 16 feet x 16 feet, with platform scale; size of platform, 8 x 16	1,000	
	One hundred and two feet of fence wall along 41st street, wall 24 inches thick, with 20-inch panels above water table, wooden lining	3,500	
	Inside of wall to keep weight of coal from wall	250	
	Carried Forward	$6,700	$1,025,745
7225	*Brought Forward*	$6,700	$1,025,745
	Vault under 41st street, sidewalk, 27 feet long x 13 feet wide, 8 feet high, with walls 2 feet thick, covered with brick arches resting on iron beams	1,500	
	Containing 3 boiler iron tanks of together 8445 gallons capacity (formerly used for storage of naphtha), with connections and valves complete, also one boiler iron tank, with drip-pan resting on top of fence wall of 1620 gallons capacity	1,200	
	Frame house, one story, 14 feet x 28 feet, on level of flags in yard, with lockers for retort-house firemen and closets for tools	1,000	
	One boiler iron tank, round 4 feet 6 inches diameter, and 25 feet long, 3,000 gallons capacity (lying in 41st street, and not in use)	500	
			$10,900

Coal sheds Nos. 1 and 2, on 42nd street, each 168 feet long, and 42 feet wide, one story high, each holding 3,000 tons of coal when trimmed, brick gables and side walls, 24 inches, two division walls, 16 inches thick, west gable of framing, wooden retaining walls inside of brick ones, wooden roof over each shed covered with tar felt and pebbles, single track railroad running over peak of each roof........................	30,000
Carried Forward........................	$1,066,645

7226

Brought Forward........................	$1,066,645
Coal shed No. 3, on 41st street, 168 feet long, 86 feet wide, divided by 1 2-foot brick wall (in center), and by wooden partitions into 6 bins; each bin holding about 1,000 tons of coal when trimmed; second story is traversed by railroad tracks, provided with the necessary switches and turning tables for distribution of coal into bins	40,000
Carpenter shop, 15 feet x 75 feet on easterly end of second story of coal shed 3, containing work benches for 3 carpenters, grindstone, drilling machine, with full set of augers, 1 3-inch auger, 1 cross-cut saw, gas fixtures, 1 hand cart, 1 car to run on tracks for moving lumber	800
Store room, 20 feet x 75 feet on west end of second story of coal shed 3, used for storage of lumber, scaffolding, wheel-barrows, ladders, one coke wagon............	500
Dock, trestle work extending from west of coal sheds to head of pier, with 3 floors.......................	
First floor for wheeling and carting on level of cellars of works (about 4 feet above high-tide)..............	
Second floor, with 3 railroad tracks, for conveying coal	
Carried Forward........................	$1,107,945

7227

Carried Forward........................	$1,107,945
from pier head to bins in coal shed 3, and to coal yard west of retort-house- 3 and 4......................	
Third floor, with two tracks for bringing coal into sheds 1 and 2, and into lots west of coal sheds, trestle work is composed of 41 trestles, built of 10-inch x 10-inch timber as uprights, with the necessary cross braces and ties, each trestle resting on cap timbers laid on top of a row of piles................................	
Length of trestle work from coal shed to platform at pier head 417 feet................................	
Width of trestle work on first floor, 28 feet 6 inches, width of trestle work on second floor, 26 feet 4 inches, width of trestle work on third floor, 12 feet 10 inches.	

From main trestle work there are branching off, 4 side trestles, each 90 feet long, with single track in connection with tracks on third floor of main trestle.......

These trestles are for the purpose of dumping coal in lots between main trestle and 42nd street...........

Two side trestles, each 78 feet long, with cross-trestle 75 feet long, same as above, for dumping coal into lots between main trestle and 41st street................

Carried Forward......................... $1,107,945

7228

Brought Forward......................... $1,107,945

On main floor of main trestle there is a frame scale house, 13 feet x 11 feet, with two Fairbanks track scales, one on upper and one on lower track; scale house further contains 1 desk, 2 chairs, 1 washstand, gas fixtures and steam heater.....................

Frame hoisting platform, 85 feet x 85 feet, at end of pier, built of 10-inch x 8-inch uprights, strongly braced piling, crib work and filling, with two floors above ground floor, corresponding with upper and lower runs of trestle work; platform provided with 6 wooden derricks, complete with blocks, falls, brake lines, guy ropes and iron stays, 5 booths or stands for brakemen, turntable, track, switches for shifting coal cars when being loaded.........................

Frame engine-house, 37 feet x 60 feet, built under platform; has two floors and wooden roof covered with tar paper; contains, on first floor: Engine room, 37 feet x 48 feet, containing one 60 horse power locomotive boiler, fire box 60 inches x 60 inches, 84 tubes 3-inch diameter, 10 feet long, with sheet iron smoke stack, 24-

Carried Forward......................... $1,107,945

7229

Brought Forward......................... $1,107,945

inch diameter extending 24 feet above top of platform, 3-inch exhaust steam pipe rising to same height, boiler fitted with draught regulator.....................

One 50 horse power hoisting steam engine, 14 inches diameter of cylinder by 24-inch stroke, with plain side valve, governor, pulley 60 inches in diameter, and flywheel resting on timber foundation, 87 feet of 3-inch shafting resting on 15 pillow blocks along 3 sides of room with gearing acting upon 8 hoisting drums, drums are fitted with friction clutches and brakes and connected one to each of the derricks, with 2 to spare, one 36-inch pulley on shafting, 45 feet of 10-inch double belt.................................

One salt water pump, Guilds and Garrison, steam cylinder 10-inch diameter, water cylinder 6-inch diameter, length of stroke 6 inches, one No. 2 "Niagara" boiler feed pump, steam heater, gas fixtures, one bench with parallel vise, set of tools and oil cans for use of engine driver, 1 bench with 6 oaken water pails for fire purposes, vestibules in front of engine room contain stairway to upper story, closet for tools................

Carried Forward........................... $1,107,945

7230

Brought Forward........................... $1,107,945

One movable hoisting engine of 8 horse power, with boiler on iron movable platform..................

Second story comprises rigging loft with rigging tools and supplies as follows: Holder, hoisting rigging, 8 15-inch blocks, 3 sheaves; 8 15-inch blocks, 2 sheaves; 8 15-inch blocks, 1 sheave, 8 falls of 3¾-inch manilla rope, 279 feet long each, 8 shackles, 8 cup hooks.....

Coal hoisting rigging: 4 12-inch tackle blocks with 3 sheaves, 2 10-inch tackle blocks with 3 sheaves, patent, 2 10-inch tackle blocks with 2 sheaves, 1 10-inch tackle block with 3 sheaves, 3 14-inch blocks with 1 sheave, 1 8-inch block with 1 sheave, 1 14-inch snatch block, 2 10-inch snatch blocks, 24 patent sheaves 11-inch diameter by 2-inch face, 13 patent sheaves 10-inch diameter by 2-inch face, 4 patent sheaves, 4-inch diameter x 1-inch face, 4 sheaves, 3½ x ⅞ inches face, 5 sheaves, 7½ x 1½ inches face, 1 tackle, 30 feet hoist with 7-inch blocks, rope 2½ inches, 2 tackles, 40 feet hoist with 7-inch patent blocks, rope 2½ inches, 5

Carried Forward........................... $1,107,945

7231

Brought Forward........................... $1,107,945

tackles, 30 feet hoist with 6-inch blocks, rope 2 inches, 1 4-inch sheave, 12-inch rope, strap tackle, 84 feet hoist 3-inch rope, 2 tackle falls, 3½ inches, 3-strand rope, 420 feet long each, 2 tackle falls, 3¾ inches, 3-strand rope, 250 feet long each, 1 tackle fall, 3¾ inches, 3-strand rope, 420 feet long, 1 tackle fall, 3 inch, 3-strand rope, 200 feet long.......................

Rigger tools, as sailor's needles, palms, marlin spikes, one winch or windlass, one bench with 6 oaken water pails for fire purposes, 18 coal cars, iron throughout, weighing about 1,100 pounds each, and holding 2,400 pounds coal each, 1 side dumping car, 12 tubs for hoisting coal, holding from 400 to 600 pounds of coal, 35 shovels, 12 kerosene lamps, 1 kerosene can, 6 water pails, 1 flat-bottomed boat with blocks and falls for lowering, 1 large float and 1 small float.......... 100,000

Tar dock, south of main pier, 82 feet long and 36 feet wide	$2,500	
Tar tank set on piles underneath tar dock, constructed of 3-inch planks and lined with sheet lead 24 x 20 feet x 8 feet deep.	2,800	
Carried Forward	$5,300	$1,207,945
7232 *Brought Forward*	$5,300	$1,207,945
Separator 4 inches x 4 feet 6 inches x 8 feet deep constructed also of 3-inch planks and lead lined	150	
Small frame house 6 x 7 feet	150	
Containing one "Niagara" steam pump No. 2½, used for pumping tar and ammoniacal liquor, with all connections and valves	300	
Ammonia tank alongside of tar dock, built on piles in river and constructed of 3-inch planks with wooden roof, size of tank 16 feet 6 inches x 19 feet 6 inches x 8 feet deep	1,050	
		$6,950
Tank yard, 80 x 38 feet along bulkhead north of main pier, enclosed by iron fence on river side and brick wall and iron fence on land side, with two gates	1,150	
Containing one iron round tank for ammoniacal liquor 30 feet diameter and 15 feet high, contents 79,200 gallons	1,600	
One iron round tank for naphtha 30 feet diameter and 21 feet high, contents 12,000 gallons	3,000	
Six tubular iron tanks for naphtha, 4 feet 6 inches diameter 25 feet long, contents, 3,000 gallons each, arranged in pairs on top of each other with connections to large round tank	3,600	
Carried Forward	$9,350	$1,214,895
7233 *Brought Forward*	$9,350	$1,214,895
One frame pump-house, 9 x 10 feet, irregular, one story, gravel roof, containing	400	
Containing one large Woodward special duplex, double-acting steam pump, with 6-inch connections, capacity 20,000 to 25,000 gallons per hour, used for pumping naphtha from boat into tank	1,000	
One No. 3 Woodward steam pump, for pumping naphtha from tanks on dock to tanks at works	275	
		11,025

Bulkhead, 275 feet of bulkhead along river front	$4,200	
Four hundred and sixty feet of fencing made of 2-inch planks, strongly braced, inclosing coal yards west of coal sheds along 42d and 41st streets	1,150	
		5,350
Sewers, 1,400 feet of sewers built of brick and cement from 8 to 24 inches wide extending through cellars, 340 feet of box sewer under gangway between coal sheds and under pier, 225 feet of 6-inch pipe sewer between governor-house and purifier-house cellars, 40 feet of 8-inch overflow pipe from gas-holder tanks 184 feet of box sewer in coal shed No. 1, 80 feet of 6-inch pipe sewer in retort-house No. 1		9,100
Carried Forward		$1,240,370

7234

Brought Forward		$1,240,370
Water gas, steam pipes, etc.: Eighteen feet of 4-inch castiron, 1,375 feet of 3-inch water pipe, wrought and cast-iron, 276 feet of 3-inch water pipe, overflows of condensers, 1,160 feet of 3-inch water pipe, wrought iron for salt water supply, 1,260 feet of 2-inch water pipe, 740 feet of 1½-inch water pipe, 510 feet of 1¼-inch water pipe, 2,000 feet of 1-inch and ¾-inch water pipe	5,000	
Six hundred and thirty feet of 2-inch gas pipe, 1,115 feet of 1½-inch gas pipe, 1,240 feet of 1¼-inch gas pipe, 2,100 feet of 1-inch gas pipe, 3,000 feet of ¾-inch gas pipe, 47 gas lanterns in yards on dock, 222 outlets for burners with stop-cocks	3,000	
Eighteen feet of 6-inch steam pipe, 69 feet of 3½-inch steam pipe, 51 feet of 3-inch steam pipe, 153 feet of 2½-inch steam pipe, 1,639 feet of 2-inch steam pipe, 1,460 feet of 1-inch and ¼-inch steam pipe, 2,000 feet of 1-inch and ¾-inch steam pipe	2,000	
Five hundred feet of 2-inch pressure pipe for gas governors, 450 feet of 1¼-inch pressure pipe for gauges, 2,500 feet of ¾-inch pressure pipe for gauges	1,000	
Carried Forward	$11,000	$1,240,370

7235 *Brought Forward*	$11,000	$1,240,370
Nine hundred and eighty feet of 3-inch cast-iron ammoniacal liquor pipe, 250 feet of 2-inch wrought-iron ammoniacal liquor pipe, 350 feet of 1½-inch wrought-iron ammoniacal liquor pipe	1,500	
T*ow* hundred and ninety-two feet of 8-inch earthen ware tar pipes, 1,292 feet of 8-inch cast-iron tar pipes, 12 8-inch branches, 6 bends, 1 valve, 480 feet of 3-inch cast-iron tar pipes for oil tar, 250 feet of 1¼-inch wrought-iron tar pipe for oil tar, 150 feet of 1-inch wrought-iron tar pipes for oil tar	6,000	
Seven hundred and forty-five feet of 20-inch cast-iron deodorizing pipe, 6 cast-iron elbows, 1 wrought-iron chimney on dock, 50 feet high, 20 inches in diameter	7,125	
Fifty feet of fire hydrant hose with play-pipe and coupling, 600 feet of ¾-inch hydrant hose	125	
Eighty feet of 6-inch wrought and cast-iron naphtha pipe, 1,900 feet of 3-inch wrought-iron naphtha pipe, 550 feet of 2-inch wrought-iron naphtha pipe, 350 feet of 1½ wrought-iron naphtha pipe, 50 feet		
Carried Forward	$25,750	$1,240,370

7236

Brought Forward	$25,750	$1,240,370
of 6-inch and 4-inch suction hose for naphtha pump, with 5 6-inch, one sheave blocks and tackle for raising and lowering	2,500	
		28,250
Mason tools: One tool box, containing 6 shovels, 6 picks, 6 steel drills, 2 striking hammers, 2 sledges, 1 derrick for setting retorts, 1 truck for hauling retorts		200
Driveway, leading from 41st street to 42ld street between coal sheds and between coal shed 1, and retort house with wooden gates at each street; 390 square yards pavement, 170 feet of wooden and iron run, 2 wooden gates		1,100
		$1,269,920

10th and 11th Avenues, 65th and 66th Streets.

Six gas-holder tanks, each 94 feet diameter and 26 feet depth, to footing of stones, built of brick with concrete bottoms.....	228,000	
Four telescopic gas-holders, 92 feet and 6 inches diameter of lower lift, 91 feet diameter of upper lift, 26 feet height of each lift, two holders with cast-iron, and two with wrought-iron columns, all with 20-inch inlet pipe, each holder having a capacity of 325,000 feet, at $26,000.........	104,000	
Carried Forward		$332,000

7237

Brought Forward		$332,000
Engine house, west to 10th avenue, 37 x 18 feet of frame, brick basement with concrete floor, slate roof	2,800	
Boiler vault under 10th avenue sidewalk 46 feet long and 18 feet wide by 11 feet high, roofed with brick arches turned between iron beams, arches are covered with concrete, tar paper and heavy flags. Railing on 10th avenue, enclosing area with vault lights and drop doors. Area on inner side of fence wall with iron steps leading from holder yard into vault.................	4,500	
Sewer connection from vault to 10th avenue sewer, 6-inch pipe....................	150	
Chimney wrought iron for boilers 2 feet diameter, 50 feet high, with base plate and stays	350	
Water meter and connections.............	140	
Boilers in vault, two cylindrical tubular boilers, each boiler has 4-feet diameter x 10 feet length and 50 3-inch tubes, boilers are built in brick work with cast-iron ornamental fronts	3,500	
One inspirator for feeding boilers with 1½-inch connections	75	
In engine room, one 12 horse power vertical beam engine, cylinder 6½-inch diameter x 18-inch stroke with flywheel and pulley.	900	
Carried Forward		$344,415

7238 *Brought Forward*		$344,415
On a foundation built of stone............	200	
One Mackenzie patent exhauster of 100,000 feet capacity per hour for 16-inch connections	2,000	
On a foundation of masonry............	175	
Forty feet of 10-inch belting and 1 friction pulley	200	
One 16-inch compensator................	600	
One 16-inch self acting bypass valve.......	250	
Connections to exhauster, 34 feet of 16-inch pipe, 4 16-inch bends, 2 branches, 4 valves	750	
Connections to pumping main, 48 feet of 20-inch pipe, 2 20-inch branches, 1 20-inch valve	500	
Connections to holders, 2 30-inch bends, 3 benches, 2 valves, 312 feet of 30-inch pipe, 36 feet of 20-inch pipe and 6 20-inch valves	6,000	
One iron circular stair leading from engine room to boiler room..................	150	
Furniture of engine room, as desk, table, chairs, closet, etc., steam heater, gas fixtures and connections................	125	
Tools, as hammer, chisels, caulking tools, set of pipe tongs, vise, stock and dies, stoking tools, iron and wooden shovels, ladders, wheel-barrow, chain block, ash tub, saws, block and fall, drip pump and set of oil cans	125	
Carried Forward		$355,490
7239		
Brought Forward		$355,490
One King's pressure gauge and 1 King's vacuum gauge and connections for both..	125	
1 arch pressure gauge and connections.....	25	
One self-registering gauge and connections..	200	
Three hundred and fifty feet of 2-inch water pipe, 100 feet ¾-inch hydrant hose......	150	
Two hundred and fifty-eight feet of 1½-inch steam pipe, and 80 feet of ¾-inch steam hose	100	
Three lamp posts and lanterns in yard with connections	150	
Seven wooden huts or boxes over valves in yard	50	
Eight hundred and twenty-four feet of brick fence wall; base 20 inches, upper part 16 inches with 12-inch panels and blue stone water table and coping................	12,000	

Two hundred feet of brick parapet wall at westerly end of tanks	1,200	
One thousand one hundred and seventy-six feet of wooden fence around westerly part of block	1,800	
Wooden bridge between westerly tanks	150	
Frame building in yard, 50 feet x 25 feet, with wooden roof	1,800	
Carried Forward		$373,240

7240

Brought Forward		$373,240
Containing parts of apparatus used for testing Gale & Rand's process for making naphtha gas	1,500	
Frame photometer room, 12 x 25, one story, wooden roof, on 66th street	300	
Office building, frame, one story, 12 x 25 feet	100	
Containing furniture as desk, chairs, stove, gas fixtures and piping	50	
Brick foundations of purifying house (up to level of main floor); size of building 200 x 68 feet, with foundation for 8 purifiers 27 feet x 25 feet	12,000	
Scales (14,000 pounds)	133	
Railroad car for hauling pipe	125	
		$387,448
Office proper: Lease to May 1, 1901, at 4,000 per annum, 6 1/3 years	25,333	
Two seaman's lanterns and burners	500	
Stock of glasses for same	45	
Desks for 19 men	950	
Two seaman's chandeliers	210	
Gas stoves	500	
One pressure register	175

7245

Brought Forward	$14,344
feet 8 inches to plate, 36 feet to peak, 16-inch walls, 4-iron pilasters	20,500
Foundations for	5,000
Six Gasogenes with air, steam and gas pipes complete, seal boxes, valves and take-off pipes, capacity, 3,000,000 cubic feet, 6 coal buckets for hoisting coal, 4 iron swinging cranes with windlass and chain for hoisting coal for gasogenes	41,525
Two iron coal wagons	300
One iron farmer's dumping barrow	125
Seven spare iron wagon wheels	50
Two Mackenzie's steam jet exhausters	100
Tools and implements	250
Retort house, brick building, 210 feet by 60 feet 8 inches, 1 story, iron roof slated, 23 feet to plate, 41 feet to peak in height, 16-inch walls, 4-inch pilasters	51,000
Containing foundations for plant	14,650
Eleven double benches of sixes, 12 inches x 20 inches x 18 feet fitted with mouth pieces, stand bridge and dip pipes, hydraulic main (wrought-iron) inlet main and inlet pipes with all valves and connections, complete, capacity 3,000,000 cubic feet	44,000
Naphtha main and connections	6,400
Five horizontal tubular boilers, set in brick work, 65-inch diameter, 16 feet long, 43 tubes 4-inch diameter, about 300 horse power	19,100
Five Hancock inspirators	350
One Guild & Harrison, No. 4 steam pump	375
Five steam gauges	175
Two coke wagons	450
Carried Forward	$218,694

7246 *Brought Forward*	$218,694
One platform scale (dock scales)	150
Tools and implements	250
Purifying-house, brick building 124 feet x 60 feet, 1 story and cellar, iron roof, slated, 22 feet 5 inches high to plate, 39 feet to peak, 16-inch walls, 4-inch pilasters.	28,600
Containing 8 purifiers, 20 feet x 21 feet x 3 feet (with foundations), arranged for 6 layers of lime in 2 sets of 4 each, inlet, and outlet connections 16 inches, boxes supported on masonry piers and arches, capacity 3,000,000 cubic feet 2 traveling carriages (iron) running on floor tracks, for lifting and transporting covers, 2 dry center seals, 16 inches	47,800
Two by-pass valves 16 inches, revolving top	2,000
Four farmer's iron dumping barrows	500
One turn-table for lime truck	100
Tools and implements	200
Lime-house adjoining purifying-house is 16 feet 8 inches x 74 feet 10 inches, 3 sides brick, 1 story, wooden roof, covered with slate, with cellar	5,300
Condenser and scrubber-house adjoining purifying-house, brick building 52 feet x 39 feet, 1 story, iron roof, slated, 20 feet high to plate, 32 feet 6 inches to peak, 16 inch wall, pilasters 4 inches	8,000
Containing 2 multitubular condensers 23 feet long, 4 feet wide, 15 feet high, each containing 250 tubes (with foundations), capacity 3,000,000 cubic feet...	20,800
Two wrought iron cylindrical scrubbers and foundations to same, 10 feet diameter, 24 feet high, capacity 3,000,000 cubic feet	9,800
Carried Forward	$342,194
7247 *Brought Forward*	$342,194
Connections to scrubbers, and condensers' inlet and outlet 16 inches, mains 24 inches, all valves and connections with drips complete	5,300
Engine house (adjoining retort house).	
Brick building, 4.4 feet 8 inches x 60 feet 8 inches, 23 feet high to plate, 41 feet to peak, 1 story and cellar, yellow pine ceiling and wainscot, iron roof, slated, 16-inch walls, 4 inch pilasters	14,600
Containing foundations for machinery	2,000
Four beam engines 12 inches x 20 inches	10,000
Four Mackenzie pressure blowers 4 x 4	3,200
Two Mackenzie gas exhausters with compensators, engine governors complete, capacity 3,000,000 cubic feet	7,600
Connections to engines, exhausters and blowers	5,000
Four lines counter-shafts and pulleys	3,250
Tow King vacuum and pressure gauges	150

Four glass syphon gauges 8 inches	50
One steam gauge	50
Tools and implements, cups, etc.	500
Meter-house adjoining purifying-house, building 52 feet x 39 feet, 3 sides brick, 20 feet high to plate, 32 feet 6 inches to peak, 1 story and cellar, iron roof, slated, 16-inch walls, 4-inch pilasters	9,200
Containing 1 station meter and foundation therefor (American Meter Co.) in wro't iron case 13 feet x 13 feet, 24-inch connections and valves, 1 station meter and foundation therefor (American Meter Co.), in cast-iron cases 10 feet x 10 feet, 16-inch connections and valves, capacity of meters 3,000,000 cubic feet	16,200
Carried Forward	$419,294

7248

Brought Forward	$419,294
One Isbell's patent street main governor, 30 inches, with by-pass and valves complete with foundation	2,500
Two arch pressure gauges, 6 inches	50
One Mackenzie rotary gas exhauster, 12 inches with compensator and engine governor and foundation therefor, capacity 1,000,000 cubic feet	1,800
One Copeland and Bacon trunk engine, 6 inches x 8 inches complete, and foundation for same	550
One line countershaft hangers, pulleys and belting complete	200
Two Jet photometers (Goodwin's)	200
Two Babcock fire extinguishers	75
Tank, 1 wrought iron over-flow tank, 8 feet diameter 24 feet long, capacity 9,000 gallons	1,200
Naphtha storage tanks, 7 tanks wrought iron, 8 feet diameter 30 feet long, 2 tanks wrought iron 8 feet diameter, 60 feet long, including valves and connections to naphtha pumps, capacity 30,000 gallons	27,600
Naphtha pump and tank house adjoining retort house, building 18 feet 4 inches x 15 feet 8 inches, three sides brick, two stories 22 feet 8 inches high, 12-inches walls, 4-inch pilasters, roof wood covered with slate, ($2,000) containing 1 Worthington duplex steam pump, 10 inches x 10 inches, with foundation thereunder, ($1,150)—$3,150. Two Guild and Garrison steam pumps No. 1½, and foundations therefor, one naphtha supply tank, 10 feet diameter, 7 feet high with floats, valves, pipes and measuring scale, capacity 4,000 gallons	3,150
Carried Forward	$459,769

7249 *Brought Forward*	$459,769
Seven hundred and fifty feet wrought iron, suction pipe, 10 inches with valves and specials	4,000
Twenty feet rubber suction hose, 10-inch	325
Twenty feet rubber suction hose, 6-inch	120
Thirty-four feet rubber suction hose, 4-inch	153
Hydraulic accumulator house water tank, adjoining retort house, building 18 feet 4 inches x 15 feet 8 inches, 3 sides brick, three stories, 35 feet 5 inches high, 16-inch walls, 4-inch pilasters, wooden roof covered with slate	3,000
One Davidson steam pump for accumulator No. 8, 1 accumulator, 1 water tank 5 feet long, 4 feet 2 inches wide, 3 feet deep—450 gallons, 1 water tank for works supply, 9 feet 8 inches diameter, 10 feet deep, capacity, 5,400 gallons	4,300
Office and meter shop, building 30 feet x 42 feet, 2 stories and cellar, brick wooden truss roof hip covered with tin, 30 feet high two plate, 16-inch walls, 4-inch pilasters	11,000
One Bunsen photometer (Am. Meter Co.), 100 in bar	1,000
One electric watch clock with battery, 6 watchman's station boxes and connecting wires to all parts of works	500
Office furniture, consisting of desks and table in engineer's office, desks, letter-press, chairs, floor coverings, maps and drawings, etc.	1,700
Tools, implements, machines, machinery, forges, etc., etc. (Complete outfit), for meter, proving and repairing and jobbing shop	3,500
Carried Forward	$489,367
7250 *Brought Forward*	$489,367
Carburetter house inside of retort house, brick 29 feet 8 inches x 38 feet, 3 sides, average height of walls 30 feet, 16-inch walls, 4-inch pilasters	5,700
Three carburetters and foundations to same, cast-iron trays, wrought iron jacket, 16-inch inlet and outlet pipes and valves, inlet and outlet steam, water and naphtha pipes and valves, capacity 3,000,000 cubic feet	13,500
Coal shed, brick, 124 feet x 44 feet, wooden roof, tinned, 17 feet high complete, 20-inch walls, 18-inch piers, capacity 1,500 tons	18,500
One hydraulic lift in process of completion	4,500
One Richle Bros. platform scales, cart scales	250
One platform scales, 600 pounds	75
Dwelling house, brick building, 20 feet x 30 feet 2 stories and cellar walls 22 feet 6 inches high, wooden roof, flat, covered with gravel, walls 12 inches thick, included in real estate valuation	

Stable, frame building, peak roof, shingle, 40 feet x 20 feet, containing 4 stalls	1,000
Three horses, 2 buggies, 1 wagon, 1 cart, harness and stable furniture and equipments	2,075
Gas holders, 1 water gas holder, 67 feet in diameter, 29 feet 3 inches deep, 6 wrought iron columns and girders, 20-inch inlet and outlet pipes, valves, drips, etc., capacity 108,000 cubic feet	51,500
One telescopic gas holder, 88 feet, 86 feet 6 inches in diameter, 23 feet deep, 8 wrought iron columns and	
Carried Forward	$586,467

7251

Brought Forward	$586,467
girders, 20-inch inlet and outlet pipes, valves and drips, capacity 300,000 cubic feet	70,000
Two "three lift" telescopic gas holders, in process of completion, 100 feet, 98 feet 6 inches, 97 feet in diameter, 28 feet deep; 16 wrought-iron columns and girders, 20-inch inlet and outlet pipes, valves, drips, etc., capacity 1,200,000 cubic feet	232,000
Total holder capacity 1,625,000 cubic feet, steam water and gas pipes, valves and connections throughout plant	9,000
Main connections about works	28,000
Water meters, 24-inch	800
Upright tubular boiler, 4 feet in diameter, 9 feet high, 121 tubes, 1¾-inch in diameter, cast iron base and ash-pit, 3 gauge cocks, 1 water gauge, 1 steam gauge and all steam and water valves complete, 4 Douglas pumps, No. 1, 8 Douglas pumps No. 2, 1 Douglas pump, No. 6, 1 brass pump, ¾-inch, Seneca Falls, grading and filling	2,662
When I contracted to build the two tanks and holders for the Union Gas-Light Company, the tide ebbed and flowed on the ground now occupied by them. All the property now known as the Knickerbocker Gas Works has been subsequently graded from about one foot below high-water mark to about five feet above, the cost thereof being, say $30,000	30,000

THOS. F. ROWLAND.

Carried Forward	$958,929

Brought Forward	$958,929
Driven well system, pump valves and connections	3,500
Sewers throughout entire plant	5,760
Flagging inside of works (included in valuation of buildings)	
Telephone lines, hose jumper, with 500 feet fire hose	500
Pipe in yard 60 tons on hand (for use in works)	2,400

Specials in yard, 65 tons on hand (for use in works)....	3,900
Sidewalks, curbing, iron gutter bridges, outside of works on all blocks..................................	3,119
	$978,108

I hereby certify that I constructed the establishment formerly known as the "Union Gas Works," located at 98th and 99th streets, and the East River, which was subsequently purchased, and is now known as the Knickerbocker Gas Works. I also designed and constructed the improvements and betterments necessary to transform it from a "coal" to a water gas process. I am thoroughly acquainted with all the details in connection therewith; and have this day carefully revised and corrected the foregoing estimate of its value, deducting the value of bulkhead, a certain dwelling house and pavement erroneously inserted, and adding the value of the grading and such items as properly belong therein. I therefore hereby declare that the total sum of nine hundred and seventy-eight thousand one hundred and eight dollars ($978,108) is the just and true present value thereof to the best of my knowledge and belief.

THOS. F. ROWLAND.

MUNICIPAL GAS LIGHT COMPANY.

VALUATION.

The diagram or plan of the Lots designated in this Schedule is appended to the original of which this is a copy.

September 8, 1884.

Real Estate. The following described property, located in the 22d Ward, on blocks bounded by West 44th and West 46th Streets, Eleventh Avenue and Hudson River, New York City, as follows, viz:

7256

On block 225 Nos. 1 to 28 inclusive, 39 and 41 to 64 inclusive, 52 lots each 25 feet by 100 feet 5 inches, 1 lot 16 feet 8 inches by 100 feet 5 inches		
On block 225*a,* 54¾ lots each 25 feet by 100 feet (8 lots above water, 32 lots under water, together with bulkhead water rights and full water grant to exterior city line.		
On block 226, Nos. 1 to 20 inclusive, and 45 to 64 inclusive, 54¾ lots each 25 by 100 feet		
On block 226*a,* 40 lots each 25 feet by 100 feet, 8 lots above water, 32 lots under water, together with bulkhead, water rights and full water grant to exterior city line.	$1,083,000	
Bulkhead, 517 feet long with two returns, dumping board, including rock filling...	52,500	
On lot No. 29, block 225, there is a two story and basement frame dwelling house (on rear of the lot)	2,500	
On lot 39, Block 225, there is a three story brick dwelling-house (situate on the front of the lot.)	3,500	
		$1,141,500

7257

On block 22[illegible]: The 44th and 45th streets property is surrounded in part by 861½ feet of 8-inch brick wall 8 feet high, 2 inches blue stone coping 12 inches wide 4-inch outside pilasters on 818 feet of rough-faced jointed stone wall 4 feet high, 3 feet 8 inches thick, coped with blue stone 2½ inches by 2 feet 4 inches wide; 7 double gates each 12 feet wide; 1 single gate, 2½ feet wide; 16 gate piers, brick, 20 inches x 28 inches in addition to 8-inch wall; 12 inside piers, brick, 8 inches x 16 inches in addition to 8-inch wall....	$10,075	
Five hundred and twenty-six feet of board fence and 2 double gates..............	1,052	
On block 226: The 45th and 46th streets property is partly enclosed by 603½ feet of 8-inch brick wall 10 feet high, 2-inch blue stone coping 12 inches wide; foundation of a portion of said wall is 245 feet of rough-faced jointed stone wall 5 feet high, 2 feet thick; 2 double gates, each 12 feet wide; 1 single gate 2½ feet wide; 6 gate piers 20 inches x 28 inches in addition to 8-inch wall; 4 inside piers 8 inches x 16 inches in addition to 8 inch wall	6,530	
Six hundred and forty-five feet of board fence and 2 double gates..............	1,290	
Dry stone retaining wall and filling around tanks	3,159	
Bulkhead: 517 feet long with two returns, dumping board; earth and rock filling. (Included in real estate valuation.).....		
Belgian pavement in yard...............	6,650	
Plant on Blocks 225 and 225*a*, as follows, viz:		
Gasogene house, brick building, 140 feet x 66 feet, one story, 49½ feet high with iron roof slated.....................	38,451	
Containing 12 gasogenes with air, steam and gas pipes, superheaters, seal boxes, "take-off" valves, pipes and mains, complete, in working order, capacity 6,500,000 cubic feet	78,973	
Carried Forward............................		$146,180

7258 *Brought Forward*		$146,180
Twelve iron railroad cars for carrying coal to gasogenes, carrying capacity 2,000 pounds each	2,400	
Twelve iron buckets for hoisting coal for gasogenes	240	
Two Guild & Garrison's No. 4 steam pumps.	750	
Six iron cranes, with windlass and chains for hoisting coal for gasogenes, 6 horizontal tubular boilers, 68 inches in diameter, 16 feet long, 63 tubes, 4 inches set in brick work, about 360 horse power, all steam and water pipes and valves complete	22,300	
Six steam gauges	195	
Six Hancock inspirators	420	
Two Guild & Garrison's No. 4 steam pumps.	750	
Two hydraulic lifts for elevating coal to gasogenes, pipes and working valves and connections complete, elevated railroad surrounding gasogenes, with two turntables, track 2 inches x 1 inch, weight 20 27-100 pounds per yard, all supported by 10½-inch I beams, 16 cast-iron columns and 4 wrought iron columns	18,400	
Two farmers dumping barrows for ashes	250	
Two coal wagons (iron) for conveying boiler fuel	300	
Two coke wagons (iron) for conveying boiler fuel	250	
Twelve glass syphon gauges, 30-inch	255	
One iron wheelbarrow	25	
One platform cart scales	450	
Complete outfit of tools and implements	500	
Carried Forward		$192,915
7259		
Brought Forward		$192,915
Retort house, brick building 207 feet x 66 feet one story 49 2-12 feet high, with iron roof slated	52,221	
Containing eighteen double benches of 6's (36 furnaces) "through retorts" 12 x 20 x 18 inches, all complete in working order, with mouth-pieces, stand, bridge and dip pipes, 6-inch hydraulic and inlet main, with main and retort valves, capacity 5,000,000 cubic feet	79,200	
Connections, valves and fittings, etc	7,600	

Four carburetters (foundations included) and connections, inlet and outlet main, valves, steam and naphtha pipes, and valves and water jacket, complete, capacity 5,000,000 cubic feet	17,855	
Two glass syphon gauges, 10 inch	10	
Four glass syphon gauges, 8-inch	18	
Two upright tubular boilers, 6 feet in diameter, 12 feet high, 195 tubes, 2 inches, about 40 horse power	3,500	
Two Hancock inspirators	125	
One Worthington duplex feed pump 4 inches x 4 inches	150	
Three iron wheelbarrows	75	
Two farmer's dumping barrows	250	
One jet photometer (Goodwin's)	100	
One water meter, 4-inch	400	
Four hose reels and rubber hose	110	
Necessary tools and implements	500	
Carried Forward		$355,029

7260

Brought Forward		$355,029
Purifying house, brick building 156 x 66 feet, one story (12-6/12 feet high), with lime room and cellar, roof wooden framing and iron truss slated, containing	33,400	
Eight purifiers, 24 x 24 feet x 3 feet, in two sets arranged for six layers of lime; supported by 8-inch wrought iron I beams and 96 cast iron columns inlet and outlet connections to boxes 20 inches, capacity 4,500,000 cubic feet; 2 iron carriages running on floor track for lifting and transporting covers; one complete set "church screens" for four boxes; One complete set Haverhill and Duffy screens for four boxes	54.571	
Two dry center seals 20-inch main inlet and outlet connections 24-inch	5,026	
Two farmers' iron dumping barrows	250	
Tools and implements necessary	300	
Office and meter-house, brick building 44 feet, 10-inch x 44 feet, two stories and cellar (48-6/12 feet high) wooden roof slated, containing	15,262	
Two station meters (with foundations thereunder) in wrought iron cases, 13 feet diameter, 13 feet high, 24-inch inlet and outlet pipes, valves and by-pass complete, capacity 4,000,000 cubic feet	16,038	

One Smith & Sayre steam jet exhauster 24-inch for water gas with governor complete, capacity 3,500,000 cubic feet	1,000	
One arch gauge 6-inch	20	
One pressure register for street mains	175	
Carried Forward		$481,071

7261

Brought Forward		$481,071
One pressure and vacuum register for exhausters	210	
One Bunsen Letheby improved photometer, 100-inch bar	1,300	
One electric watch-clock with 12 station boxes, and connecting and ground wires to all parts of the works	650	
Office furniture and fixtures, consisting of safe, 6 desks, 3 tables, map closets, letter press, lounge, chairs, illuminating power meter, window shades, maps, drawings, plans, linoleum, matting, etc., same being contained in the offices of the engineer and assistant-engineer and general office	2,650	
Spare machinery, tools and implements, etc., 1 horizontal engine 6 x 12 inches; 8 gate valves, weighmaster's scales, shovels, etc.	2,108	
Engine and condenser house, brick building, 90 feet by 50 feet, by 50 feet high, the engine-house two stories and cellar, wooden roof, the condenser house one story and cellar, wooden roof frame, iron truss, both roofs covered with slate	19,593	
The engine-house, containing 4 beam engines 12 x 18 inches, with foundations for same, about 80 horse power	9,000	
Four lines countershaft and pulleys	4,000	
Two MacKenzie exhausters with foundations, with engine governors and compensators, complete, capacity 8,000,000 cubic feet	9,394	
Carried Forward		$529,976

7262

Brought Forward		$529,976
Two steam jet exhausters (Smith & Sayre) 12 inches, complete with governors, capacity 3,000,000 cubic feet	2,000	
Two MacKenzie pressure blowers with foundations, capacity 12,500 cubic feet of air per minute with 100 revolutions, 5,500,000 gas capacity	5,298	

One Cameron steam pump No. 10, for working hydraulic coal elevator and water tank for same (Valued in railway for gasogenes.)		
Three King Vacuum and pressure gauges..	150	
One steam gauge..........................	35	
One pressure gauge for hydraulic accumulator	35	
One Siemens burner and lantern..........	275	
One water meter 4-inch..................	400	
Tar pipes in entire building..............	734	
Shafting and belting, governors and connections	9,510	
Tools and implements necessary to equip engine room fully....................	450	
The condenser-house, containing 2 wrought iron multitubular condensers (and foundations thereto) 30 feet long, 7 feet wide, 16½ feet high, 636 tubes, 4-inch, 13 feet long, 24-inch valves and connections, capacity 5,000,000 cubic feet.		
Condensers $26,600, valves and connections $4,606	31,206	
Two wrought iron cylindrical scrubbers, 10 feet diameter 21 feet high (with foundations thereunder), 24-inch valves and connections, capacity 5,000,000 cubic feet	10,000	
Carried Forward...........................		$590,069

7263

Brought Forward...........................		$590,069
One Pelouze and Audouin condenser, capacity 4,000,000 cubic feet.............	6,700	
One accumulator for hydraulic coal elevator, included in value of El. R. R., in gasogene house		
One glass syphon gauge, 18 inches........	9	
One glass syphon gauge, 24 inches........	18	
One differential gauge, 12 inches..........	18	
Eleven glass syphon gauges, 8 inches each..	40	
One glass syphon gauge, 6 inches.........	4	
One glass syphon gauge, 12 inches, and all necessary tools and implements.........	6	
In loft over engine-house, sundry valves, pulleys, electrical apparatus, etc., etc....	8,617	
Naphtha tank and pump house, brick building, 18 feet x 18 feet, 2 stories, 27 feet high, wooden roof, slated.............	2,000	
Containing 1 naphtha supply tank, 12 feet diameter, 7 feet deep, with floats, pulleys and scales, capacity 6,000 gallons.......	1,000	

Two Worthington duplex steam pumps (with foundation for same), 10 inches x 10¼ inches, capacity	2,000	
Two hundred and fifteen feet 10 inch wrought-iron suction pipe with gates	1,850	
Twenty feet 10-inch rubber suction hose with couplings	325	
Twenty feet 6-inch rubber suction hose with couplings	120	
Twenty feet 4-inch rubber suction hose with couplings	103	
Carried Forward		$612,879

7264

Brought Forward		$612,879
Two Cameron steam pumps, No. 8, for filling supply tank	925	
Naphtha storage tanks and vault surrounding same underground, brick wall 12 inches thick, 86 feet x 10 feet 6 inches x 7 feet high, with wooden roof	1,500	
Eighteen wrought-iron tanks, 8 feet diameter, 30 feet long each, with dome capacity 210,000 gallons, 6-inch discharge pipe, 18 6-inch Ludlow valves	42,209	
Three hundred and eighty-three feet picket fence	575	
One wrought iron tank underground	2,950	
Water tower, brick building, 20 feet diameter, 35 feet high, two stories	2,950	
Containing wrought-iron water tank, 20 feet diameter, 20 feet high, capacity 50,000 gallons	3,900	
Two Worthington duplex steam pumps, 7 inches x 10 inches (with the foundations thereto) fitted with valves and connections for supplying tank or for use as fire pumps	1,400	
One mercury syphon gauge, 20 inches (manometer), connected to tank	25	
Two jumpers, with hose reels and 1,000 feet fire hose	1,000	
Chemist's laboratory fully equipped, density apparatus, test and analytical apparatus, tubes, chemical apparatus, etc., etc	850	
Furniture in chemist's laboratory, drawers, closets, shelves, tables, etc., etc	750	
Boiler house in tank yard, brick building, 19 feet high, wooden roof slated	880	
Carried Forward		$672,793

7265 *Brought Forward*............................		$672,793
Containing 1 upright tubular boiler (with foundation) 4 feet 8 inches in diameter, 12 feet high, 157 tubes, 2-inch complete with all connections..................	1,550	
One Worthington duplex steam feed pump, 4 inches x 4 inches, with foundations for same................................	150	
Governor house in tank yard, brick building, 27 feet in diameter, octagon shape, 16½ feet high, lathed and plastered, wooden roof slated	2,900	
Containing 1 Isbell's patent street main governor (with foundation thereunder) with inlet and outlet valves, by-passes, and complete connection to all holders.......	20,750	
One arch gauge, 9-inch..................	28	
Two arch gauges, 6-inch..................	45	
One Worthington steam pump 4 inches x 4 inches	150	
Coal shed and elevator, coal shed, wooden building 120 feet x 80 feet high, with elevated tracks, capacity 4,000 tons, iron turntable and four-floor tracks through shed, 1 Riehle Bros. platform scales for weighing coal, 1 Hunt's patent elevator for discharging coal from boats with two elevated tracks into shed, Riehle Bros. platform scale on elevator, with railway rails, switches, etc., etc., 1 Copeland & Bacon double cylinder hoisting engine, complete, 2 iron coal tubs, 1 ton each, 2 iron coal tubs, ½ ton each, 2 Hunt's patent coal cars, water gas and steam pipes.....	14,500	
Carried Forward............................		$712,866
7266		
Brought Forward............................		$712,866
Gas holders, 1 holder for water gas, single lift, 72 feet 6 inches in diameter, 30 feet high, 8 wrought iron columns and girders, with tank, inlet and outlet pipes and valves, etc., capacity 125,000 cubic feet..	61,000	
Four gas holders, telescopic, each 90 feet 6 inches in diameter, 60 feet high, 8 wrought-iron columns and girders, with tanks, inlet and outlet pip-s and valves, etc., capacity 375,000 cubic feet each.....	320,000	

(Inlet and outlet pipes, valves, drips, and connections to those four holders are valued in the valuation of governor house.)

Plants on Blocks 226 and 226*a* as follows, viz:

Gas Holders, 1 holder for water gas, single lift, 72 feet 6 inches diameter, 30 feet high, 8 wrought-iron columns and girders, inlet and outlet pipes, valves, tank, etc., etc., capacity 125,000 cubic feet.........	61,000	
One gas holder telescopic, 180 feet diameter, 80 feet high, 18 wrought-iron columns and girders, tank, inlet and outlet pipes, valves, etc., etc., capacity 2,000,000 cubic feet	435,500	
One experimental gas holder, single lift in wrought-iron tank, 20 feet diameter, 10 feet high, cast-iron columns and wrought-iron girders, capacity 300,000 cubic feet..	3,000	
Gasogene and retort house, brick building, 105 feet by 65 feet, one story 41 1/3 feet high, iron roof slated, containing 2 gaso-		
Carried Forward..........................		$1,593,366

Brought Forward..........................		$1,593,366
genes with foundations complete, capacity 1,000,000 cubic feet.............	11,300	
Four double benches of four's retorts 12 inches x 20 inches x 18 inches with foundations, stand bridge and dip pipes, 6-inch hydraulic main, inlet main, retort connections, etc., capacity 500,000 cubic feet, 1 upright tubular boiler and foundation, boiler 6 feet diameter, 12 feet high, 195 tubes, 2-inch diameter, 1 Worthington duplex steam pump 4 inches x 4 inches experimental apparatus carburetter furnaces upright pipe-condenser, 20-inch engine exhauster governor, 4 purifiers 5 feet x 5 feet x 3 feet with dry centre seal station, meter 48 inches and rootblower..............	41,450	
Carbu-tting house, brick building, 26 feet by 26 feet, 1 story, 16¼ feet high, wooden roof, slated	3,000	
One carburetter and foundation, carburetter with wrought iron jacket, 8-inch inlet and outlet valves and connection, capacity 400,000 cubic feet....................	1,000	
Naphtha tank and pump house, brick building 10 feet by 10 feet, two stories, 24 feet high, wooden roof, slated..............	750	

One naphtha supply tank with scales, floats, etc., complete, 5 feet diameter, 8 feet high, capacity 1,200 gallons	800	
One naphtha tank, 18 inches diameter, 6 feet deep, capacity 80 gallons		
Carried Forward		$1,651,666
7268		
Brought Forward		$1,651,666
One Worthington duplex steam pump, 4 inches x 1 inch and foundation		
Pipe shop and meter repair shop, brick building, 38 feet by 28 feet, 1 story, 23 feet high, wooden roof, slated	4,000	
One meter prover, 20 feet	375	
One meter prover, 10 feet	150	
One small holder for gas	50	
One pressure gauge, 9 inches		
Tools and implements, spare machinery stocks and fixtures	5,723	
Two Copeland & Bacon engines, 8 inches x 8 inches, double cylinder, 2 lines counter shaft, pulleys, 1 Knowles pump pulleys, etc., etc.	3,925	
Valve and boiler house: Brick building 30 feet 8 inches by 24 feet 8 inches, two stories, 31 7/12 feet high, with cellar, wooden roof gravelled; boiler house 16 feet x 16 feet, brick building, one story, — feet high, wooden roof gravelled	5,000	
One MacKenzie exhauster (and foundation therefor), 12-inch connections, valves and by-pass, engine, governor and compensator	1,800	
One Copeland and Bacon single engine, 8 inches x 12 inches, with foundation therefor	550	
Two upright tubular boilers (and foundations for same), 3 feet diameter, 9 feet high, 45 tubes 1¾ inch diameter	1,750	
One Worthington duplex steam pump, 4 inches x 4 inches	150	
Two Hancock inspirators	110	
One water meter	65	
Carried Forward		$1,675,314
7269		
Brought Forward		$1,675,314
Valves and connections between holders	3,650	
Stable: Brick building, 62 feet x 47 feet, one story 35 feet high, wooden roof, slated, concrete floor, 13 stalls	9,500	

Eight horses, 4 wagons, 1 spring truck, 2 carriages, 3 carts, 1 drip cart and cask, harness, blankets and stable utensils and equipments complete	5,530	
Blacksmith's and carpenter's shops, carriage house and store rooms: One story, 12 feet high, frame, part shingle and part gravel roof, building 121 feet 6 inches x 18 feet, containing all necessary blacksmith's and carpenter's tools, stock, etc	3,500	
Naphtha storage tanks, underground: Two wrought iron tanks each 8 feet in diameter, 30 feet long with domes; one wrought iron tank, 7 feet 6 inches wide, 30 feet long, 7 feet deep, with discharge pipes, etc., etc., capacity 30,000 gallons	6,900	
Total holder capacity of entire plant, 3,753,000 cubic feet		
Total capacity of naphtha storage tanks, 240,000 gallons		
Steam, water and gas pipes, valves, cocks and connections throughout the entire plant	15,000	
Main connections about works, outside of buildings and tanks	45,000	
Sewers, throughout entire plant	5,000	
Flagging, inside of buildings. (This item is included in value of buildings.)		
Cisterns	250	
Carried Forward		$1,769,644

7270

Brought Forward		$1,769,644
Scows, one scow for transporting ashes and foul lime, No. 1, 80 feet long, 26 feet wide, 7 feet 7 inches deep, with windlass, derrick, ropes and fittings; one scow, No. 2, 71 feet long, 25 feet wide, 7 feet deep	5,800	
Sidewalks, flagging, curbing, bridging, gutter iron, etc., outside of works, in all blocks	4,358	
Pipe in yard, 60 tons of pipe on hand	2,400	
Specials, 65 tons of specials on hand	3,900	
Grading, when this property was used for "saw mill" purposes and at the time it was taken for its present use, the tide ebbed and flowed up to a point now occupied by the eastern wall of the gasogene house. The excavation from the tanks, etc., served in a measure to fill up to the present western line of the property but not entirely so, for a large sum has been expended upon the property to bring it to its		

present condition so far as relates to grade, and a proper amount to represent the material and labor will be, say............	10,000	
Miscellaneous surveyer's instruments, lamps and lanterns in yard, tiles, fire brick, gasogenes blocks	1,425	
		$1,797,527.00

This is to certify that I designed and constructed the buildings, plant, etc., known as the Municipal Gas Works. I am very familiar with every portion of the said establishment and know the cost of its production.

7271 I have this day carefully revised and corrected the foregoing estimate of its value, deducting therefrom the value set opposite the "Bulkhead" and adding the value of some items which I know to obtain, but which have been omitted. I therefore declare that the gross sum of one million seven hundred and ninety-seven thousand five hundred and twenty-seven dollars ($1,797,527) is the just and true value thereof at the present time, to the best of my knowledge and belief.

(Signed) THOMAS F. ROWLAND.

Sept. 8th, 1884.

7279 COMPLAINANT'S EXHIBIT 72.

Extract from the Special Meeting of the Stockholders of the Consolidated Gas Company, of New York, held March 9, 1900.

"Resolved, That the Capital Stock of the Consolidated Gas Company of New York, be increased from the present amount thereof, to wit, Thirty-nine million and seventy-eight thousand ($39,078,000) dollars, consisting of three hundred and ninety thousand seven hundred and eighty (390,780) shares of the par value of One hundred ($100) dollars each, to Fifty-four million five hundred and ninety-five thousand two hundred ($54,595,200) dollars, to consist of five hundred and forty-five thousand nine hundred and fifty-two (545,952) shares of the par value of One hundred ($100) dollars each, and that the trustees of this company be and they hereby are requested to issue such increase of capital stock, namely, one hundred and fifty-five thousand one hundred and seventy-two (155,172) shares, and use the same to redeem, in accordance with the terms thereof, the outstanding 4 per cent. debentures of this company issued for the stock of the New York Gas and Electric Light, Heat and Power Company, and aggregating Thirty-six million ($36,000,000) dollars.

COMPLAINANT'S EXHIBIT 73.

CONSOLIDATED GAS COMPANY OF NEW YORK.

Certificate of Increase of Capital Stock.

We, the undersigned, William Nelson Cromwell, Chairman, and O. F. Zollikoffer, Secretary, respectively, of a special meeting 7280 of the stockholders of the Consolidated Gas Company of New York, a domestic stock corporation, held for the purpose of increasing its capital stock, do hereby certify:

I. That prior to such meeting, a notice, stating the time, place and object thereof, and the amount of the increase proposed signed by a majority of the directors, was published once a week for at least three successive weeks in the New York *Sun* and the New York *Evening Post*, two newspapers in the County of New York, where the principal business office of such corporation is located.

II. That the following is a true copy of such notice:

CONSOLIDATED GAS COMPANY OF NEW YORK,

No. 4 Irving Place.

Notice to Stockholders.

New York, *June* 21, 1900.

Notice is hereby given that a Special Meeting of the Stockholders of the Consolidated Gas Company of New York will be held on the sixteenth day of July, 1900, at eleven o'clock in the forenoon, at the office of said company, No. 4 Irving Place, in the City of New York, for the purpose of voting upon a proposition to increase its capital stock from the present thereof, to wit: Fifty-four million five hundred and ninety-five thousand two hundred dollars, consisting of five hundred and forty-five thousand nine hundred and fifty-two shares of the par value of One hundred dollars each, to an amount not exceeding Eighty million dollars, or eight hundred thousand 7281 shares of the said par value; such increase of the proceeds thereof, to be used for any of the following purposes, to wit: acquiring the stocks, bonds or other obligations of other Gas or Electric Light Companies, providing for the redemption or payment of the company's debentures, debenture scrip or other indebtedness, or for additional improvements, or for such other purposes as the stockholders may determine to be expedient; and also for the purpose of transacting such other business as may come before the meeting.

JOHN P. HUGGINS,
ANTHONY N. BRADY,
S. S. PALMER,
THOMAS F. RYAN,
H. E. GAWTRY,
SAMUEL SLOAN,
JAMES STILLMAN,
GEO. F. BAKER,
WILLIAM ROCKEFELLER,
M. TAYLOR PYNE,
W. C. WHITNEY,
Majority of the Board of Trustees.

The transfer books of the Consolidated Gas Company of New York will be closed on July third, 190 , at three P. M., and reopened July seventeenth, at ten A. M.

By order of the Board.

O. F. ZOLLIKOFFER, *Secretary.*

III. That a copy of such notice was also duly mailed, postage prepaid, to each Stockholder of such Corporation, at his last known post-office address, at least three weeks before the meeting.

IV. That, at the time and place specified in such notice, Stockholders appeared in person or by proxy, representing 442,092 shares of the Capital Stock of the said Corporation, being more than three-fourths of the total Capital Stock outstanding, and organized 7282 said Meeting by choosing from their number the undersigned, William Nelson Cromwell, as Chairman, and O. F. Zollikoffer, as Secretary thereof.

V. That the notice of the Meeting and proof of the proper publishing and mailing thereof were presented and directed to be spread upon the minutes.

VI. That upon motion, a vote was then taken of those present in person or by proxy, upon the following Resolution:

"Resolved, That the Capital Stock of the Consolidated Gas Company of New York be increased from the present amount thereof, to wit, $54,595,200, consisting of Five hundred and forty-five thousand nine hundred and fifty-two (545,952) shares of the par value of One hundred ($100) dollars each, to Eighty hundred thousand (8,000,000) to consist of Eight hundred thousand (800,000) shares, of the par value of One hundred ($100) dollars each."

VII. That Stockholders owning 442,092 shares of Stock, being more than three-fourths of all of the Stock of the Corporation, voted in favor of such Resolution; and no Stockholders voted against its adoption.

VIII. That a sufficient number of votes having been cast in favor of such increase, such Resolution was thereupon declared duly adopted.

IX. That the amount of Capital of said Corporation actually paid in, is Fifty-four million five hundred and fifty-one thousand nine hundred ($54,551,900) dollars, and that the additional amount previously authorized is Forty-three thousand three hundred 7283 ($43,300) dollars, making the total amount actually paid in and authorized, Fifty-four million five hundred and ninety-five thousand two hundred ($54,595,200) dollars; that the whole amount of the debts and liabilities of such Corporation is $10,584,914 73-100; and that the amount to which the Capital Stock of such Corporation is increased is Eighty million ($80,000,000) dollars.

In Witness Whereof, We have made, signed, verified and acknowledged this Certificate in duplicate, this 16th day of July, 1900.

COMPLAINANT'S EXHIBIT 74.

EXTRACT FROM THE MINUTES OF A SPECIAL MEETING OF THE STOCKHOLDERS OF THE CONSOLIDATED GAS COMPANY OF NEW YORK, HELD JULY 16, 1900.

"Resolved, That the capital stock of the Consolidated Gas Company of New York be increased from the present authorized amount thereof, to wit, fifty-four million five hundred and ninety-five thousand two hundred dollars ($54,595,200), consisting of five hundred and forty-five thousand nine hundred and fifty-two (545,952) shares, of the par value of one hundred dollars ($100) each, to eighty million dollars ($80,000,000), to consist of eight hundred thousand (800,000) shares of the par value of one hundred dollars ($100) each.

Resolved, That the Board of Trustees may issue and sell or otherwise dispose of such increase of the Company's stock, at such times, in such amounts, for such consideration and upon such terms as shall to them seem advisable; and may use such increase and the proceeds of any sale or other disposition thereof, as and when they see fit for acquiring the stocks, bonds or other obligations, properties or franchises of other gas or electric light companies, or for providing for the redemption or payment of the debentures, debenture scrip or other indebtedness of this company, or for making improvements upon the property of this Company, or for acquiring other property, or for any other purpose which the said board may approve or authorize.

7287 It is hereby recommended, that, whenever in the opinion of the board of trustees, the proceeds of such additional capital stock shall be required, the board offer to the stockholders of this company the privilege of subscribing in proportion to their respective holdings of stock at the time specified in the said offer, to such amount of the said additional capital stock, and at such price per share, not less than par, as the board may then deem expedient, and all of such stock so offered but not subscribed for may be disposed of by the board upon the same terms.

COMPLAINANT'S EXHIBIT 75.

CONSOLIDATED GAS COMPANY OF NEW YORK.

Certificate of Increase of Capital Stock.

We, the undersigned, William Nelson Cromwell, Chairman, and Robert A. Carter, Secretary, respectively, of a Special Meeting of the Stockholders of the Consolidated Gas Company of New York, a domestic Stock Corporation, held for the purpose of increasing its Capital Stock, DO HEREBY CERTIFY:

I. That prior to such meeting, a notice, stating the time, place and object thereof, and the amount of the increase proposed, signed by the President and the Secretary, was published once a week, for at least two successive weeks, in the New York *Sun* and the New York *Times*, two newspapers, in the County of New York, where the principal business office of such Corporation is located.

II. That the following is a true copy of such notice:

7288 CONSOLIDATED GAS COMPANY OF NEW YORK.

No. 4 Irving Place.

Notice to Stockholders.

New York, *May* 18, 1904.

Notice is hereby given that a Special Meeting of the Stockholders of the Consolidated Gas Company of New York will be held on the 2d day of June, 1904, at 12 o'clock noon, at the office of the said Company, No. 4 Irving place, in the City of New York, for the purpose of voting upon a proposition to increase its capital stock from the present amount thereof, to wit: Eighty million dollars ($80,000,000), consisting of eight hundred thousand (800,000) shares of the par value of $100 each, to one hundred million dollars ($100,000,000) or one million (1,000,000) shares of the said par value; such increase or the proceeds thereof to be used for providing additional improvements and betterments, the acquisition of additional property, the payment of any indebtedness of the Company, whether now existing or hereafter contracted, and for such other purposes as the stockholders at such meeting may determine to be expedient, and also for the purpose of transacting such other business as may come before the Meeting.

The transfer books of the Company will be closed on May 26, 1904, at 3 P. M., and reopened on June 3, 1904, at 10 A. M.

By order of the board.

H. E. GAWTRY, *President.*

R. E. CARTER, *Secretary.*

7289 III. That a copy of such notice was also duly mailed, postage prepaid, to each Stockholder of such Corporation, at his last known post-office address, at least two weeks before the Meeting.

IV. That, at the time and place specified in such notice, Stockholders appeared in person or by proxy, representing 555,479 shares of the Cap*ti*al Stock of the said Corporation, being more than two-thirds of the total Capital Stock outstanding, and organized said Meeting by choosing from their number the undersigned, William Nelson Cromwell, as Chairman, and Robert A. Carter as Secretary thereof.

V. That the notice of the meeting and proof of the proper publishing and mailing thereof were presented and directed to be spread upon the Minutes.

VI. That, upon motion, a vote was then taken of those present in person or by proxy, upon the following Resolution:

"RESOLVED, That the capital stock of the Consolidated Gas Company, of New York, be increased from Eighty million dollars ($80,000,000) consisting of Eight hundred thousand (800,000) shares of the par value of One hundred dollars ($100) each, to One hundred million dollars ($100,000,000) to consist of One million (1,000,000) shares, of the par value of One hundred dollars ($100) each."

VII. That Stockholders owning 555,479 shares of Stock, being more than two-thirds of all the Stock of the Corporation, voted in favor of such Resolution, and none voted against its adoption.

VIII. That a sufficient number of votes having been cast in favor of such increase, such Resolution was thereupon declared duly adopted.

7290 IX. That the amount of Capital of said Corporation heretofore authorized, is Eighty million dollars ($80,000,000); that the amount thereof actually issued is Eighty million Dollars ($80,000,000) and that the amount to which the Capital Stock of such Corporation is increased is One hundred million Dollars ($100,000,000).

IN WITNESS WHEREOF, we have made, signed, verified and acknowledged this Certificate in duplicate, this 2nd day of June, 1904.

WM. NELSON CROMWELL,
Chairman of said Meeting.
R. A. CARTER,
Secretary of said Meeting.

STATE OF NEW YORK, *County of New York:*

COMPLAINANT'S EXHIBIT 76.

EXTRACT FROM THE MINUTES OF A SPECIAL MEETING OF THE STOCKHOLDERS OF THE CONSOLIDATED GAS COMPANY OF NEW YORK, HELD JUNE 2, 1904.

"Resolved, That the capital stock of the Consolidated Gas Company of New York be increased from Eighty million ($80,000,000) dollars, consisting of eight hundred thousand (800,000) shares, of the par value of One hundred ($100) dollars each, to One hundred million ($100,000,000) dollars, to consist of one million (1,000,000) shares, of the par value of One hundred ($100) dollars each.

Resolved, That the Board of Directors of the Company be and they are hereby authorized to issue forthwith the coupon debentures of the company, at par in denominations of $500, and such multiples thereof as the board may deem expedient, to the extent of $20,000,000 par value, dated July 1, 1904, and payable in cash July 1, 1909 (unless sooner converted into the stock of the company, as hereinafter provided), with interest at the rate of six per cent. 6% per annum, represented by coupons, payable semi-annually on the first days of January and July in each year; such debentures to contain a provision giving the holder thereof the privilege, upon the expiration of three years, namely, on July 1, 1907, and on any subsequent interest date prior to July 1, 1909, to convert the said debentures into the capital stock of the company, at its par value; and that the increased capital stock, about provided for, be reserved for the purpose of such conversion.

Resolved, That the stockholders of record on June 8, 1904, at 3

P. M., shall have the right to subscribe, at par, for the said debentures, to the extent of twenty-five per cent. (25%) of their holdings of the stock of the company, as shown at the closing of the transfer books on June 8, 1904, at 3 P. M., provided they shall exercise such right on or before June 25, 1904, at 3 P. M., and that for the purpose of ascertaining the names of stockholders, who may be entitled to subscribe for such debentures, the transfer books of the company be closed from 3 P. M. on June 8, 1904, until 10 A. M. on June 16, 1904. 7294

Resolved, That all debentures not subscribed and paid for by the stockholders, in the manner hereinafter provided shall be disposed of to such persons and in such manner as may be determined by the trustees, but at not less than par.

Resolved, That so much of the said increased stock as may not be required for purposes of conversion, as aforesaid, be sold and disposed of by the Board of Trustees, at such times, to such persons, in such amounts, for such consideration, at not less than par, and upon such terms as shall seem to them advisable.

Resolved, That the proceeds of the said debentures and of so much of the said increased stock as may not be required for the purpose of conversion be used for providing additional improvements and betterments, the acquisition of additional property, the payment of any indebtedness of the company, whether now existing or hereafter contracted, and for such purposes as the Board of Trustees may approve or authorize.

The transfer books of the Consolidated Gas Company of New York will be closed on February 27th, at 3 P. M. and reopened March 10th, at 10 A. M.

By order of the Board.

O. F. ZOLLIKOFFER, *Secretary.*"

7297 That a copy of said notice was also personally served upon or duly mailed, postage prepaid, to each stockholder of said corporation, at his last-known post-office address, at least three weeks before the meeting.

That at the time and place specified in said notice, stockholders appeared in person or by proxy, in numbers representing at least a majority of all the shares of stock of said corporation and organized said meeting by choosing from their number the undersigned, H. E. Gawtry as chairman, and the undersigned, O. F. Zollikoffer as Secretary thereof.

That the notice of the meeting and proof of the proper publishing and mailing thereof were presented, and ordered on file.

That, upon motion, a vote was then taken of those present in person or by proxy upon the following resolution:

RESOLVED, that the capital stock of the Consolidated Gas Company of New York be increased from the present amount thereof, to wit, thirty-nine million and seventy-eight thousand dollars ($39,078,000), consisting of three hundred and ninety thousand seven hundred and eighty (390,780) shares of the par value of one hundred dollars each, to fifty-four million five hundred and ninety-five thousand, two hundred dollars ($54,595,200) to consist of five hundred and forty-five thousand, nine hundred and fifty-two (545,952) shares, of the par value of one hundred dollars ($100) each; and that the Trustees of this Company be, and they hereby are, requested to issue such increase of capital stock, namely, one hundred and fifty-five thousand one hundred and seventy-two (155,172) shares and use the same to redeem, in accordance with the terms thereof, the outstanding four per cent, debentures of this Company, issued for stock of the New York Gas and Electric Light, Heat and
7298 Power Company, and aggregating thirty-six million dollars ($36,000,000).

That stockholders owning Three hundred and eight thousand eight hundred and forty-one (308,841) shares of stock, being more than two-thirds of all the stock of the corporation, voted in favor of said resolution; and stockholders owning no shares of stock voted against said resolution.

That a sufficient number of votes having been cast in favor thereof, said resolution was declared duly adopted.

That the amount of capital of said corporation actually paid in is thirty-nine million and seventy-eight thousand dollars ($39,078,000) and the whole amount of the debts and liabilities of said corporation is thirty-nine million, nine hundred and twenty-nine thousand three hundred and thirty-six and 53/100 dollars ($39,929,336.53) thirty-six million dollars ($36,000,000) thereof consisting of the debentures of the Company, issued in January, 1900, mentioned in the foregoing resolution, to be redeemed according to their terms, by the issue of the increase of stock thereby created, and that the amount to which the capital stock of said corporation is increased is fifty-four million five hundred and ninety-five thousand two hundred dollars ($54,595,200).

IN WITNESS WHEREOF, we have made, signed, verified and acknowledged this certificate in duplicate.

COMPLAINANT'S EXHIBIT No. 87.

CERTIFICATE OF INCORPORATION

OF

THE ASTORIA LIGHT, HEAT AND POWER COMPANY.

We, the undersigned, all being persons of full age, at least two-thirds being citizens of the United States and one of us a resident of the State of New York, desiring to form a corporation for the purpose of supplying gas for light and of using electricity for light, heat and power, pursuant to the provisions of the Transportation Corporations Law, Article 6, do hereby make, sign, acknowledge and file this certificate for that purpose, as follows:

First. The name of the proposed corporation is

THE ASTORIA LIGHT, HEAT AND POWER COMPANY.

Second. The objects of the said corporation are to manufacture and supply gas for lighting the streets and public and private buildings of the City of New York; and to manufacture and use electricity for producing light, heat and power, and in lighting streets, avenues, public parks and places and public and private buildings of said City; and to exercise the powers conferred by law upon corporations formed for the purposes and objects aforesaid.

Third. The amount of its capital stock is to be Five Hundred Thousand Dollars ($500,000).

7318 Fourth. The term of its existence is to be fifty years.

Fifth. The number of shares of which the stock shall consist is to be five thousand.

Sixth. The number of directors is to be five.

Seventh. The names and places of residence of the directors who are to serve for the first year are as follows:

Name.	Places of residence.
Horace W. Fuller	No. 59 West 65th St., New York.
T. Wilbur Spear	No. 449 Gates Ave., Brooklyn, N. Y.
Augustus R. Moen	No. 308 W. 77th St., New York.
Arthur C. Hume	No. 28 East 28th St., New York.
Francis R. Foraker	No. 122 W. 94th St., New York.

Eighth. The operations of the corporations are to be carried on in The City of New York, and in the several counties of New York, Kings, Queens and Richmond, lying within the said The City of New York; and the office of the Corporation is to be located in the County of Queens.

In Witness Whereof, we have made, signed, sealed and acknowledged this certificate in duplicate this nineteenth day of January, one thousand eight hundred and ninety-nine.

HORACE W. FULLER.
T. WILBUR SPEAR.
A. RENE MOEN.
ARTHUR C. HUME.
FRANCIS R. FORAKER.

7319 State of New York, *County of New York, ss:*

On this nineteenth day of January, 1899, before me personally came Horace W. Fuller, T. Wilbur Spear, Augustus R. Moen, Arthur C. Hume and Francis R. Foraker, to me severally known to be the persons described in and who made and signed the foregoing certificate, and severally duly acknowledged to me that they each made, signed and executed the same for the uses and purposes therein set forth.

[SEAL.] ADOLPH C. WAPPLER,
Notary Public, New York County.

(Cancelled Revenue Stamp 10 Cents.)

State of New York, *County of New York, ss:*

I, William Sohmer, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do hereby certify, that Adolph C. Wappler, whose name is subscribed to the Certificate of the proof or acknowledgment of the annexed instrument, and thereon written, was at the time of taking such proof or acknowledgment, a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same. And, further, that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said certificate of proof or acknowledgment is genuine.

7320 In Testimony Whereof, I have hereunto set my hand and affixed the seal of said Court and County, the 19th day of January, 1899.

[SEAL.] WM. SOHMER, *Clerk.*

(Cancelled Revenue Stamp 10 Cents.)

State of New York, *County of Queens, ss:*

I, James Ingram, Clerk of the County of Queens, and of the Courts of Record for said County, do certify, that I have compared the preceding with the original Certificate of Incorporations The Astoria Light, Heat and Power Company as the same is recorded in Liber No. 5 of Certificate of Incorporations on page 89, on January 20th, 1899, in the Clerk's Office of said County, and that the same is a true and correct copy thereof, and the whole of such original.

In Witness Whereof, I have hereunto subscribed my hand and affixed the Seal of said Court and County, the 11th day of May, 1905.

[SEAL.] D. L. VAN NOSTRAND, *Clerk.*

STATE OF NEW YORK, *Office of the Secretary of State, ss:*

I have compared the preceding with the original Certificate of Incorporation of The Astoria Light, Heat and Power Company, filed and recorded in this office on the 20th day of January, 1899, and do hereby certify the same to be a correct transcript therefrom and the whole of said original.

7321 Witness my hand and seal of office of the Secretary of State, at the City of Albany, this 20th day of Ja-uary, one thousand eight hundred and ninety-nine.

J. N. H. MONGIN,
Deputy Secretary of State.

COMPLAINANT'S EXHIBIT 88.

CERTIFICATE OF INCORPORATION

OF THE

NATIONAL COKE AND COAL COMPANY.

We, the undersigned, desiring to form a corporation pursuant to the provisions of the Business Corporations Law, all being of full age and citizens of the United States and at least one of us being a resident of the State of New York, do hereby certify:

1. That the name of the proposed corporation is the National Coke and Coal Company.

II. That the purposes for which it is to be formed are:

1. To manufacture, purchase, use and sell, throughout the United States and elsewhere, coke and coal and all products composed in whole or in part of coke and coal in combination with other substances, and all machinery, apparatus and fixtures for any purposes relating in any manner to the production and use of coke and coal, or either of them, and their products, as aforesaid.

2. To carry on the trade or business of miners, engineers, colliery proprietors and coke manufacturers, and for those purposes to search for, get and make merchantable, and to sell and dispose of coal and other minerals and substances, and all products composed in whole or in part of coke or coal in combination with other substances, and to manufacture and sell coal, coke, fuel and other products, as aforesaid. 7322

3. To acquire by purchase, lease and otherwise, and to hold, use, manage, operate, lease and dispose of lands, mineral deposits and mineral rights, water powers and water rights, quarries, coal properties and collieries, together with the veins or seams of coal and other minerals, situate therein, and all wharves, railways, fixed and

movable plant, machinery and other property and effects appertaining or belonging thereto, and all patent rights, inventions, franchises, grants, licenses, easements, concessions and other interests therein; to utilize and employ all forms of motive power and means of transportation which may be desirable or convenient in connection with the foregoing objects of any of them. It shall also have power to own the stocks and bonds issued by other corporations; and generally to conduct any business and enter into any contracts which may be permitted by the laws of the State of New York, or of the place where such business is transacted and contracts made.

III. That the amount of the capital stock is Fifty thousand dollars ($50,000).

IV. That the number of shares of which the capital stock shall consist is Five hundred and the amount of capital with which said corporation will begin business is Fifty thousand dollars ($50,000).

7323 V. That the location of its principal business office is to be in the Village of Mount Kisco, Westchester County, New York.

VI. That its duration is to be perpetual.

VII. That the number of its directors is to be five.

VIII. That the names and post-office addresses of the directors for the first year are as follows:

Names.	Post office addresses.
J. Edmund Wood	118 Clymer St., Brooklyn, N. Y.
Edwin North	109 West 82d St., N. Y. City.
James E. Keeler,	47 South Elliott Place, Brooklyn, N. Y
Charles F. Halstead	166 Schermerhorn St., Brooklyn, N. Y.
Cornelius A. Loughlin	224 East 19th St., N. Y. City.

IX. That the names and post office addresses of the subscribers and the number of shares of stock which each agrees to take in the corporation are as follows:

Names and post office addresses.	Number of shares subscribed.
J. Edmund Wood, 118 Clymer St., Brooklyn, N. Y	1
Edwin North, 109 West 82d St., N. Y. City	496
James E. Keeler, 47 South Elliott Place, Brooklyn, N. Y	1
Charles F. Halsted, 166 Schermerhorn St., Brooklyn, N. Y	1
Cornelius A. Loughlin, 224 East 19th St., N. Y. City	1

7324 In Witness Whereof, we have made, signed and acknowledged this certificate this eleventh day of November, 1901.

CORNELIUS A. LOUGHLIN. CHARLES F. HALSTED.
J. EDMUND WOOD. JAMES E. KEELER.
EDWIN NORTH.

State of New York, *County of New York, ss:*

On this eleventh day of November, 1901, before me personally came Cornelius A. Loughlin, J. Edmund Wood, Edwin North, Charles F. Halsted and James E. Keeler, to me known and known to me to be the individuals described in, and who executed the foregoing certificate and severally acknowledged to me that they executed the same.

[seal.] FREDERIC N. GILBERT,
Notary Public, Kings County.

Certificate filed in New York County.

State of New York, *County of New York, ss:*

I, William Sohmer, Clerk of the County of New York, and also Clerk of the Supreme Court for the said county, the same being a Court of Record, do hereby certify that Frederic N. Gilbert has filed in the Clerk's Office of the County of New York a certified copy of his appointment and qualifications as Notary Public for the County of Kings with his autograph signature, and was at the time of taking the proof or acknowledgment of the annexed instrument duly authorized to take the same. And further that I am well acquainted with the handwriting of such Notary, and believe the signature to the said certificate of proof or acknowledgment to be genuine.

[seal.]

7325 In Testimony Whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 11th day of November, 1901.

WM. SOHMER, *Clerk.*

State of New York, *Office of the Secretary of State:*

I have compared the preceding with the original Certificate of Incorporation of National Coke and Coal Company, filed and recorded in this office on the 21st day of November, 1901, and do hereby certify the same to be a correct transcript therefrom and of the whole said original.

Witness my hand and seal of office of the Secretary of State, at the City of Albany, this 21st day of November, one thousand nine hundred and one.

[seal.] JOHN T. McDONOUGH,
Secretary of State.

State of New York,
Office of the County Clerk of Westchester County, ss:

I have compared the preceding with the original Certificate of Incorporation filed and recorded in this office on the 23rd day of November, 1901, and do hereby certify the same to be a correct transcript therefrom and of the whole of such original.

In Testimony Whereof, I have hereunto subscribed my name and affixed my official seal this 23rd day of November, 1901.

[seal.] LEVRETT F. CRUMB,
County Clerk of Westchester County.

AGENCY AGREEMENT.

Agreement, made the 31st day of December, 1902, between the Consolidated Gas Company of New York and the New York Mutual Gas Light Company, corporation duly organized and existing under the laws of the State of New York.

I. The Consolidated Gas Company of New York hereby employs the New York Mutual Gas Light Company, as its agent and upon the terms hereinafter mentioned, to manufacture, produce and deliver to it for the term of five (5) years, such illuminating gas of the illuminating power required by the laws of the State of New York as it may require, during each year, for the said term of five (5) years, estimated to be equal to at least one hundred million

(100,000,000) cubic feet per year, and to deliver the same to the gas holders, mains or meters of the Consolidated Gas Company of 7328 New York, in such quantities and at such times as may be reasonably required by it.

The New York Mutual Gas Light Company agrees to manufacture, produce and deliver such gas, as aforesaid, as the agent of the Consolidated Gas Company of New York.

II. The New York Mutual Gas Light Company shall, as agent for the Consolidated Gas Company of New York, and at reasonable rates, purchase all the constituent materials and furnish the labor necessary to such manufacture, production and delivery, and employ in such manufacture, production and delivery its own plant and appliances.

III. At the expiration of each month, the New York Mutual Gas Light Company shall render to the Consolidated Gas Company of New York an account of all expenditures for constituent materials and labor made by it, as aforesaid, during such month, and the Consolidated Gas Company of New York agrees to pay to the New York Mutual Gas Light Company, within ten (10) days thereafter, the amount due, according to such accounts, together with an additional ten per cent. (10%) thereof, which shall be in full for its services and the use of its plant and appliances during the said month.

IV. The Consolidated Gas Company of New York shall have a right to examine, at any reasonable time during business hours, the manufacturing records, books and bills of cost of the said constituent materials and labor, and also any other books, bills and papers containing records of the total cost of the gas manufactured under the terms of this contract.

7329 V. This contract may be terminated at any time, after July 1, 1904, at the option of either party hereto, by its giving notice of its election so to do one year in advance of the date of such termination.

VI. If no notice of termination shall have been given, under the provisions of the preceding paragraph, the Consolidated Gas Company of New York may renew this agreement upon the same terms and under the same conditions for an additional period of five (5) years, provided the said Company notifies the New York Mutual Gas Light Company, in writing, during the last six months of the present term, of its election so to do.

In Witness Whereof, the Company have caused this agreement to be executed under their respective corporate seals by their respective Presidents and attested by their respective Secretaries, the day and year first above written.

COMPLAINANT'S EXHIBIT 91.

AGENCY AGREEMENT.

Agreement, made the 31st day of December, 1902, between the Consolidated Gas Company of New York and the New Amsterdam Gas Company, corporation duly organized and existing under the laws of the State of New York.

1. The Consolidated Gas Company of New York hereby employs the New Amsterdam Gas Company as its agent, and upon the terms hereinafter mentioned, to manufacture, produce and deliver to it, for the term of five years, such illuminating gas of the illuminating power required by the laws of the State of New York, as it may require during each year for said term of five years—estimated to be equal to at least 500,000,000 cubic feet per year, and to deliver the same to the gas holders, mains or meters of the Consolidated Gas Company of New York in such quantities and at such times as may be reasonably required by it.

The New Amsterdam Gas Company agrees to manufacture, produce and deliver such gas aforesaid as the agent of the Consolidated Gas Company of New York.

2. The New Amsterdam Gas Company shall as agent for the Consolidated Gas Company of New York purchase all the constituent materials and furnish labor necessary for such manufacture, production and delivery and employ in such manufacture, production and delivery, its own plant and appliances.

3. At the expiration of each month the New Amsterdam Gas Company shall render to the Consolidated Gas Company of New
7331 York an account of the cost of gas materials used and the gas
labor furnished in manufacturing said gas together with the so-called station repairs during said month, and the Consolidated Gas Company of New York agrees to pay to the New Amsterdam Gas Company within ten days thereafter the amount due according to the said account, together with an additional ten per cent. thereof, which shall be in full for the services of the latter Company, and for the use of its plant and appliances during said month, and in full also for all claims for taxes on said plant and for insurance thereon and for all administrative and general expenses and of all other claims whatsoever, except as hereinafter mentioned.

4. The Consolidated Gas Company of New York shall have the right to examine at any reasonable time during business hours the manufacturing records, books and bills of the cost of the materials and labor, and also any other books, bills and papers containing records of the total cost of the gas manufactured under the terms of this contract.

5. The Consolidated Gas Company of New York further agrees that it will at the end of every period of six months during the term of this agreement pay to the New Amsterdam Gas Company interest at the rate of five (5) per cent. per annum for the previous six months upon the amounts expended by the New Amsterdam Gas

Company in making additions to its Ravenswood Works since March 1, 1901, for the purpose of increasing or facilitating the manufacture of gas.

6. This agreement may be terminated at any time after July 1, 1904, at the option of either party hereto, by its giving notice 7332 of its election so as to do one year in advance of the date of such termination.

7. If no notice of termination shall have been given under the provisions of the preceding paragraph, the Consolidated Gas Company of New York may renew this agreement upon the same terms and under the same conditions for an additional period of five (5) years, providing the said Company notifies the New Amsterdam Gas Company in writing during the last six months of the present term of its election so to do.

In Witness Whereof, the Companies have caused this agreement to be executed under their respective corporate seals by their respective Presidents and attested by their respective Secretaries the day and year first above written.

Agreement, made the 31st day of December, 1902, between the Consolidated Gas Company of New York and the Standard Gas Light Company of the City of New York, corporations duly organized and existing under the laws of the State of New York.

I. The Consolidated Gas Company of New York hereby employs the Standard Gas Light Company of the City of New York, as its agent and upon the terms hereinafter mentioned, to manufacture, produce and deliver to it for the term of five (5) years, such illuminating gas of the illuminating power required by the laws of the State of New York as it may require, during each year, for the said term of five (5) years, estimated to be equal to at least five hundred million (500,000,000) cubic feet per year, and to deliver the same to the gas holders, mains or meters of the Consolidated Gas Company of New York, in such quantities and at such times as may be reasonably required by it.

The Standard Gas Light Company of the City of New York agrees to manufacture, produce and deliver such gas, as aforesaid, as the agent of the Consolidated Gas Company of New York.

II. The Standard Gas Light Company of the City of New York

shall, as agent for the Consolidated Gas Company of New York, and at reasonable rates, purchase all the constituent materials and furnish the labor necessary to such manufacture, production and delivery and employ in such manufacture, production and delivery its own plant and appliances.

7334 III. At the expiration of each month, The Standard Gas Light Company of the City of New York shall render to the Consolidated Gas Company of New York an account of all expenditures for constituent materials and labor made by it, as aforesaid, during such month, and the Consolidated Gas Light Company of New York agrees to pay to The Standard Gas Light Company of the City of New York, within ten (10) days thereafter, the amount due, according to such accounts, together with an additional ten per cent. (10%) thereof which shall be in full for its services and the use of its plant and appliances during the said month.

IV. The Consolidated Gas Company of New York shall have a right to examine, at any reasonable time during business hours, the manufacturing records, books and bills of cost of the said constituent materials and labor, and also any other books, bills and papers containing records of the total cost of the gas manufactured under the terms of this contract.

V. This agreement may be terminated at any time, after July 1, 1904, at the option of either party hereto, by its giving notice of its election so to do one year in advance of the date of such termination.

VI. If no notice of termination shall have been given, under the provisions of the preceding paragraph, the Consolidated Gas Company of New York may renew this agreement upon the same terms and under the same conditions for an additional period of five (5) years provided the said Company notifies the Standard Gas Light Company of the City of New York, in writing, during the last six months of the present term of its election so to do.

7335 In Witness Whereof, the Companies have caused this agreement to be executed under their respective corporate seals by their respective Presidents and attested by their respective Secretaries, the day and year first above written.

REPORT

OF THE

CONSOLIDATED GAS CO.

OF

NEW YORK

TO THE

STATE BOARD OF TAX COMMISSIONERS

OF THE

STATE OF NEW YORK

FOR THE

Year Ending June 30, 1905.

Recorded—Received Dec. 4, 1905.—Board of Tax Commissioners, Albany, N. Y.

7342 OFFICE OF THE

STATE BOARD OF TAX COMMISSIONERS,

ALBANY......................

SIR:

The following forms, prepared in conformity with the requirements of law, are forwarded you for use in preparing the Report of your company required by Section 43, Chapter 712, Laws 1899.

☞ It is requested that you complete and forward such report as required by that Act on or before December 1, 1905.

Very respectfully,
STATE BOARD OF TAX COMMISSIONERS.

EXTRACT FROM LAW RELATING TO TAXATION OF SPECIAL FRANCHISES.

SECTION 1. Subdivision three of section two of the tax law is hereby amended to read as follows:

3. The terms "land," "real estate," and "real property," as used in this chapter, include the land itself above and under water, all

buildings and other articles and structures, substructures and superstructures, erected upon, under, or above or affixed to the same; all wharves and piers, including the value of the right to collect wharfage, cranage or dockage thereon; all bridges, all telegraph lines, wires, poles, and appurtenances; all supports and inclosure for electrical conductors and other appurtenances upon, above and under ground, all surface, under ground or elevated railroads, including the value of all franchises, rights or permission to construct, maintain or operate the same in, under, above, on or through streets, highways or public places; all railroad structures, substructures and superstructures; tracks and the iron thereon; branches, switches and 7343 other fixtures permitted or authorized to be made, laid or placed in, upon, above or under any public or private road, street or ground; all mains, pipes and tanks laid or placed in, upon, above or under any public or private street or place for conducting steam, heat, water, oil, electricity or any property, substance or product capable of transportation or conveyance therein or that is protected thereby including the value of all franchises, rights, authority or permission to construct, maintain or operate in, under, above, upon, or through any streets, highways or public places, any mains, pipes, tanks, conduits, or wires, with their appurtenances, for conducting water, steam, heat, light, power, gas, oil, or other substance, or electricity for telegraphic, telephonic or other purposes; all trees and underwood growing upon land, and all mines, minerals, quarries and fossils in and under the same, except mines belonging to the state. A franchise, right, authority or permission specified in this subdivision shall for the purpose of taxation be known as a "special franchise." A special franchise shall be deemed to include the value of the tangible property of a person, copartnership, association or corporation situated in, upon, under or above any street, highway, public place or public waters in connection with the special franchise. The tangible property so included shall be taxed as a part of the special franchise. No property of a municipal corporation shall be subject to a special franchise tax.

7344

SCHEDULE A.

Title of Company, Consolidated Gas Co. of New York.

General Offices at # 4 Irving Place, New York City.

Date at close of Fiscal Year, December 31st.

For information concerning this Report address R. A. Carter, Secretary, # 4 Irving Place, New York.

OFFICERS OF THE COMPANY WITH P. O. ADDRESS:

President	All at # 4 Irving Place, New York.
Vice-President, Samuel Sloan	
Vice-President, Walter R. Addicks	
Vice-President, Lewis B. Gawtry	
Secretary, Robert A. Carter	
Asst. Secretary, Colin C. Simpson	
Treasurer, James A. Bennett	
Asst. Treasurer, Benjamin W. Whiteley	

TRUSTEES OF THE COMPANY:

Name.	P. O. Address.
Harrison E. Gawtry,	# 4 Irving Place, New York City.
Samuel Sloan,	# 26 Exchange Place, New York City.

Thomas F. Ryan,	Oak Ridge, Virginia.
Frank Tilford,	# 208 Fifth Ave., New York City.
John W. Sterling,	# 44 Wall St., New York City.

7345 SCHEDULE B.

Description of special franchise, showing streets, highways or public places possessed or rights enjoyed and in what tax district or districts same is located:

Note: If this information was given in former report and map filed, state such fact, giving only additional grants since last report.
The information called for under this schedule was filed with the report for 1899 and reference is made thereto.
A map filed at that time gave all the information that it is possible to give.
This report should be accompanied by maps showing the location and extent of all property subject to taxation as a "Special Franchise."

SCHEDULE C.

Copy of special law, grant, ordinance or contract or reference to general law under which "special franchise is held, possessed or enjoyed and statement of any condition, obligation or burden imposed upon such special franchise, or under which the same is enjoyed:"

Note: If this information was given in former report and copies filed, state such fact, giving only additional rights since last report.
Same remarks as under Schedule "B."
Any matter attached to the report should conform, if possible, to size of this blank.

SCHEDULE D.

Statement of Assets and Liabilities, June 30, 1905.

Assets.	Amount.

D VERTICAL IN BOOK

Statement of Cost to Reproduce New Property in Streets, Highways, Etc., Value, Less Depreciation and Same Outside, with Assessment in Each Tax District.

Name of each township and city, wherein located, and wards in city where different tax rates prevail.	Present value of property *in streets, highways, and public places* on basis of cost of reproduction (new).	Present value of property *in streets, highways, and public places* (allowing depreciation).	Present value of property *outside* streets, highways, and public places on basis of cost of reproduction (new).	Present value of property *outside* streets, highways, and public places (allowing depreciation).	Assessment of real estate *in* streets, highways, etc., in 1905.	Assessment of real estate *outside* streets, highways, etc., in 1905.	Remarks.
City of New York **Borough** of Manhattan	$5,801,466.10	$4,398,160.82	$106,065,283.38	....	....	$12,062,500.00	
			The details of this item appear in Schedule "D." It includes all property except the property in the streets as stated. It includes the value of the "Intangible Special Franchises" of the Company, there being no method by which the value of the "Special Franchises" can be separated from the Company's other property and Franchises.		The State Board in 1905 assessed the Special Franchise at $27,300,000.00 which includes the Company's Tangible property in the streets.		

7352 SCHEDULE L.

WALLACE YOUNG,
Notary Public,
[SEAL.] King County,

Certificate filed in N. Y. County.

Note.—*Italics* in Red ink in original.

7354 The accompanying blanks are an integral part of this report. A separate blank should be used for *each township, city, and for each ward in a city where the tax rates differ.* Additional blanks will be furnished if a sufficient number does not accompany the report.

They are intended for detailed data showing character of construction. Whenever there are peculiar conditions that tend to cause more rapid depreciation than ordinary, or any special conditions that tend to make the property less valuable, additional data should be furnished.

If any report does not contain the proper blanks for the different fields of construction needed to make a satisfactory report, other blanks will be furnished on request, covering surface street railroads, elevated railroads, surface steam railroads, telegraph, telephone, compressed air, oil, steam heat, electric light and power and subway construction. Other special blanks will be prepared if the nature of any special construction requires them.

The Law requires that every report made under this section shall have annexed thereto the affidavit of the President, Vice-President, Secretary or Treasurer of the association or corporation, or one of the persons or one of the members of the co-partnership making the same.

STATE OF NEW YORK, *County of New York, ss:*

R. A. Carter, Secretary of the Consolidated Gas Co. of N. Y., being duly sworn, deposes and says that the foregoing statements have been compiled from the books and records of this Company, and after careful examination of the same, declares them to be a true, full and correct statement of the property of said Company and the value thereof at the close of the year ending June 30, 1904, as well
7355 as of its financial condition and affairs on the said date, to the best of my knowledge and belief.

R. A. CARTER.

SCHEDULE B.

Description of special franchise, showing streets, highways or public places possessed or rights enjoyed and in what tax district or districts same is located.

Note: If this information was given in former report and map filed, state such fact, giving only additional grants since last report.

The information called for under this schedule was filed with the report for 1899, and reference is made thereto. A map filed at that time gave all the information that it is possible to give.

This report should be accompanied by maps showing the location and extent of all property subject to taxation as a "Special Franchise."

SCHEDULE C.

Copy of special law, grant, ordinance or contract or reference to general law under which "special franchise is held, possessed or enjoyed and statement of any condition, obligation or burden imposed upon such special franchise, or under which the same is enjoyed."

Note: If this information was given in former report and copies filed, state such fact, giving only additional rights since last report.

Statement under schedule "B" covers this question.

Any matter attached to the report should conform, if possible, to size of this blank.

7361

SCHEDULE D.

Statement of Assets and Liabilities, June 30, 1904.

Assets.	Amount.	Liabilities.	Amount.
Real Estate and Plant	$19,673,075.42	Capital Stock	$80,000,000.00

			$25,045,321.23

7365 SCHEDULE K. 7366 SCHEDULE K.

Statement of Cost to Reproduce New Property in Streets, Highways, Etc.; Value, Less Depreciation and Same Outside, with Assessment in Each Tax District.

Name of each township and city, wherein located, and wards in city where different tax rates prevail.	Present value of property *in streets, highways, and public places* on basis of cost of reproduction (new).	Present value of property *in streets, highways, and public places* (allowing depreciation).	Present value of property *outside* streets, highways, and public places on basis of cost of reproduction (new).	Present value of property *outside* streets, highways, and public places (allowing depreciation).	Assessment of real estate *in* streets, highways, etc., in 1904.	Assessment of real estate *outside* streets, highways, etc., in 1904.	Remarks.
City of New York **Borough** of Manhattan	$5,613,221.12	$4,261,156.39	$89,310,586.54	....	....	$13,606,000.00	
			The details of this item appear in Schedule "D." It includes all property except the property in streets as stated. It includes the value of the "Intangible Special Franchises" of the Company, there being no method by which the value of the "Special Franchises" can be separated from the Company's other property and Franchises.		The State Board in 1904 assessed the Special Franchise at $21,900,000.00, which includes the Company's Tangible property in the streets.		

Tax District, Borough of Manhattan City of New York

Is there any contest on 1904 personal assessment?.....		—No—

(Here follows fac-simile marked p. 7368.)

7369 The accompanying blanks are an integral part of this report. A separate blank should be used for *each township, city, and for each ward in a city where the tax rates differ.* Additional blanks will be furnished if a sufficient number does not accompany the report.

They are intended for detailed data showing character of construction. Whenever there are peculiar conditions that tend to cause more rapid depreciation than ordinary, or any special conditions that tend to make the property less valuable, additional data should be furnished.

If any report does not contain the proper blanks for the different fields of construction needed to make a satisfactory report, other blanks will be furnished on request, covering surface street railroads, elevated railroads, surface steam railroads, telegraph, telephone, compressed air, oil, steam heat, electric light and power and subway construction. Other special blanks will be prepared if the nature of any special construction requires them.

The Law requires that every report made under this section shall have annexed thereto the affidavit of the President, Vice-President, Secretary or Treasurer of the association or corporation, or one of the persons or one of the members of the co-partnership making the same.

STATE OF NEW YORK, *County of New York, ss:*

THE MAYOR, ALDERMEN & COMMONALTY OF THE CITY OF NEW YORK

TO

THE NEW YORK GAS LIGHT COMPANY.

Dated May 12th, 1823.

Articles of agreement indented, made and concluded this twelfth day of May, in the year of our Lord one thousand eight hundred and twenty-three, between the Mayor, Aldermen and Commonalty of the City of New York of the first part, and The New York Gas Light Company of the second part.

Witnesseth, that the said parties of the first part, for and in consideration of the covenants, articles and agreements hereinafter mentioned, on the part of the said parties of the second part, and their successors, to be observed, performed and kept, DO hereby grant, demise and to farm let, to the said parties of the second part, and their successors, All and singular the sole and exclusive privilege and right of laying or placing under ground pipes in all and every of the public streets and parts of streets of the City of New York, lying and being south of a line commencing at the East River at the foot of Grand Street, and running through Grand Street to Sullivan Street, and through Sullivan Street to Canal Street, and through Canal Street to the North or Hudson River, for conducting Gas, for lighting the public lamps in the streets and parts of streets south of said line, and the houses and buildings fronting, or to front on, or bounded by, or adjacent to the Streets or parts of Streets south of said line.

7384 To have and to hold and to enjoy the same unto the said parties of the second part and their successors from the day of the date of these presents, for and during and until the twelfth day of May, which will be in the year of our Lord one thousand eight hundred and fifty-three.

Provided, nevertheless, and this grant is upon this express condition, that the said parties of the second part, and their successors, shall and do in all things well and sufficiently keep, perform and observe, all and singular the covenants, articles, agreements and stipulations, on their part to be kept, performed and observed as hereinafter is set forth and agreed. And the said parties of the second part, in consideration of the premises, do, for themselves and their successors, covenant and agree, to and with the said parties of the first part, and their successors, as follows, that is to say, that they the said parties of the second part, shall and will before the twelfth day of May in the year of our Lord one thousand eight hundred and twenty-five, erect, establish and complete in the said City of New York, good and sufficient buildings, works and apparatus for the preparing and manufacture of gas, and that they will also cause the pipes for conducting the same, and of sufficient capacity, to be laid, and will also manufacture or cause to be manufactured and supplied, in the most approved manner, sufficient quantities of the best quality gas, commonly called inflammable gas, for lighting the houses and public lamps in the street called Broadway in the said city from the Battery to Grand Street, in the manner hereinafter mentioned. And also, moreover, that they the said parties of the second part, shall and will at all times from and after the twelfth day of May in the year of our Lord one thousand eight hundred and twenty-eight, and during the residue of the term of this 7385 grant, in like manner, cause the pipes, of sufficient capacity, for conducting the said gas to be laid, and will also manufacture or cause to be manufactured and supplied in the most approved manner, sufficient quantities of the said gas of the best quality for well and sufficiently lighting the streets, parts of streets and public places, and the public lamps and houses adjoining or to adjoin all and singular the streets and parts of streets lying in the said city, south of the aforesaid line, at such periods as the said parties of the first part shall from time to time, after the said twelfth day of May in the year of our Lord one thousand eight hundred and twenty-eight, by resolution or by-law reasonably require of the said parties of the second part. And that all such pipes to be furnished by the said parties of the second part, and placed underground, for the purpose of conducting the said gas, in all or either of the said streets or parts of streets shall be made and constructed in the most approved manner of cast iron, and of the best materials. And also that the said parties of the second part shall and will light such and so many of the public lamps, with the best quality of gas, as are in the streets or parts of streets of the said city, south of the aforesaid line whenever they may be required to light the same, or any number of the same, by the said parties of the first part, or their successors; the said lamps to be lighted during such times as the public lamps are now required to be lighted and in the streets or parts of streets in which the pipes for conducting gas shall be laid according to these presents, at a yearly expense to the said parties of the first

part not exceeding what would be the expense of lighting and supplying an equal number of the said lamps with oil of the quality generally used for that purpose, estimating the price of
7386 oil at the average price of the same in the city of New York during the preceding year. And further that the said parties of the second part shall likewise furnish at their own expense, the necessary conductors of metal of sufficient capacity to the lamp posts; that the lights of the said lamps shall be of a quality, brilliancy or intensity equal to the gas in use for the public lamps in the city of London; the said parties of the first part, however, to be at the expense of lamps, lamp irons, lamp posts and fittings up, and at no other expense for fixtures, conductors, repairs, or on any other account whatsoever. And also that the said parties of the second part shall and will, at all times, give forty-eight hours' notice to the said parties of the first part, or to their street commissioner of their intention to break up or open any street, or part of a street, for the purpose of laying or repairing the pipes to conduct the gas, and that they will replace the earth which they may remove in so doing, before sunset of the day on which any such opening shall be made. And that they will replace the pavements and repave and repair the same in such reasonable time and manner as the said parties of the first part, or their street commissioner may direct, and in as good and firm a manner as the streets were in before being broken up for the aforesaid purposes. And further that all such repairs as shall at any time become necessary by reason of the said pipes or conductors shall always be made and done by the said parties of the second part at their own cost and expense. And also that the said parties of the second part will so conduct their manufactory or manufactories of gas as not to create a nuisance and that they will in all things be governed by such reasonable and necessary rules and regulations as the said parties of the first part or their successors may from time to time pass, ordain and establish
7387 relative to the opening of streets and laying down the pipes and conductors aforesaid.

Provided always, that nothing in this grant contained shall be construed to prevent any person or persons residing on, adjacent or near to any of the said streets or parts of streets in said city south of the aforesaid line, from erecting in or on his or their own premises, any building or apparatus to light with gas his or their own house or manufactory.

And provided further, and the premises hereby granted, are also upon this express condition, anything herein contained to the contrary notwithstanding, that if the said parties of the second part, or their successors, shall not well and faithfully observe, perform, fulfil and keep, all and singular the covenants and conditions above contained, on their part and behalf to be observed, performed, fulfilled and kept, according to the true intent and meaning of these presents, then and in that case it shall and may be lawful for the said parties of the first part, in Common Council convened, by a resolution or order to annul and vacate this grant, and thereupon the premises hereby demised shall be revested in the said parties of the first part, or their successors, as fully and completely as if this Indenture had never been executed.

In witness whereof, to one part of this Indenture, remaining with the said parties of the first part, the said parties of the second part have caused the Common Seal of the said The New York Gas Light Company to be affixed; and to the other part thereof remaining with the said parties of the second part, the said parties of the first part have caused the Common Seal of the City of New York to be affixed, the day and year above written.

7388 NOTE: The words "and in the streets or parts of streets in which the pipes for conducting gas shall be laid according to these presents," interlined before execution.

STEPHEN ALLEN.

By the Common Council,

[L. S.] J. MORTON, *Clerk.*

CITY AND COUNTY OF NEW YORK, *ss:*

On the twenty-second day of May, in the year of our Lord one thousand eight hundred and twenty-three, before me personally, came Jacob Morton, who is known to me, and being by me duly sworn, did depose and say that he is the Clerk of the Common Council of the City of New York, and has the custody of the Seal of the Mayor, Aldermen and Commonalty of the City of New York, the parties of the first part described in and who have executed the preceding deed; that the seal thereto affixed is the Common Seal of the said The Mayor, Aldermen and Commonalty of the City of New York and was so affixed by him, the deponent, pursuant to an order by them made; that the signature "Stephen Allen," thereto subscribed, is the proper handwriting of Stephen Allen, the Mayor of the said city, and that the signature "J. Morton, Clerk," also thereto subscribed, is the proper handwriting of the said deponent.

JOHN W. MULLIGAN,
Commissioner under Act of 24th March, 1818.

Recorded (this Instrument) in the office of Register in and for the City and County of New York in Lib. 169 of Conveyances, Page 178, on the 15th day of August, 1823, at 54 min. past 2 o'clock P. M.

COMPLAINANT'S EXHIBIT 102.

GRANT TO THE MANHATTAN GAS LIGHT COMPANY.

Dated May 5, 1848.

This indenture made the fifth day of May in the year of our Lord, one thousand eight hundred and forty-eight.

Between the Mayor, Aldermen and Commonalty of the City of New York, of the first part, and the Manhattan Gas Light Company of the second part.

Witnesseth, that the said parties of the first part for and in consideration of the covenants, articles and agreements hereinafter mentioned on the part of the said parties of the second part and their successors, to be observed, performed and kept, do hereby grant and demise to the said parties of the second part and their successors, the privilege and right to lay or place underground pipes in any and all of the streets, avenues and public places of the city of New York, comprised between a line commencing at the East River at the foot of Grand Street and running through the middle of Grand Street to Sullivan Street and through the middle of Sullivan Street from Grand Street to Canal Street, and through the middle of Canal Street from Sullivan Street to the North or Hudson's River and a line commencing at the East River at the foot of Forty-second Street, on the north side thereof and running parallel with said street to the North or Hudson's River and embracing both sides of said street, and in any or every part of any such street, avenue or public place for the purpose of conducting gas, commonly called inflammable gas, for lighting the public lamps in the said streets, avenues and public places and parts thereof as hereinafter mentioned and for lighting the houses and buildings fronting or to front on or bounded by or adjacent to the said streets, avenues and public places or parts thereof. To have, hold, use and enjoy the said right and privilege unto the said parties of the second part and their successors from the day of the date of these presents until the fifth day of May which will be in the year one thousand eight hundred and sixty-eight. Provided always, and these presents are upon this express condition, that they the said parties of the second part and their successors, shall and do in all things well and sufficiently keep, perform and observe all and singular the covenants, articles, agreements, provisions and stipulations on their part to be kept, performed and observed as hereinafter specified. 7390

And the said parties of the second part in consideration of the premises do for themselves and their successors covenant and agree to and with the said parties of the first part and their successors as follows: that is to say, that any gas house or work for the manufactory of such gas which the said parties of the second part hereafter may use or erect and establish in the city of New York, shall be located, erected and established on the margin of either the Hudson or the East River and not south of Fourteenth Street in the said city, and that all pipes for conducting the gas which the said parties of the second part may cause to be laid, shall be of sufficient capacity and made and constructed of the best materials of cast iron and in the most approved manner. That the said parties of the first part shall have the right to order the pipes called the mains of the company, to be extended in and along all the streets, avenues and public places in the said city within the limits aforesaid, commencing at Grand and Canal Streets and continuing through each street 7391 in regular succession. Provided, however, that the said parties of the second part shall not be compelled to expend in the laying of said mains as last aforesaid during the continuance of this contract, a yearly sum to exceed six thousand dollars. Also that the said parties of the second part shall fit up and light all the public lamps required by the corporation wherever the pipes of the Company are or shall be laid within the district aforesaid, and that the said lamps shall be so lighted during such times as the public lamps throughout the city of New York are required to be lighted by the regulations of the said parties of the first part, and that all such public lamps situated within the district aforesaid which shall be required by the corporation as aforesaid, shall be so supplied and lighted by the said parties of the second part at the yearly rate of fifteen dollars for each lamp, for the light and for lighting and extinguishing the same. Also that the said parties of the first part may direct and require by notice to that effect, that all or any portion of said public lamps shall be lighted and kept burning at any other time or times during the continuance of this contract, and the said parties of the second part shall light the same and continue them burning in accordance with any and every direction of the said parties of the first part, or their proper agent or agents to that effect. Provided that if in compliance with the direction of the said parties of the first part, the whole number of hours during which the said lamps or portion of them are kept burning in any year shall exceed the average number of hours during which the public lamps in the city of New York have been kept burning during the last five years prior to the date of this contract (which the parties hereto estimate to be 7392 and fix at Two thousand three hundred hours), then and in that case the said parties of the second part shall be entitled to claim and receive for such additional number of hours, during which the public lamps or a portion of them in the district aforesaid are kept burning, in accordance with such direction of the said parties of the first part, an additional compensation, equivalent to a pro-rata increase of the compensation hereinbefore allowed, proportioned to the increased number of hours beyond the said average number.

The burners in the public lamps shall be equal to those heretofore used in the City of New York, equal to an average consumption of three cubic feet per hour.

And it is further agreed that the said parties of the second part shall furnish at their own expense, the necessary conductors of metal of sufficient capacity to the lamp posts of such public lamps as they may be required to supply with gas and light as aforesaid. The parties of the second part shall also fit up the said public lamps and shall receive as compensation therefor the sum of Five dollars for each lamp so fitted up. It is agreed, however, that the cost of the posts, lanterns and repairs shall be at the expense of the said parties of the first part.

And it is further agreed that the said parties of the second part shall have the right to lay pipes at any time within the said district upon giving forty-eight hours notice to the said parties of the first part, or to the Street Commissioner, of their intention to break up or open any street, avenue or public place or part thereof, or to remove any part of the pavement thereof for the purpose of laying or repairing the pipes to conduct the said gas and that they will replace the earth which they may remove in so doing before sunset of the
7393 day on which such opening shall be made, and that they will replace the pavement and repave and repair the same in such reasonable time and manner as the said parties of the first part or their Street Commissioner may direct, and in as good and firm a manner as such streets, avenues or public places or parts thereof were in before being broken up for the purpose aforesaid. Also that all such repairs as shall at any time become necessary by reason of laying the said pipes or conductors shall be made and done by the said parties of the second part at their own cost and expense. Also that no such street, avenue or public place or part thereof removed, or shall be so broken up or opened, or the pavement thereof removed, or shall be again filled up or repaired except under the direction and supervision of a competent person to be appointed by the said Street Commissioner, but the said parties of the second part shall not be called upon to pay any sum to any party or parties for the inspection of any pavement which they may have occasion to replace.

And it is further agreed that the said parties of the second part shall and will so conduct the manufactory or manufactories of gas as not to create a nuisance and that they will in all things be governed by such reasonable and necessary rules and regulations as the said parties of the first part or their successors may from time to time pass, ordain and establish relative to the opening of such streets, avenues or public places or parts thereof and laying down the pipes and conductors aforesaid.

And it is hereby expressly provided that nothing herein contained shall be construed or deemed as granting to the said parties of the second part any sole or exclusive right or privilege, or as preventing the said parties of the first part for granting the like privileges
7594 as are hereby given, to the said parties of the second part to any other company, persons or parties whatsoever, or as preventing any person or persons residing on or adjacent or near to any of the said streets, avenues or public places or parts thereof lying north of the line hereinbefore first mentioned from erecting in or upon his or their own premises any building or apparatus to light with gas, his or their own house, store, manufactory or premises.

And it is further covenanted and agreed by and on the part of the said parties of the first part, that the said parties of the first part and their successors shall and will pass all needful ordinances which shall be necessary to protect the interests of the said parties of the second part and which of right ought to be passed for that purpose.

And it is further provided that these presents are upon the express condition that if the said parties of the second part, or their successors, shall not well and truly observe, perform and fulfill and keep all and singular the covenants and conditions hereinbefore contained on their part and behalf to be observed, performed, fulfilled and kept, according to the true intent and meaning of these presents, then and in that case, it shall and may be lawful for the said parties of the first part by a resolution or order to be passed in Common Council, to annul and vacate this grant and thereupon the premises hereby demised shall be revested in the said parties of the first part or their successors as fully and completely as if this indenture had never been executed.

In witness whereof, to one part of this indenture remaining with the said parties of the first part, the said parties of the second part have caused the common seal of the said the Manhattan Gas Light Company to be affixed, and to the other part thereof remaining with the said parties of the second part, the said parties of the first part have caused the common seal of the City of New York to be affixed the day and year above written. 7395

7396 COMPLAINANT'S EXHIBIT 103.

GRANT TO THE MANHATTAN GAS LIGHT COMPANY.

Dated May 8, 1833.

This Indenture, made this eighth day of May in the year of our Lord one thousand eight hundred and thirty-three between the Mayor, Aldermen and Commonalty of the City of New York, of the first part, and the Manhattan Gas Light Company of the second part, Witnesseth, that the said parties of the first part, for and in consideration of the covenants, articles and agreements hereinafter mentioned, on the part of the said parties of the second part and their successors, to be observed, performed and kept, do hereby grant and demise to the said parties of the second part and their successors, the privilege and right to lay or place underground, pipes in any and all of the streets, avenues and public places of the City of New York, lying and being north of a line commencing at the East River, at the foot of Grand Street, and running through Grand Street to Sullivan Street, and through Sullivan Street to Canal Street, and through Canal Street to the North or Hudson River, and in any or every part of any such street, avenue or public place for the purpose of conducting gas, commonly called inflammable gas, for lighting the public lamps in the said streets, avenues and public places, and parts thereof, as hereinafter mentioned, and for lighting the houses or buildings fronting or to front on or bounded by or adjacent to the said streets, avenues and public places or parts thereof. To have, hold, use and enjoy the said right and privilege unto the said parties of the second part, and their successors, from the day of the date of these presents,
until the twelfth day of May, which will be in the year of our
7397 Lord one thousand eight hundred and fifty-three; provided
always, and these presents are upon this express condition, that they, the said parties of the second, and their successors, shall and do, in all things well and sufficiently keep, perform and observe, all and singular, the covenants, articles, provisions, agreements and stipulations on their part to be kept, performed and observed, as hereinafter specified.

And the said parties of the second part, in consideration of the premises, do for themselves, and their successors, covenant and agree to and with the said parties of the first part, and their successors, as follows, that is to say, that any gas house or works, for the manufactory of such gas, to be erected or established by the said parties of the second part, in the City of New York, shall be so erected and established on the margin either of the Hudson or of the East River, not south of Fourteenth Street in the said city; and that all pipes for conducting the same which the said parties of the second part may cause to be laid, shall be of sufficient capacity, and made and constructed of the best materials of cast iron, and in the most approved manner; also, that from all such main pipes, as they may lay or cause to be laid by virtue of the right and privilege hereby granted, they will supply with gas, and cause to be lighted such and so many of the public lamps opposite or adjacent to such main pipes as they may from time to time be required to do by the said parties of the first part, and that the said lamps shall be so lighted during such times as the public lamps throughout the City of New York are required to be lighted, by the regulation of the said party of the first part, and that all such public lamps situated north of the line aforesaid, and south of the line of Sixth Street, which the said parties of the first part may require to be so supplied with gas, and 7398 lighted as aforesaid, shall be so supplied and lighted by the said parties of the second part, at a yearly expense to the said parties of the first part, not exceeding fifteen dollars for supplying each of such lamps with gas, and lighting the same. And it is further agreed that the said parties of the second part shall furnish at their own expense, the necessary conductors of metal of sufficient capacity to the lamp posts of such public lamps as they may be required to supply with gas and light as aforesaid; and that the light of the said lamps shall be of a quality, brilliancy or intensity equal to the gas in use for the public lamps in the City of London. It is understood, however, that the parties of the first part are to be at the expense of such lamps, with their lamp irons, lamp posts and fittings up, but at no other expense for fixtures, conductors, repairs, or on any other account whatsoever for the same. And it is further agreed that the said parties of the second part shall at all times give forty-eight hours' notice to the said parties of the first part, or their Street Commissioner, of their intention to break up or open any street, avenue or public place or part thereof, or to remove any part of the pavement therefrom, for the purpose of laying or repairing the pipes to conduct the said gas, and that they will replace the earth which they may remove in so doing, before sunset of the day on which such opening shall be made, and that they will replace the pavement and repave and repair the same in such reasonable time and manner as the said parties of the first part, or their Street Commissioner may direct, and in as good and firm a manner as such streets, avenues and public places or parts thereof were in before being broke up for the purpose aforesaid. Also, that all such repairs as shall at any time become necessary by reason of laying the said pipes or conductors, shall be made and done by the said parties of the second part, at their own cost and expense. Also that no such street, avenue or 7399 public place or part thereof shall be so broken up or opened or the pavement thereof removed, or shall be again filled up or repaired or such pavement replaced, except under the direction and supervision of a competent person to be appointed by the said Street Commissioner, and who shall be considered as in the employ of the said parties of the first part, but who shall be paid for his services by the said parties of the second part, such sum as the said Street Commissioner may direct, not exceeding one dollar and fifty cents per diem for each day that he may be so employed. Also, that no such street, avenue or public place, or part thereof shall be so broken up or opened, or the pavement thereof removed at any time between the first of December and the first of March during the continuance of the term mentioned in these presents, without the consent of the said Street Commissioner being first obtained for that purpose.

And it is further agreed that the said parties of the second part shall and will so conduct their manufactory or manufactories of gas, as not to create a nuisance, and that they will in all things be governed by such reasonable and necessary rules and regulations as the said parties of the first part, or their successors may, from time to time, pass, ordain and establish, relative to the opening of such streets, avenues or public places, or parts thereof, and laying down the pipes and conductors aforesaid.

And it is hereby expressly provided, that nothing here in contained shall be construed or deemed as granting to the said parties of the second part, any sole or exclusive right or privilege, or as preventing the said parties of the first part from granting the like privileges as are hereby given to the said parties of the second part, to any other company, persons or parties whatsoever, or as preventing any person or persons residing on or adjacent or near to any of the said streets, avenues or public places, or parts 7400 thereof, lying north of the line hereinbefore first mentioned, from erecting in or upon his or their own premises, any building or apparatus, to light with gas, his or their own house, store, manufactory or premises. And it is further provided, and these presents are upon the express condition, that if the said parties of the second part, or their successors, shall not well and truly observe, perform, fulfill and keep all and singular, the covenants and conditions hereinbefore contained, on their part and behalf to be observed, performed, fulfilled and kept, according to the true intent and meaning of these presents, then and in that case, it shall and may be lawful for the said parties of the first part, by a resolution or order to be passed in Common Council, to annul and vacate this grant, and thereupon, the premises hereby demised shall be revested in the said parties of the first part, or their successors, as fully and completely as if this indenture had never been executed.

In witness whereof, to one part of this indenture remaining with the said parties of the first part, the said parties of the second part, have caused the common seal of the said The Manhattan Gas Light Company to be affixed and to the other part thereof remaining with the said parties of the second part, the said parties of the first part have caused the common seal of the City of New York to be affixed, the day and year, above written.

By the Common Council,

[SEAL.] GIDEON LEE, *Mayor.*

J. MORTON, *Clerk.*

Endorsed: Agreement between the Mayor, Aldermen and Commonalty of the City of New York and The Manhattan Gas Light Company.

Approved:
R. EMMET.

7401 COMPLAINANT'S EXHIBIT 104.

GRANT TO THE HARLEM GAS-LIGHT COMPANY.

Resolved, That the consent of the Mayor, Aldermen and Commonalty of the City of New York is hereby given to "The Harlem Gas-Light Company," to lay conductors for conducting gas through the streets, avenues, lanes, alleys, and squares, in all that portion of the city lying north of the center line of Seventy-ninth Street, for the purpose of supplying gas to public and private buildings, in consideration of the following articles being faithfully complied with.

First. The said company shall not impede or interrupt public travel in the laying of such mains more than cannot possibly be avoided; and shall, after opening any street, lane, alley, or square, depositing their mains, restore the same to as good condition as the same was before such opening, and be at all times subject to such restrictions, ordinances, and resolutions as the Common Council of said City may, from time to time, adopt, and under the control of the Street Department of said city.

Second. They shall furnish a supply of gas to all persons who may desire the same, and shall deprive no consumer of gas upon their refusal to pay, or for a dispute of the bill rendered, until they have served such disputant with the affidavit of their inspector as to the correctness of the register of their meter, and that all the gas for which said disputants are charged has actually passed through said meter.

Third. The Mayor, Aldermen, and Commonalty of said city hereby reserve the right to purchase, at any time, from the 7402 said company, all the materials, pipes, fixtures, buildings, and all and singular all the personal and real property owned by said company, by paying to the said company the cost of the same, and ten per cent. over and above the said cost.

Fourth. The permission herein granted, is upon the express condition that said company shall proceed immediately, or within one year from the approval by the Mayor, of the resolution, to lay their mains in the district as embraced in this grant, and supply, at least within two years from its passage, gas to be used by the corporate authorities or private consumers.

Fifth. The said company shall be exempt from taxation on their personal property for the period of three years from the organization of said corporation, pursuant to the power granted for this purpose by the eighteenth section of "An Act to authorize the formation of gas-light companies," passed by the Legislature of the State of New York, February 16, 1848.

Sixth. The Mayor, Aldermen, and Commonalty also retain the right to revoke any and all permission, which may be herein granted, upon satisfactory proof being afforded of a failure of the said "Harlem Gas Light Company" to comply with these conditions as herein expressed, or of any neglect to comply with any resolution or ordinance, which may be hereafter adopted, and nothing herein contained shall be construed as giving any exclusive permission whatever to the said Harlem Gas Light Company.

Adopted by the Board of Aldermen, March 26th, 1855.

7403 THE CITY OF NEW YORK.

I, P. J. Scully, Clerk of the said City, do certify, that I have compared the preceding with the original resolution granting permission to the "Harlem Gas Light Company" to lay conductors through the streets, etc., of the City of New York, north of Seventy-ninth Street.

Adopted by the Board of Aldermen, March 26th, 1855, — on file in my office, and that the same is a correct transcript therefrom and the whole of such original.

It witness whereof, I have hereunto subscribe- my name and affixed my official seal this 31st day of July, 1906.

P. J. SCULLY, *Clerk.*

GRANT TO THE HARLEM GAS-LIGHT COMPANY.

Resolved, That the consent of the Mayor, Aldermen, and Commonalty of the City of New York is hereby given to "The Harlem Gas-Light Company," to lay conductors for conducting gas through the streets, avenues, lanes, alleys, and squares, in all that portion of the city lying north of the centre line of Seventy-ninth Street, for the purpose of supplying gas to public and private buildings, in consideration of the following articles being faithfully complied with:

First. The said company shall not impede or interrupt public travel in the laying of such mains more than cannot possibly be avoided; and shall, after depositing their mains, restore the same to as good condition as the same was before such opening, and 7404 be at all times subject to such restrictions, ordinances, and resolutions as the Common Council of said city may, from time to time, adopt, and under the control of the street department of said city.

Second. They shall furnish a supply of gas to all persons who may desire the same, and shall deprive no consumer of gas upon their refusal to pay, or for a dispute of the bill rendered, until they have served such disputant with the affidavit of their inspector as to the correctness of the register of their meter, and that all the gas for which said disputants are charged has actually passed through said meter.

Third. COMPLAINANT'S EXHIBIT 106.

GRANT

from

The Mayor, Aldermen, etc. of the City of New York,

to

The Anthracite Gas Lighting and Heating Company

September 17th, 1863.

Amended May 26th, 1865.

Resolved, that there be, and hereby is granted to "The Anthracite Gas Lighting and Heating Company of New York," to right to lay pipes and mains for conducting gas for illuminating and heating, and other purposes, through the streets, avenues, lanes, alleys, squares and other public places in the City of New York for a period of fifty years as provided by the General Manufacturing Laws of the State of New York, the said conductors to be laid under the supervision of the Street Commissioner, the said Company being required to restore the streets, opened by them for laying such 7408 pipes to the same condition as before the said pipes and mains were laid.

Adopted by the Board of Councilmen, June 18, 1863.
Adopted by the Board of Aldermen, June 22nd, 1863.

By Board of Councilmen, July 6th 1863, received from his Honor the Mayor, with his objections thereto.

By Board of Councilmen, August 3, 1863, taken up and adopted, notwithstanding the objections of his Honor the Mayor two thirds of all the members elected having voted in favor thereof.

By Board of Aldermen, September 17th, 1863, taken up, and adopted notwithstanding the objection of his Honor the Mayor, two-thirds of all the members elected having voted in favor therefor; therefore, under the provisions of the Amended Charter, the same became adopted.

D. T. VALENTINE,
Clerk of Common Council.

THE CITY OF NEW YORK.

I, P. J. Scully, Clerk of the said City, Do certify, that I have compared the preceding with the original resolution granting to "The Anthracite Gas Lighting and Heating Co. of New York" the right to lay pipes and mains for conducting gas, etc. through the streets, avenues, etc., of the City of New York, on file in my office and that the same is a correct transcript therefrom and the whole of such original.

In witness whereof I have hereunto subscribed my name and affixed my official seal this 20th day of July 1906.

P. J. SCULLY, *Clerk.*

7409 Resolved, that the resolution granting permission to the "Anthracite Gas Lighting and Heating Company of New York," the right to lay pipes and mains for conducting gas, which became adopted, September 17th, 1863, be, and hereby is amended by adding after the words "New York" in the second line of said resolution, the words "and their assigns."

Adopted by the Board of Councilmen, May 18th, 1865.
Adopted by the Board of Aldermen, May 24th, 1865.
Approved by the Mayor, May 26th, 1865.

THE CITY OF NEW YORK.

I, P. J. Scully, Clerk of the said City, do certify, that I have compared the preceding with the original resolution amending the resolution granting permission to the "Anthracite Gas Lighting and Heating Company of New York," the right to lay pipes and mains for conducting gas, etc., on file in my office, and that the same is a correct transcript therefrom, and the whole of such original.

In witness whereof, I have hereunto subscribed my name and affixed my official seal this 20th day of July, 1906.

THE ANTHRACITE GAS LIGHTING AND HEATING COMPANY OF NEW YORK.

to

THE CITIZENS MUTUAL GAS COMPANY OF NEW YORK.

Dated, May 27, 1865.

This indenture made this twenty-seventh day of May in the year Eighteen hundred and sixty-five:

Between

The Anthracite Gas Lighting and Heating Company of New York, party of the first part, and The Citizens' Mutual Gas Company of New York, party of the second part. Witnesseth:

Whereas, the party of the first part has duly sold unto the party of the second part all its rights and interests in the several inventions and patents and the franchises held by the said party of the first part in relation to laying pipes and mains for conducting gas for illuminating and heating purposes and acquired from the city of New York on the 17th day of September, 1863.

And whereas the party of the first part by a resolution, this day passed, of its board of directors, authorized its President to make and execute all necessary conveyances and transfers, to transfer and vest said inventions and patents and franchises in the said Citizens Mutual Gas Company.

Now therefore in consideration of the premises and other valuable considerations and of one dollar in hand paid, the receipt whereof is hereby acknowledged, the said party of the first part, The Anthracite Gas Lighting and Heating Company of New 7417 York, doth hereby sell, transfer, assign and set over unto The Citizens' Mutual Gas Company of New York, the party of the second part: All and singular, all its right, title, interest and possession of, in and to the several inventions and patents of every name, character and description by it owned or in any way acquired or in which it has any right, privilege or interest; together with all its right, franchise and privilege and permission to lay pipes and mains for conducting gas for illuminating and heating and other purposes through the streets, avenues and lanes and other public places in the city of New York for the period of fifty years, together with all the privileges incident and appurtenant, thereto, acquired by the said party of the first part from the city of New York by the action of the Board of Councilmen, June 18, 1863; of the Board of Aldermen, June 22nd, 1863; of the Board of Councilmen, August 3d, 1863; of the Board of Aldermen, September 17th, 1863; and also by the subsequent action of the Board of Councilmen, May 18, 1865; the Board of Aldermen, May 24th, 1865, and approved by the Mayor, May 26th, 1865, for the said party of the second part to have and to hold the same to and for itself and its assigns forever.

And the said party of the second part doth hereby further covenant to execute any other or further instrument, assignment or transfer, that counsel learned in the law, may advise, when demanded by the party of the second part, to more effectually vest the title of the whole or any part of the inventions, patents or franchises herein and hereby conveyed and to make it or its assigns the full and perfect owner thereof.

7418 In witness whereof, the said The Anthracite Gas Lighting and Heating Company of New York has caused these presents to be duly signed by its president and secretary, the day and year above written, the said Company having no seal.

For the Anthracite Gas Lighting and Heating Company of New York,

CERTIFIED COPY OF CERTIFICATE OF INCORPORATION

of

UNION GAS LIGHT CO.

Dated October 6, 1871.

STATE OF NEW YORK, *City and County of New York, ss:*

7419 We, the undersigned, do hereby certify that we have associated together as a corporation under and by virtue of an Act of the Legislature of the State of New York, entitled "An Act to authorize the formation of gas light companies," passed February sixteenth, in the year eighteen hundred and forty-eight, and of the several acts amendatory and additional thereto for the purpose and object of manufacturing, vending and supplying gas for lighting the streets, and public and private buildings in and of the City of New York and for heating and other mechanical uses and objects, and also for the purpose of buying, taking, employing and adopting all things necessary and convenient to and in the manufacturing of such gas.

That the company shall continue and exist for the term of fifty years from this the date of its formation.

That the corporate name is "The Union Gas Light Company of the City of New York."

That the amount of the capital stock of the company is Five millions of dollars and said capital stock is divided into fifty thousand shares of One hundred dollars each.

That the number of directors is seven, and their names are James M. Ryder, Henry M. Benedict, Frank F. Jones, Edwin R. Bennet, Gordon H. Waddell, John Sickels and Francis C. White, all of the City of New York who will and shall manage the concerns of said company for the first year of its existence.

That the City and County of New York in the State of New York is the place in which the operations of the company are to be carried on.

In certification of which we hereunto subscribe our names this the 26th day of October, in the year of our Lord one thousand eight hundred and seventy-one.

7421 COMPLAINANT'S EXHIBIT 111.

THE CITIZENS' MUTUAL GAS COMPANY OF THE CITY OF NEW YORK

to

THE UNION GAS LIGHT COMPANY OF THE CITY OF NEW YORK.

Dated November 22d, 1871.

This indenture made this twenty-second day of November, 1871, made between The Citizens' Mutual Gas Company of the City of New York, party of the first part, and the Union Gas Light Company of the City of New York of the second part,

Witnesseth:

Whereas the party of the first part is the owner of certain rights and privileges in regard to laying pipes and mains for conducting gas in and through the streets, avenues, lanes and public places of the City of New York acquired by purchase from the Anthracite Gas Lighting and Heating Company of New York.

And Whereas, the Union Gas Light Company of New York did on the 18th day of November propose to purchase the same of the party of the second part, according to the terms of a written proposition bearing that date,

And Whereas, the Board of Directors of the said Citizens' Mutual Gas Company of New York did on the said 18th November, 1871, duly accept the said proposition of the party of the second part and did sell and authorize the sale of the rights and privileges aforesaid to the party of the second part upon the terms therein specified and did authorize, empower and direct the officers of said company to make and execute the necessary and proper transfer of the same,

7422 Now, Therefore, under and pursuant to the terms and provisions of the said Resolution of the Board of Directors of the said party of the first part and by the authority therein and thereby granted, the Citizens' Mutual Gas Company of New York, the said party of the first part, does hereby for and in consideration of the sum of six thousand five hundred dollars in cash and two hundred and thirty-seven thousand dollars in the full paid shares of the Capital Stock of the said Union Gas Light Company, according to the terms and privilege as elected and accepted by the party of the first part, sell, transfer and assign unto the Union Gas Light Company of the City of New York, the party of the second part, the right, privilege and permission to lay pipe and mains for conducting gas for illuminating and heating and other purposes through the streets, avenues and lanes and other public places in the City of New York for the period of fifty years, together with all the privileges incident and appurtenant thereto.

In Witness Whereof, the said Citizens' Mutual Gas Company of New York, the party of the first part, has caused these presents to be signed by its President and Secretary and attested by its corporate seal, this twenty-second day of November, 1871, at the City of New York.

JOHN WHITE, *President.*
[SEAL.] JOHN SICKELS, *Secretary.*

Two U. S. Internal Revenue Stamps 5c. Each.

STATE OF NEW YORK, *City and County of New York, ss:*

On this twenty-second day of November in the year 1871 before me personally came John White, the President of the Citizens' 7423 Mutual Gas Company of New York and John Sickels, the Secretary of said Company, with each of whom I am personally acquainted and who being by me severally duly sworn said, the said John White that he was the President of the Citizens' Mutual Gas Company of New York, and the said John Sickels that he was the Secretary of the said Company, that they each resided in the City of New York, that they knew the corporate seal of said Company, that the seal affixed to the above instrument was such corporate seal, that it was affixed by order of the Board of Directors of said Company and that they signed their names thereto by the like order as President and Secretary respectively of the said Company.

7424 COMPLAINANT'S EXHIBIT 112.

At a Special Term of the Supreme Court, held at the Court House in the City of New York on the fifteenth day of June, 1875.

Present: Hon. JOHN R. BRADY, Justice.

THE PEOPLE OF THE STATE OF NEW YORK
against
THE UNION GAS LIGHT COMPANY OF THE CITY OF NEW YORK, and
JAMES BOORMAN JOHNSON, Trustee, etc.

A motion having been made herein on behalf of the plaintiff for the appointment of a Receiver of the property and franchises of the Union Gas Light Company in accordance with the Statue in such case made and provided, and also for an injunction against the defendant Johnson as by reference to the motion papers herein will more fully and clearly appear.

And the said motion now coming on to be heard, and Freeman J.

Freeman, Esq., as Counsel for the People, duly delegated and authorized by the Attorney General, having appeared in support of the said motion, and the Union Gas Light Company and James B. Johnson the defendants having appeared in this action by Richard M. Harison, their attorney, and having by their said attorney expressly waived any and all objections for want of notice, and admitted due and legal service of the motion papers herein, now 7425 therefore, on the Complaint herein and the affidavit of F. J. Fithian and on motion of Mr. Fithian of Counsel for the plaintiff after hearing Mr. Harison of Counsel of the Union Gas Light Company and James Boorman Johnson, Trustee, &c.

It is ordered that Charles Edgar Appleby, of Glen Cove, Long Island, be and he is hereby appointed Receiver of all and singular the property, franchises and effects of every description of the said Union Gas Light Company of the City of New York with all *the* singular *and* appurtenances in anywise thereto appertaining, and of all records books, papers and accounts of said Company in anyway relating to the business thereof and necessary to enable him properly and efficiently to discharge the duties imposed upon him by this order; and the said Receiver is hereby vested with all such other and general powers as it is usual, and in accordance with the rules and practice of this court to confer upon Receivers in like cases.

And it is ordered that he give a bond for the faithful performance of his duties as such Receiver in the sum of Five thousand dollars with sureties to be approved as to form and sufficiency by one of the Justices of this Court, and that on the filing of such Bond he enter forthwith upon the performance of his duties as such Receiver.

AND IT IS FURTHER ORDERED,

1st. That as soon as may be after entering upon his office the said Receiver make and file with the clerk of this Court a true, full and complete Inventory of all and singular the property of the said corporation, seal, personal and mixed, and also a like statement of the debts and liabilities of the said Company.

2nd. That he have power to prosecute and defend with- 7426 out the further order of this Court, all existing actions by or against the said Company, and to commence and prosecute any actions, which in the usual course of business he may deem necessary and proper to commence hereafter, either in the name of the said Company, or in his own name as such Receiver, and to defend any and all suits which may hereafter be brought against the said Company, or himself, as such Receiver, and in respect to all of the aforesaid actions to pay and defray the usual and ordinary expenses incident thereto.

That he do all that may be needful to maintain and preserve the corporate organization and franchises of said corporation until final judgment herein and that he defray the proper and necessary expenses incident thereto.

3d. That the said Receiver have full power to compromise and settle any and all judgments or claims against the said corporation or its property, or in favor of the said corporation as against other parties and also to sell and dispose of any or all of the property and franchises of said Company whenever and upon such terms as he shall deem anvantageous to the interests of the creditors of the said corporation, provided, however, that no such compromise, settlement or sale shall be fully and completely consummated and carried out and the Receiver relieved from personal liability and responsibility on account thereof until the consent of confirmation of this Court shall have been first had and obtained to such compromise, settlement or sale.

4th. All moneys coming into the lands of the said Receiver from and such compromise and settlement or sale are to be held by him subject to the further order and direction of this Court and in all and singular the premises he shall be subject to such orders and 7427 directions as this Court may from time to time make and he is authorized to apply from time to time for such orders and directions as he may be advised.

5th. He shall keep a true, full and particular account of all his acts and doings as to such property and of all his payments and disbursements in the performance of the duties imposed upon him hereby, and he shall once in every three months, and oftener if required, render to this Court and file with the Clerk thereof a true, full and faithful account of all his said receipts and disbursements in the premises.

And the said Union Gas Light Company, its officers and agents are commanded and enjoined to deliver up to the said Receiver when he shall have qualified, all and singular of the property whereof he is hereby appointed Receiver.

Enter,

In Witness Whereof, I have hereunto subscribed my name and affixed my official seal this 27th day of July, 1906.

[L. S.] (Signed) PETER J. DOOLING, *Clerk.*

7428 COMPLAINANT'S EXHIBIT 113.

At a Special Term of the Supreme Court, held at the Court House in the City of New York, on the 24th day of July, 1876.

Present: Hon. T. R. WESTBROOK, *Justice.*

THE PEOPLE OF THE STATE OF NEW YORK
against
THE UNION GAS LIGHT COMPANY OF THE CITY OF NEW YORK and Others.

On reading and filing the petition of Charles Edgar Appleby, Receiver of the Union Gas Light Company of the City of New York, duly appointed by the Court, bearing date July 19, 1876, whereby it among other things appears that the said Receiver now holds in his hands, as assets of the said Union Gas Light Company certain franchises and rights to lay mains; an interest in a certain contract made by the Union Gas Light Company with William Foster, Junior, and certain others, grantees, of a grant from the City of New York, known as and described in Chapter 944 of the Laws of this State, passed June 12, 1871, which contract bears date the 25th of February, 1874, and any interest which the said Union Gas Light Company may have in and to the said State grant; and also certain checks of Cornelius S. Bushnell, amounting in the aggregate to the sum of $17,611.81; certain office furniture and fixtures of the value of about $250, 7429 and a claim against Cornelius S. Bushnell under the warranty clause in his deed of conveyance to the Union Gas Light Company of the real estate formerly owned by him, and that this constitutes all the property and rights which belong to said Company and which are now in the hands of the petitioner as such Receiver.

And it also appearing that there are now judgments and claims against the said Union Gas Light Company amounting in the aggregate to upwards of $300,000, and that it is desirable and proper, and for the best interests of all parties concerned, that all of the said property, rights, franchises and contracts should be sold forthwith at public auction, in order to close up and settle the affairs of the said Company.

Now on motion of James M. Varnum of Counsel for said Receiver and no one appearing in opposition, and upon filing proof of due service of the notice of motion.

It is Ordered that Charles Edgar Appleby, Receiver of the Union Gas Light Company of the City of New York, be and he is hereby authorized and directed to sell forthwith at public auction in the City of New York, all the right, title and interest of any Kind and nature whatsoever which the said Union Gas Light Company, or its Receiver, may have in or to certain franchises, or rights to lay mains in streets, avenues, &c., in the City of New York, acquired by the Union Gas Light Company by intermediate assignments from the Anthracite Gas Lighting and Heating Company, to which last named Company and its assigns, the said franchises and rights were granted by the Municipal authorities of the City of New York by an ordinance passed by the Common Council, September 17th, 1863, and amended subsequently by the said Common Council, and approved by the Mayor of the City of New York on or about the 26th day of May, 1865, which said franchises and rights were assigned 7430 to the Union Gas Light Company by assignment bearing date the twenty-second day of November, 1871; (and also all the interest of the said Union Gas Light Company or its Receiver in and to a certain contract made by the Union Gas Light Company with William Foster, Junior, and certain other grantees, of a grant from the State of New York, Known as and described in Chapter 944 of the Laws of this State, passed June 12th, 1871, which contract bears date the twenty-fifth day of February, 1874, and all the right, title and interest of the said Company, or its Receiver, in and to the State grant above referred to,) and also certain checks of Cornelius S. Bushnell, on the Continental National Bank of the City of New York, amounting in the aggregate to the sum of $17,611.81; and also certain office furniture and fixtures of the Union Gas Light Company of the value of about $250, viz:

and also any claim which the said Union Gas Light Company, or its Receiver, may have against the said Cornelius S. Bushnell, under the warranty clause in his deed of conveyance to the said Union Gas Light Company, of the real estate above mentioned, by reason of certain mortgage and judgment liens, which were incumbrances upon the said property at the time of its conveyance.

And it is further Ordered that said Receiver give fourteen days public notice of such sale by publication in the *Daily Register* and in the *New York Evening Post,* two newspapers published in the City of New York, once in each week for two weeks, and by mailing a copy of such notice to all the creditors and stockholders of record of said Company, addressed to their last Known address; 7431 and that said property be sold at such time to the highest bidder, and that said Receiver make and file in the office of the Clerk of this Court, a full report and account of such Sale.

And it is further Ordered that said Receiver be and he is hereby authorized and empowered to sell the said assets, either separately or as a whole, as he may in his judgment deem best and advisable, and upon the sale of the same to make, execute and deliver to the purchaser or purchasers or his or their assigns all necessary and proper deeds or other instruments conveying and transferring the same.

And it is further Ordered that the proceeds of said Sale be applied by said Receiver towards paying the claims of all the creditors of said Company, whose claims have been proved and allowed by the Receiver, and in case they shall be insufficient to discharge the same in full then that such proceeds be divided by him *pro rata* among the said creditors, in accordance with the Statutes in such case made and provided.

7432 COMPLAINANT'S EXHIBIT 114.

At a Special Term of the Supreme Court, held at the Court House in the City of New York, on the 11th day of March, 1879.
Present: Hon. A. R. Lawrence, Justice.

THE PEOPLE OF THE STATE OF NEW YORK
against
THE UNION GAS LIGHT COMPANY OF THE CITY OF NEW YORK.

Upon reading and filing the report of Charles E. Appleby, Receiver of the Union Gas Light Company, whereby it amongst other things appears that in pursuance of an order of this Court made on the 24th day of July, 1876, the said Charles E. Appleby, as Receiver as aforesaid, duly sold at public auction, at the Exchange Salesrooms, No. 111 Broadway and partly at 1½ Pine Street, in the City of New York, on the tenth day of August, 1876, by E. H. Ludlow & Co., auctioneers, all the property, assets and effects, franchises and rights of every description belonging to the Union Gas Light Company, specifically described in the order aforesaid, for the aggregate sum of Seventy-six thousand four hundred dollars to Walter Osborne, Tilton E. Doolittle and Jared E. Redfield, Receivers of the Townsend Savings Bank of New Haven, Connecticut, they being the highest bidders therefor.

And it further appearing by the vouchers and papers annexed to said report:

7433 1st. That said Receiver gave due notice of such sale for the time and in the manner described by said order of July 24th, 1876, and in all other respects has fully complied with the provisions of said order.

2d. That the purchasers at such sale duly assigned their purchase and bid to Clark Bell, and that the Receiver has duly executed transfers and conveyances of said property and assets to said Clark Bell.

3rd. That the said Receiver has distributed the proceeds of such sale among the creditors of said Union Gas Light Company *pro rata* in accordance with the provisions of said order.

Now, upon motion of James M. Varnum, Esq., of counsel for said Receiver, it is ordered, that the said Report be and the same is hereby in all respects ratified and confirmed, and the sales so made by said Receiver and the conveyances and transfers executed by him to complete the same be and the same are hereby duly ratified and confirmed by this Court.

7434 COMPLAINANT'S EXHIBIT 115.

CHARLES E. APPLEBY, RECEIVER OF THE UNION GAS LIGHT COMPANY,

TO

CLARK BELL.

Dated August 10, 1876.

This Indenture, made the tenth day of August, one thousand eight hundred and seventy-six, between Charles Edgar Appleby, Receiver of the Union Gas Light Company of the City of New York of the first part, and Clark Bell, of the City and County of New York of the second part.

Whereas, the party of the first part was duly appointed the Receiver of the property, Estate and effects of the Union Gas Light Company of the City of New York by an order of the Supreme Court of the State of New York, made on the fifteenth day of June, 1875, in an action pending in said Court in the City and County of New York, wherein the People of the State of New York are plaintiffs and the said The Union Gas Light Company and another are defendants.

And whereas, by an order of the said Supreme Court made in the said action at Special Term on the twenty-fourth day of July, 1876, it was among other things ordered that the party hereto of the first part as such Receiver, be and he was thereby authorized and directed to sell at public auction in the City of New York, to the highest bidder, all the right, title and interest of every kind and nature, whatsoever, which the said Union Gas Light Company, or its Receiver might have in and to certain franchises, rights, grants, contracts and property in such order mentioned, of which the rights and franchises hereinafter mentioned and conveyed are part;
7435 and that the said party of the first part as such Receiver, give public notice of such sale in the mode in such order mentioned, and upon the sale of the same to make, execute and deliver to the purchaser or purchasers, or his or their assigns, all necessary and proper deeds or other instruments conveying and transferring the same.

And whereas, the said party of the first part as such Receiver, pursuant to such order duly advertised to be sold at the Exchange Sales Room number 111 Broadway, in the City of New York, on the tenth day of August, 1876, at 12 o'clock noon of that day, by E. H. Ludlow & Co., Auctioneers, all and singular the franchises, rights, grants, contracts and property in such order mentioned, due notice of such sale having been given as directed in and by said order.

And whereas, at the time and place mentioned in such advertisement of sale, the party of the first part as such Receiver, duly attended and sold at public auction, the rights and franchises hereinafter mentioned, to Walter Osborn, Tilton E. Doolittle and Jared E. Redfield, Receivers of the Townsend Savings Bank of New Haven, Connecticut, for the sum of One thousand dollars, that being the highest sum bidden therefor.

And whereas, the said purchasers have since such sale, by an instrument in writing duly assigned and transferred unto the party hereto of the second part, all their rights, title and interest in and to the said property and franchises and their interest in the said bid.

Now this Indenture witnesseth, that the party hereto of the first part, in consideration of the premises and of the said sum of One thousand dollars to him, paid by the party hereto of the second part, the receipt of which is hereby acknowledged, hath bargained, sold, assigned and set over, and he hereby bargains, sells, assigns 7436 and sets over to the said party of the second part, his executors, administrators and assigns: "All the right, title and interest of any kind and nature whatsoever, which the said Union Gas Light Company, or its Receiver, may have in or to certain franchises or rights to lay mains in the streets, avenues, &c., in the City of New York, acquired by the Union Gas Light Company by intermediate assignments from the Anthracite Gas Lighting and Heating Company, to which last named company, and its assigns, the said franchises and rights were granted by the municipal authorities of the City of New York, by an ordinance passed by the Common Council, September 17th, 1863, and amended subsequently by said Common Council, and approved by the Mayor of the City of New York, on or about the 26th day of May, 1865, which said franchises and rights were assigned to the Union Gas Light Company by assignment bearing date the 22d day of November, 1871, and all the right, title and interest of the said company, or the said party of the first part as its Receiver, in and to the rights and franchises above referred to.

To have and to hold the same to the party of the second part, his executors, administrators and assigns to their own use forever.

In witness whereof, the party of the first part has hereunto set his hand and seal the day and year first above written.

CHARLES ED. APPLEBY, *Receiver.* [SEAL.]

Sealed & delivered in the presence of
M. A. POTTER.

7437 STATE, CITY, AND COUNTY OF NEW YORK, *ss:*

On this twenty-first day of August, 1876, before me personally came Charles Edgar Appleby, to me known to be the person described in and who executed the foregoing instrument, and acknowledged that he executed the same.

M. A. POTTER,
Notary Public, N. Y. Co.

STATE OF NEW YORK, *County of New York, ss:*

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a

Court of Record, do hereby certify that M. A. Potter, whose name is subscribed to the Certificate of the proof or acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same. And further that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said certificate of proof or acknowledgment is genuine.

In testimony whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 31 day of July, 1906.

Endorsed: Charles E. Appleby, receiver of The Union Gas Light Co. to Clark Bell.

Deed, dated August 10th, 1876. Anthracite Grant.

7438 COMPLAINANT'S EXHIBIT 116.

CLARK BELL
TO
KNICKERBOCKER GAS LIGHT COMPANY.

Deed

Dated August 22, 1876.

This indenture made this 22nd day of August in the year one thousand eight hundred and seventy-six

Between Clark Bell of the City and County, and State of New York, of the first part and Knickerbocker Gas Light Company of the same place, of the second part.

Witnesseth:—That the said party of the first part for and in consideration of the sum of One dollar to him in hand paid by the said party of the second part, the receipt whereof is hereby acknowledged, and of other valuable considerations, unto him moving, and in pursuance and fulfilment on his part of a certain agreement heretofore made between the said party of the first part and the said party of the second part, dated August 10th, 1876, hath bargained, sold, assigned, conveyed and set over and by these presents does bargain, sell, assign, convey and set over to the said party of the second part, its successor and assigns, all the right, title and interest of any kind and nature whatsoever, which the Union Gas Light Company or its Receiver had or which the said party of the first part has in or to certain franchises or rights to lay mains in streets, avenues, etc., in the City of New York, acquired by the Union Gas Light Company by intermediate assignments, from the Anthracite Gas Lighting and Heating Company to which last named Company and its
7439 assigns the said franchises and rights were granted by the municipal authorities of the City of New York by an ordinance passed by the Common Council September 17th, 1863, and

amended subsequently by said Common Council and approved by the Mayor of the City of New York on or about the 26th day of May 1865, which said franchises and rights were assigned to the said the Union Gas Light Company by assignment bearing date the 22nd day of November 1871, and all the right, title and interest which the said the Union Gas Light Company or its Receiver had or which the said party of the first part has in and to the rights and franchises above referred to.

Being the same rights, franchises and property heretofore conveyed to the said party of the first part by Charles E. Appleby Receiver of The Union Gas Light Company by conveyance bearing date August 10th, 1876, to the which conveyance is hereby made for a more particular description.

Also all the interest which the said The Union Gas Light Company, or its Receiver, had or which the said party of the first part has in and to a certain contract made by the said The Union Gas Light Company with William Foster, Junior, and certain other grantees of a grant from the State of New York, known as and described in Chapter 944 of the Laws of this State, passed Jan. 12, 1871, which contract bears date the twenty-fifth day of February, 1874, and all the right, title and interest which the said The Union Gas Light Company, or its Receiver, had or which the said party of the first part has in and to the State grant above referred to.

Being the same property heretofore conveyed to the said party of the first part by Charles E. Appleby, Receiver of the Union Gas Light Company by conveyance bearing date August 10th, 1876, to the which conveyance reference is hereby made for a more particular description.

7440 To have and to hold the same to the party of the second part, its successors and assigns, to their own use forever.

In Witness Whereof, The party of the first part has hereunto set his hand and seal the day and year first above written.

M. A. POTTER.

City and County of New York, *ss:*

On this twenty-second day of August, in the year 1876, before me personally came Clark Bell, to me known to be the individual described in and who executed the within instrument and acknowledged that he executed the same.

M. A. POTTER,
Notary Public, N. Y. Co.

State of New York, *County of New York, ss:*

I, Peter J. Dooling, Clerk of the County of New York and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do hereby certify that M. A. Potter, whose name is subscribed to the Certificate of the proof or acknowledgment of the annexed instrument, and thereon written was, at the time of taking

such proof or acknowledgment a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn and duly authorized to take the same, and further
7441 that I am well acquainted with the handwriting of such Notary, and verily believe the signature to the said certificate of proof or acknowledgment is genuine.

In Testimony Whereof, I have hereunto set my hand and affixed the seal in the said Court and County, the 31st day of July, 1906.

PETER J. DOOLING, *Clerk*.

COMPLAINANT'S EXHIBIT 117.

RESOLUTION CONCERNING GAS COMPANIES.

Resolved: That permission be and is hereby given to all incorporated Gas Light Companies to lay gas mains and pipes in the streets, avenues and public places in this City for the purpose of supplying gas to this City and its inhabitants, upon such conditions as may be prescribed and approved by his Honor the Mayor, the Comptroller and the Commissioner of Public Works who are now by law authorized to make provisions for lighting the streets of this City.

Adopted by the Board of Aldermen, December 21, 1876.
Approved by the Mayor, December 23rd, 1876.

THE CITY OF NEW YORK.

I, P. J. Scully, Clerk of the said City, Do Certify, that I have compared the preceding with the original Resolution giving permission to Gas Light Companies to lay gas mains in the City of New York.
Adopted by Board of Aldermen Dec. 21st, 1876, approved
7442 by the Mayor, Dec. 23, 1876, on file in my office, and that the same is a correct transcript therefrom, and the whole of such original.

In witness whereof, I have hereunto subscribed my name and affixed my official seal this 21st day of August, 1906.

(Signed) P. J. SCULLY, *Clerk*.

COMPLAINANT'S EXHIBIT 118.

MUNICIPAL COMPANY FRANCHISE. MAYOR, COMPTROLLER AND COMMISSIONER OF PUBLIC WORKS OF THE CITY OF NEW YORK

TO

THE MUNICIPAL GAS LIGHTING COMPANY OF NEW YORK.

Whereas, The following Resolution has been adopted by the Common Council and approved by his Honor the Mayor, to wit:

Resolved: That permission be and is hereby given to all incorporated Gas Light Companies to lay gas mains and pipes in the streets, avenues and public places in this City for the purpose of supplying gas to this City and its inhabitants, upon such conditions as may be prescribed and approved by his Honor the Mayor, the Comptroller and the Commissioner of Public Works who are now by law authorized to make provision for lighting the streets of this City.

7443 Adopted by the Board of Aldermen, December 21, 1876.
Approved by the Mayor, December 23, 1876.

(Signed) F. J. TWOMEY,
Clerk of the Common Council.

And Whereas, the "Municipal Gas Light Company," a Gas Light Company duly incorporated, desires to avail itself of such permission upon conditions to be prescribed and approved, as in said resolution provided; now,

We, the Mayor, Comptroller, and Commissioner of Public Works of the City of New York, in pursuance of the foregoing resolution, do hereby prescribe and approve the following, as the conditions upon which the said Municipal Gas Light Company may lay its gas mains and pipes in the streets, avenues and public places in the City of New York, for the purpose of supplying gas to this City and its inhabitants, namely:

1st. The Manufactory or Works necessary for the purpose of producing and furnishing gas, shall be so conducted as not to be in any way detrimental to the public health, nor otherwise create a nuisance.

2nd. The gas furnished shall be of the best quality of illuminating gas of an illuminating power of not less than 16 candles when tested at a distance of not less than one mile from the place of manufacture.

3rd. Gas shall be supplied to the public lamps situated on the line or lines of the mains of said Company, and said lamps shall be lighted, when required by the City, at a rate not to exceed the maximum of Twenty Dollars per annum for each lamp, burning 7444 Thirty-eight hundred and thirty-three and one-third hours and consuming gas through a burner consuming three feet of gas per hour under a pressure of one inch; the said rate to include the gas, lighting, extinguishing, cleaning, repairing, reglazing and painting the lamp-posts and lanters, replacing the cocks, tubes, burners, cross-heads, lamp irons and lanterns.

Also the prices for fitting and repairing lamp-posts, which may at any time be required, shall not exceed the following rates, to-wit:

For fitting up each lamp-post Ten Dollars.

For straightening each lamp-post, One Dollar and Fifty Cents.

For releading each column, One Dollar and Fifty Cents.

For refitting each column, Three Dollars and Fifty Cents.

For moving each lamp-post, Three dollars and fifty cents.

For resetting each lamp-post, Ten Dollars.

Fourth. If at any time during the continuance of the permission given by said Resolution of the Common Council it shall be considered by the Commissioner of Public Works that the cost of production or manufacture of gas shall be reduced to an extent to admit of the lighting of the public lamps at a rate less than twenty dollars per annum, then in that case, arbiters shall be appointed, one by the parties of the first part, one by the parties of the second part, and the two so appointed to designate a third, which three shall determine upon a fair and equitable rate below the said twenty dollars.

Fifth. Gas shall be supplied to the public buildings or offices of
the Corporation, situated on the line or lines of the mains of
7445 said parties of the second part whenever the said Company
may be required so to do by the proper officers of the City,
at a rate not to exceed two dollars per one thousand cubic feet.

Sixth. From and after the first day of January, 1878, gas shall be supplied to all persons residing or doing business on the line or lines of the mains of the parties of the second part who may desire the same, at a rate not to exceed two dollars and forty cents per one thousand cubic feet; and no consumer shall be deprived of gas upon refusal to pay or in consequence or on account of a dispute as to the bill rendered, until such consumer shall have been served with an affidavit of the Inspector of the said Company as to the correctness of the register of the meter through which such gas has been passed: Provided that leaving such affidavit on the premises where gas has been furnished, with some person of suitable age and discretion, shall be a sufficient service thereof on such consumer.

Seventh. The Common Council of the City of New York shall have the right to order the mains or pipes of said Company to be extended in or along any of the streets, avenues, or public places of the City: Provided that said parties of the second part shall not be compelled to expend in the laying of mains a yearly sum exceeding ten thousand dollars.

Eighth. All trenches or excavations shall be filled immediately after the mains or pipes shall be laid, the earth to be thoroughly rammed as the same is thrown into the trench or excavation, and the pavement to be replaced in a good and workmanlike manner and
to the entire satisfaction of the Commissioner of Public
7446 Works; and in case the said Company, or its successors, shall
fail, or neglect to replace the pavement or pavements to the
satisfaction of the Commissioner of Public Works, then the Commissioner of Public Works shall have the right to cause such pave-

ment to be taken up and replaced in a good and workmanlike manner by a person or persons to be appointed by the said Commissioner for that purpose; and the expense of such repaving shall be paid by the said parties of the second part to the Commissioner of Public Works.

Said Company shall also be governed by the laws and ordinances of the Common Council of the City of New York, and by such rules and regulations as the Commissioner of Public Works, his successor or successors in office, may prescribe for the laying of mains and the proper protection and filling of the trenches or excavations, for the taking up, replacing and repaving of the pavements, and the lighting, care and maintenance of the public lamps.

Ninth. The permission given by said resolution of the Common Council, unless sooner revoked, as hereinafter provided, shall continue for the period of thirty years from the date of signing of these conditions by the Mayor, Comptroller, and Commissioner of Public Works: Provided all the conditions herein prescribed shall be fully performed by the said Company. Neither said permission or any right conferred on said Company by said resolution shall be assigned nor transferred without the previous consent of the Common Council.

Tenth. The Common Council may repeal, annul and revoke the said resolution and the permission thereby given upon the failure of the said Company to perform any of the conditions herein 7447 contained, and thereupon all right of said Company under said resolution and these conditions shall cease, and said Company shall thereupon remove all its pipes and mains from the streets, avenues and public places.

Eleventh. It is expressly provided that nothing herein nor in said resolution contained, shall be construed as granting to the said parties of the second part, any sole or exclusive right or privilege, or as preventing the granting privileges similar to those hereby and by said resolution given to any other company, persons or parties whatsoever, or as preventing any person or persons from erecting in or upon his or their own premises any building or apparatus to light with gas his or their own house, store, manufactory or premises.

Twelfth. The permission given in said resolution shall not become operative or take effect until the said Municipal Gas Light Company shall have signified its assent to these conditions, and its acceptance of the permission given in said resolution, upon these conditions.

Dated, New York, March 22d, 1877.

SMITH ELY, Jr., *Mayor.*
JOHN KELLY, *Comptroller,*
ALLAN CAMPBELL,
Commissioner of Public Works.

The Municipal Gas Light Company hereby assents to all the above conditions and accepts the permission given by the above 7448 resolution of the Common Council of the City of New York, upon such conditions.

Dated, New York, March 22d, 1877.

THE MUNICIPAL GAS LIGHT COMPANY,
By CHARLES G. FRANCKLYN, *President.*
[SEAL.] PHILIP ALLEN, *Secretary.*

Resolved, That this Company assent to the conditions imposed by the Mayor, Comptroller and Commissioner of Public Works, as set forth in foregoing paper this day signed by them, and accept the permission given by the resolution of the Common Council of the City of New York therein referred to. That the President be and hereby is directed to execute the same in triplicate, and affix the seal of the Company thereto.

I hereby certify that the above is a true copy of a resolution passed by the Board of Directors of the Municipal Gas Light Company, March 22d, 1877.

[L. S.]

PHILIP ALLEN, *Secretary.*

Endorsed: Approved as to form, Wm. C. Whitney, Counsel to the Corporation.

The above is a correct copy of foregoing agreement on file in the Department of Finance.

N. TAYLOR PHILLIPS,
Deputy Comptroller.

STATE GRANT.

LEGISLATIVE FRANCHISE GRANTED TO ISAAC P. MARTIN AND OTHERS.

CHAP. 944, LAWS OF 1871.

AN ACT to authorize the construction of gas works, and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York, and the streets, avenues, squares and buildings therein, and to lay pipes for that purpose.

Passed June 12, 1871; three-fifths being present.

The People of the State of New York, represented in State and Assembly, do enact as follows:

SECTION 1. Isaac P. Martin, William Foster, Junior, Edward Jones, George H. Wicks, Shepherd F. Knapp, William R. Dyer, John E. Cronly, John C. Angell, Edward J. Shandly, Joseph G. Jennings, William Vail, Henry Johnson, William Johnson, William H. Murphy, James S. Turner, Thomas Y. Avery, John Balmore, Henry S. Murray, Peter H. E. Baxter, Junior, Edward Taylor, Joseph Murphy, Walter Smith, Joel A. Fithian, William H. Bloom, Andrew J.

Smith, Henry A. Smith, Patrick Quinn, Richard H. Vaughn, William P. Smith, Joseph Bell, Delavan Peck, John J. Walsh, Matthew T. Brennan, Charles E. Loew, George Chivis, Edgar Brown, John J. Turner, John H. Johnston John Cox, William Higgins, and their assigns are hereby authorized and empowered, at any time hereafter, to manufacture, make and sell gas, to be made of coal, oil, tar, peat, pitch, turpentine, or other materials, to be used for the purpose of lighting all that portion of the city of New York 7449a lying north of the center line of Seventy-ninth street, including all of the Central Park, in its entire width and length, and all streets, avenues, lanes, alleys, squares and parks, within the limits aforesaid, and any buildings, manufactories or houses contained and situate within the said limits, and to lay pipes for the purpose of conducting the gas in any streets, avenues, lanes, alleys, squares and parks of said portion of said city, and in the said Central Park, and to adopt any other necessary means to furnish gas to any inhabitants in said portion of said city, and to the said Central Park; and also the said persons and their assigns shall so conduct their manufacture or manufactures of gas as not to create a nuisance, and that in digging and laying pipes in any public street, avenue, lane, alley, square, park or highway the same shall be done in a proper and workmanlike manner, with as little delay and inconvenience to the public travel as practicable, and without injury to the Croton pipes; and the surface of such street, avenue, lane, alley, square or park shall thereupon, be immediately restored and repaired by said persons, or their assigns, to the condition in which it was immediately before the laying of such pipes. But nothing herein contained shall be taken or construed so as to authorize the laying of any gas pipes, or other conduit for the transmission of gas, or the construction of any works, buildings or erections, or the lighting of any road, street, lane or path within the Central Park, or within or upon any of the parks, public places, boulevards, streets or avenues which are under the control of the Department of Public Parks of the City of New York, without the consent of the said Department of Public Parks first had and obtained. The rights and privileges hereby granted are exclusive; but shall not be construed to affect or 7449b impair any exclusive rights or privileges, if any, vested in any incorporated company in said City.

§ 2. The said persons and their assigns shall have power to purchase and hold real estate necessary and convenient for the purposes aforesaid, and to erect and maintain all necessary and convenient buildings, fixtures and machinery for the purposes aforesaid, and incident or necessary thereto.

§ 3. If any person or persons willfully do or cause to be done any act or acts whatever, whereby the works of said persons, or of their assigns, or any pipe, conduit, plug, cock, reservoir, or any engine, machine or structure, or other thing appertaining to the same, shall be stopped, obstructed or impaired, weakened, injured or destroyed, the person or persons so offending shall forfeit and pay to the said persons, or their assigns, treble the amount of the damage sustained by means of such offense or injury, to be recovered by said persons or their assigns, with costs of suit, in any court having cognizance thereof. The persons named in the first section of this act or their assigns, shall, within ninety days after the passage of this act, select, by the ballots of a majority thereof, not less than seven, nor more than thirteen of their number, as an executive committee, who shall have the control and management of the business authorized to be done and carried on by the provisions of this act. The first five persons named in said section shall give at least five days' notice, in two daily newspapers published in the city of New York, of the time and place at which such executive committee shall be elected.

7450 § 4. This act shall be deemed a public act, and shall be favorably construed for the purposes herein expressed and declared, in all courts and places whatsoever.

§ 5. This act shall take effect immediately.

COMPLAINANT'S EXHIBIT 120.

PROOF OF PUBLICATION, IN COMPLIANCE WITH STATE GRANT.

State of New York, *City and County of New York, ss:*

Edwin J. Carver, being duly sworn, saith that he is the Principal Clerk in the office of the New York Daily Transcript, a newspaper printed in the City of New York, that the advertisement hereto annexed was published in the said New York Daily Transcript in its issues dated July 8th, 10th, 11th, 12th, and 13th, 1871.

EDWIN J. CARVER.

Sworn to before me this 13th day of July, 1871.

P. McMULLEN,
Com. of Deeds.

OFFICE NEW YORK NEWS.

State of New York, *City of New York, ss:*

Henry E. Lynch, of the City of New York, being duly sworn, says that he is Principal Clerk employed in the office of the New York News, a newspaper published in the said City of New York, and that the Notice, of which the annexed is a copy, has been regularly published in the said New York News six times successively commencing on the seventh day of July, 1871. 7451

HENRY E. LYNCH.

Sworn to before me this 13th day of July, 1871.

JOHN CALLAHAN,
Com. of Deeds, City and County of New York.

COPY OF PUBLISHED NOTICE.

To All Whom it may Concern:

In pursuance of the provisions of an act of the Legislature of the State of New York, passed May 12th, 1871, being Chapter 944 of the Laws of 1871, entitled "An Act to authorize the construction of Gas Works, and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York and the streets, avenues, squares and buildings therein and to lay the pipes for that purpose."

The undersigned, the first five persons named in said Act, hereby give notice in pursuance of the provisions thereof that a meeting of the persons named in the first Section of said Act, or their assigns, will be held on Thursday, thirteenth day of July, A. D. 1871, at the hour of one o'clock in the afternoon, at the office of Andrew J. Smith, No. 132 Nassau Street, in the City of New York, for the purpose of selecting an Executive Committee, to control and manage the business authorized to be done and carried on by the provisions of said Act.

Dated New York, July 6, 1871.

EDW. JONES.
ISAAC P. MARTIN.
WM. FOSTER, Jr.
S. F. KNAPP.
GEORGE H. HICKS.

7452 City and County of New York, *ss:*

William Foster, Jr., being duly sworn, says: That he was a member of the Executive Committee of the so-called City Gas Legal Co., organized under an Act of the Legislature of the State of New York, passed May 12, 1871, entitled "An Act to authorize the Construction of Gas Works, and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York, and the Streets, Avenues, Squares and buildings therein and to lay pipe for that purpose."

That for a long time he was Chairman of said Executive Committee and was familiar with its business and operations.

That the annexed copy of a notice was within the personal knowledge of this deponent published in the New York Daily Transcript, for six successive days succeeding the 7th day of July, 1871, and in the New York Daily News for six successive days succeeding the 7 days of July, 1871.

That the annexed copy affidavits of Edwin J. Carver, and Henry E. Lynch are true copies of the original affidavits of publication made by them respectively, of such notice, furnished by them to the said Executive Committee, which were for some time in deponent's possession, but are not now and are mislaid.

Deponent further says: That Henry Hilton and Hugh Smith were at one time elected members of the said Executive Committee, under the supposition that they were incorporators named in the Act, which was a misrepresentation in fact—that they were not corporators, and never were eligible to act as members of the Executive Committee, and so far as this deponent has any knowledge, never took by purchase or assignment the interest of any incorporator and 7453 were never by reason of their said not being eligible, entitled to act as members of said Executive Committee.

WM. FOSTER, Jr.

Subscribed and sworn to before me this 20th day of May, 1878.

JAMES CLYNE,
Notary Public, Kings County.

COMPLAINANT'S EXHIBIT 121.

WILLIAM R. DYER TO WILLIAM CAULDWELL.

Dated July 31, 1871.

Know All Men by These Presents

That I, William R. Dyer, being one of the persons mentioned in the first section of the Act hereinafter described as Grantee or Incorporator therein, for, and in consideration of the sum of *one dollar* to me in hand paid by Wm. Cauldwell of the State of New York, the receipt whereof is hereby acknowledged and for other good and valuable considerations, do hereby sell, assign, transfer and convey to the said William Cauldwell all my right, title, interest, franchise, property, and estate individually, or as incorporator or grantee named and mentioned in an Act of the Legislature of the State of New York, known as Chapter 944 of the Laws of 1871, entitled on Act "to authorize the construction of gas works for the purpose of lighting a portion of the City of New York, and the Streets, avenues, squares and buildings therein, and to lay pipes for that purpose." Passed June 12, 1871.

7454 And I do hereby constitute and declare that the said William Cauldwell is the *Assignee* of all my rights, privileges, property and estate contained in, coming through or by reason of the provisions of the above mentioned and described Act;—the intention of this instrument being to confer upon and vest in the said William Cauldwell all the rights, privileges, franchises and estate which the provisions of the said Act conferred upon or vested in me individually or as incorporator or grantee to the same extent and with like effect as if he the said William Cauldwell had been named and mentioned in the first section of said above mentioned Act as Incorporator or Grantee therein in my place and stead.

In witness whereof I have hereunto set my hand and seal this thirty-first day of July one thousand eight hundred and seventy-one.

7455 COMPLAINANT'S EXHIBIT 122.

WILLIAM CAULDWELL TO C. S. BUSHNELL & OTHERS.

Dated December 29, 1871.

For a good, full and valuable consideration, to me, William Cauldwell, the subscriber, paid, the receipt of which is hereby confessed and acknowledged, I agree to relinquish, sell, assign and transfer, and do hereby sell, assign and transfer, unto C. S. Bushnell, Henry J. Davidson and Gordon H. Waddell, all and every my right, title and interest as Assignee of William R. Dyer, one of the Grantees or persons named in the first section of the Act hereinafter mentioned by Assignment hereto annexed, in and to the charter, franchise and authority granted by the State of New York, by the Act of its Legislature, entitled: "An Act to authorize the construction of Gas Works, and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York, and the Streets, Avenues, Squares and buildings therein, and to lay pipes for that purpose," passed June 12th, 1871, whereby the said grantees named in the first section of the said Act, and their assigns, are authorized and empowered to manufacture, make and sell gas within certain limits of the City of New York, therein prescribed, and to lay pipes for the purpose of conducting the gas in certain Streets and other portions of the City, and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits, together with, and subject to, certain other conditions, rights, privileges and immunities, for the full and particular certification of which the said Act of the Legislature is particularly referred to, and its terms considered as part of this instrument.

7456 To have and to hold the same and every part thereof, with the appurtenances, unto the said C. S. Bushnell, Henry J. Davison and Gordon H. Waddell, and their assigns, with like force and effect as if they had been named as a part of the grantees or persons in the said first section of the said Act.

In witness whereof, I have hereunto set my hand and seal this twenty-ninth day of December, one thousand eight hundred and seventy-one.

Fields, to me known the subscribing witness within named, who, being by me sworn, did depose and say that he resides in the City of New York, that he knows William P. Smith, the grantor within named, knows him to be the grantor who is described in and who executed the within instrument in writing, that he was present and saw the said William P. Smith execute the same, and that he thereupon subscribed his name as a witness thereto.

[L. S.] HENRY PARSONS,
Notary Public, for New York City and County.

STATE OF NEW YORK, *County of New York, ss:*

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do hereby certify that Henry Parsons, whose name is subscribed to the certificate of the proof or acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same. And, further, that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said certificate of proof or acknowledgment is genuine.

In testimony whereof I have hereunto set my hand and
7463 affixed the seal of the said Court and County, the 31st day of July, 1906.

[L. S.] PETER J. DOOLING, *Clerk.*

COMPLAINANT'S EXHIBIT 125.

EDWARD JONES TO C. S. BUSHNELL AND OTHERS.

Dated November 25, 1871.

For a good, full and valuable consideration, to me, Edward Jones, the subscriber, paid, the receipt of which is hereby confessed and acknowledged, I agree to relinquish, sell, assign and transfer, and to hereby sell, assign and transfer, unto C. S. Bushnell, Henry J. Davison and Gordon H. Waddell, all and every my right, title and interest as one of the Grantees or persons named in the first section of the Act hereinafter mentioned, in and to the charter, franchise and authority granted by the State of New York, by the Act of its Legislature, entitled: "An Act to authorize the construction of Gas Works, and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York, and the streets, avenues, squares and buildings therein, and to lay pipes, for that purpose," passed June 12th, 1871, whereby the said grantees named in the first section of the said Act, and their assigns, are authorized and empowered to manufacture, make and sell gas within certain limits of the City of New York, therein prescribed, and to lay pipes for the purpose of conducting the gas in certain streets and other portions of the city, and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits, together with, 7464 and subject to, certain other conditions, rights privileges and immunities, for the full and particular certification of which the said Act of the Legislature is particularly referred to, and its terms considered as part of this instrument.

To have and to hold the same and every part thereof, with the appurtenances, unto the said C. S. Bushnell, Henry J. Davison and Gordon H. Waddell, and their assigns, with like force and effect, as if they had been named as a part of the grantees or persons in the said first section of the said Act.

In Witness Whereof, I have hereunto set my hand and seal this twenty-fifth day of November, one thousand eight hundred and seventy-one.

EDWARD JONES. [L. S.]

In presence of

—— ——

CITY AND COUNTY OF NEW YORK, *ss:*

On this 25th day of November, 1871, before me came Edward Jones, to me known to be the person described in and who executed the foregoing instrument in writing and acknowledged that he executed the same.

HENRY PARSONS,
Notary Public for N. Y. City.

STATE OF NEW YORK, *County of New York, ss:*

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Records, do hereby Certify, that Henry Parsons, whose name is subscribed to the Certificate of the proof or acknowl- 7465 edgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same. And further that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said certificate of proof or acknowledgment is genuine.

In Testimony Whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 31st day of July, 1906.

[L. S.] PETER J. DOOLING, *Clerk.*

COMPLAINANT'S EXHIBIT 126.

SHEPHERD F. KNAPP TO C. S. BUSHNELL AND OTHERS.

Dated November 28, 1871.

For a good, full and valuable consideration, to me, Shepherd F. Knapp, the subscriber, paid, the receipt of which is hereby confessed and acknowledged, I agree to relinquish, sell, assign and transfer, and do hereby sell, assign and transfer, unto C. T. Bushnell, Henry I. Davison and Gordon H. Waddell, all and every my right, title and interest, as one of the grantees or persons named in the first section of the Act hereinafter mentioned, in and to the charter, franchise and authority granted by the State of New York, by the Act of its Legislature, entitled: "An Act to authorize the construction of Gas Works, and the manufacture and sale of gas for the purpose of 7466 lighting a portion of the City of New York, and the streets, avenues, squares and buildings therein, and to lap pipes for that purpose," passed June 12th, 1871, whereby the said grantees named in the first section of the said Act, and their assigns, are authorized and empowered to manufacture, make and sell gas within certain limits of the City of New York, therein prescribed, and to lay pipes for the purpose of conducting the gas in certain streets and other portions of the city, and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits, together with, and subject to, certain other conditions, rights, privileges and immunities for the full and particular certification of which the said Act of the Legislature is particularly referred to, and its terms considered as part of this instrument.

To have and to hold the same, and every part thereof, with the appurtenances, unto the said C. T. Bushnell, Henry I. Davison and Gordon H. Waddell, and their assigns, with like force and effect as if they had been named as a part of the grantees or persons in the said first section of the said Act.

In Witness Whereof, I have hereunto set my hand and seal this twenty-eighth day of November, one thousand eight hundred and seventy-one.

S. F. KNAPP. [L. S.]

In the presence of
J. SMITH.

Inter. Rev. 5c Stamp Cancelled.

7467 STATE OF NEW YORK, *City and County of New York, ss:*

On this twenty-eighth day of November, in the year one thousand eight hundred and seventy-one, personally came before me John Smith, subscribing witness to the foregoing instrument, with whom I am personally acquainted, who being by me duly sworn, did depose and say that he resides in the City of Brooklyn, Kings County, New York, that he is acquainted with Shepherd F. Knapp, and knows him to be the individual described in and who executed the foregoing instrument, that he saw him sign the same, that he acknowledged in his presence that he executed the same, and that he thereupon subscribed his name as a witness thereto.

RICHARD STACKPOOLE,
Notary Public.

STATE OF NEW YORK, *County of New York, ss:*

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do hereby certify, that Richard Stackpoole, whose name is subscribed to the certificate of the proof of acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Notary Public in and for the county of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same. And further that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said certificate of proof or acknowledgment is genuine.

In Testimony Whereof, I have hereunto set my hand and 7468 affixed the seal of the said Court and County, the 31st day of July, 1906.

7472 And further that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said certificate of proof or acknowledgment is genuine.

In Testimony Whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 31st day of July, 1906.

[L. S.] PETER J. DOOLING, *Clerk.*

COMPLAINANT'S EXHIBIT 129.

JOEL A. FITHIAN TO RICHARD B. CONNOLLY.

Dated July 6, 1871.

Know all Men by These Presents: That I, Joel A. Fithian, being one of the persons mentioned in the first Section of the Act hereinafter described as Grantee or Incorporator therein, for and in consideration of the sum of One Dollar to me in hand paid by Richard B. Connolly, of the City of New York, the receipt whereof is hereby acknowledged, and for other good and valuable considerations, do hereby sell, assign, transfer and convey to the said Richard B. Connolly all my right, title, interest, franchise, property and estate individually or as an incorporator or grantee named and mentioned in an Act of the Legislature of the State of New York, known as Chapter 944 of the laws of 1871, entitled an Act "to authorize the construction of Gas Works for the purpose of lighting a portion of the City of New York, and the streets, avenues, squares and buildings therein, and to lay pipes for that purpose," passed June 12th, 1871.

And I do hereby constitute and declare that the said Richard B. Connolly is the Assignee of all my rights, privileges, property, franchises and estate contained in, coming through or by reason of the provisions of the above mentioned and described Act.—the intention of this instrument being to confer upon and vest in the said Richard B. Connolly all the rights, privileges, franchises and estate which the provisions of the said Act conferred upon or vested in me individually or as incorporator or grantee to the same extent and with like effect as if he, the said Richard B. Connolly, had been named and mentioned in the first section of said above mentioned Act as an Incorporator or Grantee therein in my place and stead. 7473

In Witness Whereof, I have hereunto set my hand and seal, this sixth day of July, one thousand eight hundred and seventy-one.

JOEL A. FITHIAN.

In the presence of
A. S. CADY.

State of New York:

On this sixth day of July, 1871, before me came Joel A. Fithian, to me known to be the person described in and who executed the foregoing instrument in writing, and acknowledged that he executed the same.

A. S. CADY,
Notary Public for County of N. Y.

STATE OF NEW YORK, *County of New York, ss:*

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same 7474 being a Court of Record, do hereby certify that A. S. Cady, whose name is subscribed to the Certificate of the proof or acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same. And further that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said certificate of proof or acknowledgment is genuine.

In Testimony Whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 31st day of July, 1906.

PETER J. DOOLING, *Clerk.*

COMPLAINANT'S EXHIBIT 132.

JOSEPH MURPHY TO FORBES HOLLAND.

Dated July 13, 1871.

Know All Men by These Presents that I, Joseph Murphy, of the City of New York, being one of the persons mentioned in the First Section of the Act hereinafter described as grantee or incorporator therein, for and in consideration of the sum of one dollar and for other good and valuable considerations to me in hand paid by Forbes Holland, the receipt whereof is hereby acknowledged, have bargained, sold and assigned, and by these presents do hereby sell, assign, transfer, grant, set over and convey unto the said Forbes Holland, his executors, administrators, and assigns, all my right, title, interest, franchise, property and estate individually or as an incorporator or grantee named and mentioned in a certain act of the Legislature of the State of New York, known as Chapter 944 of the Laws of 1871, entitled "An Act to authorize the construction of Gas Works for the purpose of lighting a portion of the City of New York and the Streets, Avenues, Squares, and Buildings therein, and to lay pipes for that purpose," passed June 12th, 1871.

7480 And I do hereby constitute and declare that the said Forbes Holland is the assignee of all my rights, privileges, property, franchises and estate contained or coming through or by reason of the above mentioned and described act—the intention of this instrument being to confer upon and vest in the said Forbes Holland all the rights, privileges, franchises and estate which the provisions of the said act conferred upon or vested in me individually or as an incorporator or grantee to the same extent and with like effect as if the said Forbes Holland had been named and mentioned in the first section of the said above mentioned Act, as an incorporator or grantee therein in my place and stead.

In Witness Whereof, I have hereunto set my hand and seal the thirteenth day of July, one thousand eight hundred and seventy-one (1871).

JOS. MURPHY. [L. S.]

Sealed and delivered in the presence of

WM. H. BLOOM.

Sworn to before me this 27th day of November, 1871.

HENRY PARSONS,
Notary Public.

STATE OF NEW YORK, *County of New York:*

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do hereby certify that Henry Parsons, whose name is subscribed to the Certificate of the proof or acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same. And further, that I am well acquainted with the handwriting of such Notary, and verily beli-ve that the signature to the said certificate of proof or acknowledgment is genuine.

In Testimony Where[illegible] I have hereunto set my hand and affixed the seal of the said Court [illegible]nd County, the 31st day of July, 1906.

[L. S.] PETER J. DOOLING, *Clerk.*

7486 COMPLAINANT'S EXHIBIT 135.

WILLIAM M. TWEED, JR. TO C. S. BUSHNELL AND OTHERS.

Dated, November 27th, 1871.

For a good, full and valuable consideration, to me, William M. Tweed, Jr., the subscriber, paid, the receipt of which is hereby confessed and acknowledged, I agree to relinquish, sell, assign and transfer and do hereby sell, assign and transfer unto C. S. Bushnell, Henry J. Davison and Gordon H. Waddell, all and every my right, title and interest, as assignee of Edward Taylor, one of the grantees or persons named in the first section of the act hereinafter mentioned by assignment dated July third, 1871 hereto annexed in and to the charter, franchise and authority, granted by the State of New York, by the Act of its Legislature, entitled "An Act to authorize the construction of Gas Works and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York, and the Streets, Avenues, Squares and buildings therein, and to lay pipes for that purpose," passed June 12th 1871 whereby the said grantees named in the first section of the said Act and their assigns are authorized and empowered to manufacture make and sell gas within certain limits of the City of New York, therein prescribed, and to lay pipes for the purpose of conducting the gas in certain Streets and other portions of the City, and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits, together with, and subject to, certain other conditions, rights, privileges and immunities, for the full and particular certification of which the said Act of the Legislature is particularly referred to, and its terms considered as part of this instrument.

7487 To have and to hold the same, and every part thereof, with the appurtenances, unto the said C. S. Bushnell, Henry J. Davison and Gordon H. Waddell, and their assigns, with like force and effect as if they had been named as a part of the grantees or persons in the said first section of the said Act.

In Witness Whereof, I have hereunto set my hand and seal this twenty-seventh day of November one thousand eight hundred and seventy one.

I, Henry Parsons, a Notary Public for the City of New York, do hereby certify that a certain power of Attorney of which the foregoing are true and correct extracts was duly exhibited to and examined by me this 29th day of December, 1871. The said power of Attorney was duly and properly executed and a certificate of the acknowledgment of such execution before Andrew J. Smith, a Notary Public, was thereto attached.

[L. S.] HENRY PARSONS,
Notary Public for N. Y. City and County.

State of New York, *County of New York, ss:*

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court of the said County, the same being a Court of Record, do hereby certify that Henry Parsons, whose 7509 name is subscribed to the Certificate of the proof or acknowledgment of the annexed instrument, and thereon written was, at the time of taking such proof or acknowledgment, a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same.

And further that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said Certificate or proof or acknowledgment is genuine.

In Testimony Whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 31st day of July, 1906.

[L. S.] PETER J. DOOLING, *Clerk.*

ASSIGNMENT.

Dated December 6, 1871.

For a good, full and valuable consideration, to me, James M. Sweeny, the subscriber, paid, the receipt of which is hereby confessed and acknowledged, I agree to relinquish, sell, assign and transfer and do hereby sell, assign and transfer unto C. S. Bushnell, Henry J. Davison and Gordon H. Waddell, all and every my right, title and interest, as Assignees of John C. Angell, one of the Grantees or persons named in the first section of an Act hereinafter mentioned by Assignment dated June 21st, 1871, hereunto annexed.

in and to the charter, franchise and authority, granted by the State of New York, by the Act of its Legislature, entitled "An Act
7510 to authorize the construction of Gas Works and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York, and the Streets, Avenues, Squares and buildings therein, and to lay pipes for that purpose," passed June 12th, 1871, whereby the said grantees named in the first section of the said Act and their assigns are authorized and empowered to manufacture, make and sell gas within certain limits of the City of New York, therein prescribed, and to lay pipes for the purpose of conducting the gas in certain Streets and other portions of the City, and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits, together with, and subject to, certain other conditions, rights, privileges and immunities, for the full and particular certification of which the said Act of the Legislature is particularly referred to, and its terms considered as part of this instrument.

To have and to hold the same, and every part thereof, with the appurtenances, unto the said C. S. Bushnell, Henry J. Davison and Gordon H. Waddell, and their assigns, with like force and effect as if they had been named as a part of the grantees or persons in the said first section of the said Act.

In Witness Whereof, I have hereunto set my hand and seal this twenty-sixth day of December, one thousand eight hundred and seventy-one.

JAMES M. SWEENY, [L. S.]
For JOHN J. BRADLEY, *Atty.*

In the presence of:
JAMES M. SWEENY.

Three 5c. U. S. Internal Revenue Stamps.

325—396

7511 CITY AND COUNTY OF NEW YORK, *ss:*

On this 26th day of December, 1871, before me came James M. Sweeny, by Wm. M. Bradley, his attorney, to me known to be the person described in and who executed the foregoing instrument in writing and acknowledged that he executed the same.

DANIEL WHALEN,
Notary Public, City and County of New York.

STATE OF NEW YORK, *County of New York, ss:*

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do hereby certify, that Daniel Whalen, whose name is subscribed to the Certificate of the proof or acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same. And further, that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said certificate of proof or acknowledgment is genuine.

In Testimony Whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 31st day of July, 1906.

COMPLAINANT'S EXHIBIT 146.

WILLIAM VAIL TO THOMAS C. FIELDS.

Dated June 14, 1871.

Know All Men by These Presents, That I, William Vail, of the City of New York, being one of the persons mentioned in the first section of the Act hereinafter described as Grantee or Incorporator therein, for, and in consideration of the sum of One Dollar to me in hand paid by Thomas C. Fields of said City of New York, the receipt whereof is hereby acknowledged and for other good and valuable considerations, do hereby sell, assign, transfer, set over and convey to the said Thomas C. Fields all my right, title, interest, franchise, property and estate Individually or as an Incorporator or Grantee named and mentioned in an act of the Legislature of the State of New York, known as chapter 944 of the laws of 1871, entitled an Act "to authorize the construction of gas works and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York and the streets, avenues, squares and buildings therein, and to lay pipes for that purpose," passed June 12th, 1871.

And I do hereby constitute and declare that the said Thomas C. Fields is the assignee of all my rights, privileges, property, franchises and estate contained in coming through or by reason of the pro-

visions of the above mentioned and described Act—the intention of this instrument being to confer upon and vest in the said Thomas C. Fields all the rights, privileges, franchises and estate which the provisions of the said act conferred upon or vested in me individually or as an Incorporator or Grantee to the same extent, and with like effect as if he, the said Thomas C. Fields, had been named and mentioned in the first section of said above mentioned
7513 act as in Incorporator or Grantee therein in my place.

In Witness Whereof, I have hereunto set my hand and seal this 14th day of June, A. D. 1871.

WILLIAM VAIL. [L. S.]

In the presence of
HENRY PARSONS.

City and County of New York, *ss:*

On this 14th day of June, 1871, before me came William Vail, to me known, and known to me to be the person described in and who executed the foregoing instrument in writing, and acknowledged that he executed the same.

HENRY PARSONS,
Notary Public for New York City.

State of New York, *County of New York, ss:*

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do hereby certify that Henry Parsons, whose name is subscribed to the Certificate of the proof or acknowledgment, of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same. And further, that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said certificate of proof or acknowledgment is genuine.

7514 In Testimony Whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 31st day of July, 1906.

[L. S.] PETER J. DOOLING, *Clerk.*

COMPLAINANT'S EXHIBIT 147.

PATRICK QUINN TO THOMAS C. FIELDS.

Know All Men by These Presents, That I, Patrick Quinn, of the City of New York, being one of the persons mentioned in the first section of the Act, hereinafter described as Grantee or Incorporator therein, for and in consideration of the sum of one dollar to me in hand paid by Thomas C. Fields, of said City of New York, the receipt whereof is hereby acknowledged, and for other good and valuable considerations, do hereby sell, assign, transfer, set over and convey to the said Thomas C. Fields all my right, title, interest, franchise, property and estate individually or as an incorporator or Grantee named and mentioned in an Act of the Legislature of the State of New York, known as Chapter 944 of the Laws of 1871, entitled an act "to authorize the construction of gas works and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York and the streets, avenues, squares, and buildings therein, and to lay pipes for that purpose," passed June 12th, 1871.

And I do hereby constitute and declare that the said Thomas C. Fields is the Assignee of all my rights, privileges, property, franchise and estate contained in, coming through, or by reason of the provisions of the above mentioned and described act—the intention of this instrument being to confer upon and vest in the said Thomas C. Fields all the rights, privileges, franchises and estate which the provisions of the said act conferred upon or vested in me individually or as Incorporator or Grantee to the same extent and with like effect as if he, the said Thomas C. Fields, had been named and mentioned in the first section of said above mentioned act as an Incorporator or Grantee therein in my place. 7515

ANDREW J. SMITH TO C. S. BUSHNELL AND OTHERS.

Dated November 25, 1871.

For a good, full and valuable consideration, to me, Andrew J. Smith, the subscriber, paid, the receipt of which is hereby confessed and acknowledged, I agree to relinquish, sell, assign and transfer, and do hereby sell, assign and transfer, unto C. S. Bushnell, Henry J. Davison and Gordon H. Waddell, all and every my right, title and interest as one of the Grantees or persons named in the first section of the Act hereinafter mentioned in and to the charter, franchise and authority granted by the State of New York, by the Act of its Legislature, entitled: "An Act to authorize the construction of Gas Works, and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York, and the Streets, Avenues, Squares and buildings therein, and to lay pipes for that purpose," passed June 12th, 1871, whereby the said grantees named in the first section of the said Act, and their assigns, are authorized and empowered to manufacture, make and sell gas within certain limits of the City of New York, therein prescribed, and to lay pipes for the purpose of conducting the gas in certain streets and other portions of the City, and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits, together with, and subject to, certain other conditions, rights, privileges and immunities, for the full and particular certification of which the said Act of the Legislature is particularly referred to, and its terms considered as part of this instrument.

7533 To have and to hold the same, and every part thereof, with the appurtenances, unto the said C. S. Bushnell, Henry J. Davison and Gordon H. Waddell, and their assigns, with like force and effect as if they had been named as a part of the grantees or persons in the said first section of the said act.

In Witness Whereof, I have hereunto set my hand and seal this twenty-fifth day of November, one thousand eight hundred and seventy-one.

AND. J. SMITH. [L. S.]

In presence of
HENRY PARSONS.

Two U. S. Internal Revenue Stamps, 5 cents each.

City and County of New York, *ss:*

On this 25th day of November, 1871, before me came Andrew J. Smith, to me known to be the person described in and who executed the foregoing instrument in writing, and acknowledged that he executed the same.

HENRY PARSONS,
Notary Public for N. Y. City.

STATE OF NEW YORK, *County of New York, ss:*

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do hereby certify that Henry Parsons, whose name is subscribed to the Certificate of the proof or acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same. 7534

And further, that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said Certificate of proof or acknowledgment is genuine.

In Testimony Whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 31st day of July, 1906.

[L. S.] PETER J. DOOLING, *Clerk.*

COMPLAINANT'S EXHIBIT 156.

HENRY A. SMITH TO C. J. BUSHNELL AND OTHERS.

Power of Attorney.

Dated November 6, 1871.

Know All Men By These Presents: That I, Henry A. Smith, of the City and County of New York, have made, constituted and appointed and by these presents do make, constitute and appoint Bernard Smythe of said City, my true and lawful attorney for me and in my name, place and stead.

To pledge or hypothecate, or to sell, assign and transfer any and all stocks, or stock, and all public funds or securities, of every kind, now owned or which may be hereafter owned by me and which now stands or may hereafter stand in my name and for such purpose to make, sign, seal and deliver and acknowledge for and in my name proper and sufficient instruments in writing.

And generally to manage and conduct all my business affairs the same as I could do if I personally present, giving and granting to my said attorney full power and authority to do and perform all and every act and thing whatever requisite and necessary to be done in and about the premises as fully to all intents and purposes as I might or could do if personally present in the full power of substitution and vocation hereby ratifying and confirming all that my said attorney or his substitute shall lawfully do or cause to be done by virtue thereof. 7535

In Witness Whereof I have hereunto set my hand and seal the sixth day of November, one thousand eight hundred and seventy-one.

(Signed) HENRY A. SMITH. [L. S.]

Sealed and Delivered in the Presence of
ANDREW J. SMITH.

City and County of New York:

On the sixth day of November, 1871, before me personally came Henry A. Smith, known to me to be the individual described in and who executed the foregoing power of attorney and acknowledged to me that he executed the same.

ANDREW J. SMITH,
Notary Public.

I certify that the foregoing is a true and correct extract from the original power of attorney in my possession.

ANDREW J. SMITH,
Notary Public, N. Y. C.

ASSIGNMENT.

Dated November 25, 1871.

For a good, full and valuable consideration, to me, Henry A. Smith, the subscriber, paid, the receipt of which is hereby 7536 confessed and acknowledged, I agree to relinquish, sell, assign and transfer, and do hereby sell, assign and transfer, unto C. S. Bushnell, Henry J. Davison and Gordon H. Waddell, all and every my right, title and interest, as one of the Grantees or persons named in the first section of the Act thereinafter mentioned, in and to the charter, franchise and authority, granted by the State of New York, by the Act of its Legislature, entitled: "An Act to authorize the construction of Gas Works and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York, and the Streets, Avenues, Squares and buildings therein, and to lay pipes for that purpose," passed June 12th, 1871, whereby the said grantees named in the first section of the said Act, and their assigns, are authorized and empowered to manufacture, make and sell gas within certain limits of the City of New York, therein prescribed, and to lay pipes for the purpose of conducting the gas in certain streets and other portions of the city, and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits, together with and subject to certain other conditions, rights, privileges and immunities, for the full and particular certification of which the said Act of the Legislature is particularly referred to, and its terms considered as a part of this instrument.

To have and to hold the same and every part thereof, with the appurtenances, unto the said C. S. Bushnell, Henry J. Davison and Gordon H. Waddell, and their assigns, with like force and effect as if they had been named as the grantees or persons in the said first section of said Act.

7537 In Witness Whereof, I have hereunto set my hand and seal this fifth day of December, one thousand eight hundred and seventy-one.

HENRY S. SMITH, [L. S.]
By BERNARD S. SMYTHE, *Att'y.*

In presence of
AND. J. SMITH.

Three U. S. Internal Revenue Stamps, 5 cents each.

CITY AND COUNTY OF NEW YORK, *ss:*

On this fifth day of December, before me personally came Bernard Smyth, Attorney in fact of Henry A. Smith, to me known to be the person described in and who executed the foregoing instrument in writing, and acknowledged that he executed the same as the act and deed of the said Henry A. Smith by virtue of letters of attorney bearing date the sixth day of November, 1871.

ANDREW J. SMITH,
Notary Public, N. Y. C.

STATE OF NEW YORK, *County of New York, ss:*

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do hereby certify that Andrew J. COMPLAINANT'S EXHIBIT 160.

THOMAS Y. AVERY TO A. OAKEY HALL.

Dated June 29, 1871.

Know All Men by These Presents that I, Thomas Y. Avery, of ——, being one of the persons mentioned in the first section of the act hereinafter described, as Grantee or Incorporator therein, for and in consideration of the sum of one dollar to me in hand paid by A. Oakey Hall, of the City of New York, the receipt whereof is hereby acknowledged, and for other good and valuable considerations, do hereby sell, assign, transfer and convey to the said A. Oakey Hall all my right, title, interest, franchise, property and estate, individually or as an Incorporator or Grantee named or mentioned in an act of the Legislature of the State of New York, known as Chapter 944, of the Laws of 1871, entitled an act "to authorize the construction of gas works for the purpose of lighting a portion of the City of New York and the Streets, Avenues, Squares 7546 and buildings therein, and to lay pipes for that purpose," passed June 12th, 1871.

And I do hereby constitute and declare that the said A. Oakey Hall is the Assignee of all my rights, privileges, property, franchises and estate, contained in, coming through or by reason of the provisions of the above mentioned and described Act—the intention of this instrument being to confer upon and vest in the said A. Oakey Hall all the rights, privileges, franchises and estate which the provisions of the said act conferred upon or vested in me Individually or as an Incorporator or Grantee to the same extent and with like effect as if he, the said A. Oakey Hall, had been named and mentioned in the first section of said above mentioned act as an Incorporator or Grantee therein in my place and stead.

In Witness Whereof, I have hereunto set my hand and seal this 29th day of June, 1871.

THOMAS Y. AVERY. [L. S.]

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do hereby certify that Cornelius Corson whose name is subscribed to the Certificate of the proof or acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same. And further that I am well acquainted with the handwriting of such Notary, and verily believe that the signa-ure to the said certificate of proof or acknowledgment is genuine.

In Testimony Whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 31st day of July, 1906.

[L. S.] PETER J. DOOLING, *Clerk.*

7556 COMPLAINANT'S EXHIBIT 165.

WILLIAM JOHNSTON TO JOHN RYAN.

Dated December 16, 1871.

For and in consideration of the sum of one dollar, to me in hand paid by John Ryan, the receipt whereof is hereby acknowledged, and for other good and valuable considerations, I, William Johnston, one of the Grantees named in the first section of a certain act of the Legislature of the State of New York, entitled, "An Act to authorize the construction of Gas works and the manufacture and sale of Gas for the purpose of lighting a portion of the City of New York and the Streets, Avenues, Squares and buildings therein, and to lay pipes for that purpose" passed June 12th, 1871, and named in said Act as William Johnson, do hereby sell, assign, transfer and set over unto the said John Ryan all my right, title, interest, property or possession in and to the Charter, Grant, Franchise and authority therein and thereby granted to me, to have and to hold the same and every part thereof with the appurtenances unto the said John Ryan, with the like force and effect as if he the said had been named as one of the Grantees in the said first section of said Act.

In Witness Whereof I have hereunto set my hand and seal this 16th day of December one thousand eight hundred and seventy one.

WM. JOHNSTON. [L. S.]

In presence of
JOHN CALLAHAN.

G. H. WADDELL. [L. S.]

Sealed and delivered in the presence of
ROBERT OWEN.

STATE, CITY AND COUNTY OF NEW YORK, *ss:*

On the 21st day of February, one thousand eight hundred and seventy-four, before me personally appeared Cornelius S. Bushnell and Henry J. Davison, and on the twentieth day of February, 1874, before me personally appeared Gordon H. Waddell, to me known to be the individuals described in and who executed the foregoing instrument, and respectively acknowledged that they executed the same.

ROBERT OWEN,
Notary Public, New York.

7602 STATE OF NEW YORK, *County of New York, ss:*

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do Hereby Certify, That Robert Owen whose name is subscribed to the Certificate of the proof or acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same. And further that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said Certificate of proof or acknowledgment is genuine.

In Testimony Whereof, I have hereunto set my hand and affixed the seal of the said Court and County, the 31st day of July, 1906.

[L. S.] PETER J. DOOLING, *Clerk.*

COMPLAINANT'S EXHIBIT 186.

CORNELIUS S. BUSHNELL AND OTHERS TO PASCHAL W. TURNEY.

Dated February 14, 1874.

For a good, full and valuable consideration to us, Cornelius S. Bushnell, Henry J. Davison, and Gordon H. Waddell, the subscribers, paid, the receipt of which is hereby confessed and acknowledged, we jointly and severally agree to relinquish, sell, assign and transfer, and do hereby relinquish, sell, assign and transfer unto Paschal W. Turney all and every our joint and several rights, title and interest as owners by intermediate assign- 7603 ments from William Johnston (otherwise called William Johnson), James S. Turner, Thomas Y. Avery, John Balmore, Henry S. Murray and Peter H. E. Baxter, Junior (or their assigns) the original grantees, in and to the charter, grant, franchise and authority granted by the State of New York by the Act and contract of its Legislature, entitled: "An Act to authorize the construction of Gas Works, and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York, and the Streets, Avenues, Squares and buildings therein, and to lay pipes for that purpose," passed June 12th, 1871, whereby the said grantees named in the first section of the said Act, and their assigns, are authorized and empowered to manufacture, make and sell gas within certain limits of the City of New York, therein prescribed, and to lay pipes for the purpose of conducting the gas in certain streets and other portions of the City, and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits, together with, and subject to, certain other conditions, rights, privileges and immunities, for the full and particular certification of which the said Act of the Legislature is particularly referred to, and its terms considered as part of this instrument.

To Have and To Hold the same and every part thereof, with the appurtenances unto the said Paschal W. Turney, as aforesaid, with like force and effect as if he had been named as the grantee in the said first section of said Act, in the place and stead of the said original grantees from whom the rights, titles and interests hereby granted and assigned, were derived as aforesaid.

7604 In Witness Whereof, we have hereunto severally set our hands and seals this fourteenth day of February, one thousand eight hundred and seventy-four.

[L. S.] PETER J. DOOLING, *Clerk.*

7608 COMPLAINANT'S EXHIBIT 188.

WILLIAM FOSTER, JR., AND OTHERS AND THE UNION GAS LIGHT COMPANY.

AGREEMENT.

Dated February 25, 1874.

This Indenture made the twenty-fifth day of February, one thousand eight hundred and seventy-four, between William Foster, Junior, James M. Townsend, Paschal W. Turney, Eben F. Bacon, Charles E. Appleby, Henry H. Porter and Samuel J. Young of the first part and The Union Gas Light Company of the City of New York of the second part:

Whereas by an Act of the Legislature of the State of New York, passed June 12, 1871, entitled "An Act authorizing the construction of gas works and the manufacture and sale of gas for the purposes of lighting a portion of the City of New York, and the Streets, Avenues, Squares and buildings therein, and to lay pipes for that purpose," Isaac P. Martin, William Foster, Junior, and others therein named and their assigns were authorized and empowered at any time thereafter to manufacture, make and sell gas to be made of coal, oil, tar, peat, pitch, turpentine or other materials to be used for the purpose of lighting all that portion of the City of New York, lying North of the centre line of Seventy-ninth Street, including all the Central Park in its entire width and length, and all Streets, Avenues, Lanes, Alleys, Squares and parks within the limits aforesaid, and any buildings, manufactories or houses contained and situate within the said limits, and to lay pipes for the purpose of conducting the gas in any Streets, Avenues, Lanes, Alleys, Squares and parks of said City and in the said Central Park and to 7609 adopt any other necessary means to furnish gas to any inhabitant in said portion of said City, and to the said Central Park together with and subject to certain other conditions, rights, privileges and immunities as by the said act will upon reference appear and the terms of which act are to be taken and considered as part of this instrument.

And Whereas, the parties of the first part by virtue of assignments from all the original grantees named in the said Act of the Legislature, or their assigns, are the owners as joint tenants of all and singular the franchises, rights, powers, immunities and authorities granted by the said Act of the Legislature.

And Whereas, the parties of the first part now constitute the Executive Committee for the control and management of the business authorized to be done and carried on by the provisions of said act.

Now This Indenture Witnesseth, that the parties hereto of the first part in consideration of the sum of One Dollar to them respectively paid, the receipt of which is acknowledged and of other good and valuable considerations, do grant and assign unto the parties of the second part for and during the whole term of the corporate existence

of the parties of the second part whether original or renewed or extended and for the whole term of the existence of any other corporation or association into which the parties of the second part may at any time become merged, the right to do, exercise and perform as the Agents and Attorneys of the parties of the first part and their successors, hereby irrevocably constituted all and every the rights, privileges, franchises and immunities given and granted or created by the said Act of the Legislature or which may be given, granted or by any Act amendatory or in addition to the said recited act
7610 fully and effectually and in as large and ample a manner as the parties of the first part as the assignees and holders of all the rights, franchises, privileges and immunities can or may exercise, use and enjoy the same. And the parties of the first part, for themselves and their successors, covenant with the parties of the second part and their successors and assigns that they hold and will continue, jointly and not severally, to hold the rights, privileges, franchises and immunities granted by the said Act of the Legislature, or which may be granted by any other amendatory or additional act and that upon the death, or upon the resignation of either of the parties of the first part as a member of the Executive Committee provided for in the said act, or of any of their successors in said Committee, the surviving members of the Executive Committee for the time being will upon the request of the parties of the second part and their successors, elect a new member of the Executive Committee in the place and stead of the member of such Committee so dying or resigning, and such new member shall be vested with the rights and be subject to the duties and obligations of the member in whose place he shall be so elected and this Instrument shall operate as a transfer and assignment of all the rights and interests of the person so dying or resigning to the person who may be appointed in his place as aforesaid, and further that they, the parties of the first part, and their successors will not, except upon the written consent of the parties of the second part, their successors or assigns, transfer, part with or encumber any of the rights, franchises, privileges or immunities vested in them by the said Act of the Legislature as the assignees of the grantees therein named or otherwise or which may become vested in them by any amendatory or additional Act. And, the
7611 parties of the first part for themselves and their successors further covenant with the parties of the second part, their successors and assigns, that they will at any time upon request of the parties of the second part and their successors, grant and delegate to any other corporation or association the right as the Agents and Attorneys of such Executive Committee to manufacture, make and sell gas to be used for the purpose of lighting any portion of the City of New York within the territorial limits expressly described in the said recited Act of the Legislature, including Central Park, and to adopt any other necessary measures to furnish gas to any other inhabitant in any other portion of said City, subject to the limitations, restrictions and conditions and with the benefit of the rights and privileges thereby granted.

And the parties of the first part for themselves and their successors further covenant to and with the parties of the second part, their successors and assigns, that they will at any time hereafter upon the request of the parties of the second part, their successors and assigns, make, do and execute all such further and other deeds and assurances which may be necessary or which may be required for the more effectually carrying out and executing of the grant, agreement and covenants on their parts herein contained.

This Indenture Further Witnesseth that the parties of the second part in consideration of the premises and of the sum of One dollar to them in hand paid, covenant with the parties of the first part and their successors, that they will at their own cost, charge and expense as the agents and attorneys of the parties of the first part and their successors do execute and perform all and every the work, labor and services contemplated in and by the said recited Act for the 7612 beneficial exercise of the rights and privileges thereby granted as fully as if they had been named the grantees in said act and that they will protect and save harmless the parties of the first part and their successors from any and every liability, damage or injury in the premises. But it is expressly understood that nothing herein contained shall be construed as an obligation to pay to the parties of the first part or their successors any sum of money whatever by way of compensation for their services in the exercise of their function as an Executive Committee as aforesaid, or any sum of money whatever other than any damages which they may sustain by reason of the failure of the parties of the second part to protect and save them harmless in the premises.

In Witness Whereof the said parties of the first part have hereunto set their hands and seals and the parties of the second part have hereunto caused their Common Seal to be affixed the day and year first above written.

COMPLAINANT'S EXHIBIT 189.

WILLIAM FOSTER, JR., TO ROBERT M. C. GRAHAM.

Dated December 5, 1876.

For a good, full and valuable consideration, to me, William Foster, Jr., the subscriber, paid, the receipt of which is hereby confessed and acknowledged I agree to relinquish, sell, assign and transfer and do hereby relinquish, sell, assign and transfer unto Robert M. C. Graham of the City of New York all my joint and several rights title and interest as owners by intermediate assignments from Isaac P. Martin, William P. Smith, Edward Jones, Shepherd F. Knapp and William R. Dyer being certain of the original grantees, together with all my right as one of the original grantees in and to the Charter grant, franchise and authority granted by the State 7615 of New York by the Act and contract of its Legislature, entitled an Act to authorize the construction of gas works and the manufacture of gas for the purpose of lighting a portion of the City of New York and the streets, avenues, squares and buildings therein and to lay pipes for that purpose, passed June 12th, 1871, whereby the said grantees named in first section of the said Act and their assigns are authorized and empowered to manufacture, make and sell gas within certain limits of the City of New York therein prescribed and to lay pipes for the purpose of conducting the gas in certain streets and other portions of the city and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits, together with and subject to certain other conditions, rights, privileges and immunities for the full and particular certification of which the said Act of the Legislature is particularly referred to and its terms considered as a part of this instrument.

To Have and To Hold the same and every part thereof with the appurtenances unto the said Robert M. C. Graham as aforesaid, with like force and effect as if he had been named as the grantee in the said first section of said Act in the place and stead of the said original grantees from whom the rights, titles and interest hereby granted and assigned were derived as aforesaid.

In Witness Whereof I have hereunto set my hand and seal this fifth day of December, A. D. 1876.

Doolitt-e of New Haven, Connecticut, all my joint and several rights, title and interest as owner by intermediate assignments from Andrew J. Smith, Henry A. Smith, Richard H. Vaughan, Joseph Bell, Delavan Peck and John J. Walsh, being certain of the original grantees in and to the Charter grant, franchise and authority granted by the State of New York by the act and contract of its Legislature, entitled "An Act to authorize the construction of gas works and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York and the streets, avenues and squares therein, and to lay pipes for that purpose," passed June 12th, 1871, whereby the said grantees named in the first section of the said Act and their assigns are authorized and empowered to manufacture make and sell gas within certain limits of the City of New York therein prescribed and to lay pipes for the purpose of conducting the gas in certain streets and other portions of the City, and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits together with and subject to certain other conditions, rights, privileges and immunities for the full and particular certification the said Act of the Legislature is particularly referred to and its terms considered as a part of this instrument. 7625

To Have and To Hold the same and every part thereof with the appurtenances, unto the said Tilton E. Doolittle as aforesaid with like force and effect as if he had been named as the grantee in the said first section of said Act in the place and stead of the said original grantees from whom the rights, titles and interests hereby granted and assigned were derived as aforesaid.

In Witness Whereof I have hereunto set my hand and seal this 4th day of December, 1876.

CHARLES E. APPLEBY. [L. S.]

Sealed and delivered in the presence of
M. A. POTTER.

7627 COMPLAINANT'S EXHIBIT 194.

WILLIAM FOSTER, JR., ET AL., TO WALTER OSBORN.

Dated December 7, 1876.

For a good, full and valuable consideration to us, William Foster, Jr., James M. Townsend, Eben F. Bacon, Charles E. Appleby, Henry H. Porter and Samuel J. Young, the subscribers, paid, the receipt of which is hereby confessed and acknowledged, we jointly and severally agree to relinquish, sell, assign and transfer, and do hereby relinquish, sell, assign and transfer unto Walter Osborn, of New Haven, Connecticut, all and every our joint and several rights, title and interest as survivors of Paschal W. Turney, deceased, under the provisions of an agreement dated the 25th day of February, 1874, between the subscribers and said Paschal W. Turney of the first part and "The Union Gas Light Company" of the City of New York of the second part.

It being the intention of this assignment to vest in said Walter Osborn only the rights, title and interest of said Paschal W. Turney as owner by intermediate assignment of certain grants and franchises from certain of the original grantees named in Chapter 944 of the Laws of New York of 1871, and vested in the subscribers as survivors of said Turney under said agreement of February 25th, 1874.

And the subscribers by virtue of the provisions of said agreement last named, and on the written request of "The Union Gas Light Company" of the City of New York do hereby elect and appoint said Walter Osborn, a member of the Executive Committee existing under section three of Chapter 944 of the Laws of New York for 1871, to fill the vacancy caused by the death of said Paschal
7628 W. Turney.

In Witness Whereof, we have hereunto severally set our hands and seals the fifth day of December, one thousand eight hundred and seventy-six.

COMPLAINANT'S EXHIBIT 196.

REQUEST AND CONSENT OF "THE UNION GAS LIGHT COMPANY."

Dated December 11, 1876.

The undersigned "The Union Gas Light Company of the City of New York" hereby consents that William Foster, Jr., James M. Townsend, Eben F. Bacon, Charles E. Appleby, Henry H. Porter and Samuel J. Young, the assignees and owners by intermediate assignments from the original grantees of the charter, grant, franchise, and authority granted by the State of New York by the Act of its Legislature entitled "An Act to authorize the construction of Gas Works and the manufacture and sale of Gas for the purpose of lighting a portion of the City of New York and the Streets, avenues, and squares and buildings therein, and to lay pipes for that purpose," passed June 12th, 1871, and owners by right of survivorship of the right, title and interest of Paschal W. Turney, deceased, may sell, assign, transfer and set over to Robert M. C. Graham of New York City, Tilton E. Doolittle of New Haven, Connecticut, Jared E. Redfield of Essex, Connecticut, John Sickels of New York City, George Howes of New York City, Walter Osborn of New Haven, Connecticut, and Henry H. Porter of New York City all of said interests. This consent is given under the provisions of a certain agreement dated the 25th day of February, 1874, between William Foster, Jr., et al., and the said "The Union Gas Light Company" of the City of New York, whereby said Company is created the agent and attorney of the parties of the first part in said agreement named.

7633 And we request said Robert M. C. Graham, Tilton E. Doolittle, Jared E. Redfield, John Sickels, George Howes, Walter Osborn and Henry H. Porter and whoever may be associated with them to grant and delegate to the "Knickerbocker Gas Light Company" of the City of New York all the rights and privileges as agents and attorneys heretofore granted and delegated to "The Union Gas Light Company" by the parties of the first part in said agreement of February 25th, 1874.

And the said "The Union Gas Light Company" hereby requests said William Foster, Jr., James M. Townsend, Eben F. Bacon, Charles E. Appleby, Henry H. Porter and Samuel J. Young, surviving members of the Executive Committee under section three of Chapter 944 of the Laws of 1871, to elect Walter Osborn of New Haven, Connecticut, a member of said Executive Committee to fill the vacancy caused by the death of Paschal W. Turney, a member of said Committee at the time of his death.

Also to assign to said Osborn all the rights, title and interest of said Turney as assignee by intermediate assignments of certain grantees named in said Chapter 944 of the Laws of 1871, and vested in them as the survivors of said Turney.

In Witness Whereof the said "The Union Gas Light Company" has hereunto set its hand and caused its common seal to be affixed this eleventh day of December one thousand eight hundred and seventy-six.

COMPLAINANT'S EXHIBIT 197.

CHARLES E. APPLEBY, RECEIVER, TO CLARK BELL.

Deed.

Dated August 10, 1876.

This Indenture, made the tenth day of August, 1876, between Charles Edgar Appleby, Receiver of the Union Gas Light Company of the City of New York, of the first part, and Clark Bell, of the City and County of New York, of the second part.

Whereas the party of the first part was duly appointed the Receiver of the property, Estate and effects of The Union Gas Light Company of the City of New York, by an order of the Supreme Court of the State of New York, made on the fifteenth day of June, 1875, in an action pending in said Court, in the City and County of New York, wherein the People of the State of New York are plaintiffs and the said The Union Gas Light Company and another are defendants.

And Whereas by an order of the said Supreme Court made in the said action, at Special Term, on the twenty-fourth day of July, 1876, it was among other things ordered that the party hereto of the first part as such Receiver, be and he was hereby authorized and directed to sell at public auction in the City of New York, to the highest bidder, all the right, title and interest of every kind and nature whatsoever, which the said Union Gas Light Company or its Receiver might have in and to certain franchises, rights, grants, contracts and property in such order mentioned, of which the contract rights and franchises and hereinafter mentioned, and conveyed, are part; And that the said party of the first part as such Receiver give public notice of such sale in the mode in such order mentioned, and upon the sale of the same to make, execute 7636 and deliver to the purchaser or purchasers, or his or their assigns, all necessary and proper deeds or other instruments, conveying and transferring the same.

And Whereas the said party of the first part as such Receiver, pursuant to such order duly advertised to be sold at the exchange Sales Room, Number 111 Broadway, in the City of New York, on the tenth day of August, 1876, at 12 o'clock noon of that day, by E. H. Ludlow & Co., Auctioneers, all and singular the franchises, rights, grants, contracts, and property in such order mentioned, due notice of such sale having been given as directed in and by said order.

And Whereas at the time and place mentioned in such advertisement of sale, the party of the first part as such Receiver duly attended, and sold at public auction, the contract and rights and grants, franchises hereinafter mentioned to Walter Osborne, Tilton E. Doolittle and Jared E. Redfield, Receivers of the Townsend Savings Bank of New Haven, Connecticut, for the sum of Seventy-five thousand dollars, that being the highest sum bidden therefor.

And Whereas the said purchasers have since such sale, by an instrument in writing duly assigned and transferred unto the party hereto of the second part all their right, title and interest in and to the said property and franchises and their interest in the said bid.

Now This Indenture, Witnesseth, That the party hereto of the first part in consideration of the premises and of the said sum of Seventy-five thousand dollars to him paid by the party hereto of the second part, the receipt of which is hereby acknowledged, hath bargained, sold, assigned and set over, and he hereby bargains, sells, assigns, and sets over to the said party of the second part, his executors, administrators and assigns all the interest of the said 7637 Union Gas Light Company, or the party of the first part, as its receiver, in and to a certain contract made by the said Union Gas Light Company with William Foster, Junior, and certain other grantees of a grant from the State of New York, known as and described in Chapter 944 of the Laws of this State, passed Jan. 12, 1871, which contract bears date the twenty-fifth day of February, 1874; and all the right, title and interest of the said Company or of the said party of the first part as its Receiver, in and to the State grant above referred to.

To Have and To Hold the same to the party of the second part, his executors, administrators and assigns to their own use forever.

In Witness Whereof the party of the first part has hereunto set his hand and seal the day and year first above written.

CHARLES E. W. APPLEBY, *Receiver*. [L. S.]

Sealed and delivered in presence of
M. A. POTTER. [L. S.]

STATE, CITY AND COUNTY OF NEW YORK, *ss:*

On this twenty-first day of August, 1876, before me personally appeared Charles Edgar Appleby to me known to be the person described in and who executed the foregoing instrument, and acknowledged that he executed the same.

[L. S.] PETER J. DOOLING, *Clerk.*

COMPLAINANT'S EXHIBIT 198.

ROBERT M. C. GRAHAM, TILTON E. DOOLITTLE AND OTHERS.

with

KNICKERBOCKER GAS LIGHT COMPANY.

AGREEMENT.

Dated December 11, 1876.

This Indenture, made this eleventh day of December, in the year one thousand eight hundred and seventy-six, between Robert
7639 M. C. Graham, of the City, County and State of New York, Tilton E. Doolittle, of New Haven, Connecticut, Jared E. Redfield, of Essex, Connecticut, John Sickels, of said City of New York, George Howes, of said City of New York, Walter Osborn, of New Haven, Connecticut and Henry H. Porter, of said City of New York of the first part, and the Knickerbocker Gas Light Company of the City of New York of the second part.

Whereas, by an Act of the Legislature of the State of New York, passed June 12, 1871, entitled "An Act authorizing the construction " of gas works and the manufacture and sale of gas for the purposes " of lighting a portion of the City of New York, and the streets, ave- " nues, squares and buildings therein, and to lay pipes for that pur- " pose," Isaac P. Martin, William Foster, Junior, and others therein named and their assigns were authorized and empowered at any time thereafter to manufacture, make and sell gas to be made of coal, oil, tar, peat, pitch, turpentine or other materials, to be used for the purpose of lighting all that portion of the City of New York lying north of the center line of Seventy-ninth Street, including all the Central Park in its entire width and length, and all streets, avenues, lanes, alleys, squares and parks within the limits aforesaid and any buildings, manufactories or houses contained and situate within the said limits, and to lay pipes for the purpose of conducting the gas in any streets, avenues, lanes, alleys, squares and parks of said City and in the said Central Park and to adopt any other necessary means to furnish gas to any inhabitant in said portion of said City and to the said Central Park, together with and subject to certain other conditions, rights, privileges and immunities as by the said act will upon reference appear and the terms of which act are to be taken 7640 and considered as part of this instrument.

And Whereas, the parties of the first part by virtue of assignments from all the original grantees named in the said act of the Legislature or their assigns, are the owners as joint tenants of all and singular the franchises, rights, powers, immunities and authorities granted by the said Act of the Legislature.

And Whereas, the parties of the first part now, constitute the Executive Committee for the control and management of the business authorized to be done and carried on by the provisions of said act.

Now This Indenture Witnesseth, that the parties hereto of the first part in consideration of the sum of one dollar to them respectively paid, the receipt of which is hereby acknowledged, and of other good and valuable considerations do grant and assign unto the parties of the second part for and during the whole term of the corporate existence of the parties of the second part whether original or renewed or extended and for the whole term of the existence of any other corporation or association into which the parties of the second part may at any time become merged the right to do, exercise and perform as the agents and attorneys of the parties of the first part and their successors hereby irrevocably constituted all and every the rights, privileges, franchises and immunities given and granted or created by the said act of the Legislature or which may be given, granted or created by any Act amendatory or in addition to the said recited Act as fully and effectually and in as large and ample a manner as the parties of the first part as the assignees and holders of all the rights, franchises, privileges and immunities can or may exercise, use and enjoy the same.

And the parties of the first part for themselves and their 7641 successors covenant with the parties of the second part and their successors and assigns that they hold and will continue jointly and not severally to hold the rights, privileges, franchises and immunities granted by the said act of the Legislature or which may be granted by any other amendatory or additional act and that upon the death, or upon the resignation of either of the parties of the first part as a member of the Executive Committee provided for in the said act, or of any of their successors in said Committee, the surviving members of the Executive Committee for the time being will upon the request of the parties of the second part and their successors elect a new member of the Executive Committee in the place and stead of the member of such Committee so dying or resigning and such new member shall be vested with the rights and be subject to the duties and obligations of the member in whose place he shall be so elected, and this instrument shall operate as a transfer and assignment of

all the rights and interests of the person so dying or resigning to the person who may be appointed in his place as aforesaid, and further that they, the parties of the first part and their successors will not, except upon the written consent of the parties of the second part, their successors or assigns, transfer, part with or encumber any of the rights, franchises, privileges or immunities vested in them by the said act of the Legislature as the assignees of the grantees therein named or otherwise, or which may become vested in them by any amendatory or additional Act. And the parties of the first part for themselves and their successors further covenant with the parties of the second part, their successors and assigns, that they will at any time upon request of the parties of the second part and their successors grant and delegate to any other corporation or association the
7642 right as the agents and attorneys of such Executive Committee to manufacture, make and sell gas to be used for the purpose of lighting any portion of the City of New York within the territorial limits expressly described in the said recited Act of the Legislature, including Central Park, and to adopt any other necessary measures to furnish gas to any other inhabitant in any other portion of said City, subject to the limitations, restrictions and conditions, and with the benefit of the rights and privileges thereby granted.

And the parties of the first part for themselves and their successors further covenant to and with the parties of the second part, their successors and assigns that they will at any time hereafter upon the request of the parties of the second part their successors and assigns, make, do and execute all such further and other deeds and assurances which may be necessary or which may be required for the more effectually carrying out and executing of the grant, agreement and covenants on their parts herein contained.

This Indenture further witnesseth that the parties of the second part in consideration of the premises and of the sum of one dollar to them in hand paid, covenant with the parties of the first part and their successors, that they will at their own cost, charge and expense as the agents and attorneys of the parties of the first part and their successors, do, execute and perform all and every the work, labor and services contemplated in and by the said recited Act for the beneficial exercise of the rights and privileges thereby granted as fully as if they had been named the grantees in said Act and that they will protect and save harmless the parties of the first part and their successors from any and every liability, damages or injury in the premises.

But it is expressly understood that nothing herein con-
7643 tained shall be construed as an obligation to pay to the parties of the first part or their successors any sum of money whatever by way of compensation for their services in the exercise of their function as an Executive Committee as aforesaid or any sum of money whatever other than any damage which they may sustain by reason of the failure of the parties of the second part to protect and save them harmless in the premises.

In Witness Whereof the said parties of the first part have hereunto set their hands and seals and the parties of the second part have hereunto caused their Common Seal to be affixed the day and year first above written.

CONSENT OF KNICKERBOCKER GAS LIGHT COMPANY.

Dated May 20, 1878.

The undersigned "Knickerbocker Gas Light Company" hereby consents that Robert M. C. Graham, Tilton E. Doolittle, Jared E. Redfield, Walter Osborn and Henry H. Porter, five of the assignees and owners by intermediate assignments from the original grantees of the charter, grant, franchise and authority granted by the State of New York by the Act of its Legislature, entitled "An Act to authorize the construction of gas works and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York and the streets, avenues, and squares and buildings therein and to lay pipes for that purpose," passed June 12, 1871, may sell, assign, transfer, and set over to William Bayard Cutting, Robert F. Cutting, M. Bayard Brown, O.P.C. Billings and William W. Moir, all of their said interests. This consent is given under the provisions of a certain agreement dated the eleventh day of December, 1876, between Robert M. C. Graham, Tilton E. Doolittle, Jared E. Redfield, John Sickels, George Howes, Walter Osborn and Henry H. Porter of the 7646 first part and the Knickerbocker Gas Light Company of the second part whereby said Company is created the agent and attorney of the said parties of the first part in said agreement named.

In Witness Whereof the said Knickerbocker Gas Light Company has caused its corporate seal to be hereunto affixed and these presents to be signed by its President and Secretary this 20th day of May, A. D. 1878.

TO
KNICKERBOCKER GAS LIGHT COMPANY.

Dated May 20, 1878.

General Release.

To All to Whom These Presents Shall Come Or May Concern, Greeting:

Know ye, That we, Walter Osborn, Tilton E. Doolittle, and Jared E. Redfield, individually and as Receivers of the Townsend Savings Bank of New Haven, Connecticut, for and in consideration of the sum of One Dollar lawful money of the United States of America, to each of us in hand paid by Knickerbocker Gas Light Company the receipt of which is hereby acknowledged, have remised, re-
7649 leased, and forever discharged and by these presents do for ourselves, our heirs, executors, and administrators and our successor or successors, remise, release and forever discharge the said Knickerbocker Gas Light Company, its successor or successors, of and from all, and all manner of action and actions, cause and causes of actions, suits, debts, dues, sums of money, accounts, reckonings, bonds, bills, specialties, covenants, contracts, controversies, agreements, promises, variances, trespasses, damages, judgments, extents, executions, claims and demands whatever in law or in equity, which against said Knickerbocker Gas Light Company we ever had, now have or which our heirs, executors, or administrators, successor or successors, hereafter can, shall or may have for, upon, or by reason of any matter, cause or thing whatsoever from the beginning of the world to the day of the date of these presents, jointly and severally.

In Witness Whereof, we have hereunto set our hands and seals, the 20th day of May, in the year of our Lord one thousand eight hundred and seventy-eight.

WALTER OSBORN. [L. S.]

KNICKERBOCKER GAS LIGHT COMPANY TO WILLIAM BAYARD CUTTING AND OTHERS.

Consent to Transfer State Grant.

The undersigned "Knickerbocker Gas Light Company" hereby consents that William Bayard Cutting, Robert F. Cutting, M. Bayard Brown, O. P. C. Billings, William W. Moir, John Sickels and George Howes, the assignees and owners by intermediate assignments from the original grantees of the charter, grant, franchise and authority granted by the State of New York by the Act of its Legislature entitled:

"An Act to authorize the construction of gas works and the manufacture and sale of gas for the purpose of enlighting a portion of the City of New York and the streets, avenues and squares and buildings therein, and to lay pipes for that purpose," passed June 12th, 1871, may sell, assign and transfer and set over to O. Ortendorfer, H. E. Gawtry, Henry Day, Phillip Allen, Charles G. Francklyn, Peter Gardner, L. C. Thompson, all of their said interests.

This consent is given under the provisions of a certain agreement, dated the eleventh day of December, 1876, between Robert M. C. Graham, Tilton E. Doolittle, Jared E. Redfield, John Sickels, George Howes, Walter Osborn and Henry H. Porter, of the first part, and the Knickerbocker Gas Light Company, of the second part, whereby said company is created the agent and attorney of the said party of the first part in said agreement named.

In Witness Whereof, the said Knickerbocker Gas Light Company has caused its corporate seal to be hereunto affixed and these
7651 presents to be signed by its President and Secretary this 11th day of March, one thousand eight hundred and eighty.

KNICKERBOCKER GAS LIGHT COMPANY,
By WM. A. STEPHENS, *President.*
JOHN SICKELS, *Secretary.*

In the presence of
DANIEL P. MAHONY.
[L. S.]

Attest:
JOHN SICKELS, *Sec'y.*

STATE OF NEW YORK, *City and County of New York, ss:*

On this eleventh day of March, one thousand eight hundred and eighty, before me personally came William A. Stephens and John Sickels, respectively the President and Secretary of the Knickerbocker Gas Light Company, with whom I am personally acquainted, who, being by me severally duly sworn, each for himself, said, that he resided in the City of New York; that he, William A. Stephens, was the President, and he, John Sickels, was the Secretary of the Knickerbocker Gas Light Company; that he knew the corporate seal of said company; that the seal affixed to the foregoing instrument was such corporate seal; that it was so affixed by order of the board of directors of the said company, and that he, William A. Stephens, signed his name thereto as President of said company, and he, John Sickels, signed his name thereto as Secretary by like order.

DANIEL P. MAHONY,
Notary Public, N. Y. Co.

7652 The foregoing agreement is subsequent and subject to two certain Indentures of Mortgages made by said Knickerbocker Gas Light Company, one dated July 16th, 1878, to secure the payment of the sum of $750,000, and the other dated March 11th, 1880, to secure the payment of the sum of $450,000.

Dated New York, March 11th, 1880.

KNICKERBOCKER GAS LIGHT COMPANY,
WM. A. STEPHENS, *President.*
JOHN SICKELS, *Secretary.*

In the presence of
DANIEL P. MAHONY.
[L. S.]

Attest:
JOHN SICKELS, *Sec'y.*

CITY AND COUNTY OF NEW YORK, *ss:*

On this 11th day of March, A. D. 1880, before me personally came William A. Stephens and John Sickels, respectively the President and Secretary of the Knickerbocker Gas Light Company, with whom I am personally acquainted, who, being by me severally duly sworn, each for himself, said that he resided in the City of New York, that he, William A. Stephens, was the President, and he, John Sickels, was the Secretary of the Knickerbocker Gas Light Company; that he [illegible]w the corporate seal of said company, that the seal affixed to the foregoing condition was such corporate seal, and that it was so affixed by order of the Board of Directors of the said
company, and that he, William A. Stephens, signed the
7653 name of said corporation thereto, and his own name as
President thereof, and he, John Sickels, signed his name
thereto as Secretary by like order.

COMPLAINANT'S EXHIBIT 203.

JARED E. REDFIELD TO WILLIAM W. MOIR.

Dated May 20, 1878.

For a good, full and valuable consideration to me, Jared E. Redfield, the subscriber, paid, the receipt of which is hereby confessed and acknoweldged, I agree to relinquish, sell, assign and transfer, and do hereby relinquish, sell, assign and transfer unto William W. Moir, of New York City, all my joint and several rights, titles and interests as owner by intermediate assignments from George H. Wicks, John E. Cronly, John C. Angell, Edward J. Shandley, Joseph G. Jennings and Henry Johnson, being certain of the original grantees in and to the charter, grant, franchise and authority granted by the State of New York by the Act and contract of its Legislature, entitled "An Act to authorize the construction of gas works and for the manufacture and sale of gas for the purpose of lighting a portion of the City of New York and the streets and avenues, squares and buildings therein, and to lay pipes for that purpose," passed June 12th, 1871, whereby the said grantees named in first section of the said Act, and their assigns, are authorized and empowered to manufacture, make and sell gas within certain limits therein prescribed, and to lay pipes for the purpose of conducting 7654 the gas in certain streets and other portions of the City, and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits, together with and subject to certain other conditions, rights, privileges and immunities, for the full and particular certification of which the said Act of the Legislature is particularly referred to, and its terms considered as a part of this instrument.

To have and to hold the same and every part thereof, with the appurtenances, unto the said William W. Moir, as aforesaid, with like force and effect as if he had been named as the grantee in the said first section of said Act in the place and stead of the said original grantees from whom the rights, titles and interests hereby granted and assigned were derived as aforesaid.

In Witness Whereof, I have hereunto set my hand and seal this 20th day of May, 1878.

JARED E. REDFIELD. [L. S.]

Sealed and delivered in the presence of
M. A. POTTER.

STATE OF NEW YORK, *City and County of New York, ss:*

On this twentieth day of May, A. D. 1878, before me personally came Jared E. Redfield, to me known to be the individual described in and who executed the foregoing instrument, and acknowledged that he executed the same.

M. A. POTTER,
Notary Public, N. Y. Co.

7655 STATE OF NEW YORK,
City and County of New York, ss:

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do hereby certify that M. A. Potter, whose name is subscribed to the certificate of the proof or acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment, a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn, and duly authorized to take the same. And, further, that I am well acquainted with the handwriting of such Notary, and verily believe that the signature to the said certificate of proof or acknowledgment is genuine.

In testimony whereof I have hereunto set my hand and affixed the seal of the said Court and County, the 31st day of July, 1906.

[L. S.] PETER J. DOOLING, *Clerk.*

COMPLAINANT'S EXHIBIT 204.

TILTON E. DOOLITTLE TO OLIVER P. C. BILLINGS.

Dated May 20, 1878.

For a good, full and valuable consideration to me, Tilton E. Doolittle, the subscriber, paid, the receipt of which is hereby confessed and acknowledged. I agree to relinquish, sell and assign and transfer and do hereby relinquish, sell and assign and transfer unto Oliver P. C. Billings of New York all my joint and several rights, title and interest as owner by intermediate assignments from Andrew J. Smith, Henry A. Smith, Richard H. Vaughn, Joseph Bell, Delavan Peck and John J. Walsh, being certain of the original grantees in and to the charter, grant, franchise and authority granted by the State of New York by the Act and contract of its Legislature, entitled "An Act to authorize the construction of gas works and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York and the streets, avenues and squares therein and to lay pipes for that purpose," passed June 12th, 1871, whereby the said grantees named in the first section of the said Act and their assigns are authorized and empowered to manufacture, make and sell gas within certain limits of the City of New York therein prescribed and to lay pipes for the purpose of conducting the gas in certain streets and other portions of the city and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits, together with and subject to certain other conditions, rights, privileges and immunities for the full and particular certification of which the said Act of the Legislature is particularly referred to and its terms considered as a part of this instrument. 7656

To have and to hold the same and every part thereof with the appurtenances unto the said Oliver P. C. Billings as aforesaid with like force and effect as if he had been named as the grantee in the said first section of said Act in the place and stead of the said original grantees from whom the rights, titles and interests hereby granted and assigned were derived as aforesaid.

In Witness Whereof I have hereunto set my hand and seal this 20th day of May, A. D. 1878.

For a good, full and valuable consideration to me, Henry H. Porter, the subscriber, paid, the receipt of which is hereby confessed and acknowledged, I agree to relinquish, sell, assign and transfer and do hereby relinquish, sell, assign and transfer unto Robert F. Cutting, of Bergen, N. J., all my joint and several rights, title and interest as owner by intermediate assignments from John Cox, John J. Turner, Edgar Brower, Charles E. Loew and Mathew T. Brenan, being certain of the original grantees in and to the charter grant franchise and authority granted by the State of New York by the Act and contract of its Legislature, entitled "An Act to authorize the construction of gas works and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York and the streets, avenues, squares and buildings therein and to lay pipes for that purpose," passed June 12th, 1871, whereby the said grantees 7661 named in the first section of the said Act and their assigns are authorized and empowered to manufacture, make, and sell gas within certain limits of the City of New York therein prescribed and to lay pipes for the purpose of conducting the gas in certain streets and other portions of the said City and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits, together with and subject to certain other conditions, rights, privileges and immunities for the full and particular certification of which the said Act of the Legislature is particularly referred to and its terms considered as a part of this instrument.

To have and to hold the same and every part thereof with the appurtenances unto the said Robert F. Cutting as aforesaid with like force and effect as if he had been named as the grantee in the said first section of said Act in the place and stead of the said original grantees from whom the rights, titles and interest hereby granted and assigned were derived as aforesaid.

In Witness Whereof I have hereunto set my hand and seal this eighteenth day of May, A. D. 1878..

H. H. PORTER. [L. S.]

Sealed and delivered in the presence of

SAMUEL JENNISON.

COMMONWEALTH OF MASSACHUSETTS,
County of Suffolk, City of Boston:

I, Samuel Jennison, a Commissioner for the State of New York, residing in Boston, in the County of Suffolk, and Commonwealth of Massachusetts, do certify that on this eighteenth day of May, A. D. 1878, in said Boston, personally appeared before me Henry 7662 H. Porter, personally known to me to be the individual described in and who has executed the foregoing instrument and acknowledged that he executed the same.

In Witness Whereof, I have hereunto set my hand and official seal at Boston this 18th day of May, A. D. 1878.

[L. S.] SAMUEL JENNISON,
A Commissioner for the State of New York.

STATE OF NEW YORK, *Office of the Secretary of State:*

I hereby certify that Samuel Jennison of Boston, County of Suffolk, and State of Massachusetts, was at the time of taking the proof and acknowledgment mentioned in his annexed certificate, a Commissioner for the State of New York, to take the proof and acknowledgment of deeds and other instruments to be used or recorded in this State, and to administer oaths and affirmations; and that such Commissioner was at the time aforesaid, duly authorized to take the same; and that I have compared the signature of the said Commissioner to the certificate subjoined to the annexed instrument with the signature of such Commissioner deposited in this office, and have also compared the impression of the seal affixed to such certificate with the impression of the seal of such Commissioner, deposited in this office, and I verily believe the signature and impression of the seal to the said certificate to be genuine.

Witness my hand and the seal of office of the Secretary of State, at the City of Albany, this fourth day of August in the year the one thousand nine hundred and six.

[L. S.] FRANK D. COLE,
Deputy Secretary of State.

DANIEL P. MAHONY.

STATE OF NEW YORK, *City and County of New York, ss:*

On this 11th day of March, A. D. 1880, before me personally came M. Bayard Brown, to me known to be the individual described in and who executed the foregoing instrument, and acknowledged that he executed the same.

DANIEL P. MAHONY,
Notary Public, N. Y. Co.

7671 STATE OF NEW YORK, *County of New York, ss:*

I, Peter J. Dooling, Clerk of the County of New York, and also Clerk of the Supreme Court for the said County, the same being a Court of Record, do hereby certify, that Daniel P. Mahony, whose name is subscribed to the Certificate of Proof or Acknowledgment of the annexed instrument, and thereon written, was, at the time of taking such proof or acknowledgment a Notary Public in and for the County of New York, dwelling in the said County, commissioned and sworn and duly authorized to take the same. And further, that I am well acquainted with the handwriting of such Commissioner, and verily believe that the signature to the said Certificate of Proof or Acknowledgment is genuine.

In Testimony Whereof I have hereunto set my hand, and affixed the Seal of the said Court and County, the 31 day of July 1906.

[L. S.] PETER J. DOOLING, *Clerk.*

COMPLAINANT'S EXHIBIT 211.

ROBERT F. CUTTING TO H. E. GAWTRY.

Dated March 11, 1880.

For a good, full and valuable consideration to me, Robert F. Cutting, the subscriber, paid, the receipt of which is hereby confessed and acknowledged, I agree to relinquish, sell, assign and transfer, and do hereby relinquish, sell, assign and transfer, unto H. E. Gawtry all my joint and several rights, titles and interest as 7672 owner by intermediate assignments from John Cox, John J. Turner, Edgar Brower, Charles E. Loew and Mathew T. Brennan, being certain of the original grantees in and to the charter, grant, franchise and authority granted by the State of New York by the Act and Contract of its Legislature, entitled "An Act to authorize the construction of gas works, and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York and the streets and avenues, squares and buildings therein, and to lay pipes for that purpose," passed June 12, 1871, whereby the said grantees named in the first section of the said Act, and their assigns, are authorized and empowered to manufacture, make and sell gas within certain limits therein prescribed, and to lay pipes for the purpose of conducting the gas in certain streets and other portions of the City, and to adopt any other means necessary to furnish gas to inhabitants within the said prescribed limits, together with and subject to certain other conditions, rights, privileges and immunities, for the full and particular certification of which the said Act of the Legislature is particularly referred to, and its terms considered as a part of this instrument.

To have and to hold the same and every part thereof, with the appurtenances, unto the said H. E. Gawtry, as aforesaid, with like force and effect as if he had been named as the grantee in the said first section of said Act, in the place and stead of the said original grantees from whom the rights, titles and interests hereby granted and assigned were derived as aforesaid.

In Witness Whereof, I have hereunto set my hand and seal this 11th day of March, 1880.

R. FULTON CUTTING. [L. S.]

Sealed and Delivered in presence of

DANIEL P. MAHONY.

7674 COMPLAINANT'S EXHIBIT 212.

WILLIAM BAYARD CUTTING TO O. OTTENDORFER.

Dated March 11, 1880.

For a good, full and valuable consideration to me, William Bayard Cutting, the subscriber, paid, the receipt of which is hereby confessed and acknowledged, I agree to relinquish, sell, assign and transfer and do hereby relinquish, sell, assign and transfer unto O. Ottendorfer all my joint and several rights, titles and interest as assignee of William Foster, Jr., James M. Townsend, Eben F. Bacon, Charles E. Appleby, Henry H. Porter and Samuel J. Young, the survivors of Paschal W. Turney, deceased, and of which said Paschal W. Turney was owner by intermediate assignments from Thomas Y. Avery, John Balmore, James S. Turner, William Johnson, and Peter H. E. Baxter, Jr., being certain of the original grantees in and to the charter grant franchise and authority granted by the State of New York by the Act and Contract of its Legislature, entitled "An Act to authorize the construction of gas works and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York and the Streets and Avenues, Squares and Buildings therein and to lay pipes for that purpose," passed June 12, 1871, whereby the said grantees named in the first section of the said Act and their assigns are authorized and empowered to manufacture, make and sell gas within certain limits therein prescribed and to lay pipes for the purpose of conducting the gas in certain streets and other portions of the city, and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits together with and subject to certain other conditions, rights, privileges and immunities for the full and particular certification of which the said Act
7675 of the Legislature is particularly referred to and its terms considered as a part of this instrument.

To have and to hold the same and every part thereof with the appurtenances unto the said O. Ottendorfer, as aforesaid with like force and effect as if he had been named as the grantee in the said first section of said Act, in the place and stead of the said original grantees from whom the rights, titles and interests hereby granted and assigned were derived as aforesaid.

In Witness Whereof I have hereunto set my hand and seal this 11th day of March, 1880.

W. BAYARD CUTTING. [L. S.]

Sealed and delivered in presence of
DANIEL P. MAHONY.

STATE OF NEW YORK,
City and County of New York, ss:

On this 11th day of March, A. D. 1880, before me personally came William Bayard Cutting, to me known to be the individual described in and who executed the foregoing instrument and acknowledged that he executed the same.

DANIEL P. MAHONY,
Notary Public, N. Y. Co.

STATE OF NEW YORK,

COMPLAINANT'S EXHIBIT 213.

GEORGE HOWES TO S. C. THOMPSON.

Dated March 11, 1880.

For a good, full and valuable consideration to me, George Howes, the subscriber, paid, the receipt of which is hereby confessed and acknowledged, I agree to relinquish, sell, assign and transfer, and do hereby relinquish, sell, assign and transfer, unto S. C. Thompson all my joint and several rights, titles and interest as owner by intermediate assignments from William Vail, William H. Murphy, Patrick Quinn, George Chivis, John H. Johnston and William Higgins, being certain of the original grantees in and to the charter, grant, franchise and authority granted by the State of New York by the Act and Contract of its Legislature, entitled "An Act to authorize the construction of gas works and the manufacture and sale of gas for the purpose of lighting a portion of the City of New York and the streets and avenues, squares and buildings therein, and to 7677 lay pipes for that purpose," passed June 12, 1871, whereby the said grantees named in the first section of the said Act, and their assigns, are authorized and empowered to manufacture, make and sell gas within certain limits therein prescribed, and to lay pipes for the purpose of conducting the gas in certain streets and other portions of the City, and to adopt any other necessary means to furnish gas to inhabitants within the said prescribed limits, together with and subject to certain other conditions, rights, privileges and immunities, for the full and particular certification of which the said Act of the Legislature is particularly referred to, and its terms considered as a part of this instrument.

To have and to hold the same and every part thereof, with the appurtenances, unto the said S. C. Thompson, as aforesaid, with like force and effect as if he had been named as the grantee in the said first section of said Act, in the place and stead of the said original grantees from whom the rights, titles and interests hereby granted and assigned were derived as aforesaid.

In Witness Whereof, I have hereunto set my hand and seal this 11th day of March, 1880.

GEO. HOWES. [L. S.]

7691

COMPLAINANT'S EXHIBIT 216.

CHAP. 736.

An Act in relation to the price of illuminating gas furnished or sold to the City of New York and providing a penalty for violation.

Accepted by the city.

Became a law, June 3, 1905, with the approval of the Governor. Passed, three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. A corporation, association, copartnership or person engaged in the business of furnishing or selling illuminating gas in the city of New York, shall not charge said city or receive therefrom for such gas, a sum in excess of seventy-five cents per one thousand cubic feet.

Sec. 2. The illuminating gas furnished or sold by any such corporation, association, copartnership or person to said city shall have an illuminating power of not less than twenty-two sperm candles of six to a pound burning at the rate of one hundred and twenty grains of spermaceti per hour tested at a distance of not less than one mile from the distributing holder by a burner consuming five cubic feet of gas per hour and each one hundred cubic feet of gas shall not contain more than five grains of ammonia nor more than twenty grains of sulphur nor more than a trace of sulphuretted hydrogen. The pressure of said illuminating gas in any service mains in the said city at any distance from the place of manufacture shall not be less than one inch nor more than two and one-half inches.

7692 Sec. 3. Any corporation, association, copartnership or person violating any provision of this act shall forfeit the sum of one thousand dollars for each offense to be sued for and recovered in the name of and by the city of New York for its benefit.

Sec. 4. All acts or parts of acts inconsistent herewith are hereby repealed.

Sec. 5. This act shall take effect on the first day of July, nineteen hundred and five.

COMPLAINANT'S EXHIBIT 217.

CHAPTER 125.

An Act in relation to illuminating gas in the City of New York and regulating the quality and pressure thereof and the price to consumers other than said city and providing a penalty for violation.

Accepted by the City.

Became a Law April 3, 1906, with the approval of the Governor. Passed, a majority being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. A corporation, association, copartnership or person engaged in the business of manufacturing, furnishing or selling illuminating gas in the city of New York, except in the fifth ward of the Borough of Queens and in that portion of the Borough of the Bronx formerly contained in the towns of Eastchester and Pelham, shall not charge or receive for gas manufactured, furnished or sold in said city a sum per one thousand cubic feet in excess of the following rates:

7693 1. In the Borough of Manhattan, in the first ward of the Borough of Queens, in the Borough of Brooklyn except the thirtieth and thirty-first wards thereof, and in the Borough of the Bronx, except that portion of it formerly contained in the town of Westchester outside of the villages of Wakefield and Williamsbridge, eighty cents.

2. In the second and fourth wards of the Borough of Queens, and in the thirtieth ward of the Borough of Brooklyn, one dollar.

3. In the third ward of the Borough of Queens, in the thirty-first ward of the Borough of Brooklyn, and in the Borough of Richmond, one dollar and twenty-five cents for the remainder of the year nineteen hundred and six; one dollar and twenty cents during the year nineteen hundred and seven; one dollar and fifteen cents during the year nineteen hundred and eight; one dollar and ten cents during the year nineteen hundred and nine; one dollar and five cents during the year nineteen hundred and ten; and one dollar thereafter.

4. In that portion of the Borough of the Bronx formerly contained in the town of Westchester, outside of the villages of Wakefield and Williamsbridge, one dollar and fifteen cents during the years nineteen hundred and six, nineteen hundred and seven and nineteen hundred and eight; one dollar and ten cents during the year nineteen hundred and nine; one dollar and five cents during the year nineteen hundred and ten; and one dollar thereafter.

Sec. 2. The illuminating gas furnished by any such corporation, association, copartnership or person shall have an illuminating power of not less than twenty-two sperm candles of six to a pound, burning at the rate of one hundred and twenty grains of spermaceti per hour tested at a distance of not less than one mile from 7694 the distributing holder by a burner consuming five cubic feet of gas per hour and each one hundred cubic feet of gas shall not contain more than five grains of ammonia nor more than twenty grains of sulphur nor more than a trace of sulphuretted hydrogen. The pressure of illuminating gas in any service mains in the said city at any distance from the place of manufacture shall not be less than one inch, nor more than two and one-half inches.

SEC. 3. Any corporation, association, copartnership or person violating any provision of this act shall forfeit the sum of one thousand dollars for each offense to the people of the state.

SEC. 4. This act shall not apply to gas furnished or sold to the city of New York.

SEC. 5. Chapter three hundred and eighty-five of the laws of eighteen hundred and ninety-seven, entitled "An act to regulate the price of illuminating gas in cities of fifteen hundred thousand inhabitants," and all other acts or parts of acts inconsistent herewith are hereby repealed.

SEC. 6. This act shall take effect on the first day of May, nineteen hundred and six.

COMPLAINANT'S EXHIBIT 218.

LAWS OF 1897.

CHAPTER 385.

AN ACT to regulate the price of illuminating gas in cities of fifteen hundred thousand inhabitants.

Became a law May 7, 1897, with the approval of the Governor. Passed, a majority being present.

7695 *The People of the State of New York, represented in Senate and Assembly, do enact as follows:*

SECTION 1. A corporation, association, company, copartnership or person shall not charge or receive for illuminating gas in a city, as now constituted, which has a population of fifteen hundred thousand, sums to exceed, per thousand cubic foot, during the remainder of the year eighteen hundred and ninety-seven, one dollar and twenty cents; during the year eighteen hundred and ninety-eight, one dollar and fifteen cents; during the year eighteen hundred and ninety-nine, one dollar and ten cents; during the year nineteen hundred, one dollar and five cents; and during each year thereafter, one dollar.

SEC. 2. Such a corporation, association, company, copartnership or person shall not charge for illuminating gas for the use of any such city, sums to exceed, per thousand cubic feet, during the re-

PAGE BOUND

mainder of the year eighteen hundred and ninety-seven, one dollar; during the year eighteen hundred and ninety-eight, ninety-seven and a half cents; during the year eighteen hundred and ninety-nine, ninety-five cents; during the year nineteen hundred, ninety-two and a half cents, and during each year thereafter, ninety cents, but this act shall not apply to that portion of the city of New York which formerly constituted the town of Kingsbridge, or that portion of said city which was annexed thereto by chapter nine hundred and thirty-four of the laws of eighteen hundred and ninety-five, entitled "An act to annex to the city and county of New York, territory lying within the incorporated villages of Wakefield, Eastchester and Williamsbridge, the town of Westchester, and portions of the towns of Eastchester and Pelham."

SEC. 3. A change hereafter affected in the territory boundaries of
such a city, either by annexation, consolidation or otherwise,
7696 shall not be deemed to enlarge or change the territory within
which the price of gas is regulated as herein provided, but
this act shall continue in force for the purpose of regulating the price of gas in such city, as now constituted, notwithstanding any subsequent change of territory, but shall not apply in or to territory not now in such city.

SEC. 4. The illuminating gas furnished by any such corporation, association, company, copartnership or person shall have an illuminating power of not less than twenty-two sperm candles of six to the pound, burning at the rate of one hundred and twenty grains of spermaceti per hour tested, at a distance of not less than one mile from the place of manufacture, by a burner consuming five cubic feet of gas per hour, and shall, as regards purity, comply with the standard now or hereafter established by law.

SEC. 5. All acts and parts of acts inconsistent with this act are hereby repealed.

SEC. 6. This act shall take effect on the first day of May, eighteen hundred and ninety-seven.

Aug. 24, 1906.

Please take notice that the Commission of Gas and Electricity of the State of New York have received in writing a complaint against your company, signed by one hundred or more customers and purchasers of gas sold and delivered by you in the City of New York.
A copy of said complaint is hereto annexed and herewith
7697 served upon you. That the purpose of said complaint is to
cause this commission to fix the maximum price of gas furnished by your company to its customers in the City of New York at seventy-five cents per thousand cubic feet; and

You will further take notice that a public hearing upon said complaint will be held in the Council Chamber, City Hall, Borough of Manhattan, City of New York, at 10.30 o'clock A. M.. on the 20th

VERTICAL IN BOOK

day of November, 1905, at which you will have the opportunity to be heard.

Dated New York City, this 8th day of November, 1905.

COMMISSION OF GAS & ELECTRICITY,
By FREDERICK E. GUNNISON, *Chairman.*

To Consolidated Gas Company, of New York,
The New York Mutual Gas Light Company,
The Standard Gas Light Company.
New Amsterdam Gas Company,
Central Union Gas Company,
Northern Union Gas Company,
Brooklyn Union Gas Company.

To the Honorable the Commission of Gas and Electricity of the State of New York:

The undersigned, complaining of the Consolidated Gas Company of New York, respectfully show:

I. That the Consolidated Gas Company of New York, is a domestic corporation duly incorporated under the Laws of The State of New York, and engaged in furnishing illuminating gas to the residents of the Borough of Manhattan, City of New York. 7698

II. That each of the undersigned is a customer or purchaser of illuminating gas from the said Company.

III. That the price charged for illuminating gas by said Company is one dollar per thousand cubic feet, and that said price is excessive and unreasonable. That a joint Committee of the Senate and Assembly of the State of New York, pursuant to a concurrent resolution adopted March 16th, 1905, did among other things, investigate the reasonableness of the charges maintained by the gas companies operating in the City of New York. That the said Committee held hearings in the City of New York, and the said company appeared before said Committee by Counsel and produced witnesses and documentary evidence in its behalf, and the said Committee did, on the 1st day of May, 1905, report to the Legislature.

"That the price of gas sold in the Boroughs of Manhattan and Brooklyn, and in that part of the Borough of The Bronx, west of the Bronx River, should be fixed at a maximum of seventy-five cents per thousand cubic feet." That a bill was introduced by said Committee into the Legislature in accordance with their recommendation, and the same was passed by the Assembly and failed of passage in the Senate by one vote, receiving twenty-five votes in favor, and twenty-three against. To the original records and testimony before said Committee, these complainants crave leave to refer in support of this complaint.

Wherefore your complainants pray that the maximum price at which the said company may charge for gas furnished to its

PAGE BOUND V

7699 customers in the City of New York be fixed at seventy-five cents per thousand cubic feet.

Dated, New York, August —, 1905.

August 24, 1906.

Please take notice that the Commission of Gas and Electricity of the State of New York have received in writing a complaint against your company, signed by one hundred or more customers and purchasers of gas sold and delivered by you in the city of New York. A copy of said complaint is hereto annexed and herewith served upon you. That the purpose of said complaint is to have this Commission investigate as to the cause for such complaint, in the manner provided by law, and that a public hearing be had thereon, and the evidence which petitioners offer then and there be duly consid-
7703 ered by this Commission, to the end that orders may me made reducing the price charged by your company for gas, to the extent warranted by the evidence; and

You will further take notice that a public hearing upon said complaint will be held in the Council Chamber, City Hall, Borough of Manhattan, City of New York, at 10.30 o'clock in the morning, on the 20th day of November, 1905, at which you will have the opportunity to be heard.

Dated New York City, this 8th day of November, 1905.

COMMISSION OF GAS & ELECTRICITY,
By FREDERIC E. GUNNISON, *Chairman.*

To Consolidated Gas Company of New York,
The New York Mutual Gas Light Company,
The Standard Gas Light Company,
New Amsterdam Gas Company,
Central Union Gas Company,
Northern Union Gas Company,
Brooklyn Union Gas Company.

Hon. Frederick E. Gunnison, John C. Davies, Lucien L. Shedden, composing the New York State Commission of Gas and Electricity:

The undersigned, purchasers of gas from the Consolidated Gas Coompany of New York, respectfully present to you their complaint as follows:

That the Consolidated Gas Company of New York is a domestic corporation authorized to manufacture, sell and supply gas for heat and light in the City of New York, and is now and for several years last past has been manufacturing, selling and supplying gas for heat and light to the undersigned and other persons residing in the City of New York.

7704 That said Consolidated Gas Company of New York is now and for several years past has been charging and receiving from the undersigned and from other persons in the City of New York, the sum of One ($1.00) dollar per thousand cubic feet for gas supplied by it to the undersigned and to such other persons in the City of New York.

That early in the year 1905, the Legislature of the State of New York, duly appointed a committee to investigate, among other things, the price for gas charged by various companies, manufacturing, selling and supplying gas in the City of New York. That said committee thereupon proceeded with said investigation and thereafter and in or about the month of April, 1905, reported to the New York State Legislature that the price charged by such companies operating in the City of New York were unreasonably high, and that the price charged by companies operating in the Borough of Manhattan, New York City, should be reduced to Seventy-five (75) cents, and that the specific recommendation of said committee appearing in said report is as follows:

"From the evidence which has been presented we are satisfied that a price of seventy-five cents per thousand cubic feet will be fair to the consumer and will afford to the companies, after allowing the proper costs for manufacture and distribution, taking into consideration all the elements of such cost, a reasonable return upon their capital investment in their gas making business. This applies to the Borough of Manhattan, the Borough of Brooklyn, and a large part of the Borough of the Bronx.

We therefore recommend that the price of gas sold in the Boroughs of Manhattan and Brooklyn and in that part of the 7705 Borough of the Bronx west of the Bronx River should be fixed at a maximum of seventy-five cents per thousand cubic feet."

That said report was made after a careful and thorough investigation by said committee of all of the facts relating to the capitalization, assets and indebtedness of each of the gas companies operating in the City of New York, and of the cost of manufacturing and supplying the gas manufactured and supplied by each of the said companies, including the Consolidated Gas Company of New York.

That the price charged for gas by the Consolidated Gas Company of New York is in fact unreasonably high and should be reduced at least to the figure recommended by said Legislative Committee.

That each of the undersigned is at present and has been for some time past a purchaser and consumer of gas manufactured, supplied and sold to him by the said Consolidated Gas Company of New York.

Wherefore, your petitioners file this complaint and pray that your Commission forthwith investigate as to cause for such complaint in the manner provided by law and that your Commission cause notice of this complaint and the purpose thereof to be served upon said Consolidated Gas Comapny of New York, and that a public hearing be had thereon, and the evidence which petitioners offer then and there be duly considered by your honorable body, to the end that orders may be made reducing the price charged by said Consolidated Gas Company of New York for gas, to the extent warranted by the evidence.

Dated, New York City, August 17, 1905.

7709 COMPLAINANT'S EXHIBIT 221.

At a meeting of the Commission of Gas and Electricity of the State of New York, held at the Capitol in the City of Albany, N. Y., on the 23rd day of February, 1906.

Present: Frederic E. Gunnison, John C. Davies, Lucien L. Shedden, Commissioners.

In the Matter of The Complaint of Edward C. Keys and Others, Being Upwards of One Hundred Customers of the Consolidated Gas Company of New York, and the Complaint of R. H. & M. McGurrin and Others, also Being Upwards of One Hundred Customers of said Company.

Complaint in writing having been made and signed by Edward C. Keys and others, being upwards of one hundred customers and purchasers of gas sold and delivered by the Consolidated Gas Company of New York in the Borough of Manhattan, City and State of New York, as to the price of such gas so sold and delivered in said city, wherein the complainants pray that the maximum price
7710 which the said Company may charge for gas be fixed at
seventy-five cents per thousand cubic feet; and the further complaint in writing made and signed by R. H. & M. McGurrin and others, being upwards of one hundred customers and purchasers of gas sold and delivered in said Borough of Manhattan, City of New York, by the said Consolidated Gas Company of New York as to the price of such gas so sold and delivered, wherein the complainants pray that an order may be made reducing the price charged for such gas to the extent warranted by the evidence; and public hearings having been had upon such complaints in the said city of New York pursuant to a notice of said complaints and the purposes thereof, which notice was duly served on said Consolidated Gas Company;

Page, Grant & Booth, by Alfred R. Page, Esq., appearing for the complainant first above mentioned;

Clarence J. Shearn, Esq., by William A. De Ford, Esq., appearing for the complainants last above mentioned;

Charles F. Mathewson, Esq., appearing in behalf of said Consolidated Gas Company;

And the said proceedings having been consolidated at said hearing by order of said Commission, and the said Commission having investigated as to the cause for such complaints and inspected the works, system, plants and methods used by said Consolidated Gas Company in manufacturing and distributing such gas, and having examined the books and papers of said Company pertaining thereto; and, pursuant to a further notice, duly served upon the said Consolidated Gas Company of New York, the Commission at said hearing having inquired into, examined and investigated the illuminating power, purity and pressure of gas supplied by said Company, and

having examined the methods employed by it in the transac-
7711 tion of its business and inquired into the methods and means employed in manufacturing, distributing and supplying gas for light, heat and power; Now, after such hearings and upon such investigations and upon the evidence and argument of counsel, and due deliberation having been had, it is

Ordered, that on and after the first day of May, 1906, the maximum price for gas which shall be charged by the Consolidated Gas Company of New York, in the Borough of Manhattan, City of New York, State of New York, be and is hereby fixed at eighty cents per thousand cubic feet; and, it is further

Ordered, that the gas furnished, sold and delivered by the Consolidated Gas Company of New York shall have an illuminating power of not less than twenty-two sperm candles of six to a pound, burning at the rate of one hundred and twenty grains of spermaceti per hour, tested at a distance of not less than one mile from the distributing holder by a burner consuming five cubic feet of gas per hour, as is now provided by law; and, it is further

Ordered, that the gas furnished, sold and delivered by the Consolidated Gas Company of New York shall not contain in each one hundred cubic feet of such gas more than five grains of ammonia, nor more than twenty grains of sulphur, nor more than a trace of sulphurated hydrogen.

As the gas supplied to all customers of the Consolidated Gas Company is delivered through the same service mains as gas supplied to the City of New York, and as the pressure of gas so supplied is fixed by law at not less than one inch nor more than two and one-half inches in any service mains in said city, at any distance from the place of manufacture, said law fixes the pressure of gas
7712 at which all customers and consumers of the Company must be furnished in said city.

COMPLAINANT'S EXHIBIT 225.

[Extract from affidavit of Robert A. Carter.]

The Senate Committee of 1886, Senate Document 47 of that year, completely sustained the valuation of the company's assets at the time of consolidation, as above appears. They had before them on their investigation, lasting nearly a year, substantially every person connected with the consolidation and were able to learn at first hand and on the spot all the facts in regard to amount and character of property and its value. The same data is not accessible to-day with the same fullness.

7727 As to the legislative committee of 1905 (known as the Stevens Committee) the resolution appointing it contained no provision authorizing the companies interested to be heard or to produce evidence or examine witnesses or participate in any way. Said Committee did not recognize at any stage the right of the Companies to participate by counsel, this company's participation being confined to such brief additional questioning or data as the courtesy of the Committee permitted. The investigation covered such a vast field and was conducted with such haste, limited in taking its testimony to less than three weeks altogether, that the elements entering into the question could be neither fully presented nor deliberately considered by said Committee, several members of which were absent from illness or other cause during a great part of the Committee's sittings. This company was not permitted to address the Committee at the conclusion of the investigation, nor did the Committee have time or opportunity to consider written memoranda submitted, prior to preparation of its report to the Legislature.

We hazard nothing in saying that the members of the Committee themselves will concede the insufficiency of the time at their disposal thoroughly and in detail to investigate, weigh and determine such important matters. The result was that, upon some most material points, no evidence at all was before the Committee; upon other points evidence was in such incomplete shape that the situation was gravely misapprehended or misconstrued by the Committee. Said Committee fell into the error of taking the figures of the tax report of the company as representing the actual value of the company's assets as a going concern or as the company's invest-7728 ment therein; and furthermore, said tax report as summarized by said committee included none of the cash working capital of the company, none of the accounts receivable which formed part of its capital, no part of Astoria investment, and took no note of other assets of great value.

The Gas Commission of the State of Massachusetts consumed more than a year in 1904-5 in consideration of the capitalization and cost of making gas as to the Boston companies alone.

As to the action and report of the Gas Commission filed February 23rd, last, in favor of 80 cent gas, it will be observed that said Commission in their estimate of the value of the company's property wholly excluded its working capital of $1,000,000 and its accounts receivable of $2,000,000, to say nothing of its investment at Astoria then amounting to nearly $6,000,000, its franchises capitalized under express authority of the Act of 1884 and other items of great value.

No sooner had said Commission begun its investigation than certain journals of the City of New York declared and reiterated in caustic terms that said Commission had no other duty to perform than to report in favor of "80 cent gas" as recommended by the Stevens Committee, and criticised said Commission in unmeasured terms for not at once so reporting. Before the petitioners in favor of the reduction of the charge for gas had completed their case, and before this complainant in defense had had an opportunity to present a word of evidence, the Governor of the State of New York (whose appointees the members of said Commission are) recommended in his message the passage of an act reducing the price of gas to eighty cents; promptly thereafter the Senator from New York who was then chief counsel for said petitioners before said Commis-7729 sion, introduced a bill to reduce said rate to eighty cents, being substantially the bill which finally passed. And finally, when it was rumored that the Commission did not see its way clear to reduce the rate to eighty cents, a bill was introduced in the Legislature by Senator Stevens, Chairman of the Legislative Committee of 1905, to abolish the Commission.

Thus the minds of the Commission from the very outset, instead of being left free to flow to a natural and unbiased conclusion upon the evidence, were at every step and by every influence pressed toward a finding which would justify the report of the Stevens Committee; and thus the complainant instead of receiving that fair and unprejudiced hearing to which it was entitled, suffered grave prejudice and has never received that judicial consideration of its property rights in behalf of which it has sought the interposition of this honorable Court.

COMPLAINANT'S EXHIBIT 226.

[Extract from affidavit of Robert A. Carter.]

2. In 1885 the Senate of the State of New York appointed a Committee of three to investigate the "consolidation and capitalization" of the six Companies so uniting, with direction to report to the next session of the Legislature whether the provisions of Chapter 367 of the Laws of 1884 had been "evaded, disregarded or in any manner violated and whether the said consolidation has been capitalized on the said basis of 'the fair aggregate value of the property, franchises and rights' of its constituent Companies or otherwise."

7730 This Committee made a most exhaustive examination of the subject referred to them; they employed an expert accountant; they had, by subpœna, Mr. Rowland and substantially every one else connected with the constituent Companies or the Consolidated Company before them upon the subject of valuations and method of consolidation, and after consuming an entire year they reported to the Legislature of 1886.

After a review of the situation, the majority report proceeds as follows:

"Under the law of 1884 the capital stock may be $39,000,000 (provided the fair aggregate value of their property, franchises and rights are equal to that amount) and could not be any more than that, had the aggregate amount of their capital stock been $50,000,000. Nor under this law does it make any difference what the property, franchises and rights may have cost the constituent Companies, whether one, five, fifteen or fifty millions. The capital stock of the new Company may still equal but must not exceed the fair aggregate value of the property, franchises and rights of these Companies at the time of the consolidation. To ascertain this value * * * your Committee with the aid of an expert made a thorough examination of the books of the constituent Companies from the time of their formation and examined many witnesses as to the value of the property and basis of consolidation."

After referring to the appraisal of the tangible property of the constituent Companies at $29,994,000 and the valuation of the franchises at $7,781,000, making, with $1,303,000 for working capital, a total of $39,078,000, the Committee proceeds:

"The question for your Committee to examine was, was this capitalization thus obtained more than the fair aggregate value of the

property, franchises and rights of the constituent Compa-
7731 nies at the time of the consolidation? The street mains,
valves, meters, services, plant, office building, office furniture, laboratories appear to have been appraised at the value of what it would cost to reproduce them at the time of the consolidation; and there is no evidence that any of these items were appraised too high, except the evidence of the expert, Mr. Yaldon, who finds that they were valued higher than they appear to have been charged as costing in the Companies' books."

The Committee then refers to the valuation of the real estate, bulkheads, piers and water rights, with opinions of real estate dealers, and thereupon continues.

"If the above basis is a correct one, then the aggregate value of the real estate and plants of the several Companies, given at $29,994,000, is not too high. Indeed, the objections to the capitalization do not appear to be so much to the valuation of the gas plant, mains, real estate, etc., as it does to their having capitalized nearly eight millions of dollars as the value of their franchises. * * * But it is a fact that the law of 1884, under which these Companies consolidated, expressly authorized this to be done, so that the only question left to your Committee to examine and report was:

1. Did these Companies have franchises?

2. If they had, were they capitalized at their fair aggregate value?"

After referring to the character of the franchises "including the privilege of laying their mains in the king's highway," and their recognition by the courts as property, the Committee goes on:

"Thus the question for your Committee to decide was this: Was the $7,781,000 more than the fair aggregate value of the franchises and rights of these six Companies? We are forced to the
7732 conclusion that it was not; that the franchises of the New
York, Manhattan, Metropolitan and Municipal were worth much more than that sum, and if these companies saw fit to give a part value of their franchises to the stockholders of the Harlem and Knickerbocker, it was a matter that interested only the stockholders of these Companies.

Your Committee therefore is compelled to report that they have found nothing in the organization which is contrary to the law under which it was effected, unless there should have been an overvaluation of property, and as to that the difficulties attending the determination of such a question are so great that your Committee believe that any attempt to upset such valuation would be futile.

The stock has been issued and circulated and by virtue of law; about one-sixth of it is held by innocent holders, and nothing but the clearest proof of fraud and violation of the law by virtue of which it was issued, would justify any attempt to render such stock worthless. We are compelled to say that we have not been able to find such proof. If injustice has been done to the gas consumers of New York City, it was done by the Legislature in passing a law allowing the consolidation to be effected in this manner. These companies did simply what the law expressly said they might do."

The conclusions of this Senate Committee, submitted to the Legislature in 1886, were accepted as closing the case. They were acquiesced in without question for twenty years, and the stock of the company has been passing from hand to hand in reliance upon the provisions of the Act of 1884 which authorized the capitalization of the complainant company at the *then value* of its property and franchises, and upon the finding of said Committee that such provisions had not been violated.

7733 COMPLAINANT'S EXHIBIT 228.

[Extract from Affidavit of Walton Clark.]

6. As a result of my experience, it is my opinion that a rate should not be fixed which will necessitate a lower return than ten per cent. upon the investment in new gas works in New York City.

COMPLAINANT'S EXHIBIT 229.

[Extract from Affidavit of Emerson McMillin.]

5. I am fairly familiar with the market values of the stocks and bonds of gas companies engaged in business in the City of New York, and of other cities in this and other states. Many of these securities here and elsewhere have, in the past, sold above par, and have paid a low rate on the investment. But in such cases, the prices have been based on the assumption of perpetual franchises, or of such consideration by public authorities, as to warrant the belief that the property will continue to be treated with the same consideration and right and protection as is accorded to other classes of investments. Where these conditions do not apply, investors will not be satisfied with less than a ten per cent. basis of earnings, even though a much lower rate of dividend may be paid. Even before the recent disturbances relating to public utility corporation securities, but few gas or electric company securities would sell at par when the net earnings were less than ten per cent. on the investment. Of some ten or more companies purchased, through my direction, since the year 1900, none were purchased on less than a nine per cent. basis of net earnings, and the average cost of all these companies was above a ten per cent. basis on net earnings. In several instances, the Companies had per-
7734 petual franchises, and in two instances, perpetual and exclusive franchises. The stock of the largest company with which I am connected (capital paid up more than $20,000,000), sells on a basis of about par for ten per cent. net earnings.

6. The popularity of public utility corporations has, in a large measure, been due to the prospective rapid growth in urban population, and the fact that such growth made it possible for these companies to rapidly reduce prices of the salable product and at the same time increase, in a marked degree, the earnings on the investment. In England, this feature has been encouraged by the Government,

through permitting gas companies not only to earn ten per cent., but to pay ten per cent. dividends, and to increase the dividends above ten per cent., provided the companies gave to their patrons, in the way of reduction in price, a designated proportion (I do not recall the figures) of the earnings above ten per cent. In addition to the encouragement named above, the Government discourages opposition companies. This discouragement amounts, practically, to exclusion.

6. The risks and hazards connected with the business of manufacturing and supplying illuminating gas in the City of New York are constantly increasing, owing to a variety of causes. The construction of subways, for instance, is likely to continue for many years, and as I am informed and believe, the City intends, shortly, to commence the laying of new and larger water mains. Work of this character not only increases the danger from explosions, due to the necessary interference with the gas mains, causing the escape of gas, but it adds materially to the cost of operation due to loss of gas through broken pipes and to the expense of using and repairing mains. The extension in the use of electricity for light and
7735 power and traction purposes also involves an increase in the risk from explosion, not only owing to the greater possibility of igniting any escaping gas, but also to the physical injury caused to the gas mains from electrolytic action, causing the disintegration of the iron of which the mains are made. The electric companies also enter into direct competition with the gas companies in the lighting business. The substitution to an increasing extent of asphalt for stone paving also adds to the cost of laying, removing and repairing the pipes of gas companies in the streets, and to the cost of finding and repairing leaky pipes; while the recent special taxation of the franchises adds a new and very heavy burden of expense to gas corporations engaged in business in the City of New York.

7. I have been a resident of New York for about fifteen years and have a general knowledge of the Consolidatd Gas Company and its relation to the consumers in the City of New York. Having due regard to the risks and hazards hereinbefore referred to in Paragraph 6, I am of the opinion that a reasonable price to be charged for its product would be such as would ensure net earnings of at least ten per cent. per annum on the investment. Underlying securities can be maintained at about par, when drawing a low rate of interest, only through the expenditure of a portion of net earnings in extensions, additions and improvements. To fix prices that would not permit such earnings to be made would be *pro tanto* a deprivation of its rights to earn upon its property and franchises fair and reasonable compensation in proportion to the special hazards hereinbefore referred to.

COMPLAINANT'S EXHIBIT 230.

[Extract from Affidavit of Allan B. Forbes.]

6. In the case of gas and electric companies and other public utility corporations, of which class of securities I have a wide knowledge, one of the first considerations to an investor is the duration and security of the franchises and the probability of being able to utilize for an extended period whatever natural facilities there may be for expansion and improvement without undue interference or harassing competition. It is only where these questions can be satisfactorily answered that a public utility corporation will be favorably regarded as an investment, even if its present rate of earnings is fully equal to 10 per cent. net upon the reasonable value of its property over and above all interest, taxes and other fixed charges.

7737

COMPLAINANT'S EXHIBIT 231.

[Extract from Affidavit of Charles S. Fairchild.]

2. I have read the affidavit of Allen B. Forbes herein, verified on May 4, 1906. The statements therein contained with reference to the returns obtainable from investments of various kinds are true and conservative, according to my own experience. The business of manufacturing and supplying illuminating gas in the City of New York is subject to such wide fluctuations and involves such special risks and hazards, that, in my judgment, capital could not be secured for establishing a business of that kind, in the city of New York, which did not yield a return of about 10 per cent. per annum upon the fair value of the property of the company engaged in the business.

COMPLAINANT'S EXHIBIT 232.

[Extract from Affidavit of Frank A. Vanderlip.]

2. I have read the affidavits of Emerson McMillin and Allen B. Forbes herein, verified on April 30, 1906, and May 4, 1906, respectively. The statements therein contained with reference to the returns obtainable from investments of various kinds are true and conservative, according to my own experience. The business of manufacturing and supplying illuminating gas in the City of New York is subject to such wide fluctuations and involves such special risks and hazards, that, in my judgment, capital could not be secured for establishing a business of that kind, in the City of New York, which did not yield a return of about 10 per cent. per annum upon the fair value of the property of the company engaged in the business.

7738 COMPLAINANT'S EXHIBIT 233.

[Extract from Affidavit of Horace J. Morse.]

2. I have read the affidavit of Allen B. Forbes, herein, verified on May 4, 1906. The statements therein contained with reference to the returns obtainable from investments of various kinds are true and conservative, according to my own experience. The business of manufacturing and supplying illuminating gas in the City of New York is subject to such wide fluctuations and involves such special risks and hazards, that, in my judgment, capital could not be secured for establishing a business of that kind, in the City of New York, which did not yield a return of at least 10 per cent. per annum upon the fair value of the property of the company engaged in the business.

COMPLAINANT'S EXHIBIT 234.

[Extract from Affidavit of N. Wetmore Halsey.]

3. I have read the affidavit of Allen B. Forbes herein, verified on May 4, 1906. The statements therein contained with reference to the returns obtainable from investments of various kinds are true and conservative, according to my own experience. The business of manufacturing and supplying illuminating gas in the City of New York is subject to such wide fluctuations and involves such special risks and hazards, that, in my judgment, capital could not be secured for establishing a business of that kind, in the City of New York, which did not yield a return of at least 10 per cent. per annum upon the fair value of the property of the company engaged in the business.

CONTRACT FOR CAST-IRON RENTAL RANGES.

October 18, 1905.

PROPOSAL.

Chairman of the Executive Committee, Consolidated Gas Co. of New York, New York, N. Y.

Dear Sir:

In response to your kind invitation to bid on your cast-iron ranges, we beg to submit the following special prices:

On approximately 2,000, 16-inch oven, and 500, 18-inch oven cast-iron ranges we bid as follows:

F. O. B. Cars, Baltimore, Not Crated.		
16″ Oven, 4 Burner, C. I. Gas Ranges...........	$11.25	each net
18″ " " " " " "	13.25	" "
F. O. B. Cars in New York, in Car Lots, Not Crated.		
16″ Oven, 4 Burner, C. I. Gas Ranges...........	$11.75	" "
18″ " " " " " "	13.75	" "
F. O. B. Cars, Baltimore, Crated.		
16″ Oven, 4 Burner, C. I. Gas Ranges...........	$11.75	" "
18″ " " " " " "	13.75	" "
F. O. B. Cars, New York, in Car Lots, Crated.		
16″ Oven, 4 Burner, C. I. Gas Ranges...........	$12.20	" "
18″ " " " " " "	14.25	" "

It is understood you are to furnish us with a set of working patterns and follow-boards. Delivery of the above to be made during the year 1903 as you may hereafter instruct, and you to have the option of doubling the above quantity, if desired, within the year 1906, upon ninety days' notice. The above quotation is contingent upon accidents and strikes in our works and other occurrences beyond our control. If favored with your order, we feel that

7749 deliveries can be made as required, and we hope that our quotations will be sufficiently low to interest you.

Yours very truly,

—— ——.

Nov. 3, 1905.

Consolidated Gas Company of N. Y., New York.

Gentlemen:

Replying to your valued favor of the 2nd, concerning our quotation of October 18th on cast iron Gas Ranges. Our prices are really figured out on a 30 days' net cash basis. However, we will allow you 1% for cash within 10 days from date of invoices, and hope the special prices we are quoting will secure us your order. Awaiting your commands, we are

Yours truly,

—— ——.

CONSOLIDATED GAS COMPANY OF NEW YORK,

128 EAST 15TH ST., *Nov. 14th*, 1905.

GENTLEMEN:

In connection with your bid for supply of ranges, you say that you require "a set of working patterns." Kindly let us know at once what you consider constitutes a *SET* of working patterns. We have in our possession ONE SET of sixteen-inch patterns (fallow-boarded) which, as I understand it, is a foundry capacity for about fifteen ranges per day. In case our requirements are for sixty to seventy-five a day, what arrangements would you make about the extra patterns on the "slow running Parts." At Albany we
7750 have what we term a set of MASTER PATTERNS, *which*
are in wood. In running off working patterns from these they have been built up to the eighteen inch size, and as our requirements demanded, have been cut down to the sixteen inch size again. WE HAVE NO MASTER PATTERNS IN METAL. Kindly send your answer back by return of mail, and oblige,

Yours very truly,
—— ——, *Supt.*

Nov. 15, 1905.

SUBJECT: PATTERNS FOR RANGES.

Consolidated Gas Co. of New York, Mr. William J. Clark, Supt.

DEAR SIR:

Replying to your favor of the 14th instant concerning working patterns for Ranges, *one complete set of iron patterns*, fallow-boarded, would enable us to produce approximately 15 complete ranges per day; if a greater number is required it would be necessary to have additional patterns and fallow-boards, which we could produce ourselves if you would ship us the wood master patterns, charging you with the actual cost of casting, finishing and fallow-boarding duplicate iron patterns, or you could have these duplicate iron patterns produced elsewhere, and forwarded to us as you prefer.

You have not as yet definitely advised us as to whether we have been awarded the order for ranges, but we have inferred from the recent correspondence that our estimate has been accepted, and we trust in the event of your placing the order with us you will give us all the time possible to get out the goods and furnish us with sufficient patterns so as to make them to good advantage. Awaiting your further orders regarding above, we are

CITY'S EXHIBIT 33.

CONTRACT FOR GAS RANGES.

Nov. 23rd, 1905.

Mr. W. R. Addicks, Vice-President, Consolidated Gas Co. of New York, No. 4 Irving Place, New York.

Dear Sir:

Referring to my quotation of yesterday, the 22nd inst., would request that you change the price named to read $11.63, or in other words, we now beg to quote you a net cash price of $11.63, ten days, F. O. B. New York on Ranges No. 16 on an order for four thousand (4000) ranges with an option to you of taking an additional four thousand (4000) during the year 1906.

Yours very truly,

—— ——.

CONTRACT FOR GAS RANGES.

Nov. 22nd, 1905.

Mr. W. R. Addicks, Vice-President, Consolidated Gas Co. of New York, No. 4 Irving Place, New York.

Dear Sir:

Referring to our conversation of the 21st, I herewith hand you a net cash price of $11.87, ten days, F. O. B. New York, on Ranges No. 16; this being my understanding of a 3 per cent. discount upon the price quoted you of $12.24 on an order for four thousand (4000) ranges, with an option to you of taking an additional four thousand (4,000) during the year 1906.

Yours very truly,

—— ——.

7752

CONTRACT FOR GAS RANGES.

Oct. 30th, 1905.

Chairman Executive Committee, Consolidated Gas Co. of New York, New York, N. Y.

Dear Sir:

In accordance with request of your Purchasing Agent, Mr. North, we quote you as follows on furnishing to your Company,

2,000 No. 16 Gas Ranges.
500 No. 18 " "

for 1906 delivery to be made in a first-class manner, same as heretofore furnished you. All ranges to be tested before leaving our Works to a pressure of nine (9) pounds to insure against imperfect pipe and couplings and the whole to be made in a first-class workmanlike manner.

Prices F. O. B. New York via Boat or Rail.	
No. 16 cast iron Gas Range	$12.24
No. 18 " " " "	$13.49
Prices F. O. B., crated.	
No. 16 cast iron Gas Range	$12.35
No. 18 " " " "	$13.60
Prices F. O. B., uncrated.	
No. 16 cast iron Gas Range	$12.00
No. 18 " " " "	$13.25

Terms: 60 days, with 2 per cent. off 10 days.

We also agree to furnish you in addition, on ninety days' notice, during the year 1906, at the same prices and terms,

2,000 No. 16 cast iron Gas Ranges.
500 No. 18 " " " "

or any part of that number you may elect.

In presenting our proposal we wish to call your attention to the fact that we have been manufacturing your ranges for the past three years and have become thoroughly familiar with all your
7753 requirements; furthermore, we have gone to the expense of making the necessary patterns and flasks to fill a rush order for you at the rate of one hundred (100) ranges per day.

We are perfecting new dies and stamps for the range, so that we will be able to advance the standard of quality, be that possible.

Trusting that we may be favored with your valued contract and assuring you of our best attention, we are,

Yours respectfully,
—— ——.

CONTRACT FOR GAS RANGES.

Nov. 3rd, 1905.

Mr. Edwin North, Pur. Agt., Consolidated Gas Go., No. 4 Irving Place, New York.

Dear Sir:

Replying to your esteemed favor of the 2nd, we are compelled to advise that it would be impossible for us to allow you a greater cash discount than that named in our quotation of the 30th ultimo. In naming you price on your Cast Iron Ranges we, of course, figured as low as is consistent with the turning out of a first-class article, and at that time took into consideration the cash discount on a 2 per cent. basis. Under these existing conditions we are, therefore, in justice to ourselves, unable to allow you greater cash discount than that already quoted.

Awaiting your further valued favors, we are,

Yours very truly,
—— ——.

CITY'S EXHIBIT 43.

CONSOLIDATED GAS COMPANY OF NEW YORK. ANSWERS TO QUESTIONS ASKED FOR BEFORE THE GAS COMMISSION ON DECEMBER 11, 1905.

1. (Q) Map of the Company's property (Borough of Manhattan) on the City lot plan, with Tax numbers at the bottom of the lots.

(A) Map is in process of preparation.

2. (Q) The usual cash discount on coal bills under coal contract "Q" (Exhibit 118H), and a statement showing the discount allowed on all purchases of coal under said contract since its inception.

(A) There is no cash discount on coal bills under contract "Q" as noted. The only cash discount that the Company obtains on its purchases of coal is from Coxe Bros. & Co., who allow us a deduction of 6% per annum from the date of payment to the due date, 30 days from the date of the bill.

3. (Q) Transcript of the ledger account showing number of meters of each size purchased, and price paid for same during the twelve months ending October 31, 1905; also statement of discounts or rebates received on purchases of meters.

ORDINARY METERS.

Size.	Purchased. Number.	Invoice. Total.	Delivered. Parts net.	Invoice. Net.	Discount.	Cost. Net.

4. (Q) Statement of quantities of pipe we have bought for use either as mains or services, for twelve months ending October 31, 1905, and the price paid for them, with the names of the Companies from whom purchased on a separate sheet.

(A) We have bought during this nominal year for use on mains as follows:

2,474 Net Tons 1204 lbs. @ $24.43 per Net Ton..... } $60,455.20
2,209 Gr. " 1044 " @ $27.36 " Gr. " ..... }

To determine how much pipe we have bought for services would be a tremendous clerical proposition, as it would involve the examination and analysis of about 500 different bills. Would not an estimate from the Street department serve the purpose of the Committee?

CITY'S EXHIBIT 44.

PLANT AND OPERATIONS FOR THE NOMINAL YEAR ENDING OCTOBER 31, 1905.

1. (Q) Number of miles of each size of Street Mains in use owned by the Consolidated Gas Co.

Answer to Question No. 1.

	1½″	.266	Miles
	2″	.804	"
	3″	31.985	"
	4″	96.097	"
	5″	.340	"
	6″	396.010	"
7772	8″	98.066	Miles
	10″	13.361	"
	12″	60.844	"
	16″	18.631	"
	18″	5.610	"
	20″	33.520	"
	24″	8.697	"
	30″	24.886	"
	36″	4.212	"

2. (Q) Number of miles of mains of each size laid before 1860.
(A) Cannot answer.

3. (Q) The same information for all mains laid before 1880, including those laid before 1860.
(A) Cannot answer.

4. (Q) Number of services in use owned by the Company.
(A) Number of services in use as at October 31, 1905, was 86,338.

5. (Q) Number of meters of each size owned by the Company.
(A) Number of meters owned as at October 31, 1905, was as follows:

Size.	Number owned.
3 Lt.	207,499
5 "	86,924
10 "	31,285
20 "	9,984
30 "	3,036
45 "	2,082
60 "	1,024
100 "	1,018
150 "	235
200 "	224
250 "	34

300 "	152	
600 "	1	
800 "	1	343,499
3 Lt. Prepayment	93,462	
5 " "	4,260	
20 " "	2	97,724
Total		441,223

7773 6. (Q) Number of meters of each size bought before 1880.

(A) Cannot answer.

7. (Q) Price paid per ton for cast iron water pipe delivered alongside of the trench each year since 1900.

(A) We have no positive data as to the cost of this pipe delivered alongside of trench since 1900, but cost of pipe delivered on the dock was as follows:

	Gross ton.	Net ton.
1900	$22.35	$19.95
1901	22.25	19.95
1902	26.35	23.52
1903	29.70	26.52
1904	23.20	20.71
1905	25.17	22.47

8. (Q) Number of miles of each size of mains laid from January 1, 1901, to December 1, 1905, with the approximate cost of same per foot.

(A) This question necessitates a vast amount of clerical labor. The work is now under way in the Street Department, and will probably be ready shortly.

9. (Q) What would be the cost of same per foot (a) for materials (b) for all other expenses, such as laying, etc., if the prices of 1905 for labor and material had prevailed during the previous three years?

(A) The prices of both labor and material have not changed materially during the last three years; at least not enough to affect the cost of main per foot. Price of labor has increased 15% over 1901.

10. (Q) Does the Company own and lay at its own expense the services (a) from the curb to the lot line (b) from the lot line to the building?

(A) The Company owns and lays at its own expense the services from curb to lot line and from lot line to the building, and inside the building wall an average distance of 3 feet.

11. (Q) If not, what are the facts in the case?

(A) Covered by answer to Question No. 10.

1. (Q) Income from operations.

1. (Q) Feet of gas sold by meter to consumers.

7774 2. (Q) Receipts for the same.

3. (Q) Number of street lamps and receipts for gas used by them.

4. (Q) Receipts for care of lamps and other expenses connected with the street lamps.

Answers to Questions 1, 2, 3 and 4.

	Cubic feet.		Amount.
Sales to Private Consumers	12,906,438,650	C. F. @ 99.91	$12,894,552.64

10. (Q) Rent of Meters.
(A) Company does not rent meters.
11. (Q) Rent of gas stoves and engines.
(A) Company does not rent Engines.
Gas Stoves rents for the period were... 120,768.60
12. (Q) Miscellaneous income from operations.
(A) Miscellaneous income 49,997.80
13. (Q) Total income.
(A) Total Income $14,236,055.64

11. Expense of Manufacture:

Note: Give answers to all the following questions on cost of manufacture for each station, and afterwards for all stations in the aggregate.

(A) Note: Figures given below are in the aggregate for all stations. The same information for each separate station is now being compiled.

1. (Q) Maximum daily capacity of each station in (*a*) coal gas and (*b*) water gas and (*c*) oil gas, for mixture with the coal gas.

2. (Q) Maximum daily output during the twelve months, of each station in (*a*) coal gas, (*b*) water gas, and (*c*) oil gas.

7777

3. (Q) During what days, if any, since January 1st, 1904, was no gas whatever made at one or more of the stations.

Answer to Questions 1, 2 and 3. The Engineering Department will furnish this information.

4. (Q) Total amount of gas made at each station during the year of (*a*) coal gas, (*b*) water gas, (*c*) oil gas.

(A) Total Gas made:

14th St. Station....	1,528,773,000	C. F.*	Coal & Oil Gas
42nd St. Station....	1,280,813,000	"	" " " "
21st St. Station....	4,185,341,000	"	Water Gas.
44th St. Station....	2,263,444,000	"	
99th St. Station....	1,401,538,000	"	
	10,659,909,000	"	

---

*Coal Gas made at 14th St.......... 1,360,284,000 C. F.
Oil Gas made at 21st St. for 14th Street ....
o Cannot separate................ 168,489,000 "

5. (Q) Where was the oil gas made at each station used.

(A) Oil Gas made at 21st Street is used at 14th Street station. Oil Gas used at 42nd Street is used at that point.

6. (Q) Cost of purifying (*a*) material, (*b*) labor.

(A) Cost of purifying—Coal Gas Plants:

Lime	$2,957.93		
Oxide	6,609.80		
		9,567.73	
Labor		9,198.74	
			$18,766.47

7. (Q) Amount and cost of water.

(A) Water — at Coal Gas Plants — 6,984,000 Cu. Ft. 6,984.00

8. (Q) Maintenance and Renewal of works, including renewal of retorts.

Carried Forward $25,750.47

7778

Brought Forward..................... $25,750.47

9. (Q) Tools and Implements.

Answers to Questions 8 & 9:

Repairs to Apparatus at Coal Gas Plants....	$71,866.41
Repairs to Buildings at Coal Gas Plants....	9,396.00
Tools	10,417.69

91,680.10

10. (Q) Cost of cartage of coal.

(A) Coal Cartage—Coal Gas Plants...... 15,312.96

11. (Q) Cost of labor at works, including superintendent, but exclusive of cartage, repairs and purifying.

(A) General Labor at Works—Coal Gas Plants 302,190.19

12. (Q) Amount and cost of gas received at each station from any other station.

(A) The only gas transferred between stations of which any financial record is kept is the Oil Gas made at 21st St. for account of 14th St., the cost of which is charged against 14th St. Operations, as follows:

Coal	$48.25
Oil	137,602.63
Coke	7.90
Sundry Supplies......	118.47
Labor	**9,603.51**

147,380.76

13. (Q) Amount and cost of coal used in water gas generators.

(A) Coal used in water gas generators, 105,650.80 Tons...................... 461,772.39

Note.—In this, and the following items, unless otherwise specified, exclude the cost of cartage and other items above called for.

Carried Forward...................... $1,044,086.87

7779

Brought Forward...................... $1,044,086.87

Answer to Note.—Cartage in the following items has been eliminated.

14. (Q) Amount and value of coke used in water gas generators.

(A) Coke used in Water Gas Generators:

33,952.28 Loads, 22,735.90 Tons } 74,855.07

15.	(Q)	Amount and value of coal used under the boilers for making water gas.		
	(A)	Coal used under Boilers—Water Gas Stations—9,159 Tons		36,075.16
16.	(Q)	Amount and cost of oil used for making water gas.		
	(A)	Oil used in making Water Gas: 36,061,742 Gallons		1,472,302.60
				$2,627,319.70
17.	(Q)	Amount and value of coal tar used in making water gas.		
	(A)	The Company's product of Coal Tar is disposed of under contract.		
18.	(Q)	Amount and value of water gas used in making water gas.		
	(A)	The Company keeps no financial record showing the use of this fuel, as all material used in Generators is charged to "Gas Production" when used—the only credit to "Gas Production" covering this residual being for such oil tar as is sold.		
19.	(Q)	Purifying material and labor for water gas, separate from other forms of gas made.		
	(A)	Purifying Material & Labor—Water Gas Plants:		
		Oxide	$12,268.63	
		Shavings	189.49	
				12,458.12

COMPLAINANT'S EXHIBIT 227.

STATE OF NEW YORK.

No. 47.

IN SENATE.

MARCH 1, 1886.

REPORT

Of Special Committee of Senate to Investigate Lighting Companies.

To the Senate:

The following is a resolution of the Senate, under which this committee was appointed:

"WHEREAS, It appears by the records of the Secretary of State, that the New York, Manhattan, Metropolitan, Municipal, Knickerbocker and Harlem Gas Companies are the only corporations that have consolidated, pursuant to the provisions of chapter 367 of the Laws 1884; and

"WHEREAS, The total share capital of said companies prior to said consolidation was represented by the par value of seventeen millions of dollars; and

"WHEREAS, It appears in evidence, before a special committee of the Senate, that the said par value is represented in the said consolidation by a nominal share capital of $35,440,000, par value, which, it has been alleged, is beyond the fair aggregate value of the property, franchises and rights, of the said constituent companies as required by said act; therefore,

7791 "RESOLVED, That a special committee of three senators be appointed by the President of the Senate and directed to investigate the said consolidation and capitalization, and to report at the next session of the Legislature whether in fact said statute has been evaded, disregarded or in any manner violated, and whether the said consolidation has been capitalized on the said basis of 'the fair aggregate value of the property, franchises and rights' of its constituent companies, or otherwise; and what legislation, if any, in respect to lighting companies, is required by the public interests; and that such committee have power to send for persons and papers and to employ a stenographer, counsel and experts for the purpose of aiding in such investigation."

The nominal capital of the Consolidated Gas Company of New York on the 11th day of November, 1884, was $39,078,000.

ND VERTICAL IN BOOK

The aggregate nominal capital of all the companies which entered into the consolidation was, on the same day, $17,000,000.

No capital of any kind was contributed to the Consolidated Company except that which was transferred to it by the several constituent companies. Of the property so transferred, the sum of $2,139,089 was returned to the shareholders of these several companies.

These facts having been ascertained, the question seemed to be this, namely: How is it that upwards of $2,000,000 taken from $17,000,000 leaves a little more than $39,000,000? The difficulty of finding a satisfactory answer was increased, if possible, when it was found that this nominal capital of $17,000,000 represented an actual capital of only $15,500,000.

At this point in the investigation the question seemed to resolve itself into this, viz: How has a capital of $15,500,000 become a nominal capital of $39,078,000 by a simple change of form, without any addition to the capital, but accompanied, on the contrary, by the withdrawal of $2,139,089?

7792 The committee was not disposed to assume hastily that this was a mere device designed to put the new company in a more secure and favorable position than that occupied by the old for exacting undue profits by over-taxing the consumers of gas.

Expert accountants were employed to examine the books of the companies named in the foregoing resolution. In order to reach well assured conclusions, and do justice to all concerned, it was necessary to cause an examination to be made of the entire financial history of each of the gas companies which entered into the scheme of consolidation. This inquiry covered a period of about sixty-two years, beginning with the organization of the New York Gas-light Company in 1823. Without that investigation it would be impossible to ascertain the actual capital of each of the companies as distinguished from that which does not represent any money or other property contributed by their shareholders.

The want of exact and sufficient information accounts for a large part of the ineffective and unstable legislation with which our statute books are encumbered.

The committee believed that in obtaining such information in regard to the gas companies in question, the legislature would not only be better able to act intelligently concerning them, but would also find valuable suggestion upon the general subject of corporate capitalization, and its effect upon the prices which the public are required to pay for whatever is furnished by incorporated companies.

Fiat Capital.

The issuing of watered stock is an adulteration of capital—an increase in volume without a corresponding increase in intrinsic value. Such stock does not represent actual capital paid in or invested. It becomes an instrument whereby additional burdens may be
7793 imposed upon the people. It furnishes a pretext for adding to the cost of commodities furnished and services rendered It creates conditions favorable to frauds and corruptions. It en-

ables the few to become immensely rich at the expense of the many. It is the root of a tree which exhausts the soil and exhales poison. It is an increasingly prevalent evil. Fiat money has been discarded. It remains to be seen whether or not there is intelligence and virtue enough to discard *fiat capital* also, and effectually prohibit it as an element in business. Both are alike in violation of first principles, and therefore inevitably mischievous in result. Until fictitious capitalization shall cease, business cannot rest upon a stable basis, nor be conducted in a normal and healthy manner. Hence, it is greatly important that the origin, methods and results of such capitalization should be accurately understood; and the sooner this is done the better for all concerned.

Until this unnatural and disturbing element is removed, the people will look in vain for relief from the unjust and therefore oppressive exactions in the form of overcharges for the common necessities of life.

Corporate capital must be purified. It must *be* what it *seems* to be. The capital of a concern must represent what has been actually put into it. The public served by them should pay such prices as will enable stockholders to receive a reasonable per cent. of profit upon the actual capital investment in the business and represented by its share capital. The reasonableness of profits depends on the risks involved when the capital was invested, on the returns which the capital has already received, and on the present and prospective security of the enterprise. 7794

CORPORATIONS NOT ANTAGONIZED.

Nothing in this report is intended to antagonize corporations as such, but only to expose and help to eradicate that which is itself in necessary opposition to all legitimate interests affected by them.

The rights of corporations are as real as those of individuals. In fact they are but an organic aggregation of individual rights. Such associations of capital are demanded by the enterprises and civilization which they advance. The real interests and rights of corporations are to be guarded as carefully as those of individuals. When all those rights and interests are ascertained and freed from intruding abuses they will be found to be in harmony. The proper conservation of corporate rights requires that they be dissociated from corporate abuses. And it is according to the nature of things that the sooner abuses are extirpated the better for all legitimate interests. They are essentially destructive.

EXACT INFORMATION ESSENTIAL.

In order to proceed intelligently and wisely in the treatment of the associated capital under investigation and the public interests concerned in its use, there must be something more than general impressions. There must be thorough inquiry into the exact facts of the case. Such inquiry has been made in relation to the gas companies which consolidated or attempted to consolidate on the 11th day of November, 1884.

The examination into the books of the constituent companies (except those of the Knickerbocker, showing the original capitalization, which books were missing), has fully disclosed their financial history.

That examination shows exactly *what capital has been put into the several companies, what profits have been taken out by the shareholders, and what they claim to have left in their own hands.* 7795

All the profits that have been distributed to the shareholders, and all that remains in their hands over and above what they have actually invested can come from only two sources. First and chiefly from the consumers, and secondly from the natural rise in the value of property.

SOME EFFECTS OF STOCK-WATERING UPON CONSUMERS.

The capital of a company may be regarded as the basis on which the per cent. of profits or dividends is computed. These dividends constitute an important element in the price of gas to the consumers. The amount of this element of cost is determined by two factors, viz.: The amount of capital on which the dividend is to be distributed, and the rate by which it is to be computed. The increase of either will ultimately involve an increase of cost to the public, or obstruct the operation of other causes tending to its reduction.

It is a matter of indifference, so far as the *immediate* result to the consumer is concerned, whether the nominal capital be doubled without increasing the actual capital, or the rate per cent. of the dividend be doubled. For example, twenty-one per cent. upon an actual capital of $1,000,000 is the same as seven per cent. upon a watered or fictitious capital of $3,000,000.

We say the *immediate* result is the same. The effect, however, in the long run, is very different. Under a scheme of misrepresentation of capital, unreasonable charges are comparatively easy, because they are made under a disguise which gives them the appearance of respectability. A price to the consumer, which involves a profit of seven per cent., seems reasonable and therefore tolerable, while a price involving a profit of twenty-one per cent. might 7796 seem unreasonable and intolerable. FICTITIOUS CAPITALIZATION, *therefore, becomes* A COVER FOR UNJUST AND OPPRESSIVE EXACTIONS.

CORPORATIONS BOUND TO FURNISH NECESSITIES AT REASONABLE PRICES.

Corporations deriving their existence and power from the public for the purpose of providing the common necessities of life, such as light, water and transportation, ought to furnish those necessities at reasonable prices. Not to do this is to turn against the people a power derived from themselves.

If a company were disposed to disregard the rights of the public in this respect, it would, nevertheless, be entirely willing that the law should fix the maximum rate of profits to the shareholders, provided the company is allowed to fix the amount of nominal capital. If, for example, a company having an actual capital of $1,000,000 were determined to derive an annual net income for distribution among its stockholders, to the amount of $350,000, the company would be quite willing that the maximum rate of dividend should be fixed by law at seven per cent., provided the company is left at liberty to adulterate, to fictitiously increase, to water its stock by making its nominal capital $5,000,000; in other words, by adding to its actual capital $4,000,000 of FIAT STOCK. In the one case the transaction shows *upon its face* that exorbitant charges have been made, while in the other the profits *seem* reasonable, but *are in fact* equally excessive and unreasonable. It is obvious that limiting the rate of dividends affords the public no protection against exorbitant charges, unless at the same time the nominal capital is made to agree with the actual.

These statements illustrate some of the injurious effects upon the consumer resulting from the watering of stock.

7797 STOCKHOLDERS LIABLE TO SUFFER FROM FALSE CAPITALIZATION.

But the evil is by no means confined to the consumers. *The stockholders themselves, or some of them, are liable to suffer still more from false capitalization.*

Those who issue this fiat stock, which represents no increase of actual capital, may, and in many cases doubtless do, make themselves rich. Immense fortunes have been made in that way. But their accumulated wealth must come out of somebody else. If a gas company, for example, it must come out of the pockets of the consumers or out of the new stockholders, or both. If the stock thus watered maintains itself in a good dividend-paying condition the loss falls upon the consumers, who pay the prices necessary to accomplish that result. Otherwise the stock itself falls in value, and its holders suffer the loss. In that case the market value of the stock may for a time be kept up by artificial means—such as manipulating stocks and borrowing money with which to pay unearned dividends—until those who profited by the fictitious issue have quietly retired from the concern, leaving the other shareholders to bear the loss.

In addition to those losses should be noticed the injurious effects of the speculative spirit and deceptive methods developed and fostered in the community by practices such as those above mentioned.

ILLUSTRATION OF STOCK WATERING.

A careful examination of the evidence accompanying the report furnishes ample illustration of the evils above suggested.

For the sake of a more clear and authoritative statement of the false methods against which the public should guard itself, 7798 let us take the case of one of the companies which combined with others to constitute the Consolidated Gas Company of New York. We present some of the salient facts in the history of the New York Gas-light Company as the same are established by the evidence given before the Committee.

This company was organized with a proposed capital of $1,000,000. Of this amount, $750,000 was paid in during the period from 1823 to 1838, inclusive. No further capital was ever paid in. But in 1861 the nominal capital was increased by $250,000, making the total nominal capital $1,000,000. It is to be observed that when this addition was made no new capital was created. The company simply said, let there be more capital, and there was more capital, by transferring from the surplus profits to the credit of stock account. This was a mere matter of bookkeeping. During the next nine years the nominal capital remained $1,000,000. In 1871 the company reorganized under a new name, and again increased their capital stock in a similar manner to the extent of $3,000,000, making the total nominal capital $4,000,000. At this time, as before, no new contribution was made to the treasury of the company. The transaction was, in effect, simply a matter of corporate decree and bookkeeping. This amount of capital continued unchanged until November 11, 1884, when the consolidation took effect. At this time the transaction, so far as capitalization is concerned, was similar to the one last mentioned, although effected under different forms of law.

In the transition from the old corporate existence to the new, no addition was made to the actual capital of the New York Company, and yet its stockholders received back from the Consolidated Company an amount of stock not only equal to that which the company had before, but the additional amount of $3,600,000, making
7799 in all $7,600,000. This was done under an agreement in pursuance of which the consolidation was effected, and by which the other constituent companies received similar additions to the amount of stock issued to their respective shareholders, without any new contribution to the actual capital employed, to say nothing of the amount actually withdrawn as before stated, and distributed among the shareholders.

It appears, therefore, that of this $7,600,000, being the par value of the consolidated stock issued to the stockholders of the New York Company, only $750,000 was ever actually paid in by its shareholders. That is to say, only ten per cent. of that part of the Consolidated stock, which was assigned to the New York Company was actually paid in by its stockholders. The remaining ninety per cent. was added by simple vote of the company, the last increase being consented to by the other constituent companies in consideration of similar additions to each of them respectively. This addition of ninety per cent., therefore, either represented no intrinsic value, or only such as arose from the natural increase, if any, of some of its properties, and from the charges exacted from the consumers over and above the enormous profits that had already been distributed among the stockholders from year to year. How small this natural increase has been will hereafter appear. What these profits were will also fully appear from the annexed report of Mr. Yalden, the expert accountant (see appendix D, at page 635, particularly at page 775), which gives the benefits derived by the stockholders of this and the other constituent companies. Mr. Yalden's thorough investigations have drawn from the records of a vast number of transactions the facts upon which in large measure the conclusions arrived at by the committee have been based.

7800 What is true of the New York Gas-light Company is substantially true of the other companies, the difference being only in degree.

HOW THE ACTUAL CAPITAL OF THE CONSTITUENT COMPANIES WAS CONTRIBUTED.

It also appeared by the evidence that the stockholders of the several companies had contributed in the aggregate only $8,727,050 in cash; and that $2,488,250 par value of stock had been issued in payment for patents and other properties; and that $4,284,170 had been transferred from surplus profits to the capital account.

This sum of $4,284,170, was in effect contributed by the gas consumers. It was derived from revenues obtained wholly from them, not in lieu of a dividend so derived, but in addition to dividends enormously large, as will hereafter appear. If, therefore, the aggregate capital stock of the constituent companies had been $15,500,000, the amount of the three items given above, and if such price had been charged for gas as would enable the companies to distribute among its shareholders in the form of dividends what should be regarded as a fair rate per cent. of profit, it would even then have been true that the consumers themselves had contributed more than a quarter of the basis on which such dividends would be predicated. But the evidence shows that the nominal capital of the constituent companies immediately before and at the time of the consolidation was $17,000,000; and that in pursuance of an agreement between those companies, all their working capital, amounting to $2,139,089, was returned to their stockholders, thereby reducing the aggregate amount of capital by so much.

7801 EFFECT OF FICTITIOUS CAPITALIZATION UPON GAS CONSUMERS OF NEW YORK CITY.

It remains to apply some of the foregoing suggestions to the particular case in mind, and to consider *how this fictitious capitalization affects the gas consumers of New York City; and how it is liable to affect the holders of the watered stock.*

As has been stated, the amount of dividends paid to stockholders is an important element in the price of gas.

If the aggregate amount of the dividends is more than a fair per cent. of profit upon the capital invested, all of that excess must come out of the pockets of the consumers and is to that extent an unjust and oppressive burden upon them; and it makes no immediate difference to them whether this aggregate amount of dividend is derived from an exorbitant rate of profit upon the real capital, or from a lower rate upon a watered capital. It is a matter of simple arithmetical computation to show that seven per cent. upon $39,078,000—the amount of capital stock issued by the Consolidated Company is about the same as sixteen and nine one-hundredths per cent. upon $17,000,000—the nominal capital just prior to consolidation and about the same as twenty-four and twenty-eight one-hundredths per cent. upon $11,215,300, the actual share capital representing shares issued for money and property of the constituent companies.

It is plain that the present cost to the consumers is the same whether they pay such a price for gas as shall yield a dividend of 24.28 per cent. on the amount of actual capital; or 16.09 per cent. upon the capital just prior to consolidation, or seven per cent. upon the stock of the consolidated company in its present greatly watered state.

7802 So much for the *present* effect upon the consumers. As to the future effect it is obvious that it would be easier to increase a nominal 7 per cent. dividend than it would be to raise one of 16 or 24 per cent. The people might submit to the former because its real character is obscured by the fictitious capitalization on which it is paid; while the same public would not tolerate the larger per cent. appearing as it really is without any artificial disguise.

If the gas consumers had known that the stockholders of the New York Company had put into the concern only $750,000; that they had taken out of it in the form of dividends $15,274,078; or $9,814,225 in excess of ten per cent. upon the nominal capital, and that when the consolidation arrangement was entered into they claimed to have left in their hands $7,600,000, that being the par value of the consolidated stock issued to the shareholders of the New York Company; if all these things had been known as they occurred, it cannot be supposed that the company could have charged a price large enough to enable them to attain such results. Knowledge of the facts would have created such a demand for reduction in the price of gas that the company could not have withstood it.

So under the present consolidation, if the public can be made to believe that they are being charged such a price for gas as enables the new company to realize only seven per cent. of profit upon the capital invested, no one will complain. They might even be allowed to increase somewhat their rate of profit. But if the people understand that the nominal capital is greatly watered—that seven per cent. on the nominal capital means more than twice seven per cent. on the actual capital, that it means three times more than seven per cent. on the amount actually invested by the stockholders, apart from that which was derived from the consumers, then it may well
7803 be doubted whether the people will long consent to the payment of a tax upon a necessity which yields to the company such unreasonable profits. Hence it is greatly important that the people should know the true state of the case. What is reasonable the people in general are willing to have done, but an unreasonable and exorbitant charge they ought not to submit to.

UNIFORMITY OF PRICE OF GAS THROUGHOUT THE STATE IMPOSSIBLE.

There cannot be a uniform price of gas throughout the State. The price must vary in different places according to the cost of labor and material used and the amount of gas consumed. A price that would yield a net profit of 100 per cent. in the city of New York might yield no profit at all in a village or small city. In London it can be made cheaper than in New York. But there is one condition of universal application. *Fictitious capitalization tends to increase the price everywhere.*

HONEST CAPITALIZATION ESSENTIAL TO FAIR PRICE OF GAS..

If, therefore, the price of gas is to be reduced to a fair and reasonable amount, it becomes a matter of obvious and prime necessity that the public, from which all chartered rights and franchises proceed, should see to it that illegitimate stocks shall not impose upon them illegitimate burdens; that corporate "rights" shall not be perverted into instruments of public wrongs. That this has been done by the gas companies of the city of New York, which your committee was directed to investigate, has been demonstrated by ample and incontrovertible evidence. We are not criticising men or motives.
That is not within our province. We are exposing methods
7804 and their results. In doing this we indicate the objective
points that must be aimed at in any attempt to provide an effective remedy. *Stock watering must be prohibited.* It must be looked upon as an instrument of extortion. It must be frowned upon as a species of dishonesty. If it has not hitherto been regarded as such, and, if good men have engaged in it, the popular conscience cannot too soon be quickened or the popular judgment too soon rectified. If this species of unjust gains is now under the protection of law, that protection cannot be withdrawn too soon. The shield of law should become a sword.

CORPORATIONS MUST ACCOUNT TO THE PUBLIC.

Prompt and entire accountability to the public should be made the law of all corporate dealings with the people. Complete reports of such dealings should be made at regular and frequent intervals, such, for example, as are required in Great Britain. These reports should be put within easy reach of the people. Legitimate capital with fair, frank dealing and a consequent mutual good understanding will result in reasonable prices to the consumer and reasonable profits to the companies.

OTHER LEGISLATIVE REMEDIES are necessary in order to supplement those above suggested. The legislature should provide for testing, by public authority, the purity of gas, its illuminating power and its measurement. These are matters which cannot safely be left to individuals. They lack the means of doing it. This falls within the range of purposes for which organized society exists.

The evidence at pages 548 and 549 shows that by altering the radius, which forms a part of the meter, the gas passing through it
may be made to register too little or too much, according as
7805 it is made longer or shorter; as a clock may be made to go too
fast or too slow by shortening or lengthening the pendulum.
We do not say that frauds have been committed by this means, but

we do say that frauds might easily be perpetrated, and that legal safeguards should be provided against such liability.

WASTE OF GAS AND INJURY TO HEALTH.

In this connection it may be useful to call attention to a very important matter which appears in the evidence on pages 552, 553 and 554. It is there stated that only about one-half of the gas that passes through the burner is consumed, and thereby converted into light. If this evidence, which is confirmed by other testimony, be correct, it must follow that about one-half of the gas which the consumer pays for is wasted, and, what is of still more serious consequence, the portion of gas which is unconsumed passes into the air and poisons it. In this way the health of the people is being steadily and stealthily injured. Thus, the consumer not only pays for that which lights his dwelling, but also for that which impairs vigor and causes disease and death. The evidence shows that when the pressure at the burner is too great the gas escapes so rapidly that imperfect combustion takes place, causing the waste and injury above mentioned. It further appears that the companies can increase this pressure, thereby increasing both gas-bills and doctor's bills. Provision should be made by law for ascertaining whether or not that power is exercised. It is due to the companies to say that they should be held responsible for this waste and injury to health only so far as it may be produced by a pressure applied by them in excess of what is necessary in order to distribute the gas to all parts of the territory covered by their operations.

7806 THE GAS PROBLEM.

It is obvious that the gas problem involves much more than the price per thousand cubic feet, as shown by the gas bill. It involves at least these four questions:

1. How to get the best attainable gas.
2. How to get it at a far price.
3. How to permit no more to escape than can be consumed and converted into light; and
4. How to secure an accurate measurement of the gas so used.

The special attention of your committee was directed to the second of the above questions, and to that as affected by the alleged false capitalization. Hence the other matters, while not wholly overlooked, have received less consideration than their importance deserves, for the reason that the committee could better serve the public by making an extensive examination into the matter specifically set forth in the resolution, than by a more equal distribution of its labors among a variety of subjects which, if time permitted, might come within the scope of its duties.

EXCESSIVE ACTUAL CAPITAL INCREASES PRICE.

In connection with the subject of fictitious capitalization it is worthy of observation also that *there should not be an unnecessarily*

large amount of actual capital employed. This would seem to be so obvious as to forbid mention were it not for the fact that its neglect has done much harm. It is often necessary to revive neglected truism, and the greatest difficulty is often experienced in setting them in their proper working relations. The evidence before your Committee has shown that the Consolidated Companies have more capital than is actually employed, or than is necessary for the
7807 results which are being accomplished. That is to say, the nominal capital is not only greatly in excess of the real capital, but the latter is in excess of what is needed for making and distributing the amount of gas furnished. The result, so far as the consumers are concerned, therefore, is that they are paying a price for gas which enables the companies to distribute a dividend not only upon watered, fictitious stock, but also, though *in a far less degree,* upon necessary capital.

A regulated monopoly, such as that wheh exists in London, by which watered stock is excluded, and which affords the best conditions for adjusting the amount of actual capital employed to actual requirements is the most economical system that has been devised. The word "monopoly" may tend to deter from its adoption. An unregulated monopoly such as prevails now to very great extent in New York city is perhaps about as bad as could be devised.

The New York city plan of UNREGULATED MONOPOLY ought to be abandoned at once. If the London plan of strictly limited and regulated monopoly does not meet with favor then there should be provided a system of regulated competition. Not unlimited competition, but one that shall be subject to such strict and well-defined regulations as economy and mutually fair dealings between the companies and the public may require.

STOCK-WATERING TO BE EXCLUDED AS A DISGUISED MEANS OF IMPOSING UNJUST AND, THEREFORE, OPPRESSIVE BURDENS UPON THE PEOPLE.

The full development of the true system will of course require time and much patient attention to details. But your committee desire to make as emphatic as possible, the inevitable injustice and bur-
7808 dens that result from a false or watered capitalization. Its utter exclusion is the beginning of success in attempting to get gas at a fair price. What is true in this respect of gas companies in New York city, is true of gas companies everywhere, and what is true of gas companies is equally true of other corporations. Watered stock in any of them is an instrument for exacting unjust gains at the public expense, and should be excluded from them all.

The committee has indulged the hope that in attempting to disclose the injustice and evils resulting from fiat gas stock, the attention of the public may be so drawn to the general subject of fictitious capitalization and the public burdens thereby imposed, as shall lead to the correction of similar abuses in other corporations. The people have very little conception of how much they are paying yearly in the form of increased prices for many of necessities of life. It must be understood that corporate franchises are granted by the public for the public good, and not to promote private speculation.

FALSE CAPITALIZATION PROMOTES OFFICIAL CORRUPTION.

The difficulty in dealing with the subject of fictitious capitalization, and the evils resulting from it, increases as corporations multiply and grow strong under the inadequate provisions of existing law Hence, there should be prompt and radical remedial legislation. The axe must be laid at the root of the abuses.

The evil furnishes the means for its own perpetuation—a false capitalization naturally tends to other forms of dishonesty.

7809 It creates inducements to corruption and provides the means of effecting it. If, for example, a company requiring only half a million of actual capital for carrying on a given enterprise issues in addition an unnecessary and fictitious stock of two millions, it is easy to see that a possible corruption fund is at hand with at least the temptation to use it both to cover up what has been done and to secure a continuance of the same. It cannot be doubted that much of the alleged bribery that has scandalized legislation and political conduct and debauched the moral sense of the people is due to the evil to which we refer. The rights of the public are believed to be bartered away by money obtained from the people themselves, who pay the over charges made necessary by the over capitalization and by whatever is corruptly expended to promote or defeat legislation. The Consolidated Gas Company of the City of New York is an example in point. By means of its fictitious capitalization its managers has the *power* to provide the funds necessary for buying the votes of legislators for the purpose of thwarting the efforts of the people to obtain relief from unjust burdens, provided enough legislators were purchasable; in which case the company *could* say to the people with an air of confidence, "What are you going to do about it?"

INDIFFERENCE TO BRIBERY—ITS DANGER.

Whether or not the alarming scandals so notoriously common both before and after the close of the last session, as to the *use* of that power were true is a matter in which the deepest interest ought to be felt. *General indifference to bribery is more alarming than the act itself.* The supremacy of the popular will cannot long survive the debasement of the popular conscience. When men come to speak

7810 lightly of giving and taking bribes; when this comes to be looked upon as "practical" business or politics; when corporations deriving their powers and their profits from the people use both to corrupt their representatives; when these things are tolerated, there is the most imperative need of reformation before the evil becomes so great as to invite revolution.

No legitimate effort should be spared to ascertain the truth or falsity of the allegations of corruption in connection with the defeat of the proposed gas legislation in 1885. If the offenses were not committed, it is injurious to the public to permit itself to become familiar with charges of corruption. The familiarity itself tends to dull the moral perceptions and sear the public conscience.

Bribery tends to defeat the popular will. It is an attack upon popular government. It is treason against popular sovereignty, and should be treated as such. Any thing short of that is danger at a vital point.

The Fair Aggregate Value of the Property, Rights, and Franchises of the Constituent Companies.

The Consolidated Gas Company assumed to organize under chapter 367 of the Laws of 1884. The promoters of that scheme had procured, in the manner hereinafter referred to, the passage of that act for the purpose of this consolidation. It was a general law for this special purpose. It provided that the several companies proposing to combine and reorganize might do so with a capital determined upon a basis of "the fair aggregate value of the property, franchises and rights" of its constituent companies. Was that done? Was $39,078,000 such value?

The words property, franchises and rights of the companies 7811 included everything which they owned or could rightfully claim to own. They owned certain lots of land with buildings and plant upon them, together with whatever might be employed by them in the manufacture and distribution of gas. To these they had an absolute right except so far as that right might be affected by liens upon them. They also had a conditional and revokable right to use that property for that purpose. This was all they had or could rightfully claim to have.

The cost of property affords some aid in ascertaining its value, especially when purchased in the ordinary course of mercantile transactions. In some cases that value may subsequently be increased. In others it may be diminished. The land, considered simply as vacant lots belonging to the companies, was worth more at the time of consolidation than when it was purchased. While on the other hand the structures upon them and the mains, services, meters, etc., were subject to deterioration. Their value is still further reduced below cost by the displacement of some of the properties made necessary by the introduction of improved methods, the property being thereby rendered comparatively valueless.

The books of the companies show that the entire cost of the property, including patent rights, was between twenty and twenty-one million dollars, for which the companies were still owing upwards of $2,000,000.

By applying the cost test, without claiming for it anything more than a means of approximation to the value, we find, after making due allowance for both appreciation and depreciation, that the value of all their properties is about equal to the aggregate share capital of the companies prior to consolidation.

Another mode of arriving at the fair value is by ascertain-
7812 ing what it would cost at the time of consolidation to dupli-
cate the property. It may safely be inferred from all the evidence that about $15,000,000 would be ample for that purpose; that an actual cash capital of that sum would purchase everything necessary for the manufacture and distribution of gas of the best quality and equal in amount to the total quantity of gas furnished by all the constituent companies prior to consolidation, or by the consolidated company since that time. See evidence, pages 397, 494, and elsewhere, as to amount of capital required. In a comparatively small business a capital of one million of dollars may be required for the daily production of one million cubic feet of gas; but as the business increases the ratio of capital to producing capacity diminishes. So that, while four million of dollars may be required for a producing capacity of four millions of cubic feet per day, a capital of $20,000,000 is adequate to a producing capacity greatly in excess of 20,000,000 cubic feet per day, and upwards of 30,000,000 cubic feet per day.

Hence one million dollars of capital for one million of cubic feet of out-put is not a proper measure of requisite capital as applied to the consolidation.

In addition to the properties above referred to there is nothing left as a basis of valuation except such right as the companies might have in respect to the use of those properties, for the purposes specified, and in the manner in which they were used, including the right to lay mains in the streets, etc.

So far as the committee are aware none of these rights were granted for a specified time, except the contracts with the city which are made from year to year. But it was doubtless expected that their privileges would be enjoyed continuously, *provided*, and this is a vital point in the case, provided the privilege so to do is not forfeited
by its abuse. This privilege, this so-called franchise or right
7813 is a public license to do a given thing during good behavior
or for a given period, as the case may be. The State has reserved to itself in express terms the right to annul the charters of corporations. This carries with it the power to revoke all franchises contained in them.

The State has reserved to itself the right to say when the privileges which it has granted have been abused; and *the* when the public good requires the annulment of such privileges, due regard being had to the rights of all in respect of the property belonging to the corporation. It ought, therefore, to follow that the more those corporate rights and franchises are abused, the more precarious should be the tenure by which they are held, and consequently the less valuable they become. It ought not to be true that the more the corporate privilege is abused and the more flagrantly the rights of the public are violated, the more valuable the franchise becomes; and the more effectively it may continue to be used as an instrument for future exactions.

The "fair" value of corporate property ought not to be increased by the fact that the corporation has made excessive charges at the expense of the public.

It cannot accord with sound public policy that an abused franchise is rendered more valuable by the abuse. It cannot be that the State will put a premium upon exorbitant charges. A forfeited privilege cannot have much "fair value" in the hands of any body.

So far as we are aware no one claims that the "fair aggregate value of the property, franchises and rights" of the constituent companies could by any method of valuation amount to the sum of $39,078,000 except upon the theory that such value is derived from the large amount of profits that had been realized by the companies. But it should be borne in mind that those enormous profits were ob-
7814 tained by the unreasonable and excessive price charged for gas. Their magnitude was proof of the wrong done to the public.

The profits which have already been distributed among the stockholders of the various companies cannot be restored to those from whom they were obtained; but is it not equally obvious that such charges, so far as they are excessive, cannot be a fair basis for increased charges in the future?

The LEGISLATURE ought not to predicate value upon a public wrong.

The quoted prices of the shares of a company are not a proper measure of the "fair value of the property, franchises and rights" of the company in question. The fluctuation in those prices cannot indicate corresponding changes in intrinsic value. According to that standard the consolidated values have varied more than $4,000,000 within less than four months. And about $8,000,000 in a year. According to the same standard, the values of all that belonged to the constituent companies rose from less than $14,000,000 in 1880, when the pooling arrangemen- took effect, to upwards of $30,000,000, in 1884, when that pooling arrangement developed, as was intended, into the consolidation. The simple truth of the matter is that during that time the passage of an act, known as the two-thirds act, hereinafter referred to, prevented competition, so far as possible, by companies outside of the pool, while the effect of the pool itself was to prevent competition among themselves. By these means the companies were enabled securely to exact from the consumers those charges for gas, which resulted in the profits elsewhere stated. We have said that the cost of an article is some indication of its value. This arises from the fact that in most cases the subject of the
7815 sale, as a whole, is known to the parties. If a farm, for example, its boundaries, location and the quality of its soil are noted. The whole subject is before the contracting parties.

If, *under such circumstances,* the minds of the buyer and of the seller, with their opposing interests, meet upon a given price, there arises a fair presumption that the price agreed upon will not widely vary from the true value.

But in the case of gas shares a comparatively small part only of the whole property and franchises were before the purchaser. In most cases it is probable that he has but a meager and superficial knowledge of the concern as a whole. He takes it with a degree of artificial and fictitious value, impressed upon it by conditions having no proper effect upon the fair value. The transaction is largely a matter of speculation.

We may safely conclude that the fair value of the property, franchises and rights of a company cannot be measured by the fluctuating and more or less speculative prices obtained for a small fraction of the company's stock.

The sum of $45,000,000 seems to have been arbitrarily taken, not, however, without some objection against its excessive character, as the capital of the new company to be formed by the consolidation of all the pooling companies.

The Mutual finding itself prohibited under penalty from consolidating with the other gas companies, did not enter the consolidation. Hence, the capital was reduced by the amount which had been assigned to the Mutual, leaving the share capital of the consolidation as already stated. So that that sum equally with the $45,000,000 was arbitrarily fixed.

7816 Having determined upon the aggregate amount of share capital, the next and most difficult matter was to distribute it. The contention was as to how each constituent company could get the largest possible fractional part for its shareholders.

Some of the properties were appraised, and the schedules were produced before the committee. In that valuation two things were noticeable:

1. Little or no allowance was made for superseded, impaired or abandoned works or apparatus, and
2. The valuation included all the rights and franchises which the company had in respect to the use and enjoyment of the properties for distributing as well as for manufacturing gas. Hence it would seem to follow that the valuation so made should be reduced as above suggested.

But instead of this an addition was made. Finding that the predetermined amount of share capital could not be reached by a liberal appraisal of some of the properties, and by nothing deserving the name of appraisal, as to other properties, the further sum of $7,781,000 was added for franchises, that being the difference between the proposed sum and that which had been reached without it. The valuation of the items constituting the proposed aggregate seems also to have been made in an arbitrary manner. The value assigned to the lots exclusive of the structures upon them, was, according to the testimony of the expert appraiser, appointed by the committee, about twenty-five per cent. in excess of their proper value, making an over valuation as to this item alone for more than $2,000,000. The evidence shows that there was not such an appraisal of anything as would have been made as between purchaser and seller. There were no purchasers in that transaction; all concerned acted as if 7817 vendors, having a common interest in making the total price as large as possible. The Consolidated Company did not capitalize upon the basis of "the fair aggregate value of the property, franchises and rights" of the constituent companies. The law referred to in the resolution has been violated, regard being had to the thing done rather than to the manner of doing it. The substance of the law, as well as the rights of the public, have been disregarded. It is no answer to say that the people have assented to it. The separate individuals composing the public do not meet these corporations upon terms of equality. The consumer is compelled to yield to superior force. It is important to observe also that the companies have hitherto kept their dealings from the knowledge of the public. Prior to this investigation it was not generally known that the entire sum ever contributed in cash by all the constituent companies was only $8,727,000, and in properties the further sum of $2,488,250, and that from this investment they have received upwards of 700 per cent. of benefits, all of which were derived from the people in the form of exorbitant gas bills.

When nominal capital represents only cash or its equivalent; when dividends upon it shall be limited to a reasonable rate; when full publicity shall be given to corporate dealings, and when all this shall be secured by governmental supervision, then may the public expect to obtain pure gas fairly measured and at a reasonable price.

For the purpose of effectuating those results, the committee make the recommendations wihch may be found at the end of the following summary of the evidence.

7818

SUMMARY

OF THE

EVIDENCE TAKEN BEFORE THE COMMITTEE AND CONCLUSIONS.

No Concurrence between the Actual and Nominal Capital of the Gas Companies.

It is established by the evidence, beyond contravention, that the nominal or share capital of the constituent companies affords no accurate information touching their actual capital. Historically considered, their is no period of time during the life of any of these companies when the nominal or share capital exclusively represented either money or property contributed as money, and so constituting a common fund, aggregating a total share capital whereof each stockholder or contributor held certificates for his proportion thereof. On the contrary, contributions of money from subscribers or of shareholders were of rare occurrence; and, compared with the total share capital, of relatively small amounts. In the few instances where the issue of stock appears to have been based on actual property, the true value of the latter never equaled the par value of such an issue.

The nominal share capital appears to have been in each and every instance an arbitrary or fixed aggregate upon which an issue of stock should be founded, and earnings distributed. This is not a theoretical inference, but an incontrovertible statement of fact.

Hence, the nominal or share capital of any or of all of these organizations is useful as a guide only in stating the denominator of fractions representing the respective interests or aliquot portions of the actual aggregate capital owned by the several stockholders. 7819

Again, a large amount of this nominal or share capital represents undistributed earnings. In so far as such earnings have been in fact devoted to the legitimate purposes of permanent capital employed in the business, apart from the usual and current expenses of business and wear and tear of its fairly capitalized properties, there is no sound objection to an actual capitalization of such earnings, so far as the necessities of the business reasonably may require such an increase of actual capital. In those cases the withholding of such surplus earnings from distribution, and their investment in actual property required by the enlargement of the business—not in replacing exhausted properties already capitalized—may fairly be treated as equivalent to cash contributions from those who would otherwise have received such earnings in distribution. Where this has fairly and legitimately been done, so as to result in an increase of actual capital in the true and correct use of that term, no criticism can reasonably be made.

Where, however, this apparent procedure is made the occasion (as it has been in some instances) for an issue of stock without any concurrent increase of actual property or producing capacity, or where the surplus earnings have been devoted to substituting new or improved processes for worn out, obsolete or unsatisfactory machinery or plant, then such an issue is calculated to deceive both shareholders* and the public; and shortly necessitates higher prices to consumers in order to cover the anticipated dividends upon the extra issue.

7820 In other instances an actual increase of capital has occurred exclusively at the expense of consumers, for the benefit of stockholders, and for the time quite regardless of the nominal or share capital. Thus, loans were made, or bonds issued, for enlargement of works or purchase of real estate, and subsequently paid off from surplus earnings realized from excessive prices of gas—prices fixed with a view to the discharge of such loans. The shareholders thereby realized large accessions to their property without contributing a dollar. Subsequently, under the plea of an increase of values, the nominal share capital would be enlarged and distributed as a scrip dividend; or, it may be, offered to stockholders for subscription and the subscriptions discharged by extra dividends; and upon this new issue of stock, as upon the old, dividends would be paid and the consumers forced to contribute for them in high prices for gas.

Hence, when the *actual* capital was enlarged, the consumers and *not* the shareholders (with some rare exceptions elsewhere herein mentioned) contributed to that increase of capital, furnishing in such instances no equities for future dividends or high prices. When the actual capital was on the other hand, in fact, diminished (as by abandonment of material or plant, losses, or extraordinary wear and tear), instead of being replenished by a new issue of shares for which shareholders contributed cash, the consumers also contributed the earnings from which the diminished capital was re-established, affording therefore, in such instances also no equities for future dividends on the lost capital or high prices to insure them.

---

*Shareholders then presume the management has in fact increased the capital, whereas it has only schemed to replace some exhausted capital.

It is in this connection noteworthy that in the entire history of the New York companies there is no instance where the nominal or share capital was in fact diminished, although it has some-
7821 times occurred that the property thereby represented was, in fact, diminished, and in one case quite destroyed.

It must therefore be conceded that if there be any limitation of dividends, there must primarily be fixed the basis upon which dividends shall be estimated and distributed, and that such basis bears no just or uniform relation to the nominal or share capital of the companies entering into this consolidation.

Dividends Should be Limited to Honest Capital.

It is difficult to state any fair reason why the dividends should be estimated upon any sum as large as the aggregate share capital of the constituent companies. But it must be conceded as beyond question that on no established principle of industrial finance should dividends be paid on a *nominal* capital of twice that amount.

If the nominal or share capital of the constituent companies before consolidation, in fact represented the *actual* capital contributed or employed in the business, then it was fraud on the public to double it and to invite investment in the swollen shares.

That the actual capital was in fact much less than the aggregate represented by the nominal or share capital is a fact fully proven.

If the properties or accretions were of *greater* value than such an aggregate, then this excess is either profits or actual increase of capital in use.

If profits, it should be distributed. If consisting of enlargements of properties necessary to the conduct of the business, then under proper circumstances and restrictions there would be no sound reason for objecting to a fairly proportionate increase of capital.

The relation sustained by the actual capital used and employed in the business immediately prior (September, 1884), to the
7822 consolidation, and in fact used and employed during the year ensuing, having in view at both periods the future necessities of the business, has been made a special topic of inquiry by the committee.

It is proven that the total capital actually in the business and capable of being ascertained, stated and defined, was greater immediately prior to than it was immediately after the consolidation. Since then it has not been increase-, but probably has been diminished by dividends. It is also proven that more capital was in actual use by the constituent companies immediately before consolidation than has been in use or is required for the business of the so-called Consolidated Company.

Thus the total capital actually in use in the business of the constituent companies—if represented by their aggregate nominal or share capital—was $17,000,000. The owners of these shares, however, in attaining their consolidation, withdrew from their common funds, under various pretexts, sums aggregating $2,139,089 (see testimony page 460). In fact these constituent companies turned over to the new consolidated concern only their plant, properties, services and mains, and no working capital. What had been their then working capital, such as supplies, customers' balances, cash, etc., amounting to $2,139,089, was retained for and distributed among themselves under the guise of extra dividends and otherwise. By this method not only were the total assets diminished, but the actual capital of the consolidated concern was impaired by at least $2,139,089 less than the aggregated capital of its uniting constituences.

The working capital of the new concern must therefore be created out of earnings, or else by the sale of new stock; and no new stock, the officers testified had been sold.

7823 In fact there is nothing to prevent this additional stock, or any other stock that may be issued to replace convertible bonds purposely made, being distributed as a bonus.

Why under these cir-*mu*stances the nominal or share capital of the new concern should exceed the figures which its owners had selected to represent the total nominal or share capital of the constituent companies, is a question that must be explained upon the principle that the nominal or share capital bears no just relation to the actual capital of the companies.

This, in fact, is further demonstrated by the entire history and management of all the companies, and must be assigned also as the theory on which all their business has hitherto been conducted.

In all discussions, therefore, whether in aid of legislation or to fix a fair price for gas, or to arrive at a proper dividends, or for any other purpose—except to write a figurative or market value for stock—it should be assumed that actual capital is in the case before us an absolutely distinct and different thing from share capital, which is nominal capital.

WHAT IS THE ACTUAL CAPITAL OF THE CONSOLIDATION.

The whole is not greater than the sum of all its parts. No legislation, financial jugglery, or gas economies can disturb this proposition. Besides, as we have seen, the combined capital in this case is actually less than the sum total of what had been enjoyed by the constituent companies.

It should also further, in this connection, be considered, whether or no all the property represented by the capital of the constituent companies, and owned and transferred by them, is property or capital necessary, or in reasonable time likely to become necessary for

the conduct of the business. If not, then there is no justice
7824 or propriety in charging such prices for gas as may be
necessary to include dividends upon an excessive and unproductive capital.

It is in proof that more property is owned by the combined companies than is useful for the manufacture and sale of gas; and also that the producing capacity of the works now in use can be largely increased if not doubled and trebled wit-out using works which are now closed, and in which capital of some of the constituent companies was invested.

Should not such properties be disposed of and the investment they represent be withdrawn from the expectation of dividend and from forming a consequent element in the cost or price of gas? Questions of this character are of wider scope than the self interest of stockholders, or managers, exclusively in their interest, and demand for their solution some intervention in behalf of the public. *In the absence of adequate statutory provisions some public authority should exist to regulate, within reasonable limits, the properties or permanent investments on which dividends are to be rated, and charges made against the public.*

That there is some property or investment of a permanent character which is not in use, or required for production, and which is not fairly requisite in any aspect for the conduct of the business is, upon the evidence, one of the inevitable conclusions of fact. The precise dimensions of this burden, or extent in figures of this extra investment, may fairly be inferred from the testimony submitted; but the committee withhold any opinion on that subject as not essential to their present conclusions. Such an opinion, however, should form an element in ascertaining or establishing a maximum price for gas, and a maximum dividend for gas stock. Notwithstanding extra or unnecessary investments all such items are included
within the totals mentioned by your committee in consider-
7825 ing the actual and real, as distinguished from the constructive
or nominal share capital of the consolidation.

How to Ascertain the Actual Capital.

In ascertaining the cash capital of the consolidation values should, in the first instance, be disregarded, and the united capital of the constituencies stated. Whether the law does or does not favor excessive capitalization by making the same distinction between a *lawful* capital and an *actual* capital, is a question that is herein elsewhere considered.

The actual capital attributed by stockholders (at the times and in the manner particularized in the expert tables, pp. 661-777), of the several constituent companies was as follows:

Manhattan	$3,280,000
New York	750,000
Metropolitan	2,500,000
Municipal Knickerbocker	2,512,300
Harlem	1,569,050
Total stockholders' contributions	$8,727,050

This sum ($8,727,050) represents the actual capital of all the constituent companies. Nor is it the initial capital of these companies.

For instance: The New York Company, with an authorized capital in 1823 of $1,000,000, commenced business with $200,000 paid in, which was increased from time to time until in 1838 the entire amount of $750,000 had been contributed. Since that time nothing has been contributed by its stockholders, unless undistributed earnings, not received as dividends but left in the business, be regarded as such contributions. These amounts are mentioned hereafter.

7826 The Manhattan Company with an authorized capital in 1830 of $500,000, commenced business with $500,000 paid in. This was from time to time increased until by 1856 $1,200,000 had been contributed; and by 1866 the entire sum of $3,280,000 had been contributed in cash by stockholders. These being the two oldest companies, further history of stockholders' contributions need not be recapitulated. The items will be found in the evidence. (See pp. 661, 662, 695, 775).

It having been suggested that earnings withdrawn from distribution and permanently invested in enlargement of works or property required by the current or probable and reasonable demands of the business, should be regarded as capital, the amounts of surplus profits carried by the companies to what they have treated as capital account, are stated respectively as follows:

Manhattan	$720,000
New York	3,250,000
Municipal Knickerbocker	34,700
Harlem	280,000
Paid to capital from surplus profits	$4,284,700

In addition to this sum large amounts of surplus profits have been expended for apparatus, construction of bulkheads, buildings, plant and various purposes of a permanent, as distinguished from a current nature, and in that respect have become capitalized as moneys employed in the business. These amounts in some instances are charged directly to expense or repair accounts, and in other instances are so intermingled in various accounts as to render it difficult to state them, except as they are in bulk extracted from all of the accounts and grouped under a title of *total cost of property.*

7827 Even then such totals in the accounts of some of the companies necessarily include stock at its par value issued directly or indirectly for property. For convenience, therefore, such issues should first be stated.

There was issued for property, at various times, shares representing at the par value:

Stock of Metropolitan	$1,887,300
Stock of Municipal	450,000
Stock of Harlem	150,950
In all of par value of	$2,488,250

These three sums, aggregating $15,500,000, *comprehend the actual capital of all the constituent companies* at the time of the consolidation, the Knickerbocker capital being included in the Municipal capital for the reasons hereafter stated.

THE COST OF INVESTMENTS.

Of the constituent companies, including worn out apparatus or mains, or other impaired property of all kinds, has been ascertained as the same *appear on the books* of the several companies.

The total cost from all sources of property paid for by stockholders' original contributions, by surplus earnings, by stock treated as money, and from the proceeds of bonds and other loans, was as follows:

Company.	Total cost of properties.
Manhattan	$4,872,999.49
New York	4,630,642.03
Metropolitan	5,292,175.35
Municipal	4,092,347.86
Knickerbocker	810,481.15
Harlem	1,243,986.97
Total cost	$20,942,632.85

7828 It was found that the total outstanding indebtedness of the same companies was then $2,329,000. The sum, therefore, should be deducted from $20,942,632 as the properties nominally costing the last named sum were subject to those debts.

The conclusion therefore follows that from the books of the constituent companies their actual investment was not greater than $18,613,632.

This sum should be further diminished by the proper amount to represent actual loss of mains, apparatus, wear and tear, and destroyed or impaired property.

A COMPARISON.

Was there any justifiable ground for representing the capital of the new combination to be greater than the combined capital of its constituencies? *There was no increase of plant, of real estate, of works, or of money; and there was a diminution of materials and of moneys and cash assets. Why then should there be an enlargement of nominal or of share capital?*

Unless the law of 1884 (chap. 367) provided such authority (and the contrary will be shown) there existed no law by which the existing nominal or share capital of the constituent companies could have been enlarged without some concurrent increase of money or of property to represent capital. *It requires some authority of law not cited to satisfy the committee that a corporation may, without consideration, voluntarily issue an unlimited amount of stock as representing its capital;* and then by a process of distribution among shareholders without benefit to the common treasury permit
7829 the shareholders to sell it at their own price, and for their
own exclusive benefit. An ignorant and innocent public, who may be induced to invest in such shares are also imposed upon; they suppose themselves to be investing in capital, whereas they are only contributing profits to the old shareholders.

Neither the policy nor the statutes of this State have ever contemplated allowing any class of corporations to magnify their nominal capital beyond the representation of an actual value therewith required. Certain corporations desiring to increase their nominal or share capital may do so under established regulations, and then dispose of the new shares as original shares for adequate value.

SHARES DO NOT CREATE VALUES.

It will not be pretended that either of the constituent companies might have enlarged their nominal capital without acquiring new values, and solely because, in the opinion of the stockholders, their property had appreciated in value beyond the par value of their shares. This may furnish a ground for advancing the market price of shares to a premium; but the wildest financier has not hitherto succeeded in adding capital to his business, by formulating the owner's opinions of values.

Pronunciamentos do not create capital stock; certificates do not create values.

If the capital of a bank be $100,000, and be wholly invested at par in United States bonds, and those bonds have subsequently been quoted in the market at ten per cent. premium, it does not follow that the *capital* of the bank has thereby become enlarged to $110,000; or, if the bonds depreciated ten points, that the capital was changed to $90,000. If this were so there would be no fixity or security in capitalized shares. No school of economists has
7830 justified such a dogma, although it is sometimes attempted
as a part of some concurrent fraud.

So, by way of illustration, when the nominal or share capital of the Manhattan Gas-Light Company was $4,000,000 ($3,280,000 of which was capital contributed, and $720,000 capitalized earnings), there was no fair basis according to which the total cost of its properties as owned by it in 1884, viz.: $4,872,999.49, should become the exact figure and the measure of its new nominal capital and further issues of shares made accordingly. The true state of fact was that there was a surplus of $872,999.49 over and above the share capital, which surplus was invested in property.

In point of fact a sum much larger than this amount was distributed in dividends by the Manhattan Company for that year (1884). Yet in the fact of these facts the *Manhattan* was assumed to be *recapitalized,* through some process, *at* $11,940,000, *which amount the committee find is not in any fair and meritorious sense the actual capital of that constituent company.*

So also by way of further illustration when the nominal or share capital of the *New York Gas-Light Company* was $4,000,000, there was no fair basis according to which even the total cost of its properties as owned by it in 1884, should become the exact figure and measure of its new nominal capital, and further issues of shares made accordingly. The true state of fact was that there was a bookkeeping surplus of $630,642.03 over and above the share capital. In point of fact in this instance also a larger sum than this was by this company distributed in dividends in its last year.

In spite of these facts also the *New York Company* was assumed to be *recapitalized* through some process or fiction of law at $7,560,-
000; *which amount the committee find is not in any fair and*
7831 *meritorious sense the actual capital of that constituent company.*

By taking the figures furnished in the evidence, other similar illustrations will present themselves; and the proposition clearly demonstrated that *neither constituent company could without equivalent in any fair and meritorious sense justifiably enlarge its issue of shares to the figures assigned to it in the Consolidation.*

If it could not justifiably issue further shares by remaining out of the consolidation how could its share capital be enlarged by the alleged merger? Yet the nominal or share capital of the constituent companies has been enlarged in the following proportions:

Name of company.	Old share capital.	New share capital.
New York	$4,000,000	$7,560,000
Manhattan	4,000,000	11,940,000
Metropolitan	2,500,000	7,175,000
Municipal	3,000,000	5,100,000
Knickerbocker	1,500,000	3,000,000
Harlem	2,000,000	3,000,000
	$17,000,000	$37,775,000
An additional amount reserved to sell, called working capital, but possibly to donate, to distribute or otherwise to dispose of is yet held by treasury		1,303,000
Combined stated nominal or share capital		$39,078,000

From this it is assumed that all debts and obligations will be paid.

The debts are, therefore, first deducted from this appointed share capital, and the net amount in shares, thus ascertained for 7832 each respective company, was apportioned to its shareholders.

The debts of the several companies, as thus deducted, and the net amounts and proportions distributed to shareholders are stated in Appendix D, at pp. 779-780.

The total debts, as already noted, are $2,329,000; more than half of it being Knickerbocker and Municipal debts. How and to whom the stock reserved to pay his debt was sold the committee could not, within their allotted time, definitely ascertain. The accounts show the shares were issued. Their precise disposition, however, is not essential to any of the conclusions at which, upon the evidence, the committee has arrived.

THE RE-CAPITALIZATION WAS NOT A PURCHASE OF PROPERTY FOR STOCK.

The theory upon which this increase of nominal or share capital without any corresponding increase, but in spite of a diminution of actual capital, is attempted to be sustained is that of a purchase and sale. It is assumed that a new corporation is created, and issues its shares for property at fair values, that the property of the old companies is purchased and transferred, and that the new issue of shares being based thereon and agreed to is not subject to further inquiry.

A purchase and sale presumes a bargain between two minds or parties. It presumes the existence of a legal entity capable of contracting. But there existed no new corporation competent to enter upon such a transaction having capacity to issue stock and to contract with each constituent company touching the values of its properties.

Assuming, however, for the sake of argument, that the 7833 properties were each and all fairly valued for the purposes of the alleged consideration and transfer, the committee have carefully inquired how far any agreement as to values and the capitalization of the combination is a matter of public importance; and without hesitation agree that an excessive recapitalization based on a revaluation of properties in a transaction of this public importance, is of that vital character that requires the interposition of public authority.

LEGISLATIVE INTERVENTION EXPEDIENT.

There is no adequate remedy for the public from whom extortionate charges for gas may be exacted in order to pay dividends on fictitious or excessive capital, except by the interposition and public authority. Whether any other authority than the legislature may or may not exist, the power of the legislature to intervene is supreme and incontestible, and the occasion for its exercise is at hand.

If through the unexpected result of some legislative enactment, the power exists whereby the gas consuming public of New York shall be made to pay in charges for gas sums sufficient to yield profits on an apparent investment of $39,078,000, when in fact the actual investment is not one-half that amount, then not only should that power be withdrawn, but all transactions in the exercise of it should be absolutely abrogated so far as may be consistent with the protection to which property rights and vested interests are justly entitled. This protection may safely be left to the courts, as is provided for in the proposed laws accompanying this report.

Is the Consolidated Gas Company an Incorporation?

If the six named constitutent gas companies of New York
7834 have in fact recapitalized themselves or revalued themselves
at the fair aggregate value of their property rights and franchises (and the committee show elsewhere that the new assumed values are not fair), then, it may be argued, that they have not become a new and valid corporation, because:

1. Chapter 367, Laws of 1884, does not by strict construction apply to the corporations assuming to consolidate; and
2. Chapter 367, Laws of 1884, is unconstitutional in one of its essential features, and therefore wholly inoperative and void.

1. Some of the reasons in support of the proposition that chapter 367 of the Laws of 1884 does not apply to the gas companies who have united in executing the consolidation agreement readily suggest themselves by a comparison of this statute with previous legislation. In this connection a comparison by sections of chapter 960 of the Laws of 1867, and chapter 367 of the Laws of 1884 becomes especially significant. This comparison is deemed by the committee of such probable service in framing future legislation that a digest of the two statutes has been prepared, showing the sections in parallel columns, and will be found as Appendix K, at the foot of this report.

It will be observed that the only substantial difference between these two enactments is in respect to the total capital of the combination or consolidation which each of the statutes assumed to authorize.

In the act of 1867 that total capital is limited in terms to the total share capital of the constituent companies; while in the act of 1884 the total capital is not thus limited in terms, but is assumed to be allowed according to "the fair aggregate value of the property, franchises and rights." Neither of these acts purport to relate to
7835 corporations of a different character than those embraced
within the other act. Both assume to apply to corporations doing business under the general manufacturing, mechanical and mining laws. If any corporations may have been organized under special statutes granted prior to 1848 for the purposes of carrying on any business authorized by the general manufacturing laws, such corporations might reasonably be deemed to be embraced within the provision of chapter 367 of the Laws of 1884. But it requires the application of very liberal rules of interpretation, which have little, if any, place in this connection, to enlarge the class of corporations

embraced within the act of 1884 beyond the corporations which, since 1848, were organized, or which may hereafter be organized under the Laws of 1848, entitled "An act to authorize the formation of corporations for manufacturing, mining, mechanical or chemical purposes," passed February 17, 1848, and the numerous acts amendatory thereof and supplementary thereto.

The uniform legislative habit of alluding to manufacturing corporations as corporations organized under general manufacturing laws and laws supplementary thereto, is not likely to be disregarded in arriving at legislative intendment. In statutes imposing taxes, where various classes of corporations are referred to in a general way for the purposes of including all the corporations of a certain class as the subject of taxation, it would not be unreasonable to assume that the legislature intended to describe, and did describe, within the terms it used, all corporations reasonably included within the ordinary use of such terms. Indeed laws for the purposes of raising revenue are by principle and authority to be construed liberally, and for the purpose of furnishing a revenue designed by the statute. Hence, it has been held that chapter 542 of the Laws of 7836 1880, imposing a special State tax to be paid to the comptroller upon the dividends of all * * * "manufacturing" * * * corporations must for the purposes of carrying out the provisions of that act be deemed to apply to the companies engaged in manufacturing and supplying illuminating gas. (*Nassau Gas-Light Company v. Tax Commissioners, etc.*, 89 N. Y. 410). This decision, however, does not hold or imply that corporations organized under one set of general laws are to be made applicable to another set of general laws authorizing and providing for a different class of corporations.

In 1848 there was passed (chap. 37) a general law, still in force, entitled "An act to authorize the formation of Gas-light Companies." A separate set of statutory provisions was made applicable to the formation and conduct of all such companies. That statute has from time to time been amended or supplemented by legislative enactments. The class of corporations thus provided for, therefore, remain for the usual purposes of State action GAS-LIGHT companies. This class of corporations is subject to the provisions and limitations of the general act in relation to *gas-light* companies as distinguished from corporations known as *manufacturing* corporations organized under the general act of 1848, relating to the formation and conduct of corporations for "manufacturing, mining, mechanical or chemical purposes."

The character of the corporations for the usual purposes of State action is derived from the law under which they have their being. At least two classes of creation are covered by these two sets of statutes, viz.: *gas-light* companies under one enactment, and companies for *manufacturing,* mining mechanical or chemical purposes under the other enactment. So far as their practical operations are concerned, the company organized under the manufacturing 7837 laws might manufacture gas, and a company organized under the gas-light laws may and necessarily must engage in manufacturing. Yet for purposes of ordinary dealings, according to the law of their origin and the character of their being, the manufacturing corporation cannot necessarily or properly be said to be a *gas-light* company, and thus subject to the gas-light laws only. Nor can the gas-light company in law properly be designated the *manufacturing* company mentioned in this statute, and subjected, therefore, only to the manufacturing laws. Hence, we observe, in most of the special laws chartering gas-light companies, or promoting their incorporation, provisions subjecting the new creation of certain general laws of the State applicable to corporations in general. Precisely such provisions are found in the two consolidation statutes of 1867 and 1884 now under consideration. Section 4 of both laws subject the new corporation to be created under such statute to all the provisions enacted under "An act to authorize the formation of corporations for manufacturing, mining, mechanical or chemical purposes."

For these and other reasons, it may fairly be held that chapter 367 of the Laws of 1884, neither by its terms nor upon sound principles of interpretation, should be treated as applying to gas-light companies, but should be limited to the class of corporations which have assumed to have become organized under and by virtue of the act entitled, "An act to authorize the formation of corporations for manufacturing, mining, mechanical and chemical purposes," passed February 17, 1848, and the acts amendatory thereof and supplementary thereto, and should not embrace any other corporations.

2. Some of the reasons in support of the proposition that chapter
367 of the laws of 1884 is unconstitutional in one of its essential
features, and therefore wholly inoperative and void, and af-
7838 fords no basis of incorporation or implied grant of franchise
from the State to any organization purporting to have been
created by virtue thereof, are as follows:

Section two of the act provides for the taking of private property by private persons and for private uses involuntarily and by compulsory process. While private property may constitutionally be taken for public use, it cannot constitutionally be taken for a use not a public use. Should the legislature assume to authorize the taking of property otherwise than for a public use, the courts would interfere.

Nor can the legislature take away the judicial authority to determine what is, or what is not, a public use. Numerous cases have arisen in this State where the courts have passed upon the question as to whether particular purposes specified in various statutes were public uses. Laws have frequently been declared unconstitutional by the courts when they have assumed to permit private property to be taken for a use not a public one. Thus the taking of land for railroad purposes in the exercise of the right of eminent domain is justified because the use is a public one. So it has been held in relation to highways, parks and other public uses.

If the right of eminent domain, or the right to take private property for the purpose of laying pipe lines, or mains to lay gas upon, should be authorized by the legislature, it would then become the province of the courts to say whether or not such use in either instance was a public use, and if it were not the act would be void.

The legislature, however, has not assumed to give to the New York gas companies any authority to take private property for public use. There is no statute that points to any right, privilege or franchise by which any New York gas company, through the courts or
7839 otherwise, may acquire by compulsion private property for the
purposes of carrying on their business. It will be time enough to inquire whether such legislation can be upheld when it shall be attempted. At present there is no such statute. The only grounds, therefore, upon which the private property of gas shareholders can be wrested from them is, for a use recognized to be a public use. No such ground exists, or is declared or implied in the statute of 1884. Nevertheless, by its provisions persons owning fractional parts of the property of the constituent companies are, if the provisions of chap. 367 of the laws of 1884 are sound, compelled to part with their interests at the instigation of other stockholders, if it may be outside parties, and for benefits exclusively of a private nature expected by such investigating party. Under such compulsion the stockholder must either part with his rights and interest, on the best terms he can make, or take such value for it as may be awarded him in adverse proceedings.

Now, the State has no power to deprive the stockholder of property represented by his stock in any of the constituent companies or the benefit of his co-shareholders and shareholders of other constituent companies. This not being the taking of private property for a public use, is an intrusion upon private rights not justified upon principle or upon authority.

The effect of a statute assuming to do this, is to force property from a minority shareholder for the private benefit of other persons, and not exclusively for a public use.

It may very well be doubted whether for the simple purpose of reorganizing an industrial corporation (although engaged in subserving by its business some public advantage), the State may exert its power of seizure upon private property; or by placing on its
7840 statute books a menace, may compel an unoffending owner to
part with his property for private purposes to strangers. Yet, by this statute the shareholder must yield up his property at a market price controlled by those engaged in wresting it from him, or engage with associates from other corporations in their ventures in conducting various businesses other than the one to which his corporate property is already devoted. He shall surrender his rights and interests, or enter upon new enterprises beyond the original promise of his association, and which, he may believe, will destroy all original values or purposes. It may very well be suggested that the execution of such a menace is an intrusion on contract rights of association, purpose, property, devotion and business risk, such as are necessarily attendant upon every incorporated association of shareholders, and hence, no violation of the constitutional prohibition against impairing contract obligations.

There is no similarity between the exertion of the powers assumed to be created, or necessarily implied by this statute, and the sovereign right of eminent domain. The taking of shareholders' stock for the purpose of being pooled and re-distributed with divers other stock to various persons, not being in any fair sense of the term a public use, cannot form a constitutional basis for sound legislation. Hence a statute fundamentally dependent for its operations on such a feature, and incapable on its face of becoming operative with that provision omitted, might be said to be unconstitutional and void.

It is submitted that the Legislature, in a clear case of a recent unconstitutional enactment of this nature, when public reasons exist therefor, should not delay for some judicial intervention, but should apply at once remedial legislation; and that the public grounds for immediate action by the Legislature are apparent in this instance.

7841 It is ascertained from the Secretary of State's office that no attempt has been made to utilize this statute, chapter 367, Laws of 1884, except by the New York gas companies to form their consolidation.

THE CONSOLIDATION SHOULD BE ANNULLED BECAUSE UNFAIRLY CAPITALIZED.

But, assuming the statute of 1884 to have the full force and validity its advocates and promoters contend for, the combination known as the Consolidated Gas Company of New York has not resulted from a compliance with its provisions. On the contrary having violated them in essential particulars, and having assumed to capitalize in excess of the true value of its acquired properties, its assumed incorporation should in the interest of the public be annulled by the Legislature and its properties and assets marshalled and distributed under the direction of the courts to those in law and equity entitled thereto. Moreover, such proceedings would doubtless swiftly result in a reorganization and a recapitalization on a fair basis.

VALUES.

Upon the question of the fair aggregate value of the properties, rights and franchises of the constituent companies the committee have made extended investigation.

In addition to the considerations hereinabove suggested touching actual values the various estimates and methods of estimation pursued in arriving at the combination in question have been spread in evidence.

From this it has resulted that in the opinion of the committee *by no fair and meritorious valuation can the property rights and franchises of the constituent companies be valued at* $39,078,000.

7842 This conclusion is sustained by any fair method of valuation that may be proposed. None has been suggested by testimony or argument that supports this figure.

The aggregate valuation is neither estimated according to actual cost; nor the fair earning capacity of the properties in the ordinary course of trade; nor the fair cost to duplicate an equivalent producing capacity; nor the salable or market value of the properties; nor the true and actual value with a fair relation to the normal condition of similar commercial enterprises as they have been current; nor according to any ascertainable principle of fair appraisement.

It is not pretended that the valuation is according to the actual cost of the properties. But it was vaguely suggested by some of the officers that the appointed values represented a fair appreciation over cost. This topic, therefore, was made the subject of extended testimony, by which it has been clearly established that *with the exception of the lots of land originally acquired for the various works there was no investment in gas properties that had perceptibly appreciated in value beyond its first cost.* On the contrary such investments, unless annually replenished by fresh expenditures of from twelve to fifteen per cent., depreciate when in use; and when not in use or properly cared for are likely in a short time to become altogether valueless. Moreover improvements in the processes and methods of manufacture depreciate some values and necessitate expenditures for maintaining with economy a stated producing capacity.

Opinions as to gas plants proper may vary, and the values thereof may be more or less dependent on location, kind of gas to be made, competition in supplying, distribution facilities and other circumstances; but as a matter of evidence before this committee, *no*
7843 *witness has ventured the opinion that a gas plant is worth more than it cost to produce it.*

THE CONSOLIDATION SCHEDULES.

By directing the evidence toward the items stated in the schedules of appraisements upon which the business on consolidation was finally negotiated, and the books of the new concern opened, the committee readily ascertained upon what items opinions, even of experts, were likely to differ, and how far such opinions were a matter of any practical or legal importance.

These schedules, showing as they do the entire scheme of capitalization as outlined by the parties effecting it, have been deemed of sufficient importance to be printed herewith in full (excepting the real estate maps), reference being had thereto, it is only necessary in this connection to note that by these schedules the total aggregate values of the properties is assumed to be $29,994,000, and no more.

Now this amount is made up by assigning to each company specific values for the following items:

1 Street mains, valves, etc.	$5,217,000
2. Meters	1,195,000
3. Services (the service pipes from mains to meters, etc)	1,005,000
4. Plant	12,151,000
5. Real estate (being lots only, exclusive of buildings)	8,617,000
6. Bulkhead piers and water rights	1,300,000
7. Office buildings	325,000
8. Office furniture	70,000
9. Laboratories, photometer-rooms, etc	24,000
Total	$29,994,000

7844 As to items 1, 2 and 3: Grouping these items ($7,417,000) for conveniences, and comparing the values assigned to them in the appraisement schedule with the books, the following appears as the cost of mains, meters, and services:

Company.	Cost.	Page of testimony.	Schedule.	Increase.
Manhattan	$1,457,021	671	$1,800,000	$342,970
New York	Unknown.	708	1,292,000	....
Metropolitan	8,357,129	727	1,477,000	239,870
Municipal Knickerbocker	923,865	747	1,904,000	980,135
Harlem	527,669	758	944,000	416,331
Total	....	.....	....	$1,979,315

Thus the values for consolidation were assumed to be at least $1,979,315 in excess of the actual cost. Is it possible that the mains, valves, meters, and services had become enhanced in value notwithstanding their use and subjection to ordinary wear and tear for from five to forty years? It is common sense that neither mains, meters, nor services increased in value with time. The privilege of using them to furnish gas, is their chief, if not their only value. Do not these figures include all such privileges? If not, then these values are excessive. If they do the item elsewhere for franchise is so far improper.

Respecting the first three items, it may be observed that the values are stated at full cost, and upon the assumption that the quantities appearing upon the books of the respective companies to have been paid for, did actually exist in a condition equivalent to that at first cost. If this proves anything, it is that cost is not an unfair element in fixing values for some gas property.

The sixth item is in fact included in the cost of the fifth item, except as filling in of water fronts and construction of piers was
7845 paid for out of current expenses for labor and materials. The two items should be considered together as $9,917,000. That the value of the lots is in some respects inordinately excessive is fully proven; so excessive, indeed in some instances, as to be treated as fraudulent.

The committee has caused every specified piece of real estate to be appraised by a disinterested witness qualified by an experience of eighteen years as an assistant appraiser of city real estate in the New York tax office; and have subjected his results to reasonable tests from other witnesses of large familiarity with such values. No certified appraisement of the values of these lots was offered by the companies.

It is a moderate statement warranted by the testimony as well as from the general sources of information accessible to the public, to conclude that *the appointed or scheduled values for the lots* (not the real estate property so-called because the buildings and fixtures are accounted for in the "plant") *designated in the schedules as "real* *estate," is about twenty-five per cent. in excess of what was their fair value in September,* 1884, *when the agreement was signed.*

This conclusion of fact, considered as it must be in connection with the obvious motives and public consequences of the whole transaction, is itself sufficient to justify the abrogation of the consolidation and capitalization assumed to have been perfected in this way.

A difference of even $2,500,000 of improper capital to which the public is practically bound to contribute, is of sufficient consequence to warrant the intervention of adequate public authority to extinguish it.

This, however, is only *one* item. What shall be done when the excess is nearer $20,000,000 than $2,000,000?

7846 Item four, "plant $12,151,000," appeared to have been arrived at as the result of a general agreement between the representatives of the constituent companies, and after much consideration.

It is not below the actual cost of the property it assumes to represent, and in some instances exceeds such cost.

Each company appraised its own plant, and submitted its figures to its associates. What is here designated as the plant comprises the retorts, benches, gas holders, tanks, engines, machinery, buildings, storehouses, yards, tools, fixtures and general apparatus for carrying on the manufacture. Fairly considered, the "plant" of a gas company is the manufactory complete for sending out a given quantity of gas. Considered with relation to capital, it is generally conceded that there is some recognized or approximate proportion between the capacity to produce a given quantity of gas, and the total capital necessary for that purpose. This will be again alluded to. The companies' valuations of plant, however, as appointed to this item, have no such significance.

The engineer who constructed a large portion of it, and who appraised the plant of the New York and Metropolitan Companies, testified that he made his valuation or appraisement (testimony, page 38) based on what the plant is worth "for the production of gas in the manner in which it was used at the time;" and that it would be of no use except in connection with the right to open streets; and that he could not conceive that it was of any value except for old material, unless under this condition, or made applicable for the purpose for which it was built. Upon that basis the witness thought it was fairly worth the money it would cost to produce it now, and he affixed his valuations accordingly.

7847 When it is observed as the testimony shows, that a large part of the plant of the old companies was produced many years ago, and used for the manufacture of a gas of a low candle-power, which did not successfully compete, in subsequent years with the gas of a higher candle-power manufactured by different method and introduced by competing companies, it is not difficult to understand why in recent years and until such competition was satisfactorily composed, the old companies were obliged to expend large sums on the plant.

Thus the New York Company during the last five years of its business substantially reconstructed a large part of its plant. Substantial additions were also made to the Manhattan plant. The officials of these companies stoutly denied that any of their plant had been rendered worthless or unserviceable. The fact, however, appeared that at the works of the companies, there was very considerable plant that was not in actual use.

There is good reason to believe, from the testimony, that in view of the competition and methods of the later companies, and the menace thereby occasioned to the excessive profits to which the stockholders of the New York and Manhattan Companies had long been accustomed, that the managers of these old companies appreciated the necessity of improving their methods and uniting their fortunes with the new comers, or of appeasing their rivalry in some substantial way. Both courses seem to have been successfully followed. Valuable concessions of money (the New York Company paid to the Municipal $300,000 for patent rights), or of business were agreed upon; then freedom from competition and finally combination or consolidation was arranged, without which a large part of the business of the old companies might have fallen into new hands.

7848 Under these circumstances it was of slight consequences to any one constituent, and of still smaller consequence to any individual stockholder, at what figure the plant, or any other scheduled item, should be appraised, or valued in the consolidation. It was only important that the minds of all the representatives of the constituent companies should meet at some figure. Each company, therefore, that was urgent for consolidation tried to make its own figures as high as possible; and there was no interest to interfere with any excessive valuation.

Upon the testimony it requires some exercise of the imagination to conclude that the fair salable value of the retorts, benches, holders, tanks, engines, machinery, buildings, fixtures and the various apparatus comprising the "plant" of the constituent companies, exclusive of any other element of value reached the schedule figure of $12,151,000.

In the view taken by the committee respecting the total capitalization, it is not necessary to express any opinion as to what was in truth the fair value to be assigned to this particular item of $12,151,000 because the value of a gas apparatus is elsewhere considered and is not fairly to be separated from the value of a gas plant in its entirety. If the various factory items be detached from each other and valued separately, and not for the purpose of being used in the manufacture of gas, then, as the witnesses agree, their separate values would be much less than cost. In that event they should not have been scheduled on the basis of estimated cost; or as pretended according to what it would cost to reproduce the apparatus. Much of the material was necessarily obsolete, laid aside, or incapable of detached estimation without regard of the general relation of all parts of the plant to each other and to the business in which it is used.

7849 It is clear that all parties treated the value to be assigned or scheduled to this item (as indeed they treated all the other items) as dependent on the condition of its continuing use at the same place for making and supplying gas. The valuations were for property of a "going concern;" else, as one of the builders and appraisers testified, the plant had little value except as old material.

Of course, therefore, the value of the "going concern" depended on the right of the concern to keep going; and this necessarily included the right or franchise so to do if any existed.

The entire properties when valued or pretended to be valued in this way are scheduled by the managers at $29,994,000.

This scheduled estimation of $29,994,000, therefore, necessarily comprehended an over-valuation of all there was or could have been of properties, franchises and rights belonging to all the constituent companies.

The arbitrary addition, therefore, to this sum of more than twenty-five per cent. of this excessive valuation not only savors of fraud to some innocent stockholders who approved it but amounted to a public wrong.

Instead of $29,944,000 the consolidation capital appears scheduled at $39,078,000. This result is attained not only by excessive estimations according to the scheduled items, but by their actual duplication; here is

ONE FICTITIOUS ITEM OF $7,781,000.

With no limitation by law on the price of gas, or regulation as to its quality or measurement, the effect of adding arbitrarily $7,781,000, the last scheduled item, to the capitalization of six companies already capitalized excessively for the business they were conducting, is to tax gas consumers for an unrestricted profit on an apparent investment of $7,781,000, when in honest truth that $7,781,000 does not represent one dollar.

7850 Seven per cent. on this sum is over half a million dollars per annum. More than four times that amount has already been distributed as dividends and collected by the consolidation from the gas paying public of New York.

This item alone of $7,781,000, is a significant badge. The public wrongs its approval would perpetuate justifies the Legislature in disintegrating the transaction of which it is an essential element.

THE TRUE VALUE OF GAS PROPERTIES.

But the true value of a complete plant, capable of producing a stated quantity of gas and adequate to the varying demands of the seasons, and of reasonable expansion for the future, including real estate, apparatus and all the necessary equipment for business, has been conceded by all the witnesses testifying upon the subject to be measured by its fair cost. All the evidence concurs in the statement that the capital fairly requisite to produce a given quantity of gas is readily ascertainable within approximate limits. The experience of witnesses who have organized companies, constructed and located gas works, inaugurated and conducted gas business generally, coincides within reasonable limits. Indeed so uniform was the testimony—extracted from unwilling witnesses and not without difficulty—that the committee have no hesitation in stating it to be a fact that for a producing capacity for furnishing, say five million cubic feet of gas per day a maximum capital of five millions of dollars is abundantly adequate including preparation for extensions and enlargements of the business.

To double this capacity would not require double the capital. On the contrary in dealing with such large capacities, the proportion of additional capital required to increase the manufacture diminishes as the capacity increases.

7851 By way of illustration, the constructor and manager of the works and business of the Mutual Gas-light Company testified to having attained a capacity of 4,000,000 cubic feet per day, with a representative capital of $4,100,000; in which sum is included $600,000 spent in experiments, enlargement, and alterations of works and street mains, and other miscellaneous items belonging to a proper construction account. The construction here alluded to was also made soon after the war when prices for labor and materials were higher than at present. The same thing could be done now, the witness thought, for twenty per cent. less. The producing capacity thus established, having been conducted with regard to the future demands of the business, is capable of being doubled by the further expenditure of about $1,500,000.

Here is testimony from experience that a total capital of less than $6,000,000 is practically adequate to the necessities of a gas business capable of furnishing for New York 10,000,000 cubic feet of gas per day.

The present consolidation is now producing about 22,000,000 cubic feet of gas per day, and in the opinion of some witnesses is capable of producing 28,000,000. It claims to own land enough to erect works to double its present production.

If this be true such land should either be utilized or disposed of, to prevent the public from being charged dividends for its use as capital.

Upon this testimony a capital of $15,000,000 would more than suffice for a business capable of furnishing 25,000,000 cubic feet of gas per day.

Indeed, as an appraiser of gas property this expert stated that as a practical man, to arrive at the fair actual value of gas works, he would not apply any other basis or principle of valuation than what it would cost to produce a given quantity of gas per day.

7852 He also stated that he and others interested in the consolidation negotiations thought its capital too large.

Another expert who was engaged in constructing the Manhattan works, and was for many years the chief manager of that company, testified that with the expenditure of $1,000,000 an additional producing capacity of five million cubic feet of gas per day could be constructed by the consolidation.

The president of the Equitable Gas Light Company, who also organized the Municipal company, testified that with a capital of $20,000,000, he would hopefully undertake to furnish the whole city of New York with more gas than they required and also make considerable allowance for future growth; and further, that within the past few years his company had attained a capacity to produce 2,500,000 cubic feet of gas per day, at a total expenditure (including $500,000 of stock issued for patents) of about $2,850,000.

Enlarging the capacity above five million cubic feet per day requires much less capital in proportion to further capacity than the original capital required for the initial capacity. Especially is this true when the original construction is planned with due regard to future growth, and all gas works are usually so devised.

Thus, it is indisputable that *upon the evidence the fair capital of the combined constituent companies, having regard to their actual and prospective capacities, and present out-put of gas should stand at less than twenty millions of dollars. Under no circumstances should it be permitted to remain for any public purpose whatever* at $39,078,000.

If in any possible view of the situation the combined properties be deemed to be of any such value a large portion of the property should be sold and a recapitalization established upon a basis
7853 that shall be fair to the public and just to all parties in interest.

According to the experienced testified to by the president of the Mutual Company, a capital of $18,000,000 would be more than adequate for a producing capacity of 30,000,000 cubic feet per day; a larger output than the consolidation has yet attained.

To express it *within wide and liberal limits* on the whole evidence, regardless of cash actually contributed by stockholders—if such important elements are in any aspect of the case proper to be disregarded—*a fair and meritorious capitalization of the constituent companies consolidating would have been at some figure between* $15,000,000 *and* $20,000,000.

MARKET VALUES OF STOCK UNDER NORMAL CONDITIONS NOT ABOVE THESE FIGURES.

The conclusions above expressed are further supported by comparing the market values of the shares of the constituent companies with the large capitalization which their managers had themselves established.

In 1879, under normal conditions, when there was competition and the ordinary demands of commerce and of capital, operated without artificial restraint in the public enterprises of supplying gas, the total market value of all the shares of capital stock of the six constituent companies was, according to the quotation then current, about $13,933,000.

Gas was then furnished as low as one dollar per thousand cubic feet; new capital was seeking to supply it, and the old companies sought to defeat the endeavor by destroying the new companies and by impairing the confidence of capitalists in them. But the
7854 expensive methods of the old companies and low candle power of the gas produced by them, threatened their business and profits in competition with the new rivals. So a truce was agreed upon.

It is incredible that without any substantial contribution of money or of property or any new privileges, that which six years ago was valued in the market at $13,933,000 should now have attained an actual aggregate value of $39,078,000. Yet if the consolidation is an honest one such should be the fact. This however, as we have seen is not the fact; many of the old stockholders of the new concern seem to be of the same opinion lest when the public become more fully informed on the subject they may not heartily invest in the shares at par. Since the consolidation the old shareholders have disposed of about one-seventh of their holdings to the general public who have purchased (as it appears by the books) since the Senate ordered its investigations.

THE GAS POOL AN UNLAWFUL COMBINATION AND NO TRUE ELEMENT OF VALUE.

The truce agreed upon when the price of gas was restored and the gas pool established was the organization of consolidation.

An agreement was made April 5, 1880, between all the companies at that time supplying gas in New York city, fixing the price of gas at $2.25 per thousand cubic feet, providing that there should be "no canvassing or soliciting of customers," that no new mains should be laid in streets where mains were already laid "it being the intention that no competing mains be laid," that all sales should be pooled and the proceeds distributed in established proportions, and that the agreement should continue for five years "unless sooner terminated by consolidation."

7855 It is noteworthy that this agreement followed the absorption by the Municipal Company of the Knickerbocker Company (the details of which transaction are elsewhere alluded to) and that the parties profiting by this transaction were active managers in promoting the consolidation that was in terms contemplated by the pooling agreement.

The agreement also provided for a committee of one member from each company to conduct the business under it. Thus the Municipal Company, which owned all the stock of the Knickerbocker acquired two votes in the combination. Some of the largest stockholders of the Manhattan and New York Companies had also become interested in the Municipal Company, and naturally assisted in promoting the consolidation.

Four votes, representing these four companies, determined values, stock distributions and reservations, total share capital, together with the general course of action of the committee, and finally brought about the consolidation.

Moreover the immense profits immediately enjoyed by the combination, and the fact, that within less than six months from its perfection the quoted value of the shares of the companies participating had more than doubled, intensified the possibilities of the future.

The New York Company spent several hundred thousand dollars in adapting its coal gas apparatus so as to manufacture water gas; and improved or generally reconstructed a large part of its works.

The accounts show over $800,000 expenditures of this kind from earnings realized after the pool was made, and that the immense profits succeeding the pooling agreement are due to the excessive charges for gas fixed by the pool and maintained by it.

7856 This price was obviously so fixed as to pay the dividends mutually agreeable to the managers, and without any consideration of what was a reasonable price for the public to pay.

This pooling agreement of April 5, 1880, was undoubtedly illegal and void as against public policy, and in restraint of trade. Its existence was concealed from the public. Its terms come within the well-defined class of judicial authority on that subject. If any method existed by which this agreement could be subjected to judicial scrutiny it would doubtless be declared to be illegal. Its public effect having been to extort from the consumers in charges for gas supplied, large sums of money in excess of a fair and reasonable charge, does not add anything to its integrity, but on the contrary, affords additional reason why the results attributable to such an impolitic contract should not, if unjust, receive legislative sanction.

If it be true that by reason of this agreement and its operation the price or market value of the capital stock and properties of the constituent companies greatly appreciated, and if in consequence of the extortion thereby practiced, and profits thereby realized, the aggregate values of the properties of the constituent companies became in the opinion of their own managers largely enhanced, then these considerations should be disregarded in arriving at what, under normal conditions, and according to the unrestrained influence of the laws of commerce and the requirements of capital, was the true value of the aggregate properties of the constituent companies.

It is submitted that the legislature has no moral right to entertain fictitious or illegal standards of values as the basis for legislative action, and that in consequence all estimates founded upon wrong should be absolutely disregarded. The values of the prop-
7857 erties of the constituent companies should be ascertained independently of this agreement, or of any operations under or in pursuance of it.

The profits during the four years following this pooling agreement are aptly illustrated by the fact that the Manhattan Company, in that short period, paid in dividends to its stockholders an amount exceeding its entire capital. The Municipal Company likewise returned to its stockholders more than its actual capital, and the Metropolitan Company divided also as its profits sums equal to about four-fifths of its actual capital. The actual receipts and expenditures of the constituent companies during this time, as shown by their books exhibited their excessive profits to have arisen exclusively from the charges for gas. *These charges for gas, being excessive and unreasonable,* formed no proper element in valuing the respective properties of the constituent companies.

Much difficulty was experienced by the committee in ascertaining from the witnesses who were individually concerned in the endeavor, and who were members of the pooling committee having consolidation in contemplation, as to the time when the details for consolidation and capitalization were first definitely arrived at. There was a curious coincidence of failure of memory in this respect. The records exhibited that as early as the fall of 1883 plans of consolidation were under consideration, and in December, 1883, a plan was so far adopted as to be referred to a sub-committee "with power to call in legal counsel," with a view to carry it *in* into operation.

At this point it became desirable to ascertain whether any legislation had been proposed in aid of the contemplated consolidation; but in this respect the efforts of the committee were unex-
7858 pectedly—and either by design or accident—thwarted. It
did appear by the testimony of one of the directors of the Municipal and Knickerbocker Companies, and one of the members of the pooling committee and an active promoter of the consolidation and one of its present advisers and directors, that in 1883 an act was drafted in aid of the consolidation scheme. This proposed act the witness (Henry Day) testified was handed by him to one of the State senators and subsequently became a law, known as chapter 567 of the Laws of 1884 (see testimony, pages 206-215). The witness said he asked the senator to take the bill and to push it along as fast as he could and that the senator introduced the bill (ib. 214) At the next session of the committee the senator named appeared and requesting to testify stated, that while he was handed the bill and requested to introduce it, yet he did not do so but returned it to the witness with his reasons. He did not know or hear while he was in the Senate of the passage in 1884, or the presentation of any bill relating to the consolidation of gas companies in the city of New York; and that it was a matter of surprise to him when he learned that a bill had been claimed to have been passed looking toward such consolidation. He also stated that the bill which he had returned to the witness was an act authorizing the consolidation of manufacturing corporations, and that it was returned to the witness within two months from the beginning of the session of 1884.

The examination of the witness Day had, meanwhile, been suspended, with the understanding that he should attend again upon the committee when notified, and produce also certain papers called for. The witness was then notified to attend and to produce, in addition to the papers called for, the draft of the proposed act
7859 which the senator had returned to him. This, however, he
neglected to do, sending the committee a letter that he would be out of town on the appointed day. Mr. Day successfully evaded, or avoided the efforts of the sergeant-at-arms to serve him with a further subpœna. (See proceedings, page 587.) The committee allude to this incident as affording a partial and suggestive explanation of the sources of some of the legislation which the promoters of the consolidation scheme have claimed to take advantage of, and to throw light on the question whether such legislation should be repealed, or should remain on the statute book.

In this connection there are two amendments (chap. 276, Laws of 1883, and chap. 287 of the Laws of 1884) to the New York city consolidation act or charter of 1882, which could not have had their origin elsewhere than with the promoters of the consolidation scheme.

The present effect of these amendments is to prohibit the laying of any gas mains in the streets or avenues of New York city, except after two-thirds of the owners of the property fronting on the streets and avenues where mains are to be laid, shall have united in petitioning the city authorities for that purpose. This legislation was without precedent respecting gas companies in the city of New York, and practically prohibits forever any competition with existing companies.

It is the occupants of stores or dwellings, rather than the real estate owners, who are directly interested in the laying of one or more mains in front of their premises. It is the numerous small consumers who are unable to protect themselves against extortionate charges for gas, or to induce competition at their premises, or whose trade is affected who are immediately interested. Moreover capital would not be successfully invited to invest in the laying of
7860 mains in one block or street, unless there was a reasonable opportunity to perfect some profitable system of arterial distribution for the gas it proposes to manufacture. Any devised system of distribution might be destroyed by the failure of one block of real estate owners to consent to the laying of mains, while on that same block no one of such owners might reside or carry on business, or be interested to the extent of one dollar in the laying of such mains.

This prohibitory legislation was undoubtedly designed to cut off competition, and to promote and to perfect the scheme of fraud and of extortion which has culminated in the consolidation.

It is noteworthy that this practical prohibition against competition, was made a law shortly after the Equitable Gas Company by its contract with the city had acquired for itself the right to lay mains, and had guaranteed the maximum price. It proposed to furnish gas at $1.75 per thousand cubic feet, instead of at the price of $2.25 per thousand cubic feet, which was then charged by all the companies. It is also in this connection noteworthy that when the Equitable Gas-light Company had constructed works, laid mains, and had begun to furnish gas in appreciable quantities, viz.: in November, 1884, there was a coincident reduction or apparent reduction by the consolidation from the price of $2.25 to $1.75 per thousand feet.

Concealed as this prohibitory legislation was in the amendment to a section relating to steam pipes, it is not strange that its practical operation did not suggest itself to the Legislature which enacted it. In the light of its effect and its expediency the committee recommend its abrogation. To effect this, requiring as it will a further amendment to the New York City Consolidation Act, or
7861 a separate or local act, the committee have prepared an act which is herewith proposed.

As long as the policy of the State appears on its statute books as it does since the passage of chapter 37 of the Laws of 1848, to authorize the formation of gas-light companies under the general laws and without special authority from the Legislature, there is no good reason in the opinion of the committee why under reasonable and proper regulations capital should not be invited to interest itself in serving the public on fair terms, without favor or partiality to any particular company or monopoly that may have improperly fortified itself against further enterprise and reasonable competition. It is obvious, however, that it was the purpose of the promoters of consolidation to exclude further enterprise and further capital, and to insure at the same time a remunerative return upon a nominal and fictitious capitalization which might attract innocent investors. It was undoubtedly with this view that the combined capital of the constituent companies was fixed arbitrarily by the parties to the agreement at $45,000,000.

That is was not from the first intended by any of the promoters of consolidation to unite upon the total combined, actual or nominal capital of the constituent companies, is clear when it is observed that there already existed a law authorizing manufacturing corporations to consolidate upon a combined capital which should not exceed the aggregate capital of the uniting companies. Such a law was passed in 1867. Its terms did not apply to gas companies; its re-enactment in 1884 did not then in terms apply to gas companies: but the law of 1884 assumed to permit consolidation upon a capital equivalent to the fair aggregate value of the property, franchises and rights of the uniting companies. While it may be 7862 true that neither of these statutes apply to the New York Gas Companies, it is clear that the first one, limiting as it did the new capital to the total capital of the constituent companies, did not answer the purposes of the consolidation promoters.

The testimony shows that the figures, $45,000,000, as the capital of the new concern, was proposed early in the summer of 1884. About the same time schedules of the real estate of the constituent companies were directed to be prepared. Schedules of the other property, plant, mains, etc., in more or less perfect form had already been considered by the members of the pooling committee, but nothing definite in respect to values had been determined. Careful questioning of every member of that committee who was called as a witness, and of all the officers of the constituent companies, has failed to disclose any paper containing in whole, or in part, any schedules whatever of any of the properties of any of the constituent companies, or any of the plans for consolidation that were before the pooling committee. Nothing in this respect has been found except the formal inventories or schedules exhibiting the properties of the various constituent companies, as they were finally accepted and agreed upon at the time the consolidation agreement, dated September 29, 1884, was executed. The committee is unable to explain the singularly coincident absence of data by which these various schedules must have been prepared; and cannot account for the absence of memory of all the witnesses who assumed to agree upon the details of values therein set forth.

The failure of the Mutual Gas-light Company to become one of the constituent companies in the consolidation, as designed, by the terms of the consolidation agreement is explained by the provisions of its charter (chapter 651 of the Laws of 1866, sec. 6), that renders its directors voting for consolidation, or for transferring its franchise to any other gas company, liable to punishment as for a misdemeanor. It is doubtless for this reason that the Mutual Company did not unite in the agreement in which it is recited as a party. The capital, therefore, of $45,000,000 for the consolidation was in fact reduced by the amount which by that agreement had been assigned to the Mutual, viz.: $5,922,000; leaving the existing nominal capital of the combination to stand at $39,078,000. 7863

Whether the execution of the pooling agreement, dated April 5, 1880, by the Mutual Company and signed by its president was an offense under the section quoted, or such a violation of law as impairs the charter of that company, are questions which may properly be left with the judiciary.

THE FAILURE OF THE MUTUAL COMPANY TO COMPLY WITH ITS CHARTER.

There is, however, one provision (Sec. 4, chap. 651 of the Laws of 1866) in the charter of the Mutual Gas-light Company which, according to the evidence and accountant's tables prepared from that company's books and accompanying this report, requires special attention with relation to that company. Its charter requires that whenever the profits of this company shall in any one year exceed ten per cent. on its capital stock, then the excess shall be divided "between the consumers of gas furnished by said company, *pro rata* according to the amount consumed by them respectively, and the other half shall be paid as a dividend to such owners and holders of the stock of said company as may be consumers," provided that no individual stockholder shall be paid such dividends upon more than fifty shares.

7864 It appears that during the last few years the profits exceeded in each year ten per cent. of the whole capital stock of the company, and that (testimony, page 405) a large fund (exceeding $800,000) has accumulated, and that large accumulations are now being made after providing for an annual profit equivalent to ten per cent. upon the whole capital stock. No measures appear to have been taken to distribute this profit in accordance with the above quoted provision of the charter of the company; nor has it been used to reduce the price of its gas furnished. The net earnings or profits of this company were for many years largely in excess of $500,000 per year, or ten per cent. upon its nominal capital stock. A scheme was resorted to of issuing $1,500,000 of bonds to stockholders for an equivalent amount of stock concurrently surrendered. This operation is treated by the company as a reduction of capital; and it is now proposed to pay those bonds out of the accumulated earnings. Some have already been paid. Dividends also were paid upon $3,500,000 in 1883 and 1884. There are now among the assets of that company representing earnings after paying dividends, $3,130,000, $830,000 of which is invested in United States bonds.

This attempted evasion of the section above quoted is a violation of law, that in the opinion of the committee requires the intervention of public authority. It would seem to warrant the abrogation of its charter.

Under the circumstances, and in the absence of an opportunity for further investigation into the matter, and in the absence of any justification offered by the company when called to its attention, the committee recommends that the Attorney-General of the State be instructed to institute such proceedings as the facts may warrant.

A bill for this purpose is herewith submitted.

7865 THE POOLING AGREEMENT WAS EXTINGUISHED BY THE FINAL AGREEMENT OF CONSOLIDATION.

Four years and a half of successful operations under the pooling agreement, assisted by friendly legislation, culminated in the consolidation of November 1885, formally announced to the public with a reduction in the nominal price of gas per thousand cubic feet.

The agreement of consolidation, by its article VIII, assigned to the various companies the amount of the capitalization (testimony p. 787) respectively apportioned to each company, and also a number of shares of the par value of $100 each that should be allotted to the stockholders of the constituent companies out of the total number of shares, thus: (See page 787.)

Name of company.	Par value of shares.	No. of shares allotted.
New York Gas light Company	$7,821,000	75,600
Manhattan Gas light Company	12,352,000	119,400
Metropolitan Gas light Company	7,422,000	71,500
New York Mutual Gas-light Company	5,922,000	57,250
Municipal Gas-light Company	5,276,000	51,000
Knickerbocker Gas-light Company	3,104,000	30,000
Harlem Gas-light Company	3,103,050	30,000
Total	$45,000,050	434,750

It was also provided that outstanding obligations or debts of either of the constituent companies might be assumed or paid by the consolidation, and a proportionate amount of stock be reserved from this distribution to stockholders in order to provide means to pay such indebtedness.

It was also provided that supplies and material on hand by the constituent companies might be sold or transferred to the consolidated company for cash or stock; and that schedules of property, debts and shareholders should be furnished by the constituent 7866 companies. And also that if any company should not sanction the agreement, the consolidation should be binding upon those who did sanction it.

The Municipal and Knickerbocker Profits in Consolidation.

In this scheme of capitalization it will be observed that $8,380,000 of the total nominal capital and 81,000 shares of its stock was assigned to the Municipal and Knickerbocker companies. Here is an item that concerns one-fifth of the total recapitalization, and affords another illustration in support of the conclusions expressed in this report.

The nominal or *share capital of the Municipal* company was $3,000,000, and of the Knickerbocker company $1,500,000. Upon what reasonable ground could $8,380,000 be *apportioned* to the owners of $4,500,000?

It has been suggested that there were debts of these two companies amounting to $1,465,000 (Municipal $328,000, Knickerbocker $1,137,000). That, however, is no explanation, as the property represented by the old stock was subject of course to debts, and issuing new stock for old did not change the situation in that respect. The transaction still retained its character of the substitution of 81,000 shares of new for what was called 45,000 shares of old stock, without the contribution of an additional dollar of actual capital.

In fact, however, there was not in any true and proper sense of the term a capital of $4,500,000, which 45,000 shares of old stock could fairly be said to represent in these two companies. All the stock (15,000 shares, representing the par value of $1,500,000) of the Knickerbocker Company was in fact purchased by the Municipal Company, and held in trust for its benefit by a transaction concluded
in March, 1880, just before the gas pool was made. These
7867 15,000 shares being in fact paid for by the issue of 3,500
shares (representing $350,000 par value) of the capital stock of the Municipal Company, were thenceforward represented by this Municipal issue. It was, therefore, no less a fraud on the public than it was a fraud on stockholders of other constituent companies to include the same capital twice in the consolidation, as it was in fact included. Thus, new stock of the consolidation was issued both for those 3,500 shares of the Municipal Company at the rate of 158½ new stock for 100 of old, and new stock was also issued for those 15,000 shares of Knickerbocker stock at the rate of 123½ of new for 100 of old. Nor is it any answer to this unwarrantable multiplication of shares, and imposition on the public and on investors, that it was a profitable transaction to the holders of shares in the Municipal Company. When a fraud is attempted and successfully perpetrated, profit is generally contemplated and realized. It undoubtedly was profitable in this instance to those who managed the business. The knowledge of structural weakness in this method of capitalization is doubtless the explanation of what the share lists show to be the fact, viz.: That among the old shareholders of the constituent companies who since the consolidation have parted with their stock, more than half are Municipal shareholders.

THE KNICKERBOCKER TRANSFER.

As further illustrating the initial wrong or fraud in this same element of capitalization, the method pursued by the officers of the Municipal Company in issuing the block of its 3,500 shares last mentioned is noteworthy. This transaction in brief was as follows: The stock of the Knickerbocker Company was of no value. Its 7868 officers had so sworn for successive years before the tax authorities in New York city. The property of the company was incumbered with debts for construction, etc., to the extent of about $1,150,000, and no immediate prospect of relief was at hand. The nominal or share capital of the Municipal Company was at that time $2,000,000. This was voted to be increased to $3,000,000. The Municipal Company drew its checks for $350,000, and paid it to R. F. Cutting, who, in common with his associates, owned a large part of the debt against the Knickerbocker Company. Cutting, without relinquishing any of the debt, drew his check in return for $350,000 and paid it back to the Municipal. The latter company thereupon under the pretense of having received $350,000 of money in payment for subscription to its increased stock, issued these 3,500 shares, which were distributed by Cutting or his associates at their own pleasure, in acquiring the total 15,000 shares of Knickerbocker Company's stock. The discontinuance of a pending law suit, to which the paper showed a complete defense (see Appendix I), further assisted to conceal the actual transaction. These 15,000 shares were then placed in the hands of Messrs. Francklyn, Ottendorfer, Gawtry, Allen and Day, as five trustees to hold for the benefit of the Municipal Company.

These five trustees, holding each one share separately in his own name to qualify as a director, assumed to constitute themselves a directory for the Knickerbocker Company. Some of them were already trustees or directors of the Municipal Company, and all of them were, of course, interested in that company. Thereafter the Knickerbocker Company became owned and managed by the Municipal Company. It was, of course, the interest of the last-named company to discharge the Knickerbocker indebtedness. It has, in fact, succeeded in having that indebtedness substantially dis- 7869 charged by the consolidation, and has received from the consolidation, the profit of about $5,380,000 in its shares for the privilege.

It is true that after the acquisition of the Knickerbocker shares in March, 1880, the Municipal company did expend upon the works of the Knickerbocker in improving them several hundred thousand dollars. This expenditure is represented by an equivalent increase in the capital stock of the Municipal company. The testimony particularizing the transactions last above mentioned as far as the committee have been able to extract them (and it is a notable coincidence that one of the persons concerned and largely interested in the transaction represented by the exchange of checks for $350,000, sailed for Europe while the testimony on that subject was being taken; and that another party in interest, and one of the trustees, a director, manager, and professional advisor in the affair, could not be found at his house, or at his office during the last three weeks of the life of the committee) will be found at pages 215 to 288 of the proceedings.

As further illustrating the motive in preserving the semblance of two separate and independent organizations, when in fact there was only one, and of preserving the power of *two* corporations in the combination, when in fact it was but *one* party, and of the probable design towards the ultimate profitable result attained through consolidation, the form was observed of executing an apparent lease whereby the Knickerbocker Company purported to lease its works and properties to the Municipal company for an annual rent of $75,000 for five years from November, 1880. This lease, together with the trust agreement above mentioned, will be found printed in
full in the appendix to the report of the prior senate com-
7870 mittee, whose conclusions at page 9 in reporting that the pay-
ments under that alleged lease could only have been matters of form this committee on further investigation ratifies and confirms, and in view of the fact developed further finds to have been parts of a scheme to defraud.

The conclusion arrived at upon this branch of the investigation of the consolidation and capitalization is that the nominal or share capital of the so-called constituent companies was in part fictitious; that the new issue was also in part fictitious; and that the consolidation in these respects was not according to the fair aggregate value of the property, franchises and rights of the united companies.

Other illustrations than those above detailed of fiction or of water in the stock of the consolidation need not be further particularized.

INTERESTS MAINTAINING CONSOLIDATION AND PRICES.

It is not strange that a capitalization constructed on such a basis should be jealous of the power to regulate its own revenues by fixing its own price of gas. This power it now exercises without restriction. Nor is there at present any competition, except that which, within a limited territory, is afforded by the gas furnished by the Equitable Gas-light Company.

The Mutual Company's operations supply a territory with which the consolidation does not interfere, and for practical purposes may be deemed to be covered by the combination so far as price is affected. The interest of this company, as well as of the Equitable Company is, and at the present outlook must continue to be, to maintain the present price for gas.

The officers of the Equitable Company while opposing official restriction of price of gas, claim to furnish a better quality of gas than
has ever been delivered in New York; and seem content to
7871 compete with their gas at any price charged by the consolida-
tion. Hence, the continuance of the high prices fixed by the consolidation operates advantageously for all the companies under the present condition. Without, therefore, a limitation of capital and dividends as an element of price, or an absolute price to be fixed

by law (which might if not sufficiently elastic to respond to the exigencies of commerce prove in some year to be inequitable), there is no prospect of gas being furnished any cheaper by existing companies.

If new companies, with responsible parties, will enter upon the task and supply capital under reasonable restrictions as to dividends, price, and proper official regulation, the committee recommend that the proper authority be given them by law for that purpose.

But the time that would be required for new enterprises to perfect their sources of supply and means of distribution would not afford any immediate relief against the present overcharges.

LIMITATIONS FAIR TO SHAREHOLDERS.

In legislation to limit the price of gas, or the dividends of the present companies, there is no inequity to the shareholders. The excessive profits shown to have been derived by the shareholders in the consolidation removes this consideration from serious attention.

The few recent investors or speculators who have been induced to deal in consolidation shares took their own risks as to what the paper was worth, and as to what might be the results of the investigations undertaken on the part of the State prior to their transactions.

The excessive profits just mentioned as realized by the shareholders
of some of the constituent companies, six-sevenths of whom
7872 still retain their holdings, are illustrated by the following
facts:

The New York Company's shareholders have received from the earnings of that company $18,484,078.50 in dividends and $87,258.19 of assets distributed at the time of consolidation. The same shareholders have also been allotted $3,600,000 (par value) in shares of the consolidation over and above the $4,000,000 (par value) of their old shares, which latter represented an actual investment of $750,000. The total benefits to New York shareholders above investment are $22,171,336.69.

The Manhattan shareholders have received from the earnings of that company $26,347,675.66 in dividends and division of assets, together with $7,940,000 (par value) in shares of the consolidation over and above the $4,000,000 (par value) of their old shares—the latter representing an actual investment of $3,280,000. The total benefits to Manhattan shareholders above investment are $34,287,675.66.

The Metropolitan Company's shareholders have received from the earnings of that company, $7,573,749.36 in dividends, and will receive $686,988.17 additional distribution of assets upon consolidation. The same shareholders have also been allotted $4,000,000 (par value) in shares of the consolidation over and above the $2,500,000 (par value) of their old shares, which latter represented $612,700 paid in money, and $1,887,300 (par value) of shares issued for property. The total benefits to Metropolitan shareholders above actual capital are $12,260,737.53.

The Municipal and Knickerbocker shareholders have received within nine years from the joint earnings of these corporations, $2,-

806,192.50 in dividends, and $932,843.63, proceeds of assets distributed at time of consolidation. The same shareholders have also been allotted $3,600,000 (par value) in shares of the consolida-
7873 tion, over and above the $3,000,000 (par value) of the total Municipal stock, which latter represented all the shares and capital of the Knickerbocker, or $2,515,300 of shares paid for in money, and $450,000 (par value) of shares issued for property. The total benefits to Municipal and Knickerbocker shareholders are $7,339,036.13.

The Harlem shareholders have received from the earnings of that company, $2,529,917.25 in dividends, and $830,000 (par value) in shares of the consolidation over and above the $2,000,000 (par value) of their old shares, which latter represented $1,569,050 of cash, and $150,950 (par value) of shares issued for property. The total benefits to Harlem shareholders are $3,359,917.25.

Altogether the shareholders of the constituent companies (see pages 775 and 776) have received from earnings in cash dividends $57,741,613.27, and proceeds of assets distributed at time of consolidation, $1,707,089.99. The same shareholders have also been allotted $19,970,000 (par value) in shares of the consolidation over and above the $15,500,000 (par value) of their old shares. The latter represented only $8,727,050 of cash actually invested by shareholders, and $2,488,250 (par value) of shares issued for property, the balance ($4,284,700) of the old nominal or share capital representing accumulated earnings. The total benefits to shareholders of all the constituent companies as the result of consolidation are $79,418,703.26.

Reports and Publicity of Accounts.

The fact that these extensive accumulations and inordinate profits have been attained by extortionate charges upon gas consumers, and without any public information or means of information as to the necessity or fairness of the charges exacted or authority to measure them, demonstrates in the opinion of the committee the ex-
7874 pediency and usefulness of full and complete publicity of gas companies' finances.

While the gas companies do not enjoy any special power or authority over private property (*e. g.,* they may not exercise the power of eminent domain), they are nevertheless in their very nature more or less of a monopoly, and as such have devoted their capital or property toward a business in which the public have an interest.

Upon that ground, as well as upon other grounds, they are subject to public regulation. The primary regulation should be to enforce fair and honest reports of their transactions.

Stated accounts and reports are necessary in any well conducted business; and have proved efficacious in many respects when enforced upon corporations engaged in a business of a public nature. The gas companies of London, and of many of the great cities of the world, are subject to some such supervision. The stated reports are of large practical service to consumers and investors.

The detailed statement of capital, property, investments, earnings, expenses, repairs, loss, profits, receipts, purchases of material and sales of gas, residuals and other products, amount and value of productions have been enforced in many places with excellent results both to the shareholders, managers and consumers.

The forms in which such reports are now required to be particularized, as well as the information furnished by a large business of that character during the first half of the year 1885, are deemed of sufficient general public interest to be appended (appendix L) to this report. Besides its value as a form this publication of the Gas-light and Coke Company of London exhibits operations involving a capital of about $54,000,000, an out-put of gas of 8,479,915,000 in 7875 six months, a maximum price to the consumer of seventy-two cents per thousand (and for much of the gas a less price, different kinds of gas being made), and a profit on various issues of its shares ranging from five to ten per cent. on the investment.

For purposes of useful comparison, however, the operations of the three companies furnishing gas in the city of London during the entire year of 1884 are more valuable. This information is detailed in reports resulting from investigations of Parliament, printed by order of the House of Commons in March and July, 1885.*

This report shows that the Gas-light and Coke Company in the year 1884 sold 15,251,603,000 cubic feet of gas—about four times the out-put of the New York Consolidation for the year ending November, 1885—and at a price to consumers ranging from sixty-four to seventy-two cents per thousand; that the operations of the company involved a capital of $53,665,000, represented by various grades of shares, on which dividends were paid ranging from five to twelve per cent. per annum.

The Commercial Gas Company of London in the year 1884 sold 1,633,122,000 cubic feet of gas at a maximum price to consumers of sixty-four cents per thousand. Its capital was $3,729,000, represented by different grades of shares, on which dividends were paid ranging from ten and one-quarter to thirteen and one-quarter per cent. per annum.

The South Metropolitan Company in the year 1884 sold 4,234,164,000 cubic feet of gas at a maximum price per 1,000 feet of sixty-eight cents (less five per cent. to public bodies and railways). 7876 Its capital was $11,401,800, represented by different grades of shares, on which dividends were paid ranging from eleven and three-quarters to fourteen and one-half per cent. per annum.

Hence the total out-put of gas during the year 1884 sold in the city of London was 21,118,889,000. Its production occupied capital represented by various grades of shares in round figures of $68,795,800, on which liberal dividends have been earned, while consumers have not paid beyond a maximum price of seventy-two cents per thousand. This rate does not refer to cannel gas, which affords no useful comparison.

---

* These reports are made in great detail for all the gas undertakings in the United Kingdom, exhibiting the various authorities under which they act, and their capital, profits, and all their operations. The reports may be had of the London book-sellers.

It assists the comparison to observe that in 1884 the price of residuals was so reduced in London as to assimilate themselves to the corresponding values of residuals in New York.

By this it would seem that a capital of $17,000,000 was amply adequate to produce 5,000,000,000 cubic feet per annum, or an out-put exceeding the year's out-put of the Consolidation.

It cannot be true that in the face of these facts $39,078,000 is a true capital or the fair aggregate value of properties, franchises and rights employed as capital in the business of selling to consumers in the city of New York, an out-put of 3,820,000,000 cubic feet of gas—which was the out-put during the first year of the operations of the Consolidation. Nor can it be true that there is any necessity or equity in extorting a price of $1.75 per thousand.

Operations of the Consolidation.

In the investigation of the transactions of the Consolidation, since the new organization, it appeared that about the time the stock at the request of the managers was listed at the New York Stock Exchange, and became a matter of daily quotation in the stock lists,
loans were authorized and subsequently made, and from time
7877 to time renewed. From the spring of 1885 until the close of
the sessions of this committee there appeared to be only a
short period when the Consolidation was not borrowing money. In June, 1885, a semi-annual dividend of three and one-half per cent. was declared. A loan was then outstanding. A similar dividend for the next six months was declared *in* November 25, payable December 15, 1885. On the day this last dividend was payable (December 15) $600,000 was borrowed from the city bank, and as collateral for this loan all the revenues of the company were pledged.

The principal officer of the National City Bank and others of his business associates were largely interested as shareholders in the constituent companies. In addition to the loan above mentioned there was a loan by the National City Bank on demand notes without security of $300,000 which had been made October 2, 1885. This loan was outstanding when the cashier of that bank was on December 18 subpœnaed to testify. Immediately after the subpœna was served, and by his direction this loan was charged up against the account of the Consolidated Company, which until that charge was made had owed $900,000 borrowed.

The payment of each of these dividends required in round figures $1,100,000. There is upon all the testimony abundant fortification of the statement of the expert in his report on this subject (see testimony, pages 653-655), that the payment of the last dividend is not fairly warranted by the earnings.

While the balance sheets of the books of the Consolidation may show apparent footings of adequate profit, yet if a proper amount were allowed for expense, that is to say, if the accounts were made up upon a true basis of reserving a proper amount for depreciation

and wear and tear, the dividend was not earned; nor could it
7878 in fact have been paid except by anticipating the receipts and
borrowing money.

Twelve and a half per cent. per annum is, according to the testimony, a fair minimum amount to be allowed for depreciation or repairs, or wear and tear of a gas plant; and such an amount according to the accounts has not been expended or provided for even if the plant and works had been taken at actual cost, much less if taken at their present scheduled value (see testimony, pages 338, 347, 654).

Large expenditures also were in fact charged to plant, works, etc., thereby considerably increasing the apparent outlay for plant, and increasing the depreciation in future years. The profits of the company were exhausted in the payment of the dividends.

The company has no working capital, except as it may sell stock, on which also dividends must then be paid. "There being no working capital to provide for the cash assets except the credit obtained for supplies, the company must of necessity be a borrower;" and to provide means to carry on the business must continue to borrow, "unless more capital stock is subscribed, or a surplus fund created out of profits." The pretended object of consolidation, being to reduce the price of gas, is not likely therefore to be immediately accomplished.

Moreover, the cost of executive management is large, amounting to $75,000 per annum. Contracts awarding $10,000 a year for ten years were made with officers of some of the constituent companies on consummating the consolidation. In many other instances other expenses remain the same.

What has apparently been gained by the consumers in the
7879 nominal reduction in the price of gas from $2.25 to $1.75,
is largely accounted for by the decrease in leakage from the
closing of the mains formerly in use.

The Harlem Company's works also have been closed, and the large amount of capital thereby represented, rendered idle and unprofitable. It is not required in the business, in the opinion of the managers; but it remains a charge upon the consumers.

The dividends, it will be seen, are being paid to substantially the same shareholders, who were shareholders in the old companies, and these dividends approximate in amount the dividends received by them on their corresponding holdings in the constituent companies. There is no concession made by the shareholders; on the contrary the prospect exhibited by the present situation indicates the necessity from their point of view of increasing the charge to consumers.

New investors in Consolidation shares, on the assumption that the dividends will be regular, should have advised themselves of the fact that such dividends are proposed on the capital artificially created at their expense for the benefit of the original holders, and through increased valuations and charges upon consumers in former years and excessive prices for gas.

The fact of the nominal capital of $17,000,000, or more properly $15,500,000, being enlarged by about $4,284,700 of accumulated earnings at the consumers' expense, long prior to consolidation, and then further increased on consolidation to $39,078,000 by the creation of fiat stock demonstrates the benefits to the old shareholders, to the detriment of the new shareholders and to the consumers. Thus injustice is worked to the consumers and a wrong perpetrated by shareholders upon the persons to whom they sell their stock.

7880 The workings of the consolidation demonstrate that no relief can be afforded or is in prospect through its operations.

EXTRA SHARES OR BONDS SHOULD REPRESENT ACTUAL INVESTMENTS.

The shares of stock, also "$1,303,000" reserved in the scheme of organization for so called *"working capital"* of the Consolidation, according to the testimony, have in fact been issued in trust to an officer of the Consolidation. There is no law prohibiting the distribution of this stock, or its proceeds, among all of the shareholders either as dividends, or as a gratuity, or for any other purpose. Nor is there any adequate law to prevent the Consolidation from borrowing money, secured by a mortgage on its property or otherwise, issuing its bonds at pleasure, and distributing the proceeds of such loans, or even the bonds themselves, among the shareholders. There is at present no law to enforce the appropriation of further capital that may be acquired in this way toward permanent improvements or to any other legitimate purpose. Indeed at the volition of the parties, bonds themselves might be issued and distributed to shareholders, and consumers charged a sufficient price to take up the bonds out of earnings.

The financial history narrated in this report, and the evidence accompanying it, exhibit transactions which correspond to such possibilities.

Remedial legislation adequate to prevent the recurrence of such circumstances in the future, and to rectify the transactions of the consolidation, including its capitalization, is urgently requisite.

7881 NO OBJECTION TO OFFICIAL SUPERVISION.

The advantageous results attained elsewhere, as well in respect to profits and stability of investment as in the charges to gas consumers, fortify from experience the correct principle of reasonable regulation of gas companies, including restrictions as to dividends, capitalizations, accumulation of earnings and charges to consumers. It is not difficult, therefore, to apprehend why the committee has failed to elicit from any of the officers of the New York companies any assignable reason adverse to such official supervision.

No witness interested in the gas business has tendered any sound reason against remedial legislation.

A bill is, therefore, proposed and herewith submitted, drafted in accordance with the views and conclusions herein expressed. This bill provides limitations of dividend paying capital, of profits and of charges to consumers, together with proper regulation as to measurement, quality of gas, and publicity of accounts. This is to be accomplished through the supervision of a commission charged with enforcing the laws in these respects.

The total annual expense attending such a commission, if for New York city, would be much less than one cent for every thousand cubic feet of gas furnished in the city of New York; a sum too inconsiderable, even if paid by the consumers, to be of any importance in weighing the public interests to be thereby promoted.

This commission at least for the first term of its existence, and in view of its great judicial duties, should comprise three members.

THE COMMITTEE REFER TO NEW YORK CITY ONLY.

7882 The investigation being in terms directed to the Consolidation and New York city has not extended to other cities in the State. It was deemed better to treat one subject thoroughly and at one time, than to make partial inquiries in many quarters, and do possible injustice to all. Time did not permit further inquiry; although the committee were informed that excessive capitalization and its consequent evils were more or less dominant in other places. Further inquiry in other cities will subserve the public interest.

Enough has been shown, however, to demonstrate that some of the legislation expedient for New York city must be especially adapted to that metropolis. The situation is not such as to admit of uniform treatment throughout the State in all respects. Local and special acts exclusively adapted to the exigencies of the city of New York are essential. Such enactments are recommended for that purpose, and are herewith submitted.

INCIDENTAL OBSERVATIONS.

As an incident in the course of this investigation there was developed a notable coincidence of expression of press opinions in respect to proposed gas legislation. A journalist attached to a New York evening newspaper (*"Mail and Express"*) testified to having written at the instance of an officer of the Consolidation, an article urging republican assemblymen not to vote for the gas companies bill, as it would give patronage to a democratic mayor; and another article suggesting that democrats in the Legislature should not vote for it on some party ground.

The articles were intended for insertion as editorial or reading matter in republican and democratic journals respectively. He was paid for the articles; and through an adverstising agency
7883 they were inserted in thirty-seven prominent newspapers, in as many different places in this State.

The names of these newspapers and the amounts which they were paid appear at page 512 of the testimony. These articles did not appear as advertisements, but as editorial or reading matter, apparently the expressions of the home editors; and the bill was rendered to and paid by the "Consolidated Gas-light Company." The lawyer's opinion purporting to have been rendered to a stockholder and by him contributed to a New York daily newspaper, and on which these thirty-seven articles were founded, was also paid for from the same treasury (and his voucher produced before the committee), together with an apparently voluntary contribution published as a communication in another New York daily.

Had the committee felt charged with the duty or indeed authorized to continue an inquiry into the methods adopted to influence public opinion, and, consequently, legislation in respect to gas companies, enough appeared to indicate that these were probably not the only instances where the profits from furnishing gas were applied in such directions. Indeed, the numerous and distinct allegations of improper influences of this character spread in the columns of many newspapers shortly after the adjournment of the last Legislature, would justify the most searching inquiry of this character. Whether or no, therefore, if it be true, as editorially alleged, that legislative action was "scandalous" and "made it still more clear, that members were sold to the gas monopoly," is a charge that must be left to such consideration and action as may be determined by the Senate. No duty on that subject was specially indicated by the resolution under which this committee was appointed; but 7884 one of the gas company trustees volunteered testimony that brought the topic to the special consideration of the committee, too late in its sessions, however, to be adequately pursued, even had the committee deemed itself authorized to do so.

LEGISLATIVE CORRUPTION.

The public importance of this particular subject, however, renders it proper in this connection to be noted that there was evidence before the committee showing that some of the earnings of the gas companies had been used in buying what untruly appeared to the reader as disinterested editorial opinion, and that the intent was to prevent legislation designed to protect the public against what were deemed extortions on the part of the gas companies. Charges were notoriously made in the public press that the gas companies had defeated the contemplated legislation by the corrupt use of money; that the votes of members of assembly were procured thereby, and that the profits derived from consumers were used to defeat legislation proposed for the protection of consumers.

These allegations were so generally made since the adjournment of the Legislature of 1885, and were accompanied by circumstances so suspicious, and charges of legislative corruption are of such vital importance to the State, that they demand at the hands of some adequate authority a thorough investigation.

If crimes of the sort alleged have been committed, the offenders should be brought to swift and condign punishment, and should not be allowed to use their corrupt gains to deceive the public, or thus to fortify their own continuance in power, and secure new opportunities for corrupting and being corrupted.

7885 Such scandals should not go uninvestigated. If true, they strike at the foundations of popular government. If untrue, both the gas managers and accused legislators have been most outrageously wronged. In that case both the wronged managers and legislators should themselves demand an investigation.

It is, therefore, respectfully recommended that by a joint committee of Senate and Assembly, or other adequate authority, the fullest investigation be directed with a view to determine upon the necessity or expediency of further laws or constitutional amendments toward preventing the use of corrupt means to promote or to defeat legislative action.

The moneyed interests at stake in legislation, together with the vigilance and dexterity of the managers of large enterprises, which are more or less dependent on public authority for their creation and revenues, secure advocates or apologists where the body of the people are sometimes not heard. It is better that there should be too many than too few such inquiries.

RECOMMENDATIONS.

1. That chapter 367 of the Laws of 1884 be repealed; or so amended as to prohibit the capitalization of franchises, and in terms exclude gas companies from its operation.

2. That the price of gas be regulated by limiting the dividends to a fixed rate per cent. of the actual capital invested.

3. That dividends shall not exceed ten per cent. of the actual capital invested.

7886 4. That for the purpose of covering losses, gas companies be allowed to accumulate a reserve fund not to exceed ten per cent. in the aggregate of the actual capital invested. And whenever such reserve fund shall reach said amount, that then the surplus, if any shall be applied for the benefit of the gas consumers, in such manner as the gas commission may direct.

5. That a gas commission be appointed for the State of New York consisting of three persons, to be appointed by the Governor, by and with the advice and consent of the Senate, one of whom shall be chosen from that political party which cast the next greatest number of votes for governor at the last gubernatorial election after that by which the governor was elected. And that whenever a vacancy shall occur in such commission it shall be so filled that each of the two largest political parties shall always have at least one member of the commission. That such commission shall have power and it shall be its duty to provide, among other things, for testing the quality of gas; for regulating the pressure applied in its distribution; for measuring the gas used; for fixing the price of gas in accordance with the foregoing recommendations; for procuring stated and other reports to the commission in substantial accordance with reports contained in appendix "L" attached to the evidence in this matter, with such other items as the commission may deem useful, and for giving publicity to such reports, and that the

commission be invested with such other powers as may be appropriate in order to protect and promote the rights of gas consumers, at the same time doing justice to the companies.

6. That the statute requiring the consent of two-thirds of the owners of property fronting on the streets, avenues and public places in the city of New York be repealed; and that the gas commission
7887 be invested with power to determine whether or not the
streets, avenues and public places in any city of the State, having a population of 100,000 or upwards, shall be used for the purpose of laying gas mains and services; that any parties feeling themselves aggrieved by any decision of the commission in respect to such use of streets, avenues or public places, may appeal to the general term of the Supreme Court in the judicial department in which the question arose, and their decision shall be final.

The oral testimony and proceedings of the committee and such of the numerous documents that were before the committee as it was deemed expedient to append thereto are herewith submitted.

Dated Albany, *February* 26, 1886.

Respectfully, JOHN I. GILBERT.

To the above recommendations your committee are unanimous and to *many* of the conclusions in the report reached, but to that part of the report which finds that the Consolidated Gas Company violated any of the provisions of chapter 367 of the Laws of 1884, and to all conclusions which follow from such finding, the majority of your committee dissent, and submit the following as their report on that question:

To the Senate of the State of New York:

The committee appointed by resolution of the Senate, dated May 15, 1885, to inquire and report at the next session of the Legislature:

1. Whether or not the Consolidated Gas Company of New York has evaded, disregarded or in any manner violated the provisions of chapter 367 of the Lawe of 1884.

2. And whether the said consolidation has been capitalized
7888 on the basis of "the fair, aggregate value of the property, fran-
chises and rights of its constituent companies," or otherwise.

3. And what legislation, if any, in respect to lighting companies is required by the public interests.

If there be any question as to whether or not the law of 1884 is applicable to gas companies, your committee decline to discuss it, for the reason that neither their opinion nor that of the Legislature would be of any practical worth. Our courts must settle that. *If there be* any question as to the constitutionality of the law, for the same reason your committee decline to discuss it, and for the further reason that the Legislature having enacted a law are estopped from questioning the legality of acts performed in strict obedience to its provisions. They may, as in this case, inquire whether or not any of its provisions have been violated or in any manner evaded. Beyond this your committee have no power to go.

There was no claim made to your committee that the law of 1884

had been violated, evaded or disregarded by the consolidation of the several gas companies, *except* that the capital stock of the new company represented *more* than the fair aggregate value of the property, franchises and rights of the several constituent companies. To properly understand the real issue involved in this allegation it may be well to state the changes which chapter 367 of Laws of 1884 made in the then existing law in reference to manufacturing companies consolidating. Previous to the passage of this act and by the Law of 1867, companies could consolidate, but the capital stock of the new company could not be larger in amount than the aggregate amount of capital of the consolidating companies. While under the
law of 1884 the capital stock of the new company *shall not be*
7889 *larger in amount* than the fair aggregate value of the prop-
erty, franchises and rights of the consolidating companies.
Thus it will be seen at a glance that under the Law of 1884, the capital stock of the consolidating companies has nothing whatever to do with the amount of the capital stock of the *new* company. Thus with the case in controversy. These six companies could have consolidated under the Law of 1867 (if that law applies to gas companies), but in that case the capital stock of the new company could not have exceeded seventeen millions, though the value of their property might have been fifty millions. But under the law of 1884 the capital stock may be thirty-nine millions (provided the fair aggregate value of their property, franchises and rights are equal to that amount), and could not be any more than that, had the aggregate amount of their capital stock been *fifty* millions. Nor under this law does it make any difference what the property, franchises and rights may have cost the constituent companies, whether it be five, fifteen or fifty millions. The capital stock of the new company may still equal but *must not exceed* the fair aggregate value of the property, franchises and rights of these constituent companies at the time of the consolidation. To ascertain this value and the truth of these allegations so charged, your committee, with the aid of an expert, made a thorough examination of the books of the constituent companies from the time of their formation, and examined many witnesses as to the value of the property and basis of consolidation. From such examinations your committee have arrived at the following conclusions of fact:

1. It was the intention of these companies to have formed a consolidation of all the gas companies then existing in the city of New York, being seven (7) in number, viz., the New York, the Man-
hattan, the Metropolitan, the Mutual, the Municipal, the
7890 Knickerbocker and the Harlem. Six of these seven com-
panies voted to become parties to the consolidation, the Mutual
being prevented by a clause in its charter which made it a misdemeanor for any director voting to consolidate with any gas company in the city of New York. Of the companies so consolidated the New York Gas-light Company was organized in 1823, and at the time of the consolidation it had a capital of $4,000,000. The Manhattan Gas Company was organized in 1830, at the time of the consolidation having also a capital of $4,000,000. The Harlem Gas-light Company was organized in 1855, having a capital at the time of

the consolidation of $2,000,000. The Metropolitan Gas Company was organized in 1858, having at the time of consolidation a capital of $2,500,000. The Municipal Gas Company was organized in 1876, having a capital at the time of the consolidation of $3,000,000. The Knickerbocker Gas Company was organized in 1876, having at the time of the consolidation a nominal capital of $1,500,000. Several of these younger companies had also outstanding obligations in bonds to a very considerable amount.

The amount of capital for the new consolidated company appears to have been a subject of long and much discussion among the directors of the several constituent companies. It was finally fixed upon this basis: taking the number of shares of stock of each constituent company, they multiplied it by the price for which such shares were then selling in the market, and the total of the amounts thus obtained was agreed to be the capital of the new company and that such total amount so obtained should be divided among the original companies upon the same basis as nearly as could be.

The next step was to appraise the property of the constituent companies, consisting of street mains, valves, etc., meters, services,
7891 plant real estate, bulkhead, piers and water right, office buildings, office furniture, laboratories, photometer rooms, etc. The value of this property finally agreed upon by the six constituent companies comprising the consolidation was $29,994,000, but as the value of the stock of the same six companies had been agreed to be $39,078,000, after setting apart $1,303,000 for working capital it left $7,781,000 which they called the value of the franchises and rights of the several constituent companies, and was divided between them in proportion to their individual sales of gas, to the gross amount of sales by all the companies from October 14, 1882 to October 14, 1883, and the sum thus divided was added to the schedule value of each of the existing companies.

The question for your committee to examine was *was* this capitalization thus obtained more than the fair aggregate value of the property, franchises and rights of the constituent companies at the time of the consolidation. The street mains, valves, meters, services, plant, office building, office furniture, laboratories appear to have been appraised at the value of what it would cost to repdoduce them at the time of the consolidation, and there is no evidence that any of these items were appraised too high, except the evidence of the expert, Mr. Yalden, who finds that they were valued higher than they appear to have been charged as costing in the company's books. As to the value of the real estate, bulkheads, piers, water rights, there is a conflict of testimony. It is a difficult question to determine owing to the varying opinions of real estate dealers. It appears from the evidence given by the three presidents of the Equitable, Consolidated and Mutual Companies that it costs for real estate and everythink necessary for a capacity to produce and deliver gas in the city of New York about one million dollars for every million of feet produced and distributed daily. See pages of testimony 415,
7892 484, 485, 494, 495, 523 and 528.

The Consolidated Gas Company can now produce and deliver 28,000,000 cubic feet daily, and having a large amount of plant not now in use by the additional expense of $1,000,000, it can produce and deliver thirty-three million feet per day. If the above basis is a correct one then the aggregate value of the real estate and plants of the several companies given at $29,994,000 is not too high. Indeed, the objections to the capitalization do not appear to be so much to the valuation of the gas plant, mains, real estate, etc., as it does to their having capitalized nearly eight millions of dollars as the values of their franchises. There certainly seems to be *a great injustice* to the people in permitting the value of the franchises conferred by the State to form a basis of capitalization for the purpose of organization as a corporation, and that the consumers of gas should be required to pay such a price for it as would pay a dividend upon the value of these franchises which are a *gift* of the *people*. But it it as fact that the law of 1884, under which these companies consolidated, expressly authorized this to be done. So that the only question left to your committee to examine and report was:

1. Did these companies have franchises?

2. If they had, were they capitalized at their fair aggregate value? To the first question there can be but one answer: "A franchise is a royal privilege or branch of the King's prerogative subsisting in the hands of a subject. If there are certain immunities and privileges which cannot be exercised without authority derived from the sovereign power, it would seem that such immunities and privileges must be franchises." 15 Johnson's Reports, page 386.

7893 These gas companies had the privilege of laying their mains in the King's highway. They enjoyed the immunities of being free from indictment as common nuisances, which had they been private works, they would have been subject to. 6 Lans. Reports, page 467.

Our courts have virtually decided that they hold such franchises. 5 Hun, page 206.

The second question as to the value of these franchises. We know of but one rule to determine the value of a franchise, viz.: the return which it makes upon the capital necessarily invested for its proper enjoyment. To ascertain this, your committee, with the aid of an expert accountant, went through the books of all the constituent companies from their first organization to the time of the consolidation, and thus learned the amounts of money actually paid in for each; the amount of money earne[illegible]y each; the amount of money paid for permanent improvements and to increase the capital stock; the amount paid for dividends in each year; the amount of stock assigned to each in the Consolidated Company. From this examination it appears that four of the six companies consolidated have from their organization earned large dividends—in many instances *enormous*. Thus the Manhattan, after paying good large dividends yearly and keeping their property up in as good condition as new, had surplus earnings still on hand, so that in 1885 they divided to each of the 40,000 shareholders of $50 of its stock, $18 towards paying for a new issue of stock of $2,000,000. After paying large dividends on the capital thus increased, the same company, in 1863, again divided a surplus among the stockholders equal to 98 per cent of their original investment. See testimony, page 365.

The New York Company had invested in 1838 $750,000,
7894 after paying large dividends on this, yet out of the surplus
earnings over and above all dividends, could, in 1862, make a dividend in fact equal to 133⅓ per cent.; and in 1863, 26 66-100 per cent.; in 1864, 40 per cent.; in 1865, 66⅔ per cent.; in 1866, 120 per cent.; in 1868 and 1869, 66 per cent., and in 1871, by valuing their property at what it was then worth, the increase of value from the time of the purchase, in 1836, with the surplus earnings enabled them to increase their stock $3,000,000 without paying in any money. See testimony, pages 436, 437. The Metropolitan has averaged over 16 per cent. dividends from the time it commenced business. The Municipal has paid from its earnings 16⅔ per cent. dividends on its actual capital every year since it commenced doing business. The Harlem has never paid large dividends, and the Knickerbocker, as a separate organization, has never paid any, but since its lease to the Municipal, in 1880, its dividends appear to consist in the payment of interests on her bonds. These six companies, in the year 1884, paid a dividend upon capital which had been increased by earnings, as in the case of the Manhattan and New York, of 18 per cent. Had it been upon the money actually paid in it would have been nearly 25 per cent. These franchises were in force on the 10th day of November, 1884, the time of the consolidation, and the money invested in them was earning the same enormous dividends. So far as the evidence shows there was nothing in the condition of affairs on the 10th of November to indicate that these franchises would not be as valuable for the next twenty years as they have been in the past. There were gas companies enough in the city with a capacity capable of supplying the demands for the next twenty years. A law was on our statute books that virtually prohibited the laying of any
more gas pipes in her streets. The gas companies had an
7895 agreement among themselves fixing the price of gas at a figure
that paid these dividends. The people were paying this price, as they had in the past, without objection or protest. This price may have been too high, and the dividends *were excessive but they were not illegal,* and the valuation of franchises, computed upon those dividends and that state of facts, cannot be called a violation of a law that expressly authorized it to be done, *unless* such valuation was too high. That the above is a proper method of computing the value of a franchise: see *People v. Albany Insurance Company,* 92 N. Y. Rep., p. 458. The court there holds, in substance, that the value of a franchise depends upon its annual dividends.

Thus the question for your committee to decide was this: Was $7,781,000 more than the fair aggregate value of the franchises and rights of these six companies? We are forced to the conclusion that it was not; that the franchises of the New York, Manhattan, Metropolitan and Municipal were worth *much more* than that sum, and if these companies saw fit to give a part of the value of their franchises to the stockholders of the Harlem and Knickerbocker it was a matter that interested only the stockholders of these companies.

Your committee, therefore, is *compelled* to report that they have found nothing in the organization which is contrary to the law under which it was effected, unless there should have been an over valuation of property, and as to that the difficulties attending the determination of such a fact are so great that your committee believe that any attempt to upset such violation would be futile.

The stock has been issued and circulated and by virtue of law; about one-sixth part of it is held by innocent holders, and 7896 nothing but the clearest proof of fraud and violation of the law, by virtue of which it was issued, would justify any attempt to render such stock worthless. We are compelled to say that we have not been able to find such proof. If injustice has been done to the gas consumers of New York city it was done by the Legislature passing a law allowing consolidations to be effected in this manner. These companies did simply what the law expressly said they might do.

The number of consumers of gas in the city of New York is enormous, and your committee are bound to state that the number of complaints which came to their ears was small as compared with the whole body of consumers; but that there is a mistrust or dissatisfaction extending among a large number of citizens, there can be no doubt.

The only remedy that presents itself to the mind of the committee is such a regulation with reference to the management of the business of these companies, and such oversight on the part of the State authorities as to the manner in which the business is conducted, as to restore confidence to the community.

Your committee are impressed with the idea that legislation upon this subject should be of a general character; that the Legislature should not be *annoyed* from year to year with complaints from separate localities relating to the same subject. The establishment of a supervising power to whom the whole of the subject might be relegated, your committee believes, will afford a substantial remedy for all the evils complained of. They exist not only in the city of New York, but in other cities of the State, and will necessarily arise wherever population increases to such an extent as to make the manufacture of gas profitable.

7897 Your committee have considered the subject with much care. They have noted the operation of the Railroad Commission established within the State a few years ago, exercising supervisory care over the railroad systems prevading the State. They have noticed that the amount of time consumed in the Legislature in the matter of disputes relative to railroads has been very much diminished since the establishment of that commission. They believe that it is in consequence with the spirit of the Constitution of the State, which calls for the enactment of general laws and provides for the remedy of evils and the accomplishment of good by such legislation as will be available to the uses of the citizens of the whole State.

They therefore recommend that a gas commission be established for the State, to consist of three persons, to be appointed by the Governor, with the advice and consent of the Senate, giving them a liberal salary and compelling them to give their whole attention to the duties of the office by requiring that they shall hold no other with power to hear complaints from any part of the State, to make such examination as may be necessary to establish such rules as may be required for the regulation of these companies, and compelling them to supply gas of a proper quality, pressure and purity. They recommend also, after an examination of the English system of laws, the plans that were adopted in Massachusetts, and which have been introduced in other States, that the price of gas be regulated by limitation of the dividends which shall be paid upon the actual capital employed. That there are risks attending the business, and that the possible introduction of electricity or some other illuminating power may suddenly make all gas works unprofitable (propositions which are strongly urged on behalf of the companies), your committee are, of course, ready to admit, for these are facts. 7898

Your committee deems that ten per cent. dividends is enough to satisfy the requirements of any capital that is investigated in the State in such business. Owing the peculiarity of the nature of the business your committee think it would be right to permit the accumulation of a reserve fund to cover losses, say not exceeding ten per cent. of the actual capital stock, and to provide that whenever such a fund has been accumulated and the profits amount to ten per cent., the surplus shall be applied for the benefit of consumers in such manner as the commissioners may determine shall be equitable and just.

In this way the committee believe that a long felt want shall be supplied, that the Legislature will be relieved from all this class of special legislation which is called for by reason of alleged abuses, causing a vast amount of trouble in the investigations to be had by special committees, while with the general commission established in this way all the facts can be accumulated and the Legislature can be informed of what is required by the recommendations which such commission may make of laws enacted to meet any difficulties which shall be apparent to them in the course of their examinations, and which may be carefully considered and well digested by the persons forming the commission, having experience in the matter, before the Legislature is called upon to act upon them.

Dated ALBANY, *February* 26, 1886.

CITY'S EXHIBIT 2.

No. 14.

THE CITY OF NEW YORK.

DEPARTMENT OF

WATER SUPPLY, GAS AND ELECTRICITY.

BID OR ESTIMATE.

For Furnishing Gas or other Illuminating Material for, and for Lighting, Extinguishing, Cleaning, Repairing and Maintaining the Public Lamps (and Supplying Gas, etc., for New Lamps, when required), and for making certain Repairs to Lamp Posts, and for furnishing Burners and Appliances of Improved System of Lighting on Streets, Public Buildings, Avenues, Piers, Parks and Public Places in the Borough of Manhattan, in The City of New York, for the term of one year from March 16th, 1904, to March 15, 1905.

Made this 16th day of March, 1904, by Consolidated Gas Co. of New York.

1. I, W. R. Addicks, Vice-President of the Consolidated Gas Company of New York, do declare that the Consolidated Gas Company of New York is (are) the only person, persons or corporation interested in this bid or estimate; and that no other person, persons or corporation than are herein named have any interest in this bid or estimate, or in the contract proposed to be taken. 7900

2. I further declare that this bid or estimate is made without any connection with any other person, persons or corporation making a bid or estimate for the same work, and is in all respects fair, and without collusion or fraud.

3. I further declare that no member of the board of aldermen, head of a department, chief of a bureau, deputy thereof or clerk therein, or any other officer of The City of New York, is, shall be or become interested directly or indirectly, as contracting party, partner, stockholder, surety or otherwise, in this bid or estimate, or in the performance of the contract, work or business to which it relates, or in any portion of the profits thereof.

4. I further declare that the names of the persons affixed to the consent hereto annexed were written by said persons respectively, and

that said persons are householders or freeholders in The City of New York, or duly authorized officers or agents of a guaranty or surety company duly authorized by law to act as surety.

5. I have examined the contract (including the specifications) for the supplies and work, in the form approved by the Corporation Counsel, and will contract, in the form so approved, to perform and complete the work mentioned in said contract and specifications, and furnish the supplies on the following terms, viz.:

7901 I. For furnishing illuminating gas (of not less than 20-candle-power to burners consuming three cubic feet of gas per hour, by photometric test, made at a distance of not less than one mile from the place of manufacture), for each lamp, including the lighting, extinguishing, cleaning, repairing, reglazing and painting lamp-posts and lanterns, replacing the cocks, tubes, burners, cross-heads, lamp-posts, lamp-irons and lanterns thereto, for the term of one year in the Borough of Manhattan, including the southerly fixed span and draw span of the Madison Avenue Bridge, the southerly fixed span and draw span of Central Bridge, all of High Bridge and Washington Bridge, to wit: the sum of Seventeen and 25/100 dollars ($17.25) per lamp per year.

II. For furnishing gas to burners consuming four cubic feet of gas per hour, under the same conditions as above, the sum of Twenty-one and 50/100 dollars ($21.50) per lamp per year.

III. For furnishing gas to burners consuming five cubic feet of gas per hour, under the same conditions as above, the sum of Twenty-six and 25/100 dollars ($26.25) per lamp per year.

IV. For furnishing illuminating material other than gas, of kind and grade as stated herewith ...... of ...... for each lamp, at each lamp, for the term of one year, and also operating supplying and maintaining the lamp including the illuminant. The operation and maintenance to include the lighting, extinguishing, cleaning, reglazing, repairing and painting of lanterns, lamp-posts, and replacing cocks, tubes, burners, tanks, crossheads, lamp-posts, lamp-irons, frames and lanterns when so ordered by the Commissioner.

All the above for the term of one year in the Borough of Manhattan, to wit, the sum of .... dollars ($......) per lamp per year.

7902 V. For furnishing, and connecting ready to use, for each mantle gas and naphtha lamp, improved burner appliances and incandescent mantles, including cocks, tubes, burners, mantles, globes, chimneys, rods and regulating apparatus, necessary for each lamp, and also operating and maintaining it, including illuminant. The operation and maintenance to include the lighting, extinguishing, cleaning, reglazing, repairing and painting of lanterns, lamp-posts and the replacing of cocks, tubes, burners, mantles, chimneys, globes, rods and regulating apparatus as well as lamp-posts, lanterns, cross-heads, lamp-irons and frames, when so ordered by the Commissioner. Lamp-posts for gas lamps, when necessary, will be furnished to the Contractor through this Department by The City.

All the above for the term of one year in the Borough of Manhattan, to wit, the sum of .... dollars ($......) per lamp per year.

VI. For furnishing, maintaining and putting in place all the above-mentioned items, excepting the cost of illuminating material, for a period of one year, the sum of .... dollars ($.....).

VII. For repair of lamp-posts and erection of new lamp-posts—

For Single Incandescent Mantle Lamps (Gas).

Twenty-eight and 75/100 dollars ($28.75) per lamp per year for less than 10,000 lamps.

Twenty-seven and 75/100 dollars ($27.75) per lamp per year for over 10,000 lamps and less than 15,000 lamps.

Twenty-six and 75/100 dollars ($26.75) per lamp per year for over 15,000 and less than 20,000 lamps.

7903 Twenty-five and 75/100 dollars ($25.75) per lamp per year for over 20,000 and less than 25,000 lamps.

Twenty-four and 75/100 dollars ($24.75) per lamp per year for 25,000 or more lamps.

Twenty-four and 75/100 dollars ($24.75) per lamp per year for single order now for 22,500 lamps.

For Double Incandescent Mantle Lamps.

Forty-six and 50/100 dollars ($46.50) per lamp per year.

(*a.*) For each lamp-post straightened, the sum of one and 50/100 dollars ($1.50).

(*b.*) For each column releaded, the sum of two and 50/100 dollars ($2.50).

(*c.*) For each column recalked, the sum of one and no/100 dollars ($1.00).

(*d.*) For each column refitted, the sum of three and one-half dollars ($3.50).

(*e.*) For each service pipe refitted the sum of five and 50/100 dollars ($5.50).

(*f.*) For each stand pipe refitted the sum of two and 50/100 dollars ($2.50).

(*g.*) For each lamp-post removed the sum of three and 50/100 dollars ($3.50).

(*h.*) For each lamp-post reset the sum of eight and no/100 dollars ($8.00).

(*i.*) For each new lamp-post used for gas lamps fitted up complete and erected with service and stand-pipe and lantern, the sum of—Fitting up new lamp, 8 and no 100 dollars ($8.00); Boulevard lantern additional, six dollars ($6.00)—($14.00).

VIII. For furnishing illuminating gas of not less than 20 candle power, when tested, as provided for gas to street lamps, in-
7904 cluding the service pipes from the gas mains to the building,
and a proper meter for registering the gas, for the term of one year for each of the public buildings and offices in the Borough of Manhattan, the lighting of which is now, or hereafter may be, under

the jurisdiction and control of the Department of Water Supply, Gas and Electricity, per 1,000 cubic feet at a pressure of not less than 1½ inches, in the sum of ninety cents ($0.90).

IX. For furnishing, connecting and maintaining a pressure regulator, at the option of the Commissioner, controlling supply of gas from each meter which registers the total consumption of gas in any building under the jurisdiction and control of the Department. This gas pressure regulator shall maintain an even pressure of 1½ inches throughout the building as closely as can be obtained. The Contractor shall inspect and regulate same at least once a month, and shall perform all necessary acts in order to maintain same in such a condition that it shall efficiently regulate the supply of gas in the building. The regulator shall be inspected and tested, when required by the Commissioner, by the Engineer, and if found defective, shall be replaced, without further expense to the City, whenever such replacement is ordered by the Engineer.

Estimates may be given separately on the price for use of regulator for one year, and on the maintenance, as specified.

For furnishing and connecting regulators of an average capacity of about one and one-quarter inches, for the period of one year, in the Borough of Manhattan the sum of .... dollars ($......).

For maintaining the above regulators for the period of one year, in the Borough of .... as specified, the sum of .... dollars ($......).

7905 Subject to the general conditions of this contract bids on Section IX may be made independently of the other services and supplies called for. Bids may also be made on the entire contract excluding Section IX.

SURETIES' AGREEMENT.

In consideration of the premises, and of one dollar to us and each of us in hand paid by the City of New York, the receipt whereof is hereby acknowledged—

We, the undersigned, consent and agree, that if the contract for which the preceding estimate is made be awarded to the person, persons or corporation making the same, we will upon its being so awarded, become bound as his, their or its sureties for its 7906 faithful performance; and if the said person, persons or corporation shall omit or refuse to execute such contract, if so awarded, and give the proper security within five days after the written notice that the same is ready for execution, we will pay, without proof of notice or demand, to the said the City of New York, or its successors, any difference between the sum to which such person, persons or corporation would be entitled upon the completion of such contract, and the sum which the City of New York may be obliged to pay to the person, persons or corporation to whom the contract shall be awarded at any subsequent letting; the amount in each case to be calculated upon the estimated amount of the SUPPLIES and WORK by which the bids are tested.

In Witness Whereof, we have hereunto set our hands, this 15th day of March, one thousand nine hundred and four.

THE UNITED STATES FIDELITY & GUARANTY COMPANY,
By CHAS. W. YOUNG, *Attorney-in-Fact.*

Attest:
GEORGE E. HAYES,
Attorney-in-Fact.

The adequacy and sufficiency of the above-named sureties approved.

Dated this 1st day of July, 1904.

J. W. STEVENSON,
Deputy Acting Comptroller.

THE CITY AND STATE OF NEW YORK, *County of ——, ss:*

The above-named ...., being duly sworn, says that he is a householder, or freeholder in the City of New York, 7907 and is worth the sum of .... dollars ($......), being the amount of security required for the completion of the contract above referred to, over and above all his debts of every nature, *and over and above his liabilities as bail, surety and otherwise;* that he has offered himself as a surety in good faith, and with an intention to execute the bond required by law.

CITY'S EXHIBIT 2A.

No. 1.

Name of Bidder, Consolidated Gas Co. of New York.
Address..............................

THE CITY OF NEW YORK.

DEPARTMENT OF

WATER SUPPLY, GAS AND ELECTRICITY.

BOROUGH OF MANHATTAN.

1904.

PROPOSALS FOR BIDS OR ESTIMATES FOR GAS AND NAPHTHA LAMPS, ETC.

1. Sealed Bids or Estimates will be received at the office of the Department of Water Supply, Gas and Electricity, Room 1536, No. 21 Park Row, in the City of New York, until 2 o'clock P. M. on Wednesday, March 16th, 1904.

For Furnishing Gas or other Illuminating Material for, and for Lighting, Extinguishing, Cleaning, Repairing and Maintaining the Public Lamps (and Supplying Gas, etc., for New Lamps when required), and for Making Certain Repairs to Lamp-posts, and for Furnishing Burners and Appliances of Improved System of Lighting on Streets, Public Buildings, Avenues, Piers, Parks and 7912 Public Places, in the Borough of Manhattan, in The City of New York, for the term of one year from March 16th, 1904, to March 15th, 1905.

2. The amount of security required is TWENTY-FIVE (25) PER CENTUM of the total amount of bid or estimate.

3. In the Borough of Manhattan, the total number of ordinary

gas-lamps now burning is about 13,951; the total number of Welsbach gas-lamps now burning is about 5,078; the total number of Welsbach naphtha lamps now burning is about 754; the total number of ordinary naphtha lamps now burning is about 107; but the Commissioner of Water Supply, Gas and Electricity reserves the right to designate the location and number of the lamps of each kind as to districts, streets, avenues, piers, parks and public places or parts thereof. Bidders must satisfy themselves by a personal examination of the number and kind of lamps required in each Borough, as numbers given above must be taken only as a close approximation of the number of lamps that may be required.

4. The person or persons making an estimate shall furnish the same in a sealed envelope, indorsed with the title given above, of the work for which the estimate is made, with his or their name or names and the date of presentation to the head of the Department, at the said office, on or before the date and hour above named, at which time and place the estimates received will be publicly opened by the head of the Department and read, and the award of the contract made according to law as soon thereafter as practicable.

5. Bidders are required to state in their estimates the districts or several streets, avenues, piers, parks and places, or parts of
7913 streets, avenues, piers, parks and places in which they propose to perform the requirements herein contained, and also the illuminating or candle power of the gas they propose to furnish, when tested at a distance of not less than one mile from the place of manufacture; and bidders proposing to furnish any illuminating material other than illuminating or coal gas, must state distinctly what kind of grade and material they propose to furnish, and the illuminating power of the light they propose to furnish. When the term "illuminating material other than gas" is used in these proposals or the annexed contract and specifications, it shall mean either naphtha or gasolene.

6. Bidders will state in their bids or estimates a price per lamp per year for furnishing gas or illuminating material other than the gas to the public lamps in the Borough of Manhattan, and for other fixtures or appliances or illuminating material for each lamp, including the lighting, extinguishing, cleaning, repairing, reglazing and painting lamp-posts and lanterns, and replacing the cocks, tubes, burners, crossheads, lamp-posts, lamp-irons and lanterns thereto, for the term of one year; stating the price, for the above-named term of one year, for each lamp. The burners for open flame or mantle gas lamps will be of such a kind and construction that they will burn three cubic feet of gas per hour under a pressure of not less than 1½ inches. The gas furnished shall have an illuminating power of not less than 20 candles when tested by photometric test at a distance of not less than one mile from the place of manufacture, and bidders will state the price per lamp per year for gas of the illuminating power, and in the quantity and at the pressure specified. Bidders shall also state the cost per year per lamp for
7914 gas supplied to a burner consuming four cubic feet of gas per hour, and the price for a burner consuming five cubic feet of

gas per hour. If open flame and mantle lamps shall use illuminating material other than gas, then the burners to be used for such illuminating material will be of such kind and construction that they will give a light (by photometric test) equal to the light given by the ...... foot open flame or mantle gas-burners of similar type as used in the public lamps in The City of New York, furnished with 20-candle power gas. Bidders are required to state in their estimates the kind, grade and cost of such illuminant furnished in the receptacles for same on the lamps for one year for each lamp at each lamp.

7. A price for furnishing lanterns with improved burner appliances and incandescent mantle for gas or naphtha burners, to produce a light of not less than sixty (60) candle power each, including material for each lamp, maintenance, lighting, extinguishing, cleaning, repairing, reglazing, painting, replacing cocks, tubes, burners, crossheads, lamp-posts lamp-irons and lanterns thereto, for the afore-mentioned period of one year.

7. (*a*) A price for furnishing, maintaining and putting in place all the above-mentioned items, excepting the cost of illuminating material, for a period of one year.

7. (*b*) Bidders will state in their bids or estimates a price per thousand cubic feet of gas of not less than 20 candle power for all or any of the public buildings or offices in the Borough of Manhattan, the lighting of which is now, or hereafter may be, under the jurisdiction and control of the Department of Water Supply, Gas
and Electricity. This price will include the service pipes
7915 from the gas mains to the building and a proper meter for
registering the consumption of gas. A bid may also be made on the regulators for governing the supply of gas in buildings in each borough.

8. Bidders will state in their bids a price for the repair of lamp-posts, including straightening and releading, and for each new lamp-post fitted up, as follows:

(*a*) For each lamp-post straightened, stating the price per post.
(*b*) For each column releaded, stating the price per post.
(*c*) For each column recalked, stating the price per post.
(*d*) For each column refitted, stating the price per post.
(*e*) For each service pipe refitted, stating the price per post.
(*f*) For each standpipe refitted, stating the price per post.
(*g*) For each lamp-post removed, stating the price per post.
(*h*) For each lamp-post reset, stating the price per post.
(*i*) For each new lamp-post used for gas-lamps fitted up complete and erected with service and stand-pipe, including lantern, stating the price per post.

9. The right is reserved to the Commissioner to determine and designate in any locality, at any time after the estimates are opened, what illuminating material shall be used in the public lamps, or any number of them, in such locality, during the term of this contract; also upon such determination, to decline any estimate or part thereof for lighting such locality with illuminating material other than that so determined upon; also to decline all estimates for any par-

ticular locality, or all localities if deemed for the best interests of the City.

7916 10. Should any alteration or any attachment be required to any portion of the lamps for which estimates are made in consequence of the use of illuminating material other than gas, then such alteration shall be done and such attachment placed on the posts, without expense to the City.

11. If the estimate of any bidder shall include any lamp-posts with which the pipes or conductors of such bidder are not connected at the time of the making of the bid, and a contract for furnishing the illuminating material for any such lamp-posts shall be awarded to such bidder, in that case, THIRTY DAYS from the date of the execution of such contract, and such further time, not exceeding thirty days, as may be deemed reasonable by the Commissioner, shall be allowed to such bidder in which to connect such pipes or conductors with such lamp-posts, and all such connections shall be made by the Contractor without expense to the City.

12. No payment to such bidder, on account of any such lamps, will be made for the time so allowed, nor until the same shall have been connected with the mains or conductors of such bidder, nor except for the time during which all the requirements in this proposal and in the contract, including specifications, which shall be awarded and entered into under this proposal, shall have been fully performed.

13. The number, kind and location of lights to be furnished under the contract to be awarded and entered into under this proposal shall be determined and prescribed by the Commissioner.

14. No bid will be entertained unless the Commissioner shall be satisfied that the party or parties bidding are possessed of sufficient plant to carry out the provisions of the contract.

7917 15. The award of any and all contracts under this proposal, and all contracts entered into in pursuance of said proposal, will be subject and subordinate to the rights of all persons, parties or corporations under contracts or agreements (if there are any such) which are now binding and obligatory upon the City of New York.

16. The number of hours the gas or naphtha lamps are to be kept burning during the contract is 3,925, and in leap year, 11 hours and 55 minutes additional for February 29.

17. Bidders will *write out* the total amount of their estimates in addition to inserting the same *in figures.*

18. The Commissioner reserves the right to reject any or all bids or estimates if the Board of Estimate and Apportionment shall determine it is for the public interest of the City so to do.

19. Each bid or estimate shall contain the same and place of residence of the person making the same, the names of all persons interested with him therein, and if no other person be so interested it shall distinctly state that fact; also that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair, and without collusion or fraud; and that no member of the board of aldermen, head of a department, chief of a bureau, deputy thereof, or clerk therein, or other

officer of the City of New York, is, shall be, or become interested, directly or indirectly, as contracting party, partner, stockholder, surety or otherwise in, or in the performance of the contract, work or business to which it relates, or in any portion of the profits thereof. The bid or estimate must be verified by the oath, in writing, of the party making the estimate that the several matters stated
7918 therein are in all respects true; or, if the bidder is a corporation, by the oath, in writing, of an officer of such corporation, with knowledge of the facts and having authority to make such sworn statement.

20. Each bid or estimate shall be accompanied by the consent, in writing, of two householders and freeholders in the City of New York, or of a guaranty or surety company, duly authorized by law to act as surety, and shall contain the matters set forth in the blank forms mentioned below.

21. No bid or estimate will be considered unless accompanied by money or a certified check drawn on a National or State bank located in The City of New York, to the order of the Comptroller, to the amount of five per centum of the amount of the bond required, as provided in section 420 of The Greater New York Charter.

22. For particulars as to the repairs or the quantity or quality of the supplies, or the nature and extent of the work, reference must be made to the specifications on file in the Department.

23. Bidders are requested to make their bids or estimates upon the blank form prepared by the Commissioner, a copy of which, with the proper envelope in which to inclose the bid, together with a copy of the contract, including the specifications, in the form approved by the Corporation Counsel, can be obtained upon application therefor at the office of the Commissioner of Water Supply, Gas and Electricity, Room 1536, No. 21 Park Row, The City of New York.

The City of New York, March 3rd, 1904.

JOHN T. OAKLEY,
Commissioner of Water Supply,
Gas and Electricity.

THE CITY OF NEW YORK,

DEPARTMENT OF

WATER SUPPLY, GAS AND ELECTRICITY,

BOROUGH OF MANHATTAN.

CONTRACT AND SPECIFICATIONS

For Furnishing Gas or other Illuminating Material for, and for Lighting, Extinguishing, Cleaning, Repairing and Maintaining the Public Lamps (and Supplying Gas, etc., for New Lamps when required), and for making certain Repairs to Lamp-posts, and for furnishing Burners and Appliances of Improved System of Lighting Streets, Public Buildings, Avenues, Piers, Parks and Public Places, in the Borough of Manhattan in The City of New York, for the term of one year, from March 16th, 1904, to March 15th, 1905, per specifications herein contained or hereto attached.

This agreement, made and entered into this 1st day of July, in the year one thousand nine hundred and four by and between The City of New York, by the Commission of Water Supply, Gas and Electricity, party of the first part, and Consolidated Gas Company of New York, Contractor, party of the second part, pursuant to the provisions of the Greater New York Charter.

Witnesseth, That the parties to these presents, each in consideration of the agreements on the part of the other, herein contained, have mutually agreed, and hereby mutually agree, the party of the first part for itself and its successors, and the party of the second part for itself and its successors, as follows:

7920 (*A*) Wherever in this contract the words "The City," or "The Commissioner," or a pronoun in the place of either of them is used, they shall mean and intend the party of the first part or the Commissioner of Water Supply, Gas and Electricity of The City of New York; wherever the words "Borough President," are used in this contract, they shall mean and intend the President of the Borough above mentioned; wherever in this contract the words "the Department," or a pronoun in place of them is used they shall mean and intend the Department of Water Supply, Gas and Electricity in The City of New York.

(*B*) Wherever in this contract the word "Contractor," or a pronoun in the place of it is used, the same shall mean and intend the party of the second part to this agreement.

(*C*) Wherever the word "Engineer" is used in this contract, it shall mean and be taken to mean and intend the Engineer of the Bureau of Lamps and Gas of the Department, or the Engineer, or other person or official, in charge of the Lighting Bureau in the borough for which this contract is made, acting either directly or through any Assistant or Inspector duly appointed or designated therefor, pursuant to The Greater New York Charter as amended, by the Engineer or either of the Engineers, to inspect, test, examine and accept the supplies of gas or other illuminating material, repairs or supplies, which are the subject of this contract, limited by the particular duties intrusted to him.

(*D*) The Contractor will furnish and deliver to the party of the first part, at the Contractor's own cost and expense, at the times and places and in the manner, and under the conditions herein specified, gas or other illuminating material for, and light, extinguish,
7921 clean, repair and maintain the public lamps (and supply gas, etc., for new lamps when required), and make certain repairs to lamp-posts, and furnish burners and appliances of improved system of lighting on the streets, public buildings, avenues, piers, parks and public places in the Borough of Manhattan, in the City of New York, for the term of one year from March 16th, 1904, to March 15th, 1905, and will accept as full compensation therefor the sum or price hereinafter named, which sums or prices are the amounts at which this contract was awarded to the Contractor at the public letting thereof. The said specifications, the proposal for bids or estimates, the bid or estimate and the bond required are and shall be a part of this contract.

(*E*) The Contractor will not ask, demand, sue for or recover for any supplies delivered, repairs made, illuminating material furnished, or work performed under this contract, any extra compensation beyond the amounts payable for the several classes of work and supplies herein enumerated, which shall be actually supplied at the price therefor, herein agreed upon and fixed.

(*F*) The Engineer shall inspect and test or have tested the gas or other illuminating material, lamps, meters, regulators, repairs and supplies furnished, and see that the same strictly correspond with the specifications hereinafter set forth, and the Engineer is hereby authorized and empowered to reject any of the said gas or other illuminating material, lamp posts, lamps, meters, regulators, repairs and supplies offered under this contract, for the reason that the same do not comply in quality or quantity or pressure, or time or place of maintenance, with the specifications herein contained or hereto annexed.

7922 (*G*) Whenever the Engineer shall be unable to act, in consequence of absence or other cause, then such assistant or other person as shall be designated by the Commissioner shall perform all the duties and be vested with all the power herein given to the Engineer.

(*H.*) To prevent all disputes and litigations, the engineer shall, in all cases, determine the amount, quantity and quality of the supplies, illuminating material, and work, which are to be paid for under this contract, and he shall determine all questions in relation to said gas or other illuminating material, repairs and supplies, and he shall in all cases decide every question which may arise relative to the execution of this contract on the part of the Contractor, and his estimate and decision shall be final and conclusive.

(*I.*) Any doubt as to the meaning of the contract, including the specifications, or any obscurity as to the wording of them, will be explained by the Engineer, and all directions and explanations required, alluded to, or necessary to complete any of the provisions of these specifications, and give them due effect, will be given by the Engineer.

(*J.*) The Contractor shall commence the delivery of the lamps and other apparatus called for by this contract, and the furnishing of the illuminant required, and the lighting of the lamps, as soon as he shall be ordered so to do by the Commissioner; he will carry on such contract as required from time to time, with such force and in such manner and order, and at such times and seasons, as may be directed by the Commissioner, and that he will fully and entirely perform this contract on his part on or before the fifteenth day of March, 1905.

7923 (*K.*) In case any lamp shall fail to burn continuously throughout each and every night, during the term of this contract, during the hours specified in the time-table hereto annexed, or such hours as the Commissioner may from time to time prescribe, and such failure shall not be due to any act or omission of The City, its officers, agents or employees, the Contractor shall and will pay to The City a sum of money equal to one three hundred and sixty-fifth (1/365) of the contract price of such lamp per annum for each and every night or part thereof that such failure shall continue, which said sum, in view of the difficulty of ascertaining the loss which The City will suffer by reason of such failure, is hereby agreed, fixed and determined by the parties hereto, as the liquidated damages that The City will suffer by reason of such failure, and not as a penalty, and the City shall and may deduct and retain the amount of such liquidated damages out of any moneys which may be due or become due to the Contractor under this agreement.

(*L.*) Neither an extension of time, for any reason, beyond the date fixed for the delivery of supply of gas, or other illuminating material, lamps, repairs and supplies, nor the delivery and acceptance of any said delivery of supply of gas, repairs and supplies, called for by this contract, shall be deemed to be a waiver by the Commissioner of the right to abrogate this contract for abandonment or delay in the manner herein provided.

(*M.*) The Contractor will employ only competent, skillful and faithful men to do the work, and he further agrees that whenever the Commissioner shall inform him in writing that any man engaged in the work is, in his opinion, incompetent or unfaithful, 7924 he will discharge him from the work and will not again employ him upon the work.

(*N.*) The Contractor shall receive the following prices as full compensation for furnishing and maintaining the lights, lamps, apparatus and accessories, and performing the services herein provided to be performed by the Contractor, viz.:

I. For furnishing the aforesaid illuminating material for each lamp, for burners consuming three cubic feet of gas, of 20 candle-power per hour, including the lighting, extinguishing, cleaning, repairing, reglazing, painting, replacing cocks, tubes, burners, cross-heads, lamp-posts, lamp-irons and lanterns thereto, for the aforementioned period of one year, in the sum of Seventeen and 25/100 dollars ($17.25).

II. and III. For furnishing the aforesaid illuminating gas for each lamp, at each lamp, as directed and specified, for burners consuming 4 or 5 cubic feet as may be selected, for the above-mentioned period of one year, the sum of II., Twenty-one and 50/100 dollars ($21.50); III., Twenty-six and 25/100 dollars ($26.25).

IV. For furnishing illuminating material other than gas for each lamp, at each lamp, and of the kind and grade as stated in the bid, as directed and specified, ... of .... and also operating and maintaining the lamp including illuminant. The operation and maintenance to include the lighting, extinguishing, cleaning, reglazing, repairing and painting of lanterns, lamp-posts, and replacing cocks, tubes, burners, cross-heads, lamp-posts, lamp-irons, frames and lanterns, when so ordered by the Commis-
7925 sioner. All the above for the term of one year, in the Bor-
ough of ...., to wit, the sum of .... dollars ($....), per lamp per year.

V. For furnishing lanterns with improved burner appliances and incandescent mantle for gas or naphtha burners, to produce a light of not less than sixty (60) candle power each, including the illuminating material for each lamp, maintenance, lighting, extinguishing, cleaning, repairing, reglazing, painting, replacing cocks, tubes, burners cross-heads, lamp-irons, lamp-posts and lanterns thereto, for the aforementioned period of one year, the sum of.................. dollars ($......).

For Single Incandescent Mantle Lamps (Gas).

Twenty-eight and 75/100 dollars ($28.75) per lamp per year for less than 10,000 lamps.

Twenty-seven and 75/100 dollars ($27.75) per lamp per year for over 10,000 lamps and less than 15,000 lamps.

Twenty-six and 75/100 dollars ($26.75) per lamp per year for over 15,000 and less than 20,000 lamps.

Twenty-five and 75/100 dollars ($25.75) per lamp per year for over 20,000 and less than 25,000 lamps.

Twenty-four and 75/100 dollars ($24.75) per lamp per year for 25,000 or more lamps.

Twenty-four and 75/100 dollars ($24.75) per lamp per year for single order now for 22,500 lamps.

For Double Incandescent Mantle Lamps.

Forty-six and 50/100 dollars ($46.50) per lamp per year.

VI. For furnishing, maintaining and putting in place all the above-mentioned items, excepting the cost of illuminating material, for a period of one year, the sum of .... dollars ($....).

VII. For repair of lamp-posts and erection of new lamp-posts:

7926 (*a.*) For each lamp-post straightened, the sum of One and 50/100 ($1.50).

(*b.*) For each column re-leaded, the sum of Two and 50/100 dollars ($2.50).

(*c.*) For each column recalked, the sum of One dollar ($1.00).

(*d.*) For each column refitted, the sum of Three and 50/100 dollars ($3.50).

(*e.*) For each service-pipe refitted, the sum of Five and 50/100 dollars ($5.50).

(*f.*) For each stand-pipe refitted, the sum of Two and 50/100 dollars ($2.50).

(*g.*) For each lamp-post removed, the sum of Three and 50/100 dollars ($3.50).

(*h.*) For each lamp-post re-set, the sum of Eight dollars ($8.00).

(*i.*) For each new lamp-post used for gas lamps fitted up complete and erected with service and stand-pipe and lantern, the sum of....

Fitting up new lamps, Eight dollars..................	($8.00)
Boulevard lantern additional, Six dollars...............	($6.00)
Fourteen dollars	($14.00)

VIII. For furnishing illuminating gas for lighting of not less than 20 candle power, including the service-pipes from the gas-mains to the building, and a proper meter for registering the gas, for the term of one year, for all or any of the public buildings and offices in the Borough of Manhattaan, the lighting of which is now, or hereafter may be, under the jurisdiction and control of the Department of Water Supply, Gas and Electricity, per 1,000 cubic
7927 feet, at a pressure of not less than 1½ inches, in the sum of Ninety cents ($0.90).

IX. For furnishing and maintaining a pressure regulator, at the option of the Commissioner, controlling supply of gas from each meter which registers the total consumption of gas in any building under the jurisdiction and control of the Department. This gas pressure regulator shall maintain an even pressure of 1½ inches throughout the building as closely as can be obtained. The Contractor shall inspect and regulate same at least once a month, and shall perform all necessary acts in order to maintain same in such a condition that it shall efficiently regulate the supply of gas in the building. The regulator shall be inspected and tested when required by the Commissioner, by the Engineer, and if found defective, shall be replaced, without further expense to the City, whenever such replacement is ordered by the Engineer.

Estimates may be given separately on the price for use of regulator for one year and on the maintenance, as specified.

For furnishing .... regulators of an average capacity of about one and one-quarter inches for the period of one year, in the Borough of.......................the sum of .... Dollars ($..........).

For maintaining the above regulators for the period of one year, in the Borough of .... as specified, the sum of .... Dollars ($..........).

(*O.*) No payment will be made or allowed on account of supply of illuminating materials, repairs and supplies to any lamp, except for the time during which all the requirements herein men-
7928 tioned shall have been fully performed in accordance with the specifications.
